OTHER MATTERS

CLOSED SESSION

Any Closed Session Items not completed prior to 6:30 p.m. will be considered at this time.

ADJOURNMENT - to the meeting of October 19, 2021

In compliance with the Americans with Disabilities Act and the California Ralph M. Brown Act, if you need special assistance to participate in this meeting, or to be able to access this agenda and documents in the agenda packet, please contact the Office of City Clerk at (559) 782-7464. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting and/or provision of an appropriate alternative format of the agenda and documents in the agenda packet.

Materials related to an item on this Agenda submitted to the City Council after distribution of the Agenda packet are available for public inspection during normal business hours at the Office of City Clerk, 291 North Main Street, Porterville, CA 93257, and on the City's website at www.ci.porterville.ca.us.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Fall Community Clean-Up Event - October 16, 2021

SOURCE: Public Works

COMMENT: To encourage local property maintenance and beautification, the City sponsors two clean-up events every year; an event in the Spring and an event in the Fall. These events offer City residential refuse customers free disposal of general trash, bulky items, woodwaste, yard clippings, and e-waste at the City's Corporation Yard. City residents are required to bring a current City of Porterville refuse bill as proof of residency. Business or commercial waste is not allowed. Trailers will be limited to no longer than ten (10) feet and participants will be required to unload their own vehicle. Items not accepted will include: tires, refrigerators, and oversized auto parts.

The next clean-up event is scheduled for October 16, 2021, as approved by the City Council at its meeting on March 2, 2021. This event will occur from 8:00 a.m. until 2:00 p.m. As in the past, the events are open to all residents receiving City residential refuse service. Cost for this event is funded through the Solid Waste Operating Budget.

RECOMMENDATION: Information Only

CITY COUNCIL AGENDA – MARCH 2, 2021

SUBJECT: Community Clean Up Events

SOURCE: Public Works

COMMENT: To encourage local property maintenance and beautification, the City sponsors two community clean up events each year; one in the Spring and one in the Fall. These events offer City residential customers free disposal of general trash, bulky items, wood waste, yard clippings, and e-waste at the City's Corporation Yard. Last year's Fall event was the largest event to date with 903 vehicles participating, while the Spring event was cancelled due to the COVID-19 pandemic.

Based on the success of prior events, staff recommends the City again host both Community Clean Up Events in 2021. The proposed event dates are Saturday, April 17th and Saturday, October 16th, and given the ongoing COVID-19 pandemic, both events would be planned with appropriate and necessary health and safety precautions for staff and participants. Staff is unaware of any community event conflicts with these dates. As is the past, the events are open to all residents receiving City residential refuse service. Staff estimates costs for both events to be approximately $11,000 funded through the Solid Waste Operating Budget.

RECOMMENDATION: That City Council:
1. Declare April 17, 2021, "Spring Clean-Up Day" and October 16, 2021, "Fall Clean-Up Day";
2. Encourage all residents to clean up their properties and take advantage of these special opportunities offered by the City;
3. Authorize the City to accept trash, litter, and yard clippings delivered by City residents receiving City residential refuse service to the Spring and Fall Clean Up Events for free disposal; and
4. Authorize the cost of both events to be funded from the Solid Waste Operating Budget.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Authorization to Advertise for Bids - Animal Shelter

SOURCE: Engineering and Project Management

COMMENT: City staff through its consultant has completed the preparation of construction plans and specifications (i.e. Project Manual) for the remodel of an existing building for the Animal Shelter project located at 185 N. D Street.

The proposed project includes the remodel of an existing building to create an Animal Shelter at 185 N. D Street. Besides the base bid, there are four alternate components to the project along with frontage improvements on D Street, with the work areas shown and described in the attachments. The proposed trail section adjacent to the Animal Shelter property will be designed and constructed separately as part of the Butterfield Stage Corridor ATP grant project. This project location required hazardous materials remediation, which was previously approved and accepted by City Council.

The consultant's estimate of probable cost for the total project plus alternates is $7,086,791.62. An additional $708,679.16 is necessary for construction contingencies (10%). It is anticipated that an additional $494,701.81 is required for construction management, quality control, and inspection services for a total estimated project cost of $8,290,172.59. The total estimate of probable cost for the individual areas of the project are as follows:

Bid Part:	Estimate:	Contingency:	Management:	Total:
Base Bid	$ 4,393,142.30	$ 439,314.23	$ 439,314.23	$ 5,271,770.76
Alternate #1	$ 342,587.48	$ 34,258.75	incl. in base	$ 376,846.23
Alternate #2	$ 246,434.26	$ 24,643.43	incl. in base	$ 271,077.69
Alternate #3	$ 1,381,383.50	$ 138,138.35	incl. in base	$ 1,519,521.85
Alternate #4	$ 353,993.52	$ 35,399.35	incl. in base	$ 389,392.87
D Street Frontage	$ 369,250.56	$ 36,925.05	$ 55,387.58	$ 461,563.19
Totals	$ 7,086,791.62	$ 708,679.16	$ 494,701.81	$ 8,290,172.59

Funding for the project was designated in the FY 2021/2022 budget as unfunded, except for the D Street Frontage portion, which is funded by Local Transportation Funds in the amount of $400,000. It is proposed to use $7,890,172.59 of General Fund / Measure I Fund Reserves to fully fund the project.

RECOMMENDATION: That City Council:

1. Approve staff's recommended Plans and Project Manual;
2. Authorize staff to advertise for bids on the project; and
3. Consider authorizing the Finance Director to appropriate

$7,890,172.59 from General Fund Reserves to fully fund this project, including all alternates.

SECTION 01 23 00
ALTERNATES

PART 1 GENERAL

1.01 SECTION INCLUDES

A. Description of Alternates.

B. Procedures for pricing Alternates.

1.02 RELATED REQUIREMENTS

A. Instructions to Bidders prepared by the City of Porterville.

B. Bid Form prepared by the City of Porterville.

C. Construction Contract Agreement prepared by the City of Porterville.

D. Division 01 Sections prepared by the City of Porterville.

1.03 ACCEPTANCE OF ALTERNATES

A. Alternates quoted on Bid Forms will be reviewed and accepted or rejected at Owner's option. Accepted Alternates will be identified in the Owner-Contractor Agreement.

B. Coordinate related work and modify surrounding work to integrate the Work of each Alternate.

C. For alternates accepted at the times of bid award, detailed base bid work shall be considered as future work.

1.04 SCHEDULE OF ALTERNATES

A. Alternate No. 1 - Rooms 131, 132, 133, & 134:
   1. Base Bid: Full build-out of area as indicated on Drawings.
   2. Deductive alternate:
      a. Maintain existing room 134 as is.
      b. Build out corridor wall (Room 118) with gypsum wall board facing on hall side to close off space for rooms 131, 132, & 133.
      c. Rooms 131, 132, & 133: Stub-out plumbing for hose reel and complete installation of floor drains. Do not install dividing walls between rooms or room finishes, including ceilings.

B. Alternate No. 2 - Rooms 141 and 142:
   1. Base Bid: Full build-out of area as indicated on Drawings.
   2. Deductive alternate:
      a. Build hallway wall (Room 119).
      b. Rooms 141 & 142: Stub-out plumbing for hose reel and complete installation of floor drains. Do not install dividing walls between rooms or room finishes, including ceilings.

C. Alternate No. 3 - Rooms 151, 152, 153, 154, 155, 156,157, and 158:
   1. Base Bid: Full build-out of area as indicated on Drawings.
   2. Deductive alternate:
      a. Complete wall for Room 119 hallway, including parts along rooms 157, 151 & 152.
      b. Room 157: Stub-out plumbing for water supply & complete floor drains.
      c. Provide paint for reception counter and new paint on lobby walls.
      d. Rooms 151, 152, & 153: Do not install dividing walls between rooms or room finishes, including ceilings.
      e. Do not install walls for 154 & 155.
      f. Do not install Crate Storage fence using fence type MTL-3 on exterior near through drive through aisle.

D. Alternate No. 4 - Exterior dog park and parking areas:
   1. Base Bid: Full build-out as indicated on drawings, including addition of ADA parking stall and associated accessories.

2. Deductive alternate: Maintain existing parking lot with striping, but add fence type MTL-2 extending from face of building to existing fence at west property edge, adjacent to line ‘D’.

PART 2 PRODUCTS - NOT USED

PART 3 EXECUTION - NOT USED

END OF SECTION

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Purchase of Personal Protective Equipment for Structural Firefighting

SOURCE: Fire

COMMENT: The Fire Department consistently reviews the condition of its Personal Protective Equipment (PPE), and in a recent review of the PPE used for structural firefighting (commonly known as "turnout gear"), staff found a need to replace eight sets of turnout gear. These eight sets will replace sets currently in use that are near the end of its useful life. This type of gear expires after ten (10) years, and this is the oldest gear in use at the Department.

The Fire Department's uniform standard is Globe G-Xtreme. In this area, L.N. Curtis & Sons is the only retailer licensed to sell Globe turnouts, which makes this a sole source purchase. Documentation of sole source and quote that lists eight full sets of turnout gear for a total price of $19,988.38 is attached. Funding for this purchase is available in the Fire Department's Equipment Replacement Fund.

RECOMMENDATION: That the City Council authorize the purchase of eight sets of personal protective equipment for structural firefighting from L.N. Curtis & Sons in the amount of $19,988.38.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Authorization to Purchase Specialized Laboratory Equipment - Glassware Washer

SOURCE: Public Works

COMMENT: The City's Laboratory is requesting authorization to purchase a new steam scrubber glassware washer to replace the current unit that has failed after twenty-seven (27) years of service.

Laboratory staff received three quotes for a new glassware washer. The quotes are as follows:

Vendor	Total
Fisher Scientific	$6,772.98
USA Bluebook	$9,420.00
VWR	$9,608.30

Fisher Scientific has been identified as presenting the lowest quote, therefore securing the award for the purchase of the glassware washer. The expenditure for the equipment will be funded from the Fiscal Year 2021-2022 Laboratory Operating Budget, in the amount not to exceed $8,640 inclusive of freight, taxes, and a ten percent (10%) contingency.

RECOMMENDATION: That City Council:
1. Award the purchase of specialized equipment to Fisher Scientific for an amount not to exceed $8,640 inclusive of freight, taxes, and a ten percent contingency;
2. Direct the Finance Director to initiate a Purchase Order to Fisher Scientific for an amount not to exceed $8,640 inclusive of freight, taxes, and a ten percent (10%) contingency; and
3. Direct the Finance Director to make payment to Fisher Scientific upon receipt of invoice approved by the Public Works Director.

Description

Labconco SteamScrubber™ Glassware Washers are designed for efficient and consistent washing of general purpose labware such as wide-mouth beakers. The CleanWorks OS software is accessible through a full-color touch screen interface and provides intuitive and clear monitoring of wash loads – ensuring repeatable, effective and traceable cleaning.

SteamScrubber models reach a maximum of 93° C wash temperature and quickly dry glassware with standard forced air chamber drying with SpeedVent heat-management technology. SteamScrubber models include lower and upper standard racks to accommodate a wide variety of racks and inserts making these washers extremely versatile for all washing needs.

- Touch screen display with intuitive CleanWorks OS software
- Flexible design allows for use of standard and injector spindle racks
- Max wash temperature 93° C removes tough contaminants
- Advanced wash pump maximizes water circulation up to 112 gal/min (424 liters/min)
- Standard forced air chamber drying with SpeedVent technology
- Durable Type 304 stainless steel chamber and racks
- Upper and lower Standard Racks included

- Features forced air drying system—no need for a separate dryer

Price:

$9,420.00 USD/Each

Need Help? Call 800-548-1234

Clean labware is essential to accurate test results. Labconco washers remove tough residues from all shapes and sizes of plastic and glass labware. They feature a full color 5" touchscreen display with CleanWorks OS for intuitive control. Save up to 200 user-defined programs, and select unique calibration set points for temperature, fill volume and detergent dispensing.

Choose your level of required cleanliness to ensure accurate test results, and adjust settings based on your load. Delay start (up to 12 hours) operates washers off peak hours. Alarm displays and self diagnostics alert for abnormalities and maintenance. Export user-defined programs, wash data and diagnostics data via USB.

A powerful built-in steam generator produces hot vapor to penetrate dried contaminants. Wash arms rotate 360° to distribute hot water and detergent. A pure water pump draws pure water from a non-pressurized water source for rinsing, while another drains water to minimize cross contamination. Forced-air drying means labware is ready for use upon cycle completion.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Authorization to Change Vendors for the Purchase of Police Department Administrative Vehicles

SOURCE: Police

COMMENT: At its meeting on September 7, 2021, the City Council approved the purchase of twelve (12) police vehicles, to include two Chevrolet Tahoe's from National Auto Fleet Group. It has since been determined due to the nationwide vehicle computer chip shortage and the high demand of the Police Chevrolet Tahoe, all General Motors Fleet orders were cut off and no new orders are being accepted. In speaking with the vendor, it was undetermined when, or if, the order for the Chevrolet Tahoe's would be fulfilled.

Police Department staff began a search for any additional approved vendors who may be able to fulfill the order with their existing inventory. Merle Stone Chevrolet Fleet was contacted and were non-responsive. Staff contacted Three-Way Chevrolet, a City-approved vendor, and they advised they had two Chevrolet Tahoe's in transit to the their dealership. Three-Way Chevrolet has agreed to retain these two vehicles for the Porterville Police Department upon arrival.

Total costs for these vehicles are as follows:

(2) 2021 Chevrolet Tahoe's – Administration - $119,550.01, which is a cost increase of $327.51 in comparison to National Auto Fleet Group pricing.

Funding for this purchase will remain the same as previously approved by the Council on September 7, 2021 (M.O. 03-090721), through the Equipment Replacement Fund, which is funded by the General Fund and Measure I in addition to being incorporated in the Fiscal Year 2021-2022 Police Department budget.

RECOMMENDATION: That the City Council:
1. Authorize Police Department staff to negotiate the purchase of two Administrative Police Vehicles from Three-Way Chevrolet; and
2. Authorize payment to Three-Way Chevrolet upon receipt of listed vehicles.

CITY COUNCIL AGENDA – SEPTEMBER 7, 2021

SUBJECT: Authorization for Purchase of Police Department Vehicles and Equipment

SOURCE: Police

COMMENT: On an annual basis, the Police Department finds it necessary to purchase vehicles to replace aging vehicles in its fleet. As always, a careful evaluation is made of each particular vehicle to determine actual need for replacement. In light of the City's commitment to strong budget control and fiscal management, this component of the Police Department's vehicle replacement process is even more critical to ensure that a vehicle is not replaced only because it is scheduled to be replaced.

Many factors are considered in this process, such as the age of the vehicle, mileage, maintenance costs, etc. A primary consideration is given to the safety of each vehicle, due to the high-risk driving required at times of these vehicles. In addition, the evaluation includes examining the assignment of vehicles to determine if reassignment of vehicles can reduce fleet numbers.

The Department has recently completed this evaluation and determined that twelve (12) vehicles are in need of replacement. Through strategic contributions to the Department's vehicle depreciation plan, the monies for the replacement vehicles have already been accumulated in the Equipment Replacement Fund and this expenditure was approved in the 2021-2022 fiscal year budget.

Nine of these vehicles will be for sworn patrol personnel positions. Of these nine vehicles, four are planned to be Ford Explorers, which are intended to be assigned to the UAV (drone) operators. In addition, a portion of the fleet already includes Ford Explorers and will maintain uniformity. Staff research conducted revealed that the Ford Explorer is better suited to accommodate the UAV specific equipment to include charging stations and other specialized necessities as part of this assignment. The remaining five patrol vehicles will be Dodge Chargers to maintain uniformity of the remaining patrol fleet. One of these vehicles is specifically funded by Measure H.

One of the twelve (12) vehicles purchased will be a Chevrolet Silverado to be assigned to a task force Detective who is participating in a Department of Justice Firearms enforcement unit.

In an effort to continue with uniformity in the administrative command staff vehicles, one of the current Dodge chargers currently in service will require

minimal up fitting to be utilized by the Patrol Division. Once the up fit is completed, this vehicle will be reassigned to the Patrol Division. With that reassignment, the Department will purchase one Chevrolet Tahoe for the vacated vehicle assignment. In addition, the Department is increasing its fleet by one vehicle due to a Command Staff member no longer participating in a vehicle allowance stipend, which will also be a Chevrolet Tahoe.

The Department is requesting authorization to purchase these vehicles per Resolution 35-93, which authorizes no-bid purchases through a cooperative purchase program. The Department has identified National Auto Fleet Group as a provider of such a program for the desired vehicles, available under the Sourcewell Master Vehicle Contract #120716-NAF. While National Auto Fleet Group is contracting with Cook's Communications for vehicle up fitting, and has up fitted the Department's past vehicles, it should be noted that Cook's Communications also holds negotiated contracts with both Tulare County (#PA7232) and Fresno County (#A-16-426) and Cook's Communication's is providing the up fit under these contracts. Included within and attached to the National Auto Fleet Group quote is the Cook's Communication quote to up fit each vehicle with the necessary emergency equipment.

Total costs for these vehicles are:

Four (4) Marked Police Vehicles - 2022 Ford Explorer – Patrol - $233,533.12

Five (5) Marked Police Vehicles - 2022 Dodge Charger – Patrol - $237,548.14

One (1) Unmarked Police Vehicle – 2022 Chevrolet Silverado - Detective - $35,507.42

One (1) Conversion of an unmarked administrative police vehicle – 2019 Dodge Charger – Patrol - $5,593.36

Two (2) Unmarked Administration Vehicles – 2022 Chevrolet Tahoe – Administration - $119,222.50

The Department is also requesting to purchase twelve (12) police vehicle radios for each of these new vehicles. The vehicle radios are to be purchased through its sole provider, J's Communications. The Department radios are all Motorola, and Motorola Solutions requires agencies to go through the area provider for purchase. J's Communications is the area provider and provides all of the Department's vehicle and handheld radios, and additionally has a current County of Los Angeles contract. Quotes for each vehicle and for twelve (12) police vehicle radios are attached. Total costs for these police vehicle radios are:

Twelve (12) Police Vehicle Radios - $51,176.23.

With these vehicle purchases, a total of ten (10) Dell laptops equipped with Microsoft Deployment Toolkit's (MDT's) and associated equipment and software will need to be purchased. The MDT's allow personnel to conduct

necessary inquiries in the field, as well as keep themselves and others updated on current incidents in progress and allow the transmission of required information between field units and the Communications Center. These MDT's are to be purchased from the City vendor for Dell computers. Total costs for these computers is as follows:

Ten (10) Dell Latitude 7220 Rugged and related hardware/software $30,029.80.

Total cost for purchase of twelve (12) Police vehicles and outfitting of thirteen (13) Police Vehicles (which includes the up fit of one administrative vehicle already in use by the department to a patrol vehicle) is $712,610.57. The replacement vehicles and related equipment will be funded through the Equipment Replacement Fund, which is funded by General Fund and Measure I, with one marked police patrol vehicle being funded by Measure H.

RECOMMENDATION: That the City Council;

1. Authorize staff to negotiate the purchase of twelve (12) Police Vehicles from National Auto Fleet; and

2. Authorize staff to negotiate the retro up fit of an Administration Dodge Charger to a Patrol suited vehicle; and

2. Authorize staff to negotiate the purchase of twelve (12) APX 6500 unit radios from J's Communications; and

3. Authorize staff to negotiate the purchase of ten (10) Dell Latitude 7220 laptop MDT's from Dell; and

4. Authorize payment to respective vendors upon receipt of listed equipment.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Authorization to Purchase Battery-Electric Shuttle Vans for State of Good Repair Project

SOURCE: Public Works

COMMENT: The Tulare County Regional Transit Agency (TCRTA) has received approximately $291,027 in Fiscal Year 2021-2022 State of Good Repair (SGR) funding for an eligible capital project. At this time, the TCRTA is not eligible to perform the project until the Agency completes its annual Transportation Development Act (TDA) audit at the end of the fiscal year.

At its meeting on August 16, 2021, the TCRTA Board of Directors approved the Fiscal Year 2021-2022 State of Good Repair Project to purchase battery-electric vans to operate a regional on-demand service, similar to the City's transPORT service powered by the Uber software. The TCRTA Board also authorized the City of Porterville to perform the project on behalf of the TCRTA; based on its history of deploying zero-emission vehicles.

To assist the City in the procurement, TCRTA staff requested quotes from available vendors that manufacture a battery-electric "sprinter style" van. Sprinter style vans are a medium-duty vehicle that is preferred for operating on-demand service because of its smaller size. The City currently operates twelve (12) battery-electric shuttle vans for its on-demand service and have proved to be very effective and cost efficient.

Additionally, the California Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP), part of California's Climate Investments, provides vouchers to help lower the cost of zero-emission vehicles and accelerate commercialization. In order to take advantage of the voucher and lower the cost of the vehicles, only HVIP approved vehicles and vendors were asked to submit quotes. Based on the estimated funding and HVIP voucher, staff requested a quote for the purchase of three vehicles.

Staff received the following HVIP qualified vendor and vehicle quotes:

GreenPower Motor Company	$298,236
Lightning eMotors and NorCal Vans	$335,372

The Lightning eMotors and NorCal Vans attached quotes do not accurately

reflect a quantity of three vehicles. The Lightning eMotors quote accurately reflects the purchase of three electric powertrains, however, the NorCal Van quote only reflects the purchase of two Ford Transit chassis. Staff calculated the price for each component to reflect the complete estimated cost of the project.

At the TCRTA Board meeting on September 27, 2021, the Board recommended that the City purchase three battery-electric shuttle vans from GreenPower Motor Company at a cost of $298,236.

If approved, the estimated delivery date of the vehicles will be in March 2022. Funding for this project will be from Fiscal Year 2021-2022 State of Good Repair and local transportation funding. Although not required, additional funding from the San Joaquin Valley Air Pollution Control District may be available to help offset the cost of the purchase or extended warranties. TCRTA staff will be contacting the Air District to seek available match funding, which if available, will be presented to the City Council for further information.

RECOMMENDATION: That the City Council authorize the purchase of three battery-electric shuttle vans from GreenPower Motor Company at a cost of $298,236.

AGENDA ITEM VI C

September 27, 2021

Prepared by Richard Tree, TCRTA Staff

SUBJECT:

Action: Recommend the Purchase of Electric Shuttle Vans for State of Good Repair Project

DISCUSSION:

The Tulare County Regional Transit Agency has received approximately $291,027 in FY 2021-2022 State of Good Repair (SGR) funding for an eligible capital project. At this time, TCRTA is not eligible to perform the project until the Agency completes its annual Transportation Development Act (TDA) audit at the end of the fiscal year.

On August 16, 2021, the Board approved the FY 2021-2022 State of Good Repair project to purchase battery-electric vans to operate the regional On-Demand service. The Board also authorized the City of Porterville to perform the project on behalf of the TCRTA.

To assist Porterville in the procurement, staff requested quotes available vendors that produce a battery-electric "sprinter style" van. Sprinter style vans are a medium-duty vehicle that is preferred for operating on-demand services because of their smaller size.

The California Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP), part of California Climate Investments, provides vouchers to help lower the cost of zero-emission vehicles and accelerate commercialization.

Staff received the following quotes for battery-electric shuttle vans:

Vendor	Base Price per Vehicle	Estimated HVIP Voucher	Net Price per Vehicle
Lightning eMotors	$152,764	($50,000)	$102,764
GreenPower Motor Company	$163,150	($69,000)	$94,150

It is recommended that the Board:

1. Recommend the purchase of three GreenPower Motor Company battery-electric shuttle vans at a total cost of $298,235.72; and
2. Authorize staff to provide assistance to the City of Porterville in the procurement of the vehicles and the management of the project.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Authorization to Renew Cradlepoint Licenses for Transit In-Vehicle Technologies.

SOURCE: Public Works

COMMENT: Since 2015, the City's Transit fleet has been utilizing Cradlepoint routers to power its suite of in-bus technologies. Cradlepoint routers provide an all-in-one wireless connectivity for complementary passenger Wi-Fi, real-time traveler information, battery-electric telematics, and digital manifests for vehicle operators.

In order to effectively and efficiently manage the Cradlepoint routers, a subscription-based license, Cradlepoint NetCloud, is required for each device. The Cradlepoint NetCloud service delivers cloud-based management and control, enterprise-class routing and security, and zero-touch deployment and software upgrades.

Currently, the City's Transit fleet has forty-four (44) Cradlepoint devices that have expiring NetCloud licensing. Staff recommends renewing the NetCloud licensing for three-years to take advantage of a multi-year discount. Staff received the following vendor quotes for forty-four (44) Cradlepoint NetCloud three-year licenses:

AT&T - $19,141.06
SHI - $20,233.69
Always Connect Solutions - $21,533.69

Funding for the CradlePoint NetCloud licenses have been budgeted in the Fiscal Year 2021-2022 Transit operating budget, of which, fifty percent (50%) is reimbursable from Federal Transit Administration operating assistance.

RECOMMENDATION: That the City Council authorize the purchase of forty-four (44) Cradlepoint NetCloud three-year licenses from AT&T in the amount of $19,141.06.

Terms & Conditions

All invoices are required to be paid in full before shipping unless other agreements have been made. All hardware sales and services are final and not returnable or refundable.

For Recurring Data Service:
Billing period is between the 14th of the current month to the 13th of the following month for all recurring Data solutions. All Data overage in GB will be billed at $15 per GB unless otherwise discussed. All overages will be paid on following invoice or Data service will be suspended until payment is received. Please reply with any questions regarding overages. We will work within reason to bill you for the

plan you should have been on.

Accounts over 60 days past due will be suspended and charged a late fee of $25 or 1.5% of the balance each 30 days overdue and a separate invoice will be sent for the late fee.

Data service cancellation must be requested 3 business days(Monday-Friday) before the end of month or you will be responsible for paying the next month service as well. If you do want to cancel service, please let us know if there is anything that we can do, or change to make working with us a better experience. We are very open to suggestions. Our customers come first and we will do whatever we can to keep our relationship continuing.

All credit cards on file may be used for invoices in arrears over 30 days, data overages, or other charges clearly marked on a transaction, if we do not have feedback from you from email reminders.

By completing this purchase you are agreeing to these terms and conditions and they are non negotiable and you agree to not dispute any charges for overages or late fees on all services provided.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Acceptance of Project - Asbestos and Other Hazardous Materials Abatement and Demolition Project and Related Specialty Work

SOURCE: Engineering and Project Management

COMMENT: Central Valley Environments has completed the Asbestos and Hazardous Material Abatement and Demolition Project per plans and specifications. The project consisted of the required abatement of existing asbestos materials, mercury lighting, and other components requiring specific abatement protocol mandated by State regulations. The project was the first step in the remodeling of the Stout building, and also included the full demolition of the Spencer House and Waste Water Treatment Facility (WWTF) Office, while protecting the WWTF's critical supervisory control and data acquisition (SCADA) equipment.

Additionally, at its meeting on February 2, 2021, the City Council authorized additional specialty work that was to be completed at the WWTF Office by separate contractors. OACYS Technology was contracted to relocate the radio/communication system and Blair Electric was contracted to relocate the power source for the SCADA equipment. All specialty work has been completed as well.

Staff tracks construction costs of all capital improvement projects and reports project construction expenditures when the project is accepted by the Council. At it's meeting on January 19, 2021, the Council authorized a total expenditure not to exceed $121,738 for construction, construction management, quality control and inspection services for this project. Council approved an additional $18,919 for the required specialty work at its meeting on February 2, 2021, for a project total of $140,657; $38,200 for the Spencer House remediation and demolition, $23,235 for the Stout Building remediation, and $79,222 for the demolition of the WWTF Office (while protecting the SCADA equipment) and all related specialty work. The following itemizes the construction related costs in two categories: 1) the construction contract(s), and 2) a combination of construction management and quality control.

<u>Spencer House</u>
1) Final construction cost $30,977
2) Construction management and quality control costs are $4,045.64

<u>Stout Building</u>
1) Final construction cost $12,019
2) Construction management and quality control costs are $9,205.42

WWTF Office
1) Final construction cost (including specialty work) $62,828.19
2) Construction management and quality control costs are $12,680.34

The total construction cost for the Spencer House is $35,022.64, which is less than the $38,200 overall budget approved by Council at the time of award for this portion of the project. Funding for this portion of the project includes Local Transportation Funding (LTF).

The total construction cost for the Stout Building is $21,224.42, which is less than the $23,235 overall budget approved by Council at the time of award for this portion of the project. Funding for this portion of the project includes LTF.

The total construction cost for the WWTF Office (including specialty work) is $75,508.53, which is less than the $79,222 overall budget approved by Council at the time of award for this portion of the project. Funding for this portion of the project includes Waste Water Treatment Facility Reserve Funds (WWTFR).

Staff has reviewed all work and has found it acceptable.

RECOMMENDATION: That City Council:
1. Accept the project and related specialty work as complete;
2. Authorize the filing of the Notices of Completion; and
3. Authorize the immediate release of final payment, provided no stop notices have been filed.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Agreement Between City of Porterville and Porterville Angels Baseball Club for Use of Zalud Park South Baseball Diamond

SOURCE: Parks and Leisure Services

COMMENT: Within the City's Zalud Park are two baseball fields that at one time were used by Porterville Little League (PLL) to host games. In 1995, PLL transitioned its games to the Burton Ballfields. In 2015, Porterville Little League was given authorization by City Council to enter into an agreement with the City to fund and transform the south field at Zalud Park into a 50/70 baseball field in exchange for exclusive use of the designated area from February to July. The agreement included PLL pay for its field usage. This was the first year PLL was adding a 50/70 option for age appropriate players. A 50/70 field is designed for 12-14 year-olds to ease the transition between elementary age (60' bases and 46' pitching mounds) to high school age (90' bases and 60' pitching mounds) field dimensions.

Once the agreement expired, the PLL chose not to request an agreement extension and moved all games back to the Burton ballfields. The recently formed Porterville Angels Baseball Club (PABC) submitted a proposal to City staff to be granted exclusive use of the south field at Zalud Park similar to the previous agreement with PLL. PABC would pay for all field renovations and $800 per year for exclusive use of the south field. PABC's initial field improvements would include adding an outfield fence, pitcher's mound, leveling the infield, irrigation adjustments and bases. During the term of the agreement, PABC would be responsible for all maintenance of the field, as well as maintaining the cleanliness of the area. The proposed length of the agreement is a three year term with the option to extend it an additional three years upon completion of the first term. On September 2, 2021, the Parks and Leisure Services Commission voted unanimously to recommend the three year exclusive use agreement between the City of Porterville and PABC.

RECOMMENDATION: That the City Council approve the Agreement between the City of Porterville and the Porterville Angels Baseball Club and authorize and direct the Mayor to execute the same.

Final Approver: John Lollis, City Manager

Porterville Angels Baseball Club

TIN: 87-1016711
311 N 2nd St, Ste. B5, Porterville CA 93257

We are a developmental youth baseball program initially consisting of a 12U team and an 11U team. We will be participating in 50/70 baseball, a transitional field size between Little League and regulation baseball fields. We'd like to lease the south ballfield at Zalud Park for the remainder of 2021 through the end of 2025, with extension possible. We would like to have exclusive rights to the field year round, our plan being to play year round. The primary goal of the club is player development. We would like to install fencing and locking gates to the perimeter of the field, to protect improvements and ongoing maintenance at the field. Field will be maintained through parent volunteers and by the youth athletes. Part of the program is teaching the kids how to care for and maintain a baseball field. Future plans are to expand the program to younger athletes as well as additional 12U-14U teams. Program is open to age eligible athletes who abide by the conduct code outlined in club bylaws. No league games will be played at the facility, but scrimmages and "friendlies" are a possibility. No ticket sales.

Proposed Facility Improvements

1. Add fence at appropriate distances for 50/70 play - Price Pending
2. Irrigation system check, replacement - $200-600
3. Rototill infield, add topsoil, level infield - $500-800
4. Infield/foul territory sod installation (Celebration Bermuda via AG Sod Farm) - $3000-4,000
5. Rototill infield skin, add Turface or equivalent infield conditioner, level infield skin - $1,200-1,500
6. Rebuild pitcher's mound using mound specific clay; replace pitching rubber - $600-1,000
7. Rebuild home plate area, add batter's box fortification mats, replace plate - $500-1,000
8. Replace base anchors - $100-200
9. Overseed outfield - $200-300
10. Construct fenced bullpen beyond 3rd base dugout - Price Pending
11. Add covers and/or roof to dugouts - Price Pending
12. Add sea train storage unit for maintenance equipment and team supplies - Price Pending

We thank you for your consideration and support for the youth of Porterville.

Sincerely,

Porterville Angels Baseball Club Board of Directors

Patrick Nanamura: Director of Operations
Josh Guilliams: Director of Performance

CITY OF PORTERVILLE CALIFORNIA

ZALUD PARK SOUTH FIELD FACILITY USE AND MAINTENANCE AGREEMENT BETWEEN CITY OF PORTERVILLE AND PORTERVILLE ANGELS BASEBALL CLUB

Recognizing the value to the community of sharing facilities, the following Agreement has been adopted by the City of Porterville Parks and Leisure Services Department ("**CITY**") and Porterville Angels Baseball Club ("**PABC**"). The Agreement establishes policies regarding the use of the south ballfield at Zalud Park, 700 N. El Granito.

1. Term of this Agreement shall be for three years commencing October 1, 2021, and ending October 1, 2024. The Agreement may be extended for an additional three years upon the same terms and conditions, at the option of **PABC**, provided that **PABC** provides Notice of Intent to extend the Agreement at least thirty days prior to expiration of the initial period. Thereafter, the Agreement may be extended for an additional three-year period upon terms and conditions mutually agreeable to both parties.

2. **PABC** has the intent and commitment within the term of the agreement to continue making facility improvements to the south field at Zalud Park in exchange for exclusive use of the facility. PABC shall pay CITY an annual fee of $800 for exclusive use of the south Zalud Park field for each twelve-month duration.

3. **PABC** Board personnel shall attend a pre-season organizational meeting with **CITY** staff to discuss specific operational duties and responsibilities.

4. **PABC** agrees that the **CITY** shall be scheduling agent for the field and that **CITY** shall schedule the dates and times of use, except for use by **PABC**.

5. **CITY** agrees to continue its routine maintenance of the rest of Zalud Park at its current schedule.

6. **PABC** shall be responsible for maintaining the facilities in good playing condition. Maintenance and responsibilities shall include:

    a. Mowing and irrigating the infield and outfield turf areas as needed.
    b. Maintaining bleacher area in good order and free of litter. Cleaning the bleacher area after each use.
    c. Repairing damage to designated area.
    d. Providing the necessary maintenance equipment and supplies to accomplish all the above tasks.
    e. At no time shall vehicles including, but not limited to, maintenance vehicles, be permitted on turf areas without permission of the **CITY**, except in the performance of necessary maintenance duties.

7. **PABC** staff shall be responsible for providing all related supplies and equipment such as additional bleachers, scoreboards, PA system, and other miscellaneous items that may be required.

8. After the completion of each use, **PABC** staff shall be responsible for clean-up of all debris in a timely manner.

9. **PABC** shall contact **CITY** before installing improvements relative to the program such as signs, field improvements, electrical improvements, etc.

10. All concerns or request for routine, additional or special maintenance needs are to be directed to the Parks Superintendent at 782-7515.

11. If **PABC** should make substantial improvements to the facility, upon termination of this Agreement, **CITY** shall determine disposition of these improvements. If **CITY** determines that some or all of the improvements are to be removed, **PABC** at its own expense shall remove them in a timely manner and return the facility to its original condition. Otherwise, all improvements shall remain **CITY** property.

12. **PABC** shall make repairs and corrections to miscellaneous items not in proper working condition. Field markings must be painted and not chemically sprayed.

13. All games and practices must be scheduled during normal park hours (7:00 AM to 10:00 PM)

14. **PABC** shall promptly and completely observe, comply with, and conform to all present and future applicable federal, state and local laws, requirements, and standards in the operation and use of the Agreement and the premises, and its programs on this premises. This includes, but is not limited to, State and Federal discrimination and disability laws and regulations. **PABC** shall, at its own cost and expense, make any and all improvements thereon or alteration thereto, structurally or otherwise, that may be required at any time hereafter by any such present or future law, rule, requirement, order, direction, ordinance or regulations. Failure to comply with this section is grounds for immediate termination of this Agreement by **CITY**, and any notice requirements required pursuant to this Agreement shall not apply.

15. **PABC** must procure and maintain insurance filed with **CITY** for the duration of the Agreement for which the south field at Zalud Park has been reserved against claims for injuries to persons or damages to property which may arise from or in connection with **PABC** operation and use of Zalud Park. The cost of such insurance shall be borne by **PABC**.

16. To the fullest extent permitted by law, the **PABC** shall and hereby does agree to hold harmless, save, defend and indemnify the **CITY**, and all of its officers, agents, employees and volunteers of and from all manner of claims, demands, losses, damages, actions or causes of actions of all persons arising from or in any way connected with the use, occupation or employment of said Agreement, or activities engaged in, or carried on, or conducted upon the premises by the **PABC**, together with costs and attorney's fees, except for losses due to the sole negligence or willful misconduct of the **CITY**.

17. **PABC** shall secure and maintain, at **PABC'S** expense, liability insurance including with a two million dollar ($2,000,000) combined single limit for property damage and injury, including death, to one or more persons, and deposit with the **CITY** an original certificate of said insurance, naming the **CITY**, its officers, agents and employees as an additional insured on **PABC'S** policy.

18. **PABC** shall maintain Workers' Compensation Insurance for all its employees and volunteers who are in any way connected with the performance of **PABC'S** activities to the extent required and as provided by law.

19. **PABC** shall maintain a City of Porterville Non-profit Business License during the term of this Agreement.

20. In the event the **PABC** shall fail, neglect or refuse to abide by and perform the terms, conditions, covenants, and agreements hereof, the **CITY** may, at its option, terminate and cancel this Agreement and in the event of a termination of this Agreement, the **PABC** shall surrender up and deliver to the **CITY** complete possession of the premises where said Agreement is being operated within 30 days after receiving notice to vacate. The **CITY** may also terminate the Agreement with written notice if **PABC** fails to use the facility as intended for a period of three consecutive months or more. The apparent commission of a crime by **PABC** or any of **PABC'S** employees, contractors, agents, or volunteers during the term of this Agreement is grounds for immediate termination of this Agreement by the **CITY**.

21. **PABC** shall not assign, transfer or convey this Agreement or any of the rights or benefits hereunder to any person, firm or corporation without first securing the written consent of the **CITY**, and said consent can be withheld for any reason.

22. The **CITY**, by its authorized agents and servants, reserves the right of entry upon the premises where said Agreement is being operated for purposes of inspection.

23. Nothing herein shall be construed as making the **CITY** and the **PABC** partners and/or the parties engaging in joint ventures.

24. **PABC** shall maintain compliance with all Federal, State and local laws, rules and regulations.

25. During the entire term of this Agreement, **PABC** shall not suffer, allow, or permit any income, profit, or emolument gross and net from any of its activities arising from, connected with, or in any manner associated with the use and employment by **PABC** of this Agreement to inure, to be paid to, or delivered to the benefit of any members, private shareholder, or individual; income, profit, gross and net, or other rights or benefits which shall arise from the use and employment of this Agreement shall be used solely, positively and exclusively to meet the necessary expenses or upkeep and operation of the activities of the **PABC** as such, and not any members, shareholders, or individual.

26. Attorney Fees. If any litigation is commenced between the parties to the Agreement concerning the Agreement or the rights and duties of either in relation to the Agreement, the party prevailing in that litigation shall be entitled, in addition to any other relief that may be granted in the litigation, to a reasonable sum as and for its attorneys fees in the litigation, which shall be determined by the court in that litigation or in a separate action brought for that purpose.

27. Each party has participated fully in the review and revision of this agreement. Any rules of construction to the effect that ambiguities are to be resolved against the drafting party shall not apply in interpreting this Agreement. The language in this Agreement shall be interpreted as to its fair meaning and not strictly for or against any party.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: One-Year Extension of On-Call Consulting Services Contract

SOURCE: Community Development

COMMENT: On August 7, 2018, the City Council awarded contracts to four environmental consulting firms, to provide on-call consulting services to the City of Porterville Community Development Department with Minute Order 07-080718. These firms, for the last three years, have provided services on private development projects where the developer pays the cost of certain studies. In addition, the firms have been used to prepare environmental studies or other specialized consulting services for City funded projects. The firms under contract with the City are: AES, LSA Associates, Provost & Pritchard Consulting, and Crawford & Bowen Planning.

The term of the initial contract was a three year term beginning October 15, 2018, with an option for an extension if mutually agreed upon by both parties. Staff contacted all four of the aforementioned firms currently under contract and they have all requested to extend the contract. Staff recommends extending the contract of all four firms for a period of one year.

RECOMMENDATION: That the City Council:

1. Approve extension of all four contracts for a period of one year;
2. Authorize the Mayor to sign contract documents;
3. Authorize the Community Development Director to sign task orders; and
4. Authorize staff to make payments up to 100% upon satisfactory completion of tasks.

Jason Ridenour, Community Development Director

Final Approver: Patrice Hildreth, Deputy City Manager

CITY COUNCIL AGENDA – AUGUST 7, 2018

SUBJECT: Selection of On-call Environmental Consultants

SOURCE: Community Development

COMMENT: On April 3, 2018, the City Council authorized staff to distribute a Request for Qualifications for On-Call Consulting Services. The Request for Qualifications (RFQ) was sent to thirty eight (38) firms with offices throughout the Central Valley and the Los Angeles area. The City received seven responses and offered interviews to all responsive firms. The six firms that accepted interviews were: AES, Crawford & Bowen, EMC Planning Group, LSA, Provost & Pritchard Consulting Group, and QK. All firms were found to meet the desired qualifications.

Since 2003, the City has maintained an on-call consulting services contract. Until 2012, the City contracted with only one consulting firm at any given time; in 2012, this contract was amended to include three firms, so that staff could solicit proposals from multiple firms, rank them appropriately, and execute task orders as needed. In keeping with that intent, staff has at this time selected the top four consulting firms, allowing even greater flexibility, expedited response time, and capacity for the City's consulting needs.The proposed contract has a term of three years, with two possible one year extensions.

Initial projects to be pursued under these contracts would include:

- City initiated projects identified in the 10-year Capital Improvement Program
- Developer initiated projects
- SGMA implementation efforts
- General Plan Element amendments

During the review of the Statements of Qualifications and the interview process, the top ranking firms were identified as AES, Crawford & Bowen, LSA, and Provost & Pritchard Consulting Group.

RECOMMENDATION: That the City Council:
1. Authorize staff to negotiate on-call contracts with AES, Crawford & Bowen, LSA, and Provost & Pritchard Consulting Group;
2. Authorize the Mayor to sign contract documents;
3. Authorize the Community Development Director to sign task orders; and
4. Authorize staff to make payments up to 100% upon satisfactory completion of tasks.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Status and Review of Local Emergency: Drought

SOURCE: City Manager's Office

COMMENT: At its meeting of May 5, 2015, the City Council took action to approve a Resolution Declaring a Drought Emergency in the City of Porterville. At its meeting of September 21, 2021, the Council reviewed the status of existence of local emergency, and acted to continue its Resolution of local emergency.

Governor Brown issued Executive Order B-29-15 on Wednesday, April 1, 2015, which established drought-related mandates and restrictions in addition to those already stipulated in previous Executive Orders B-26-14 and B-28-14. Of significance, the Governor directed the State Water Resources Control Board to impose restrictions to achieve a statewide 25% reduction in potable urban water usage through February 28, 2016, in comparison to the amount used in 2013, and with consideration given to per capita usage as a basis. The Governor further directed the Board to impose additional restrictions on commercial, industrial, and institutional properties with significant landscaping (cemeteries, golf courses, parks, schools, etc.), to also achieve a 25% reduction in potable water usage. Also of significance, the Board was directed to prohibit irrigation with potable water outside of newly constructed homes and buildings that is not delivered by drip or micro-spray systems.

On November 13, 2015, Governor Brown issued Executive Order B-36-15, which extends emergency conservation regulations through October 2016, if drought conditions persist through January 2016. On February 2, 2016, the State Water Resources Control Board adopted extended emergency water conservation regulations, to be in effect March 1 through October 31, 2016. The City of Porterville benefited somewhat from the extended regulations as the City's water conservation rate has been reduced from 32% to 26%, due to new water connections that have been made and population served (4%), as well as a new climate adjustment factor that was considered (2%).

On May 9, 2016, Governor Brown issued Executive Order B-37-16 ("Making Water Conservation a California Way of Life"), which directs the State Water Resources Control Board to establish new regulations making permanent the emergency conservation regulations. On May 18, 2016, the State Water Resources Control Board adopted a statewide water conservation approach that replaces the percentage reduction-based water conservation standard with a localized "stress test" approach that mandates urban water suppliers act immediately to ensure at least a three-year supply of water to their customers

under continued drought conditions.

On April 7, 2017, Governor Brown issued Executive Order B-40-17, which ended the drought state of emergency in most of California, with the exception of Fresno, Kings, Tulare and Tuolumne counties where emergency water supply and reliability projects are continuing toward addressing diminishing groundwater supplies. The Order maintains monthly reporting requirements and prohibitions on wasteful practices.

On May 31, 2018, Governor Brown signed both AB 1668 (Friedman) and SB 606 (Hertzberg), which set permanent overall targets for indoor and outdoor water consumption. The legislation sets an initial limit for indoor water use of 55 gallons per-person per-day in 2022, reducing to 52.5 gallons per-person per-day in 2025, and finally to 50 gallons per-person per-day in 2030. The amount of residential outdoor use is yet-to-be determined, but will allow for varying regional climates. In addition, a standard for water loss due to leak rates in water system pipes will be established. As an urban water provider, the City of Porterville will need to submit its plan for compliance for approval by the State Water Resources Control Board.

On March 5, 2021, Secretary Vilsack of the United Stated Department of Agriculture federally-designated Tulare County as a primary natural disaster area due to ongoing drought conditions. On April 21, 2021, Governor Newsom issued a State of Emergency Proclamation due to drought conditions, including Tulare County. On April 27, 2021, the Tulare County Board of Supervisors adopted a Resolution Proclaiming a Local Emergency due to severe drought conditions.

Initially within the city of Porterville, twenty-six (26) residences within the city were determined to have dry wells, for which City staff submitted a Mutual Aid Request to Tulare County OES to initiate the household tank program for identified properties within the city where wells are dry and challenged for permanent connection. The State has committed funding for non-profit agencies to continue drought-related activities, which Self-Help Enterprises has continued the household tank program locally, through State Cleanup and Abatement Account (CAA) emergency funds.

Representatives for the City, County, State (CalOES, DDW, DWR, and SWB) and non-profit partners have continued to meet in support of the long-term permanent water connection project for the entire East Porterville area and the estimated 1,800 expected future connections. DWR identified 423 residential units in the East Porterville area (381 of which are in the City's Urban Development Boundary), that were served by the County's Household Tank Program and desired by the State to be connected to the City's water distribution system as soon as possible. DWR has completed a significant City waterline extension project to permanently connect those 423 residential units to the City's water system (considered Phase I of the project). To provide initial source water for the DWR extension project, CalOES desired to expeditiously connect the new well on Olive Avenue to the City's water system instead of being first

equipped as a filling station. Given the new well has an estimated water production value of 800 gallons per minute, as well as a SWB assumed 1.5 gallons per minute per residence, the new well could effectively serve up to 500 single-family residential units. The City indicated its significant interest that the E. Vandalia Avenue area and its eighty (80) residential units be included in the water connection project, to which the State was agreeable.

Given CalOES has paid for the development of the new well, and its connection to the City's water system, the City will be required under "Drought Redundancy and Resiliency Provisions" to make available to the State up to three million gallons of water per month without charge for emergency purposes.

To proceed with the connection of the new well to the City's water system and the 500 East Porterville and E. Vandalia Avenue residential units, the City Council approved modifications to the Draft Agreement between the City and County at its meeting on April 5, 2016, which the County Board of Supervisors subsequently approved at their meeting on May 10, 2016.

A Memorandum of Understanding between the State, County, and City on the East Porterville permanent water connection project was approved by the Council during a Special Meeting on Tuesday, June 21, 2016, and approved by the Board of Supervisors on Tuesday, June 28, 2016. With the approval of the MOU, the State began the permanent connection of approximately forty (40) homes that are located along existing City water mains. Subsequently, the State officially requested that the City approve the connection of an additional thirty (30) residences as part of the first immediate connections, for up to a total of seventy (70), which the Council approved at its meeting on August 2, 2016.

In regards to the new well's development and connection to the City's water distribution system, the Board of Supervisors awarded the contract for equipping and connecting the new well at their meeting of Tuesday, August 16, 2016, and construction activities commenced the week of October 10, 2016. County staff had previously indicated that the well would be in service and connected to the City's system no later than December 2016, however, the well was operational and connected to the City's water distribution as of Friday, February 17, 2017. Given the delay in the well's completion and connection, DWR requested that the Council consider allowing the connection of residences as they become prepared for connection, to which the Council was receptive, and a Draft MOU Amendment was approved by the Council at its meeting on December 6, 2016, and subsequently approved by the Board of Supervisors at is meeting on December 20, 2016. City staff continued to work with County staff toward the transfer of the well's ownership from the County to the City, which at its meeting on April 20, 2021, the Council approved the draft Transfer Agreement subject to the City Attorney's final form.

As of Friday, March 31, 2017, the date the State established as the final day for property owners to complete the registration process to participate in the State-funded connection program opportunity, of the 1,017 eligible developed

residential properties identified by the State for connection, 722 completed the required Extra-Territorial Services Agreement, leaving 295 developed residential properties non-responsive to this unique connection program, 23 of which were reported as having either dry or diminishing capacity wells. On February 6, 2018, the final residential connection was made of the approximate eligible 800 residences in East Porterville to the City's water system.

City staff continues to coordinate with Self-Help Enterprises and State representatives toward the extension of water mains to serve all residential properties within City limits and the city's periphery that are currently participating in the County's Household Tank Program. The two main areas of focus are N. Cobb Street (northwest of State Route 65 and Pioneer Avenue), and S. Cloverleaf Street (southeast of State Route 65 and Olive Avenue). The State has maintained its commitment to grant-fund the necessary infrastructure and connection fees, providing an official funding letter to the City on January 18, 2018, which commits up to $2.81 million in funding until December 31, 2019. The authorization to advertise for bids for the water connection project was approved by the Council at its July 17th meeting, after which DWR reviewed the bid package for compliance and approved in December the package for advertisement. Council authorized award of the construction contract for approximately $1.82 million at its meeting on January 15, 2019. City staff conducted a pre-construction public outreach meeting with the affected residents on the status of the project on Thursday, April 4, 2019. Council authorized the agreement with Self-Help Enterprises Inc. to provide the private residential connections at its meeting on July 2, 2019, and construction work began on the project. At its meeting on October 1, 2019, the Council accepted the public works segment of the project in the installation of water mains as complete, with Self-Help and CSET continuing to collaborate on the completion of the individual private connections and abandonment of private wells. City staff has recently been made aware that there may be a couple of additional residences whose wells are dry that are located along existing City water mains or may require further extension of water mains. Staff is coordinating with State staff on addressing these new isolated needs.

County OES and the State Division of Drinking Water (DDW) have reported to the City that the Central Mutual Water Company, located south of the city and south of Gibbons Avenue, has had its well run dry and desires an immediate emergency connection to the City's water system to serve the 41 connections currently without water. DDW is wishing to support a financial application to upgrade the small water system to City standards (new water lines, meters ,etc.), and to sponsor an Urban Development Boundary (UDB) Amendment application to Tulare County Local Agency Formation Commission (LAFCO), given this area is currently outside the City's UDB but within the City's Urban Area Boundary (UAB). Given several private wells have run dry in this area, DDW is also attempting to sponsor their connection to the City's water system. For source water capacity for the connections, DWR will include these new connections within the East Porterville water connection capacity development projects. At its Special meeting on August 30th, the City Council directed staff to proceed with the immediate emergency connection of the Central water

system, with the permanent connection of the system contingent upon an Agreement with DDW to the sponsorship conditions they have offered. At its meeting on October 1, 2019, the Council directed staff to proceed with the amendment of the UDB to facilitate annexation, which a public meeting with the affected residents was conducted on Wednesday, October 9, 2019. At its meeting on April 21, 2020, the Council conducted a Public Hearing and approved Resolutions of approval of the environmental determination and amendment to the UDB to facilitate annexation. At its meeting on June 1, 2021, the Council approved the State Water Board funding agreement for the development of a City-owned production well, distribution mains and water meters to serve each customer, as well as fire hydrants. On July 20, 2021, the City received notification from the State Water Board that the Akin/Central Water Consolidation Project funding agreement had been formally approved and executed.

DDW has also reported to the City that the Del Oro East Plano water system, located on Paul Street (southeast of the intersection of Plano Street and Worth Avenue), is experiencing problems with its existing well and have implemented severe water restrictions. The East Plano water system serves fourteen (14) residences and approximately 45 people. DDW is wishing to provide financial support to upgrade the small water system to City standards (new water lines, meters ,etc.), and for source water capacity for the connections, DDW would need to either pay appropriate fees and/or develop a capacity development project. The Council is aware that the Del Oro Grandview Gardens water system (north of W. North Grand Avenue) is also experiencing significant issues, and DDW may seek their future consolidation with the City's water system as well.

DDW has further reported to the City that the Beverly Grand Mutual Water Company water system, located north of West North Grand Avenue, is experiencing problems with its existing well and water quality issues, and desires its connection to the City's system to serve the 31 residences the system serves. DDW is wishing to provide financial support to upgrade the small water system to City standards (new water lines, meters ,etc.), and for source water capacity for the connections, DDW has agreed to pay appropriate fees toward developing a capacity development project, which at its meeting of October 3, 2017, the Council approved a purchase agreement with Smee Homes, Inc. for the acquisition of property along the Tule River for the development of a new municipal well. At its meeting of October 1, 2019, the Council approved proceeding with the consolidation of the Beverly Grand water system.

RECOMMENDATION: That the City Council receive the report of status and review of the Declaration of Local Emergency and determine the need exists to continue said Declaration.

John Lollis, City Manager

Final Approver: John Lollis, City Manager

RESOLUTION NO. 49-2015

A RESOLUTION OF THE CITY COUNCIL OF
THE CITY OF PORTERVILLE DECLARING A DROUGHT EMERGENCY
WITHIN THE CITY OF PORTERVILLE

WHEREAS: in response to the ongoing severe drought, the State Water Resources Control Board approved an emergency regulation to ensure water agencies, their customers, and state residents increase water conservation in urban settings or face possible fines or other enforcement; and

WHEREAS: as we enter the fourth year of severe drought, long-term forecasts indicate no relief of the current drought conditions, and suggest a warmer-than-average summer, resulting in increased domestic demand for water; and

WHEREAS: public and private potable water supplies continue to be threatened due to decreasing supplies of groundwater caused by the precipitation deficit and an extended state of groundwater overdraft; and

WHEREAS: the long-term ramifications of the current drought will have a significant impact on the city of Porterville and potentially pose a danger to the health and welfare of its residents; and

NOW, THEREFORE, BE IT RESOLVED: that the City Council of the City of Porterville does hereby proclaim that, due to drought conditions, a Local Emergency now exists in the city of Porterville and shall remain in effect for the duration of the emergency; and

BE IT FURTHER RESOLVED: that the City Council of the City of Porterville requests the Governor and California Department of Water Resources make available California Disaster Assistance Act funding for the State of Local Emergency proclaimed on May 5, 2015, and seek all available forms of Federal assistance, to include a Presidential Declaration of Emergency and Individual Assistance and Public Assistance programs as applicable; and

BE IT FURTHER RESOLVED: that a copy of this resolution be forwarded to the State Director of the Office of Emergency Services.

PASSED, APPROVED, AND ADOPTED this 5th day of May 2015.

Milt Stowe, Mayor

ATTEST:
John D. Lollis, City Clerk

By: Patrice Hildreth, Chief Deputy City Clerk

United States Department of Agriculture

Office of the Secretary
Washington, D.C. 20250

March 5, 2021

The Honorable Gavin Newsom
Governor
State of California
Sacramento, California 95814

Dear Governor Newsom:

In accordance with 7 CFR 759.5(a), I am designating 50 California counties as primary natural disaster areas due to a recent drought.

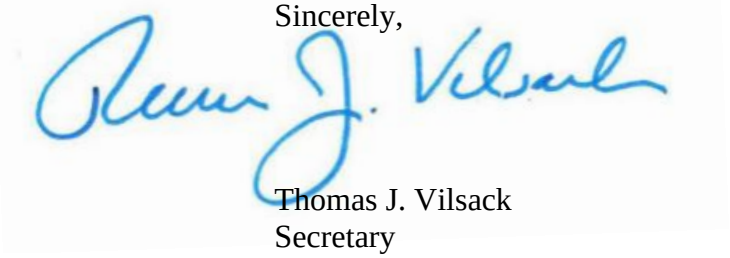
According to the U.S. Drought Monitor (see http://droughtmonitor.unl.edu/), these counties suffered from a drought intensity value during the growing season of 1) D2 Drought-Severe for 8 or more consecutive weeks or 2) D3 Drought-Extreme or D4 Drought-Exceptional.

In accordance with section 321(a) of the Consolidated Farm and Rural Development Act, additional areas of your state and adjacent states are named as contiguous disaster counties. Enclosed you will find documentation that provides a detailed list of all primary and contiguous counties impacted by this disaster.

A Secretarial disaster designation makes farm operators in primary counties and those counties contiguous to such primary counties eligible to be considered for certain assistance from the Farm Service Agency (FSA), provided eligibility requirements are met. This assistance includes FSA emergency loans. Farmers in eligible counties have 8 months from the date of a Secretarial disaster declaration to apply for emergency loans. FSA considers each emergency loan application on its own merits, taking into account the extent of production losses on the farm and the security and repayment ability of the operator.

Local FSA offices can provide affected farmers with further information.

Sincerely,



Thomas J. Vilsack
Secretary

Enclosure

Disaster Designation Areas for California and Contiguous States

Primary Counties:

California	**(50)**			
Alameda	Glenn	Marin	Riverside	Solano
Alpine	Humboldt	Mariposa	Sacramento	Sonoma
Amador	Imperial	Mendocino	San Bernardino	Stanislaus
Butte	Inyo	Merced	San Francisco	Sutter
Calaveras	Kern	Modoc	San Joaquin	Tehama
Colusa	Kings	Mono	San Mateo	Trinity
Contra Costa	Lake	Napa	Santa Clara	Tulare
Del Norte	Lassen	Nevada	Shasta	Tuolumne
El Dorado	Los Angeles	Placer	Sierra	Yolo
Fresno	Madera	Plumas	Siskiyou	Yuba

Contiguous Counties:

California	**(8)**		
Monterey	San Benito	San Luis Obispo	Santa Cruz
Orange	San Diego	Santa Barbara	Ventura

In addition, in accordance with section 321(a) of the Consolidated Farm and Rural Development Act, counties in adjacent states are named as contiguous disaster areas. Those states, counties, and numbers are:

Contiguous Counties in Adjacent States:

Arizona	**(3)**		
La Paz	Mohave	Yuma	
Nevada	**(8)**		
Clark	Esmeralda	Mineral	Washoe
Douglas	Lyon	Nye	Carson City
Oregon	**(5)**		
Curry	Josephine	Lake	
Jackson	Klamath		

EXECUTIVE DEPARTMENT
STATE OF CALIFORNIA

State of Emergency Proclamation

WHEREAS climate change is intensifying the impacts of droughts on our communities, environment and economy, and California must therefore improve drought resiliency and prepare to respond to more frequent, prolonged, and intense dry periods; and

WHEREAS much of the West is experiencing severe to exceptional drought and California is in a second consecutive year of dry conditions, resulting in drought or near-drought throughout many portions of the State; and

WHEREAS these drought conditions can result in degraded water quality, fallowing of productive farmland, setbacks to vulnerable and rural communities through job losses and longer-lasting recoveries, significant impacts to tribal, commercial, and recreational salmon fisheries, constraints on access to traditional lifeways, loss of aquatic and terrestrial biodiversity, and ecosystem impacts; and

WHEREAS drought conditions vary across the State and some watersheds, including the Russian River and Klamath Basin, are extremely dry and are facing substantial water supply and ecosystem challenges; and

WHEREAS it is necessary to expeditiously mitigate the effects of the drought conditions within the Russian River Watershed, located within Mendocino and Sonoma counties, to ensure the protection of health, safety, and the environment; and

WHEREAS experience in the last drought has demonstrated the value of preparing earlier for potential sustained dry conditions, the need to improve our monitoring and forecasting capabilities, and many other lessons that are captured in the Administration's *Report to the Legislature on the 2012-2016 Drought*; and

WHEREAS the State and its many partners have strengthened drought resilience since the last drought including state investments in water management systems, implementation of the Sustainable Groundwater Management Act, establishment of the Safe and Affordable Fund for Equity and Resilience Program, development of the Administration's *Water Resilience Portfolio*, and continued water conservation by Californians whose current statewide urban water use is 16% lower than at the beginning of the last drought; and

WHEREAS state agencies have been actively responding to current drought conditions and preparing for the possibility of a third dry year including through convenings of the interagency drought team, which was established at my direction, to organize, focus, and track changing conditions, coordinate state agency responses, and work closely with partners across the State; and

WHEREAS under the provisions of Government Code section 8558(b), I find that the conditions caused by the drought conditions, by reason of their magnitude, are or are likely to be beyond the control of the services, personnel, equipment, and facilities of any single local government and require the combined forces of a mutual aid region or regions to appropriately respond; and

WHEREAS under the provisions of Government Code section 8625(c), I find that local authority is inadequate to cope with the drought conditions; and

WHEREAS to protect public health and safety, it is critical the State take certain immediate actions without undue delay to prepare for and mitigate the effects of, the drought conditions within the Russian River Watershed, and under the provisions of Government Code section 8571, I find that strict compliance with various statutes and regulations specified in this Proclamation would prevent, hinder, or delay the mitigation of the effects of the drought conditions of the Russian River Watershed, located within Mendocino and Sonoma counties.

NOW THEREFORE, I, GAVIN NEWSOM, Governor of the State of California, in accordance with the authority vested in me by the State Constitution and statutes, including the California Emergency Services Act, and in particular, section 8625, **HEREBY PROCLAIM A STATE OF EMERGENCY** to exist in Mendocino and Sonoma counties due to drought conditions in the Russian River Watershed.

IT IS HEREBY ORDERED THAT:

1. To further the success of California's water conservation efforts and increase our drought preparedness, state agencies shall partner with local water districts and utilities to make all Californians aware of drought, and encourage actions to reduce water usage by promoting the Department of Water Resources' Save Our Water campaign (https://saveourwater.com) and other water conservation programs.

2. To continue coordination with partners across the State for the potential of prolonged drought impacts, the Department of Water Resources, the State Water Resources Control Board (Water Board), the Department of Fish and Wildlife, and the Department of Food and Agriculture shall work with regional and local governments, including groundwater sustainability agencies, to identify watersheds, communities, public water systems, and ecosystems that may require coordinated state and local actions to address issues stemming from continued dry conditions, to ensure that we can respond to water shortages and protect people, natural resources and economic activity.

3. To continue partnership and coordination with Californian Native American tribes, state agencies shall engage in consultation, collaboration, and communication with California Native American tribes to assist them in necessary preparation and response to drought conditions on tribal lands and potential impacts to cultural and traditional resources within ancestral lands.

4. To prioritize drought response and preparedness resources, the Department of Water Resources, the Water Board, the Department of Fish and Wildlife and the Department of Food and Agriculture, in consultation with the Department of Finance, shall:

    a. Accelerate funding for water supply enhancement, water conservation, or species conservation projects.
    b. Identify unspent funds that can be repurposed to enable projects to address drought impacts to people, ecosystems, and economic activities.
    c. Recommend additional financial support for water resilience infrastructure projects and actions for potential inclusion in the upcoming May Revision.

5. To increase resilience of our water supplies during drought conditions, the Department of Water Resources shall:

    a. Work with counties to encourage reporting of household water shortages, such as dry residential wells, on the website the Department maintains for that purpose, to enable tracking of drought impacts.
    b. Work with counties, and groundwater sustainability agencies as appropriate, to help ensure that well drillers submit required groundwater well logs for newly constructed and deepened wells in a timely manner.
    c. Work with agricultural water suppliers and agricultural water users to provide technical assistance, including implementation of efficient water management practices and use of technology such as the California Irrigation Management Information System.
    d. Work with urban and agricultural water suppliers to encourage timely submittal by water districts and public posting of urban water management and water shortage contingency plans and agricultural water management and drought plans.
    e. Accelerate updating the land subsidence data it is providing to support implementation of the Sustainable Groundwater Management Act.

6. To increase resilience of our water systems during drought conditions, the Water Board shall:

    a. Use its authority, provide technical assistance, and where feasible provide financial assistance, to support regular reporting of drinking water supply well levels and reservoir water levels where the Water Board determines that there is risk of supply failure because of lowering groundwater levels or reservoir levels that may fall below public water system intakes.
    b. Prioritize the permitting of public water systems that anticipate the need to activate additional supply wells where water quality is a concern and treatment installation needs to proceed to relieve a system's potential supply concerns.
    c. Provide annual water demand data, information on water right priority, and other communications on water availability on its website.
    d. Identify watersheds where current diversion data is insufficient to evaluate supply impacts caused by dry conditions, and take actions to ensure prompt submittal of missing data in those watersheds.

7. To address the acutely dry conditions in the Russian River Watershed, the Water Board shall consider:

    a. Modifying requirements for reservoir releases or diversion limitations in that watershed to ensure adequate, minimal water supplies for critical purposes.
    b. Adopting emergency regulations to curtail water diversions when water is not available at water rights holders' priority of right or to protect releases of stored water.

    For purposes of carrying out this directive, Public Resources Code, Division 13 (commencing with section 21000) and regulations adopted pursuant to that Division are suspended in the counties of Mendocino and Sonoma to the extent necessary to address the impacts of the drought in the Russian River Watershed. The Water Board shall identify the projects

eligible for the suspensions pursuant to this paragraph and maintain on its websites a list of the activities or approvals for which these provisions are suspended.

8. To ensure that equipment and services necessary for drought response in the Russian River Watershed can be procured quickly, the provisions of the Government Code and the Public Contract Code applicable to procurement, state contracts, and fleet assets, including, but not limited to, advertising and competitive bidding requirements, are hereby suspended to the extent necessary to address the effects of the drought in the Russian River Watershed, located within Mendocino and Sonoma counties. Approval of the Department of Finance is required prior to the execution of any contract entered into pursuant to this provision.

9. To increase the resilience of our natural habitats to protect vulnerable species during drought conditions, the Department of Fish and Wildlife shall:

    a. Evaluate and take actions to protect terrestrial and aquatic species and, wherever possible, work with water users and other parties on voluntary measures to protect species.
    b. Work to improve State hatcheries and increase water use efficiency on State wildlife areas and ecological reserves to maintain habitat for vulnerable species.
    c. Respond to human-wildlife interactions related to ongoing dry conditions and increase public messaging and awareness.
    d. Work with commercial and recreational salmon fishing and tribal representatives to anticipate and develop strategies to mitigate and respond to salmon fishery impacts, with particular emphasis on addressing impacts to salmon fisheries in the Klamath Basin.

10. To support our agricultural economy and food security during drought conditions, the Department of Food and Agriculture shall:

    a. Provide technical assistance to support conservation planning, on-farm water and energy conservation practices and technologies, including augmenting the State Water Efficiency and Enhancement Program.
    b. Conduct an economic analysis of drought impacts to agriculture, including land use, jobs, and rural food economies, expanding on existing research done in the last drought to include thorough regional analysis especially in the Central Valley, and in the implementation of the Sustainable Groundwater Management Act and alternative land uses for fallowed land.
    c. Maintain a web page with drought resources for farmers and ranchers, including the United States Department of Agriculture and other federal and state resources.
    d. Work with federal agencies to assist Klamath Basin farmers and ranchers contending with reduced water supplies.

11. To ensure the potential impacts of drought on communities are anticipated and proactively addressed, the Department of Water Resources, in coordination with the Water Board, shall develop groundwater management principles and strategies to monitor, analyze, and minimize impacts to drinking water wells.

12. To provide critical information on the different drought conditions across the State, the Department of Water Resources, in consultation with the Department of Fish and Wildlife, the Department of Food and Agriculture,

and the Water Board, shall develop a California Drought Monitor by December 31, 2021, as recommended in the Administration's *Report to the Legislature on the 2012-2016 Drought*.

13. To prepare for potential salinity issues in the Delta, the Department of Water Resources, in consultation with the Water Board, the Department of Fish and Wildlife, the Delta Stewardship Council, and the Central Valley Flood Protection Board, shall initiate actions necessary to prepare for and address potential Delta salinity issues during prolonged drought conditions.

14. To prepare for potential impacts of drought conditions on species, the Water Board and the Department of Fish and Wildlife shall work with federal agency partners to manage temperature conditions for the preservation of fish in the Sacramento River downstream of Shasta Dam while balancing water supply needs.

This Proclamation is not intended to, and does not, create any rights or benefits, substantive or procedural, enforceable at law or in equity, against the State of California, its agencies, departments, entities, officers, employees, or any other person.

I FURTHER DIRECT that as soon as hereafter possible, this Proclamation be filed in the Office of the Secretary of State and that widespread publicity and notice be given of this Proclamation.

IN WITNESS WHEREOF I have hereunto set my hand and caused the Great Seal of the State of California to be affixed this 21st day of April 2021

GAVIN NEWSOM
Governor of California

ATTEST:

DR. SHIRLEY WEBER
Secretary of State

RESOLUTION PROCLAIMING A LOCAL EMERGENCY BY THE BOARD OF SUPERVISORS COUNTY OF TULARE, STATE OF CALIFORNIA

IN THE MATTER OF A LOCAL EMERGENCY DUE TO SEVERE DROUGHT CONDITIONS

RESOLUTION NO. 2021-0290

WHEREAS, California's most recent drought spanning from approximately 2012 to 2018 required the proclamation of a Local Emergency by the County of Tulare from February 2014 to November 2019, as well as a Governor's State of Emergency and the combined resources of multiple local, state, and federal agencies, commercial entities, and non-profit organizations to mitigate; and

WHEREAS, over 3,000 failed or dry wells – including private domestic, community, and agricultural wells – were reported to Tulare County from 2014 to 2017 as a result of the prior drought, causing significant health, safety, and economic issues for Tulare County residents and businesses; and

WHEREAS, well over $100 million in emergency relief and permanent infrastructure projects were expended to mitigate the effects of the prior drought; and

WHEREAS, a hydrological year ("water year") runs from October 1 to September 30 of the following year; and

WHEREAS, the current water year beginning October 1, 2020 is, to date, the third-driest on record, with potential to become the driest on record without significant additional precipitation which is unlikely to occur during the traditionally dry months; and

WHEREAS, the United States Drought Monitor shows that 94.51% of Tulare County is currently experiencing "Extreme Drought" (D3) conditions and the remaining 5.49% is in "Severe Drought" (D2) conditions, and the County of Tulare anticipates that these conditions will progress to "Exceptional Drought" (D4) conditions as occurred in the prior drought based on the current Southern Sierra snowpack measured at only 15% of historical average for April 1st, drastically reduced surface water allocations on the State Water Project and Central Valley Project, and correspondingly low water levels in local reservoirs; and

WHEREAS, surface water supply constraints create a demonstrable and unsustainable increase in demand for groundwater which is likely to cause additional dry wells for community water systems, private domestic wells, and agricultural wells, creating economic hardships and conditions of extreme peril to the health and safety of individuals within Tulare County requiring the combined forces of all levels of government to mitigate; and

WHEREAS, California Government Code section 8630 empowers the Board of Supervisors to proclaim the existence or threatened existence of a local emergency; and

WHEREAS, Section 1-15-1005 of the Tulare County Ordinance Code defines "emergency" to include "the actual or threatened existence of conditions of disaster or of

extreme peril to the safety of persons and property within [Tulare] County caused by such conditions as air pollution, fire, flood, storm, epidemic, riot, earthquake, or other conditions, ... which conditions are or are likely to be beyond the control of the services, personnel, equipment, and facilities of [Tulare] County, requiring the combined forces of other political subdivisions to combat"; and

NOW, THEREFORE, IT IS HEREBY PROCLAIMED that a local emergency now exists throughout said Tulare County due to drought which has created conditions of disaster and extreme peril to the safety of persons and property within the County, and that such conditions are or are likely to be beyond the control of the services, personnel, equipment, and/or facilities of this County, thus requiring the combined forces of other political subdivisions to combat; and

IT IS FURTHER PROCLAIMED that this local emergency is proclaimed pursuant to the California Emergency Services Act, California Government Code §8550 et seq.; and

IT IS REQUESTED that the Governor of the State of California find and proclaim Tulare County to be in a State of Emergency, and make available any and all material and financial support and resources necessary to combat the conditions of disaster, including but not limited to California Disaster Assistance Act funding for emergency protective measures and increased funding to relevant programs of the State Water Resources Control Board and Department of Water Resources; and

IT IS FURTHER REQUESTED that the Governor waive and all regulations and statutes that may hinder response to this emergency; and

IT IS PROCLAIMED AND ORDERED that during the existence of said local emergency, the powers, functions, and duties of the emergency organization of Tulare County shall be those prescribed by State law, by ordinances and resolutions of Tulare County, and by the Tulare County Operational Area Emergency Operations Plan, as approved by the Board of Supervisors.

UPON MOTION OF SUPERVISOR MICARI, SECONDED BY SUPERVISOR TOWNSEND, THE FOLLOWING WAS ADOPTED BY THE BOARD OF SUPERVISORS, AT AN OFFICIAL MEETING HELD APRIL 27, 2021, BY THE FOLLOWING VOTE:

AYES: SUPERVISORS MICARI, VANDER POEL, SHUKLIAN, VALERO AND TOWNSEND

DRINKING WATER CONSTRUCTION LOAN

AGREEMENT NO. SWRCB0000000000D2002017
by and between
CITY OF PORTERVILLE ("Recipient")
and
CALIFORNIA STATE WATER RESOURCES CONTROL BOARD ("State Water Board")

for the purpose of the

AKIN/CENTRAL WATER CONSOLIDATION PROJECT
5410010-018C AND 5400655-001C ("Project")

- Section 116760 et seq. of the Health and Safety Code and Resolution Nos. 2019-0065 and 2020-0022.

PROJECT FUNDING AMOUNT: $4,787,664
PRINCIPAL FORGIVENESS COMPONENT: $4,787,664

ESTIMATED REASONABLE PROJECT COST: $4,787,664
ELIGIBLE WORK START DATE: JULY 1, 2016
ELIGIBLE CONSTRUCTION START DATE: SEPTEMBER 22, 2020
CONSTRUCTION COMPLETION DATE: OCTOBER 1, 2023
FINAL REIMBURSEMENT REQUEST DATE: APRIL 1, 2024
RECORDS RETENTION END DATE: OCTOBER 1, 2059

1. The State Water Board and the Recipient mutually promise, covenant, and agree to the terms, provisions, and conditions of this Agreement, including the following Exhibits, which are attached hereto or are incorporated by reference:
   - Exhibit A – Scope of Work and Schedule
   - Exhibit B – Specific Funding Provisions
   - Exhibit C – GENERAL TERMS AND CONDITIONS 2019-NOV
   - Exhibit D – Special Conditions

2. The following documents are also incorporated by reference:
   - the Drinking Water System Permit No. 03-12-06P-004;
   - the Davis-Bacon requirements found at: https://www.waterboards.ca.gov/water_issues/programs/grants_loans/srf/docs/davisbacon/2020_dwsrf_governmental_entities.pdf
3. Party Contacts during the term of this Agreement are:

State Water Board		City of Porterville	
Section:	Division of Financial Assistance		
Name:	Pete Stamas, Project Manager	Name:	Monte Reyes, Mayor
Address:	1001 I Street, 16th Floor	Address:	291 North Main Street
City, State, Zip:	Sacramento, CA 95814	City, State, Zip:	Porterville, CA 93257
Phone:	(916) 552-9983	Phone:	(559) 782-7499
Fax:		Fax:	
Email:	Pete.Stamas@waterboards.ca.gov	Email:	montereyes@portervilleca.gov

Each party may change its contact upon written notice to the other party. While Party Contacts are contacts for day-to-day communications regarding Project work, the Recipient must provide official communications and notices to the Division's Deputy Director.

4. Conditions precedent to this Agreement are set forth as follows:
   (a) The Recipient must deliver an opinion of general counsel satisfactory to the State Water Board's counsel dated on or after the date that the Recipient signs this Agreement.
   (b) The Recipient must deliver to the Division a resolution authorizing this Agreement and identifying its authorized representative by title.
   (c) The Recipient must deliver to the Division a resolution certifying that its decision-making body reviewed and considered the Mitigated Negative Declaration filed by the State Water Board for the Akin Water Company Water Supply Project together with the Mitigation Monitoring and Reporting Program and reached its own conclusions on whether and how to approve the Project, pursuant to Section 15050 (b) of the CEQA Guidelines.

5. The Recipient represents, warrants, and commits to the following as of the Eligible Work Start Date and continuing thereafter for the term of this Agreement, which shall be at least until the Records Retention End Date:

   (a) The Recipient agrees to comply with all terms, provisions, conditions, and commitments of this Agreement, including all incorporated documents.

   (b) The execution and delivery of this Agreement, including all incorporated documents, has been duly authorized by the Recipient. Upon execution by both parties, this Agreement constitutes a valid and binding obligation of the Recipient, enforceable in accordance with its terms, except as such enforcement may be limited by law.

(c) None of the transactions contemplated by this Agreement will be or have been made with an actual intent to hinder, delay, or defraud any present or future creditors of Recipient. The Recipient is solvent and will not be rendered insolvent by the transactions contemplated by this Agreement. The Recipient is able to pay its debts as they become due. The Recipient maintains sufficient insurance coverage considering the scope of this Agreement, including, for example but not necessarily limited to, general liability, automobile liability, workers compensation and employer liability, professional liability.

(d) The Recipient is in compliance with all State Water Board funding agreements to which it is a party.

IN WITNESS WHEREOF, this Agreement has been executed by the parties hereto.

CITY OF PORTERVILLE:

By: _____
Name: Monte Reyes
Title: Mayor

Date: 6/1/2021

STATE WATER RESOURCES CONTROL BOARD:

By: _____
Name: Leslie Laudon
Title: Deputy Director
Division of Financial Assistance

Date: 7/15/21

EXHIBIT A – SCOPE OF WORK AND SCHEDULE

A.1. PROJECT PURPOSE AND DESCRIPTION.

The Project is for the benefit of the Recipient and has a Useful Life of at least 40 years. The funding under this Agreement shall be used to provide the residents of two small disadvantaged communities currently served by Akin Water Company (Akin WC) and Central Mutual Water Company (Central MWC) with a sustainable source of safe drinking water.

A.2. SCOPE OF WORK.

The Recipient agrees to do the following: consolidate with Akin WC and Central MWC. Recipient also agrees to construct a new production well, estimated to produce between 1,300 and 1,800 gallons per minute, to provide the needed source capacity for the consolidation of Akin WC, the consolidation of Central MWC, as well as satisfy the remainder of East Porterville residents' capacity needs.

The Recipient agrees to do the following for the Akin WC service area: construct approximately 1,500 feet of 8-inch waterline to provide water service to each customer currently served by Akin WC; install approximately three new fire hydrants and twenty-six new service laterals and meters; and destroy Akin WC's two existing wells.

The Recipient agrees to do the following for the Central MWC service area: construct approximately 1,400 feet of 6-inch waterline to provide water service to each customer currently served by Central MWC; install approximately four new fire hydrants and thirty-four new service laterals and meters; and destroy Central MWC's existing well.

Upon Completion of Construction, the Recipient must expeditiously initiate Project operations.

A.3 SIGNAGE

The Recipient must place a professionally prepared sign at least four feet tall by eight feet wide made of ¾ inch thick exterior grade plywood or other approved material in a prominent location on the Project site and must maintain the sign in good condition for the duration of Project implementation. The sign may include another agency's required information and must include, prominently displayed, the following disclosure statement and color logos (available from the Division):

"Funding for this project has been provided in full or in part under the Drinking Water State Revolving Fund, which may include capitalization funding from the United States Environmental Protection Agency through an agreement with the State Water Resources Control Board."

A.4 SCHEDULE.

Failure to provide items by the due dates indicated in the table below may constitute a material violation of this Agreement. The Project Manager may adjust the dates in the "Estimated Due Date" column of this table, but Critical Due Date adjustments will require an amendment to this Agreement. The Recipient

must complete and submit all work in time to be approved by the Division prior to the Project Completion Date. As applicable for specific submittals, the Recipient must plan adequate time to solicit, receive, and address comments prior to submitting the final submittal. The Recipient must submit the final Reimbursement Request prior to the Final Reimbursement Request Date set forth on the Cover Page.

ITEM	DESCRIPTION OF SUBMITTAL	CRITICAL DUE DATE	ESTIMATED DUE DATE
EXHIBIT A – SCOPE OF WORK			
A.	ADDITIONAL SUBMITTAL(S) TO DIVISION		
1.	Final Plans and Specifications		September 1, 2021
2.	Final Budget Approval Package		February 1, 2022
3.	Completion of Construction	October 1, 2023	
B.	REPORTS		
1.	Progress Reports		Quarterly
2.	Final Inspection and Certification		October 1, 2023
3.	Project Completion Report		December 1, 2023
4	As Needed Reports		TBD
EXHIBIT B – REIMBURSEMENTS, BUDGET DETAIL, AND REPORTING PROVISIONS			
A.	REIMBURSEMENTS		
1.	Reimbursement Requests		Quarterly
2.	Final Reimbursement Request	April 1, 2024	

The Recipient must award the prime construction contract and begin construction timely. The Recipient must deliver any request for extension of the Completion of Construction Date no less than 90 days prior to the Completion of Construction Date.

A.5 PROGRESS REPORTS.

The Recipient must provide a progress report to the Division each quarter, beginning no later than 90 days after execution of this Agreement. The Recipient must provide a progress report with each Reimbursement Request. Failure to provide a complete and accurate progress report may result in the withholding of Project Funds, as set forth in Exhibit B. A progress report must contain the following information:

1) A summary of progress to date including a description of progress since the last report, percent construction complete, percent contractor invoiced, and percent schedule elapsed;
2) A description of compliance with environmental requirements;
3) A listing of change orders including amount, description of work, and change in contract amount and schedule; and
4) Any problems encountered, proposed resolution, schedule for resolution, and status of previous problem resolutions.

A.6 SPECIAL REPORTS.

(a) The Recipient must submit a Project Completion Report to the Division with a copy to the appropriate District Office on or before the due date established by the Division and the Recipient at the time of final project inspection. The Project Completion Report must include the following:

i. Description of the Project,
ii. Description of the water quality problem the Project sought to address,
iii. Discussion of the Project's likelihood of successfully addressing that water quality problem in the future, and
iv. Summary of compliance with applicable environmental conditions.

(b) If the Recipient fails to submit a timely Project Completion Report, the State Water Board may stop processing pending or future applications for new financial assistance, withhold reimbursements under this Agreement or other agreements, and begin administrative proceedings.

(c) The Recipient must report Disadvantaged Business Enterprise (DBE) utilization to the Division on the DBE Utilization Report, State Water Board Form DBE UR334. The Recipient must submit such reports to the Division annually within ten (10) calendar days following October 1 until such time as the "Notice of Completion" is issued. The Recipient must comply with 40 CFR § 33.301 and require its contractors and subcontractors on the Project to comply.

A.7 FINAL PROJECT INSPECTION AND CERTIFICATION.

Upon completion of the Project, the Recipient must provide for a final inspection and must certify that the Project has been completed in accordance with this Agreement, any final plans and specifications submitted to the State Water Board, and any amendments or modifications thereto. If the Project involves the planning, investigation, evaluation, design, or other work requiring interpretation and proper application of engineering, or other professionals, the final inspection and certification must be conducted by a California Registered Civil Engineer or other appropriate California registered professional. The results of the final inspection and certification must be submitted to the Project Manager.

EXHIBIT B – FUNDING AMOUNTS

B.1 ESTIMATED REASONABLE COST AND PROJECT FUNDS.

The estimated reasonable cost of the total Project is set forth on the Cover Page of this Agreement and is greater than or equal to the funding anticipated to be provided by the State Water Board under this Agreement. Subject to the terms of this Agreement, the State Water Board agrees to provide Project Funds not to exceed the amount of the Project Funding Amount set forth on the Cover Page of this Agreement.

B.2 RECIPIENT CONTRIBUTIONS.

(a) The loan component of this Agreement is forgiven. The estimated amount of principal that will be due to the State Water Board from the Recipient under this Agreement is Zero dollars and no cents ($0.00).

(b) The Recipient must pay any and all costs connected with the Project including, without limitation, any and all Project Costs. If the Project Funds are not sufficient to pay the Project Costs in full, the Recipient must nonetheless complete the Project and pay that portion of the Project Costs in excess of available Project Funds, and shall not be entitled to any reimbursement therefor from the State Water Board.

(c) If the Recipient recovers funds from any responsible parties, the Recipient shall immediately notify the Division. The amount of this Agreement may be reduced to reflect the recovered funds.

B.3 VERIFIABLE DATA.

Upon request by the Division, the Recipient must submit verifiable data to support deliverables specified in the Scope of Work. The Recipient's failure to comply with this requirement may be construed as a material breach of this Agreement.

B.4 BUDGET COSTS

Budget costs are contained in the Summary Project Cost Table below:

LINE ITEM	TOTAL ESTIMATED COST	PROJECT FUNDING AMOUNT
Construction	$3,194,720	$3,194,720
Pre-Purchased Material/Equipment	$0	$0
Purchase of Land	$0	$0
Contingency	$638,944	$638,944
Allowances (Soft Costs)	$954,000	$954,000
TOTAL	$4,787,664	$4,787,664

The Division's Final Budget Approval and related Form 259 and Form 260 will document a more detailed budget of eligible Project Costs and Project funding amounts.

The Recipient is prohibited from requesting disbursement amounts that represent Recipient's mark-ups to costs invoiced or otherwise requested by consultants or contractors.

Reasonable indirect costs may be allowable upon approval by the Division.

B.5 LINE ITEM ADJUSTMENTS.

Upon written request by the Recipient, the Division may adjust the line items of the Summary Project Cost Table at the time of Division's Final Budget Approval. Upon written request by the Recipient, the Division may also adjust the line items of the Summary Project Cost Table as well as the detailed budget at the time of Recipient's submittal of its final claim. Any line item adjustments to the Summary Project Cost Table that are due to a change in scope of work will require an Agreement amendment. The sum of adjusted line items in both the Summary

Project Cost Table and the detailed budget must not exceed the Project Funding Amount. The Division may also propose budget adjustments.

Under no circumstances may the sum of line items in the budget approved through the Final Budget Approval process exceed the Project Funding Amount. Any increase in the Project Funding Amount will require an Agreement amendment.

B.6 REIMBURSEMENT PROCEDURE.

(a) Except as may be otherwise provided in this Agreement, reimbursements will be made as follows:

1. Upon execution and delivery of this Agreement by both parties, the Recipient may request immediate reimbursement of any eligible incurred costs as specified below through submission to the State Water Board of the Reimbursement Request Form 260 and Form 261, or any amendment thereto, duly completed and executed.
2. The Recipient must submit a Reimbursement Request for costs incurred prior to the date this Agreement is executed by the State Water Board no later than ninety (90) days after this Agreement is executed by the State Water Board. Late Reimbursement Requests may not be honored.
3. Additional Project Funds will be promptly disbursed to the Recipient upon receipt of Reimbursement Request Form 260 and Form 261, or any amendment thereto, duly completed and executed by the Recipient for incurred costs consistent with this Agreement, along with receipt of progress reports due under Exhibit A.
4. The Recipient must not request reimbursement for any Project Cost until such cost has been incurred and is currently due and payable by the Recipient, although the actual payment of such cost by the Recipient is not required as a condition of reimbursement. Supporting documentation (e.g., receipts) must be submitted with each Reimbursement Request. The amount requested for Recipient's administration costs must include a calculation formula (i.e., hours or days worked times the hourly or daily rate = total amount claimed). Reimbursement of Project Funds will be made only after receipt of a complete, adequately supported, properly documented, and accurately addressed Reimbursement Request. Upon request by the Division, supporting documents for professional and administrative services must include the employees' names, classifications, labor rates, hours worked, and descriptions of the tasks performed. Reimbursement Requests submitted without supporting documents may be wholly or partially withheld at the discretion of the Division.
5. The Recipient must spend Project Funds within 30 days of receipt. If the Recipient earns interest earned on Project Funds, it must report that interest immediately to the State Water Board. The State Water Board may deduct earned interest from future reimbursements.
6. The Recipient shall not request a reimbursement unless that Project Cost is allowable, reasonable, and allocable.
7. Notwithstanding any other provision of this Agreement, no reimbursement shall be required at any time or in any manner which is in violation of or in conflict with federal or state laws, policies, or regulations.

(b) Notwithstanding any other provision of this Agreement, the Recipient agrees that the State Water Board may retain an amount equal to ten percent (10%) of the Project Funding Amount until Project Completion. Any retained amounts due to the Recipient will be promptly disbursed to the Recipient, without interest, upon Project Completion.

(c) Except as follows, construction costs and disbursements are not available until after the Division has approved the final budget form submitted by the Recipient. The Deputy Director of the Division may authorize the disbursement of up to ten percent (10%) of Project Funds for the reimbursement of eligible construction costs and pre-purchased materials prior to Division approval of the final budget form submitted by the Recipient. All other construction costs are not eligible for reimbursement until after this the Division has approved the final budget form submitted by the Recipient. Construction costs incurred prior to the Eligible Construction Start Date are not eligible for reimbursement.

B.7 REVERTING FUNDS AND DISENCUMBRANCE.

In the event the Recipient does not submit Reimbursement Requests for all funds encumbered under this Agreement by the Final Reimbursement Request Date, any remaining funds revert to the State. The State Water Board may notify the Recipient that the project file is closed, and any remaining balance will be disencumbered and unavailable for further use under the Agreement.

EXHIBIT C – GENERAL TERMS AND CONDITIONS 2019-NOV

GENERAL TERMS AND CONDITIONS 2019-NOV is incorporated by reference and is posted at https://www.waterboards.ca.gov/water_issues/programs/grants_loans/general_terms.html

EXHIBIT D – SPECIAL CONDITIONS

1. Notwithstanding Exhibit C, the following terms have no meaning for the purposes of this Agreement:

    - Work Completion
    - Work Completion Date

2. Each capitalized term used in this Agreement has the following meaning:

- "Allowance" means an amount based on a percentage of the accepted bid for an eligible project to help defray the planning, design, and construction engineering and administration costs of the Project.
- "Authorized Representative" means the duly appointed representative of the Recipient as set forth in the certified original of the Recipient's authorizing resolution that designates the authorized representative by title.
- "Completion of Construction" means the date, as determined by the Division after consultation with the Recipient, that the work of building and erection of the Project is substantially complete, and is established on the Cover Page of this Agreement.
- "District Office" means District Office of the Division of Drinking Water of the State Water Board.
- "Division of Drinking Water" means the Division of Drinking Water of the State Water Board.
- "Eligible Construction Start Date" means the date set forth on the Cover Page of this Agreement, establishing the date on or after which construction costs may be incurred and eligible for reimbursement hereunder.
- "Eligible Work Start Date" means the date set forth on the Cover Page of this Agreement, establishing the date on or after which any non-construction costs may be incurred and eligible for reimbursement hereunder.
- "Enterprise Fund" means the enterprise fund of the Recipient in which Revenues are deposited.
- "Event of Default" means, in addition to the meanings set forth in Exhibit C, the occurrence of any of the following events:
    a) A material adverse change in the condition of the Recipient, the Revenues, or the System, which the Division reasonably determines would materially impair the Recipient's ability to satisfy its obligations under this Agreement.
    b) Failure to operate the System or the Project without the Division's approval;
- "Final Budget Approval" means the Division-approved final budget for the Project, as set forth in Exhibit B.
- "Indirect Costs" means those costs that are incurred for a common or joint purpose benefiting more than one cost objective and are not readily assignable to the Project (i.e., costs that are not directly related to the Project). Examples of Indirect Costs include, but are not limited to: central service costs; general administration of the Recipient; non-project-specific accounting and personnel services performed within the Recipient organization; depreciation or use allowances on buildings and equipment; the costs of operating and maintaining non-project-specific facilities; tuition and conference fees; generic overhead or markup; and taxes.
- "Initiation of Construction" means the date that notice to proceed with work is issued for the Project, or, if notice to proceed is not required, the date of commencement of building and erection of the Project.
- "Net Revenues" means, for any Fiscal Year, all Revenues received by the Recipient less the Operations and Maintenance Costs for such Fiscal Year.
- "Operations and Maintenance Costs" means the reasonable and necessary costs paid or incurred by the Recipient for maintaining and operating the System, determined in accordance with GAAP, including all

reasonable expenses of management and repair and all other expenses necessary to maintain and preserve the System in good repair and working order, and including all reasonable and necessary administrative costs of the Recipient that are charged directly or apportioned to the operation of the System, such as salaries and wages of employees, overhead, taxes (if any), the cost of permits, licenses, and charges to operate the System and insurance premiums; but excluding, in all cases depreciation, replacement, and obsolescence charges or reserves therefor and amortization of intangibles.

- "Reimbursement Request" means the Recipient's request for Project Funds from the State Water Board as set forth in Exhibit B.
- "Revenues" means, for each Fiscal Year, all gross income and revenue received or receivable by the Recipient from the ownership or operation of the System, determined in accordance with GAAP, including all rates, fees, and charges (including connection fees and charges) as received by the Recipient for the services of the System, and all other income and revenue howsoever derived by the Recipient from the ownership or operation of the System or arising from the System, including all income from the deposit or investment of any money in the Enterprise Fund or any rate stabilization fund of the Recipient or held on the Recipient's behalf, and any refundable deposits made to establish credit, and advances or contributions in aid of construction.
- "System" means all drinking water collection, transport, treatment, storage, and delivery facilities, including land and easements thereof, owned by the City of Porterville, or its successor agency, and all other properties, structures, or works hereafter acquired and constructed by the Recipient and determined to be a part of the System, together with all additions, betterments, extensions, or improvements to such facilities, properties, structures, or works, or any part thereof hereafter acquired and constructed.
- "Useful Life" means the economically useful life of the Project beginning at Project Completion and is set forth in Exhibit A.

3. Acknowledgements.

   The Recipient must include the following acknowledgement in any document, written report, or brochure to be shared with the general public prepared in whole or in part pursuant to this Agreement:

"Funding for this project has been provided in full or in part under the Drinking Water State Revolving Fund, which may include capitalization funding from the United States Environmental Protection Agency through an agreement with the State Water Resources Control Board. The contents of this document do not necessarily reflect the views and policies of the foregoing, nor does mention of trade names or commercial products constitute endorsement or recommendation for use."

4. Rates and Charges. The Recipient must, to the extent permitted by law, fix, prescribe and collect rates, fees and charges for the System during each Fiscal Year which are reasonable, fair, and nondiscriminatory and which will be sufficient to generate Revenues in the amounts necessary to cover Operations and Maintenance Costs, and must ensure that Net Revenues are in an amount necessary to meet its obligations under this Agreement. The Recipient may make adjustments from time to time in such fees and charges and may make such classification thereof as it deems necessary, but shall not reduce the rates, fees and charges then in effect unless the Net Revenues from such reduced rates, fees, and charges will at all times be sufficient to meet the requirements of this section.

5. [RESERVED]

6. [RESERVED].

7. Environmental/Technical Special Conditions

Technical:

1. The Recipient shall submit its professional engineering services contract to the Division prior to disbursement of funds for costs incurred under such contract.
2. The Recipient shall not solicit bids, award a contract, or commence construction activities until final plans and specifications are approved by the Division of Drinking Water Tulare District Office Engineer and the Project Manager.
3. The Recipient must submit final consolidation agreements with Akin WC and Central MWC, in a form satisfactory to the Division, and receive written approval from the Project Manager to proceed before Project Funds may be disbursed for any Project Costs under the Agreement.
4. Upon completion of the Project the Recipient shall submit a water supply permit amendment request for review to the Division of Drinking Water Tulare District Office.

Environmental:

1. The documents identified below are incorporated by reference and the Recipient shall comply with the conditions and recommendations therein:
    a. The Mitigation Monitoring and Reporting Program adopted by the State Water Board on June 16, 2016 for the Project. The Recipient shall implement all mitigation measures therein.
    b. The letter dated February 12, 2020, from Patricia Cole of the United States Fish and Wildlife Service, San Joaquin Valley Division to Douglas E. Eberhardt of the United States Environmental Protection Agency, including, but not limited to, the following:
        i. Implement Avoidance and Minimization Measures and Best Management Practices prior to and during construction activities to minimize and avoid effects to the San Joaquin kit fox.
    c. The Mitigation Monitoring and Reporting Program adopted by the City of Porterville on April 21, 2020 for the Central Mutual Water Company Consolidation Project. The Recipient shall implement all mitigation measures therein.
2. In the Recipient's Quarterly Reports submitted pursuant to this Agreement, the Recipient shall include a discussion of the status of its compliance with environmental measures identified in this Exhibit D, with separate sections clearly labeled and titled, discussing the status of Recipient's compliance.
3. In the Recipient's Project Completion Report submitted pursuant to this Agreement, the Recipient shall include a discussion of its compliance with environmental measures identified in this Exhibit D, with separate sections clearly labeled and titled, discussing the status of Recipient's compliance.

8. [RESERVED].

9. Appointment of Receiver/Custodian. Upon the filing of a suit or other commencement of judicial proceedings to enforce the rights of the State Water Board under this Agreement, the State Water Board may make application for the appointment of a receiver or custodian of the Revenues, pending such proceeding, with such power as the court making such appointment may confer.

10. [RESERVED].

11. Damages for Breach of Federal Conditions. In the event that any breach of any of the provisions of this Agreement by the Recipient results in the failure of Project Funds to be used pursuant to the provisions of this Agreement, or if such breach results in an obligation on the part of the State or any subdivision or agency thereof to reimburse the federal government, the Recipient must immediately reimburse the State or any subdivision or agency thereof in an amount equal to any damages paid by or loss incurred by the State or any subdivision or agency thereof due to such breach.

12. [RESERVED].

13. Operation and Maintenance. The Recipient shall sufficiently and properly staff, operate, and maintain the facility and structures constructed or improved as part of the project throughout the term of this Agreement, consistent with the purposes of this Agreement. The Recipient assumes all operations and maintenance costs of the facilities and structures; the State Water Board shall not be liable for any cost of such maintenance, management or operation.

14. Insurance. The Recipient will procure and maintain or cause to be maintained insurance on the System and Project with responsible insurers, or as part of a reasonable system of self-insurance, in such amounts and against such risks (including damage to or destruction of the System or Project) as are usually covered in connection with systems similar to the System or Project. Such insurance may be maintained by a self-insurance plan so long as such plan provides for (i) the establishment by the Recipient of a separate segregated self-insurance fund in an amount determined (initially and on at least an annual basis) by an independent insurance consultant experienced in the field of risk management employing accepted actuarial techniques and (ii) the establishment and maintenance of a claims processing and risk management program. In the event of any damage to or destruction of the System or Project caused by the perils covered by such insurance, the net proceeds thereof shall be applied to the reconstruction, repair or replacement of the damaged or destroyed portion of the System or Project. The Recipient must begin such reconstruction, repair or replacement as expeditiously as possible, and must pay out of such net proceeds all costs and expenses in connection with such reconstruction, repair or replacement so that the same must be completed and the System and Project must be free and clear of all claims and liens. Recipient agrees that for any policy of insurance concerning or covering the construction of the Project, it will cause, and will require its contractors and subcontractors to cause, a certificate of insurance to be issued showing the State Water Board, its officers, agents, employees, and servants as additional insured; and must provide the Division with a copy of all such certificates prior to the commencement of construction of the Project.

15. Notice Events. Upon the occurrence of any of the following events, the Recipient must notify the Division's Deputy Director and Party Contacts by phone and email within the time specified below:

    a. The Recipient must notify the Division within 24 hours by phone at (916) 327-9978 and by email to DrinkingWaterSRF@waterboards.ca.gov of any discovery of any potential tribal cultural resource and/or archaeological or historical resource. Should a potential tribal cultural resource and/or archaeological or historical resource be discovered during construction or Project implementation, the Recipient must ensure that all work in the area of the find will cease until a qualified archaeologist has evaluated the situation and made recommendations regarding preservation of the resource, and the Division has determined what actions should be taken to protect and preserve the resource. The Recipient must implement appropriate actions as directed by the Division.

    b. The Recipient must notify the Division promptly of the occurrence of any of the following events:

        i. Bankruptcy, insolvency, receivership or similar event of the Recipient, or actions taken in anticipation of any of the foregoing;

        ii. Change of ownership of the Project (no change of ownership may occur without written consent of the Division);

        iii. Loss, theft, damage, or impairment to Project;

        iv. Events of Default, except as otherwise set forth in this section;

v. A proceeding or action by a public entity to acquire the Project by power of eminent domain.

vi. Any litigation pending or threatened with respect to the Project or the Recipient's technical, managerial or financial capacity or the Recipient's continued existence;

vii. Consideration of dissolution, or disincorporation;

viii. Enforcement actions by or brought on behalf of the State Water Board or Regional Water Board.

ix. The discovery of a false statement of fact or representation made in this Agreement or in the application to the Division for this funding, or in any certification, report, or request for reimbursement made pursuant to this Agreement, by the Recipient, its employees, agents, or contractors;

x. Any substantial change in scope of the Project. The Recipient must undertake no substantial change in the scope of the Project until prompt written notice of the proposed change has been provided to the Division and the Division has given written approval for the change;

xi. Any circumstance, combination of circumstances, or condition, which is expected to or does delay Completion of Construction for a period of ninety (90) days or more;

xii. Any Project monitoring, demonstration, or other implementation activities required in this Agreement;

xiii. Any public or media event publicizing the accomplishments and/or results of this Agreement and provide the opportunity for attendance and participation by state representatives with at least ten (10) working days' notice to the Division;

xiv. Any event requiring notice to the Division pursuant to any other provision of this Agreement.

xv. Completion of work on the Project.

xvi. The Recipient must promptly notify the Division and Party Contacts of cessation of all major construction work on the Project where such cessation of work is expected to or does extend for a period of thirty (30) days or more;

xvii. The Recipient must promptly notify the Division and Party Contacts of the discovery of any unexpected endangered or threatened species, as defined in the federal Endangered Species Act. Should a federally protected species be unexpectedly encountered during implementation of the Project, the Recipient agrees to promptly notify the Division. This notification is in addition to the Recipient's obligations under the federal Endangered Species Act;

xviii. The Recipient must promptly notify the Division and Party Contacts of Completion of Construction, and Project Completion;

xix. The Recipient must promptly notify the Division and Party Contacts of the award of the prime construction contract for the Project; and the Recipient must promptly notify the Division and Party Contacts of Initiation of construction of the Project.

xx. The occurrence of a material breach or event of default under any Recipient obligation that results in the acceleration of principal or interest or otherwise requires immediate prepayment, repurchase or redemption.

xxi. [RESERVED].

16. Continuous Use of Project; No Lease, Sale, Transfer of Ownership, or Disposal of Project. The Recipient agrees that, except as provided in this Agreement, it will not abandon, substantially discontinue use of, lease, sell, transfer ownership of, or dispose of all or a significant part or portion of the Project during the Useful Life of the Project without prior written approval of the Division. Such approval may be conditioned as determined to be appropriate by the Division, including a condition requiring repayment of all disbursed Project Funds or all or any portion of all remaining funds covered by this Agreement together with accrued interest and any penalty assessments that may be due.

17. State Cross-Cutters. Recipient represents that, as applicable, it complies and covenants to maintain compliance with the following for the term of the Agreement:

    a) The California Environmental Quality Act (CEQA), as set forth in Public Resources Code 21000 et seq. and in the CEQA Guidelines at Title 14, Division 6, Chapter 3, Section 15000 et seq.

    b) Water Conservation requirements, including regulations in Division 3 of Title 23 of the California Code of Regulations.

    c) Monthly Water Diversion Reporting requirements, including requirements set forth in Water Code section 5103.

    d) Public Works Contractor Registration with Department of Industrial Relations requirements, including requirements set forth in Sections 1725.5 and 1771.1 of the Labor Code.

    e) Volumetric Pricing & Water Meters requirements, including the requirements of Water Code sections 526 and 527.

    f) Urban Water Management Plan requirements, including the Urban Water Management Planning Act (Water Code, § 10610 et seq.).

    g) Urban Water Demand Management requirements, including the requirements of Section 10608.56 of the Water Code.

    h) Delta Plan Consistency Findings requirements, including the requirements of Water Code section 85225 and California Code of Regulations, title 23, section 5002.

    i) Agricultural Water Management Plan Consistency requirements, including the requirements of Water Code section 10852.

    j) Charter City Project Labor Requirements, including the requirements of Labor Code section 1782 and Public Contract Code section 2503.

    k) The Recipient agrees that it will, at all times, comply with and require its contractors and subcontractors to comply with directives or orders issued pursuant to Division 7 of the Water Code.

18. Financial Management Systems. The Recipient must comply with federal standards for financial management systems. The Recipient agrees that, at a minimum, its fiscal control and accounting procedures will be sufficient to permit preparation of reports required by the federal government and tracking of Project funds to a level of expenditure adequate to establish that such funds have not been

used in violation of federal or state law or the terms of this Agreement. To the extent applicable, the Recipient is bound by, and must comply with, the provisions and requirements of the federal Single Audit Act of 1984 and 2 CFR Part 200, subpart F, and updates or revisions, thereto.

19. Access and Inspection. In addition to the obligations set forth in section 2 of the General Terms and Conditions incorporated in Exhibit C of this Agreement, the Recipient must ensure that the United States Environmental Protection Agency, the Office of Inspector General, any member of Congress, or any authorized representative of the foregoing, will have safe and suitable access to the Project site at all reasonable times during the term of the Agreement.

20. Fraud, Waste, and Abuse. The Recipient shall prevent fraud, waste, and the abuse of Project Funds, and shall cooperate in any investigation of such activities that are suspected in connection with this Agreement. The Recipient understands that discovery of any evidence of misrepresentation or fraud related to reimbursement requests, invoices, proof of payment of invoices, or other supporting information, including but not limited to double or multiple billing for time, services, or any other eligible cost, may result in referral to the Attorney General's Office or the applicable District Attorney's Office for appropriate action. The Recipient further understands that any suspected occurrences of false claims, misrepresentation, fraud, forgery, theft or any other misuse of Project Funds may result in withholding of reimbursements and/or the termination of this Agreement requiring the immediate repayment of all funds disbursed hereunder.

21. Disputes. The Recipient must continue with the responsibilities under this Agreement during any dispute. The Recipient may, in writing, appeal a staff decision within 30 days to the Deputy Director of the Division or designee, for a final Division decision. The Recipient may appeal a final Division decision to the State Water Board within 30 days. The Office of the Chief Counsel of the State Water Board will prepare a summary of the dispute and make recommendations relative to its final resolution, which will be provided to the State Water Board's Executive Director and each State Water Board Member. Upon the motion of any State Water Board Member, the State Water Board will review and resolve the dispute in the manner determined by the State Water Board. Should the State Water Board determine not to review the final Division decision, this decision will represent a final agency action on the dispute. This provision does not preclude consideration of legal questions, provided that nothing herein shall be construed to make final the decision of the State Water Board, or any official or representative thereof, on any question of law. This section relating to disputes does not establish an exclusive procedure for resolving claims within the meaning of Government Code sections 930 and 930.4.

22. Additional Representations and Warranties. The Recipient makes the following representations and warranties:

    a. [RESERVED].

    b. The Recipient has not made any untrue statement of a material fact in its application for this financial assistance, or omitted to state in its application, a material fact that makes the statements in its application not misleading.

    c. The Recipient agrees to fulfill all assurances, declarations, representations, and commitments in its application, accompanying documents, and communications filed in support of its request for funding under this Agreement.

    d. The execution, delivery, and performance by Recipient of this Agreement, including all incorporated documents, do not violate any provision of any law or regulation in effect as of the date set forth on the first page hereof, or result in any breach or default under any contract, obligation, indenture, or other instrument to which Recipient is a party or by which Recipient is bound as of the date set forth on the Cover Page.

e. Except as set forth in this paragraph, there are, as of the date of execution of this Agreement by the Recipient, no pending or, to Recipient's knowledge, threatened actions, claims, investigations, suits, or proceedings before any governmental authority, court, or administrative agency which materially affect the financial condition or operations of the Recipient, the Revenues, and/or the Project.

f. There are no proceedings, actions, or offers by a public entity to acquire by purchase or the power of eminent domain any of the real or personal property related to or necessary for the Project.

g. The Recipient is duly organized and existing and in good standing under the laws of the State of California. Recipient must at all times maintain its current legal existence and preserve and keep in full force and effect its legal rights and authority. Within the preceding ten years, the Recipient has not failed to demonstrate compliance with state or federal audit disallowances.

h. Any financial statements or other financial documentation of Recipient previously delivered to the State Water Board as of the date(s) set forth in such financial statements or other financial documentation: (a) are materially complete and correct; (b) present fairly the financial condition of the Recipient; and (c) have been prepared in accordance with GAAP. Since the date(s) of such financial statements or other financial documentation, there has been no material adverse change in the financial condition of the Recipient, nor have any assets or properties reflected on such financial statements or other financial documentation been sold, transferred, assigned, mortgaged, pledged or encumbered, except as previously disclosed in writing by Recipient and approved in writing by the State Water Board.

i. The Recipient is current in its continuing disclosure obligations associated with its material debt, if any.

j. The Recipient has no conflicting or material obligations, except as set forth in this paragraph.

k. The Recipient legally possesses all real property rights necessary for the purposes of this Agreement, not subject to third party revocation, which rights extend at least to the Records Retention End Date of this Agreement, except as set forth in this paragraph.

l. The Recipient and its principals, to the best of the Recipient's knowledge and belief, are not presently debarred, suspended, proposed for debarment, declared ineligible, or otherwise excluded from participation in any work overseen, directed, funded, or administered by the State Water Board program for which this grant funding is authorized; nor have they engaged or permitted the performance of services covered by this Agreement from parties that are debarred or suspended or otherwise excluded from or ineligible for participation in any work overseen, directed, funded, or administered by the State Water Board program for which this grant funding is authorized.

m. The Recipient possesses all water rights necessary for this Project.

23. Federal SRF Requirements. The Recipient acknowledges, warrants compliance with, and covenants to continuing compliance with the following federal terms and conditions for the Useful Life of the Project:

a. Unless the Recipient has obtained a waiver from USEPA on file with the State Water Board or unless this Project is not a project for the construction, alteration, maintenance or repair of a public water system or treatment work, the Recipient shall not purchase "iron and steel products" produced outside of the United States on this Project. Unless the Recipient has obtained a waiver from USEPA on file with the State Water Board or unless this Project is not a project for the construction, alteration, maintenance or repair of a public water system or treatment work, the

Recipient hereby certifies that all “iron and steel products” used in the Project were or will be produced in the United States. For purposes of this section, the term "iron and steel products" means the following products made primarily of iron or steel: lined or unlined pipes and fittings, manhole covers and other municipal castings, hydrants, tanks, flanges, pipe clamps and restraints, valves, structural steel, reinforced precast concrete, and construction materials. “Steel” means an alloy that includes at least 50 percent iron, between .02 and 2 percent carbon, and may include other elements.

b. The Recipient must include in full the Wage Rate Requirements (Davis-Bacon) language incorporated by reference in Section 2 of this Agreement in all construction contracts and subcontracts.

c. The Recipient shall notify the State Water Board and the USEPA contact of public or media events publicizing the accomplishment of significant events related to this Project and provide the opportunity for attendance and participation by federal representatives with at least ten (10) working days’ notice.

d. The Recipient shall comply with applicable EPA general terms and conditions found at http://www.epa.gov/ogd.

e. No Recipient may receive funding under this Agreement unless it has provided its DUNS number to the State Water Board.

f. [RESERVED]

g. The Recipient represents and warrants that it and its principals are not excluded or disqualified from participating in this transaction as such terms are defined in Parts 180 and 1532 of Title 2 of the Code of Federal Regulations (2 CFR). If the Recipient is excluded after execution of this Agreement, the Recipient shall notify the Division within ten (10) days and shall inform the Division of the Recipient’s exclusion in any request for amendment of this Agreement. The Recipient shall comply with Subpart C of Part 180 of 2 CFR, as supplemented by Subpart C of Part 1532 of 2 CFR. Such compliance is a condition precedent to the State Water Board’s performance of its obligations under this Agreement. When entering into a covered transaction as defined in Parts 180 and 1532 of 2 CFR, the Recipient shall require the other party to the covered transaction to comply with Subpart C of Part 180 of 2 CFR, as supplemented by Subpart C of Part 1532 of 2 CFR.

h. To the extent applicable, the Recipient shall disclose to the State Water Board any potential conflict of interest consistent with USEPA’s Final Financial Assistance Conflict of Interest Policy at https://www.epa.gov/grants/epas-final-financial-assistance-conflict-interest-policy. A conflict of interest may result in disallowance of costs.

i. USEPA and the State Water Board have the right to reproduce, publish, use and authorize others to reproduce, publish and use copyrighted works or other data developed under this assistance agreement.

j. Where an invention is made with Project Funds, USEPA and the State Water Board retain the right to a worldwide, nonexclusive, nontransferable, irrevocable, paid-up license to practice the invention owned by the Recipient. The Recipient must utilize the Interagency Edison extramural invention reporting system at http://iEdison.gov and shall notify the Division when an invention report, patent report, or utilization report is filed.

k. The Recipient agrees that any reports, documents, publications or other materials developed for public distribution supported by this Agreement shall contain the Disclosure statement set forth in Exhibit A.

l. The Recipient acknowledges that it is encouraged to follow guidelines established under Section 508 of the Rehabilitation Act, codified at 36 CFR Part 1194, with respect to enabling individuals with disabilities to participate in its programs supported by this Project.

m. The Recipient, its employees, contractors and subcontractors and their employees warrants that it will not engage in severe forms of trafficking in persons, procure a commercial sex act during the term of this Agreement, or use forced labor in the performance of this Agreement. The Recipient must include this provision in its contracts and subcontracts under this Agreement. The Recipient must inform the State Water Board immediately of any information regarding a violation of the foregoing. The Recipient understands that failure to comply with this provision may subject the State Water Board to loss of federal funds. The Recipient agrees to compensate the State Water Board for any such funds lost due to its failure to comply with this condition, or the failure of its contractors or subcontractors to comply with this condition. The State Water Board may unilaterally terminate this Agreement if the Recipient that is a private entity is determined to have violated the foregoing.

n. The Recipient certifies to the best of its knowledge and belief that:

    i. No federal appropriated funds have been paid or will be paid, by or on behalf of the Recipient, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.
    ii. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress in connection with this Agreement, the Recipient shall complete and submit Standard Form-LLL, “Disclosure Form to Report Lobbying,” in accordance with its instructions, and notify the State Water Board.
    iii. The Recipient shall require this certification from all parties to any contract or agreement that the Recipient enters into and under which the Recipient incurs costs for which it seeks disbursements under this Agreement.

o. The Recipient must comply with the following federal non-discrimination requirements:

    i. Title VI of the Civil Rights Act of 1964, which prohibits discrimination based on race, color, and national origin, including limited English proficiency (LEP).
    ii. Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination against persons with disabilities.
    iii. The Age Discrimination Act of 1975, which prohibits age discrimination.
    iv. Section 13 of the Federal Water Pollution Control Act Amendments of 1972, which prohibits discrimination on the basis of sex.
    v. 40 CFR Part 7, as it relates to the foregoing.
    vi. Executive Order 13798, including, to the greatest extent practicable and to the extent permitted by law, the requirement to respect and protect the freedom of persons and organizations to engage in political and religious speech
    vii. All applicable federal civil rights regulations, including statutory and national policy requirements (2 CFR section 200.300).

p. Executive Order No. 11246. The Recipient shall include in its contracts and subcontracts related to the Project the following provisions:

"During the performance of this contract, the contractor agrees as follows:"(a) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

"(b) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

"(c) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under Section 202 of Executive Order No. 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

"(d) The contractor will comply with all provisions of Executive Order No. 11246 of Sept. 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

"(e) The contractor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

"(f) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be cancelled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of Sept 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

"(g) The contractor will include the provisions of Paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order No. 11246 of Sept. 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, That in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States."

q. The Recipient agrees to comply with the requirements of USEPA's Program for Utilization of Small, Minority and Women's Business Enterprises as set forth in this Agreement.

r. Procurement Prohibitions under Section 306 of the Clean Air Act and Section 508 of the Clean Water Act, including Executive Order 11738, Administration of the Clean Air Act and the Federal Water Pollution Control Act with Respect to Federal Contracts, Grants, or Loans; 42 USC § 7606; 33 USC § 1368. Except where the purpose of this Agreement is to remedy the cause of the violation, the Recipient may not procure goods, services, or materials from suppliers excluded under the federal System for Award Management: http://www.sam.gov/ .

s. Uniform Relocation and Real Property Acquisition Policies Act, Pub. L. 91-646, as amended; 42 USC §§4601-4655. The Recipient must comply with the Act's implementing regulations at 49 CFR 24.101 through 24.105.

t. The Recipient agrees that if its network or information system is connected to USEPA networks to transfer data using systems other than the Environmental Information Exchange Network or USEPA's Central Data Exchange, it will ensure that any connections are secure.

u. All geospatial data created pursuant to this Agreement that is submitted to the State Water Board for use by USEPA or that is submitted directly to USEPA must be consistent with Federal Geographic Data Committee endorsed standards. Information on these standards may be found at www.fgdc.gov.

v. If the Recipient is a water system that serves 500 or fewer persons, the Recipient represents that it has considered publicly-owned wells as an alternative drinking water supply.

w. The Recipient represents that it is not a corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability; and it is not a corporation that was convicted of a felony criminal violation under a Federal law within the preceding 24 months.

x. The Recipient agrees to immediately notify the Project Manager in writing about any allegation of research misconduct involving research activities that are supported in whole or in part with EPA funds under this Project, including fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results, or ordering, advising, or suggesting that subordinates engage in research misconduct.

y. The Recipient agrees to comply with, and require all contractors and subcontractors to comply with, EPA's Scientific Integrity Policy, available at https://www.epa.gov/osa/policy-epa-scientific-integrity, when conducting, supervising, and communicating science and when using or applying the results of science. For purposes of this condition scientific activities include, but are not limited to, computer modelling, economic analysis, field sampling, laboratory experimentation, demonstrating new technology, statistical analysis, and writing a review article on a scientific issue.

z. The Recipient shall not suppress, alter, or otherwise impede the timely release of scientific findings or conclusions; intimidate or coerce scientists to alter scientific data, findings, or professional opinions or exert non-scientific influence on scientific advisory boards; knowingly misrepresent, exaggerate, or downplay areas of scientific uncertainty; or otherwise violate the EPA's Scientific Integrity Policy. The Recipient must refrain from acts of research misconduct, including publication or reporting, as described in EPA's Policy and Procedures for Addressing Research Misconduct, Section 9.C, and must ensure scientific findings are generated and

disseminated in a timely and transparent manner, including scientific research performed by contractors and subcontractors.

aa. The Recipient agrees to comply with the Animal Welfare Act of 1966 (7 USC 2131-2156). Recipient also agrees to abide by the "U.S. Government Principles for the Utilization and Care of Vertebrate Animals used in Testing, Research, and Training," available at http://grants.nih.gov/grants/olaw/references/phspol.htm#USGovPrinciples.

bb. The Recipient certifies that no Project Funds will be used on:

i. Video surveillance or telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities), telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities);

ii. Telecommunications or video surveillance services produced by such entities;

iii. Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of the National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country; or

iv. Other telecommunications or video surveillance services or equipment in violation of 2 CFR 200.216.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Butterfield Stage Corridor Mitigated Negative Declaration Public Hearing Continuation

SOURCE: Community Development

COMMENT: The City is proposing the development of a non-motorized transportation facility known as the Butterfield Stage Corridor to provide safe, improved access to education, retail opportunities, job centers, housing, and the Transit Center. The Butterfield Stage Corridor will utilize approximately nine miles of City-owned former Union Pacific Railroad right of way between Teapot Dome Avenue to the south and Avenue 196 in Strathmore to the north. The project will consist of a Class 1, twelve (12) foot paved, non-motorized multi-use path that, within city limits, will include amenities such as solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. Portions of the path that are outside of city limits, would still include the following amenities: solar lighting, drought tolerant landscaping and trash receptacles. The path will meander through the width of the right of way in a manner best suited to avoid irregularities of grade and to provide space for the amenities. The project will facilitate the achievement of General Plan Implementation Policy PSCF-I-14, to "develop a safe and efficient trail network throughout the City that links parks and other key City destinations."

The City Council opened the Public Hearing for consideration of a Mitigated Negative Declaration for the project on August 17, 2021. The Public Hearing was continued to the meeting of October 5, 2021, to provide adequate time to address a comment letter received from the San Joaquin Valley Unified Air Pollution Control District (SJVAPCD) during the comment period. After consultation with the SJVAPCD, a new letter was received on August 23, 2021. The comment letter provided by the SJVAPCD as well as responses to each comment are attached for reference. The comments provided did not result in changes to the Initial Study/Mitigated Negative Declaration (IS/MND). No comments received identified a new unavoidable significant affect, nor did they result in a finding that the proposed mitigation measures in the IS/MND will not reduce potential affects to less than significant. Accordingly, pursuant to California Environmental Quality Act (CEQA) Guidelines § 15073.5, recirculation of the IS/MND is not required.

RECOMMENDATION: That the City Council:
1. Adopt the draft Resolution approving a Mitigated Negative

Declaration of environmental impact; and
2. Direct staff to carryout the development of the Butterfield Stage Corridor Project.

Chapter 1 Introduction

Provost & Pritchard Consulting Group (Provost & Pritchard) has prepared this Initial Study/Mitigated Negative Declaration (IS/MND) on behalf of the City of Porterville to address the environmental effects of the City-proposed Butterfield Stage Corridor Project (Project). This document has been prepared in accordance with the California Environmental Quality Act (CEQA), Public Resources Code Section 21000 *et seq*. The District is the CEQA lead agency for this proposed Project.

The site and the proposed Project are described in detail in the **Chapter 2 Project Description**.

1.1 Regulatory Information

An Initial Study (IS) is a document prepared by a lead agency to determine whether a project may have a significant effect on the environment. In accordance with California Code of Regulations Title 14 (Chapter 3, Section 15000, *et seq*)-- also known as the CEQA Guidelines--Section 15064 (a)(1) states that an environmental impact report (EIR) must be prepared if there is substantial evidence in light of the whole record that the proposed project under review may have a significant effect on the environment and should be further analyzed to determine mitigation measures or project alternatives that might avoid or reduce project impacts to less than significant levels. A negative declaration (ND) may be prepared instead if the lead agency finds that there is ***no*** substantial evidence in light of the whole record that the project may have a significant effect on the environment. An ND is a written statement describing the reasons why a proposed project, not otherwise exempt from CEQA, would not have a significant effect on the environment and, therefore, why it would not require the preparation of an EIR (CEQA Guidelines Section 15371). According to CEQA Guidelines Section 15070, a ND or *mitigated* ND shall be prepared for a project subject to CEQA when either:

a. The IS shows there is no substantial evidence, in light of the whole record before the agency, that the proposed project may have a significant effect on the environment, or

b. The IS identified potentially significant effects, but:

    1. Revisions in the project plans or proposals made by or agreed to by the applicant before the proposed MND and IS is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur is prepared, and

    2. There is no substantial evidence, in light of the whole record before the agency, that the proposed project *as revised* may have a significant effect on the environment.

1.2 Document Format

This IS/MND contains four chapters and four appendices, **Chapter 1 Introduction**, provides an overview of the Project and the CEQA process. **Chapter 2 Project Description**, provides a detailed description of Project components and objectives. **Chapter 3 Impact Analysis**, presents the CEQA checklist and environmental analysis for all impact areas, mandatory findings of significance, and feasible mitigation measures. If the Project does not have the potential to significantly impact a given issue area, the relevant section provides a brief discussion of the reasons why no impacts are expected. If the Project could have a potentially significant impact on a resource, the issue area discussion provides a description of potential impacts, and appropriate mitigation measures and/or permit requirements that would reduce those impacts to a less than significant level. **Chapter 3** concludes with the Lead Agency's determination based upon this initial evaluation. **Chapter 4 Mitigation Monitoring and Reporting Program** (MMRP), provides the proposed mitigation measures, implementation timelines, and the entity/agency responsible for ensuring implementation.

The CalEEMod Output Files, Biological Evaluation Report, Cultural Resources Information, a Phase I Environmental Site Assessment Report, and a Pedestrian Bridge Foundation Type Alternatives Analysis Report are provided as technical **Appendix A, Appendix B, Appendix C, Appendix D** and **Appendix E** respectively, at the end of this document.

Chapter 2 Project Description

2.1 Project Background and Objectives

2.1.1 Project Title

City of Porterville Butterfield Stage Corridor Project (Project)

2.1.2 Lead Agency/Project Proponent Name and Address

The City of Porterville
291 North Main Street
Porterville, CA 93257

2.1.3 Contact Person and Phone Number

Lead Agency Contact
City of Porterville Community Development
Jason Ridenour, Community Development Director
(559)782-7460

CEQA Consultant
Provost & Pritchard Consulting Group
Dawn Marple, Principal Planner
(559) 636-1166

2.1.4 Project Location

The Project is located within the City of Porterville California, approximately 241 miles south of Sacramento and 50 miles north of Bakersfield (see **Figure 2-1** and **Figure 2-2**). The proposed site of Project runs generally north and south across the entire City of Porterville, east of State Route (SR) 65, from Tea Pot Dome Avenue/Avenue 128 to the south and Avenue 196 in Strathmore (unincorporated community within the County of Tulare) at the northerly extent. The facility, a non-motorized use path 12 ft in width, is approximately nine miles long, consisting of four segments, and can be seen in **Figure 2-3**, **Figure 2-4**, **Figure 2-5**, and **Figure 2-6**.

2.1.5 Latitude and Longitude

The coordinates for the centroid of each segment is as follows:
Segment 1: 36° 2' 8.7", 119° 1' 6.096"
Segment 2: 36° 3' 57.096", 119° 1' 8.724"
Segment 3: 36° 5' 42.756", 119° 2' 6.072"
Segment 4: 36° 7' 45.588", 119° 3' 9.756"

2.1.6 General Plan Designation

A majority of the Project area is designated as road right-of-way, with small portions lying within land that is designated for Downtown Mixed Use, and Downtown Retail. Outside of the City limits, the Tulare County designations along the path are Misc. Rights of Way, Rural Agriculture (See **Figure 2-7**, **Figure 2-8**, **Figure 2-9** and **Figure 2-10**).

2.1.7 Zoning

City: D-PS (Public & Semi-Public), D-GC (General Commercial), D-MX (Mixed Use)
County: Not Zoned (Right-of-Way) (See **Figure 2-11**, **Figure 2-12**, **Figure 2-13** and **Figure 2-14**)

2.1.8 Description of Project

2.1.8.1 Project Description

The Project consists of the development of a transportation facility for non-motorized users to provide safe, improved access to education, retail opportunities, job centers, housing and the city's transit center. The facility will utilize roughly nine miles of former Union Pacific Railroad (UPRR) right-of-way now owned by the City between Tea Pot Dome Avenue/Avenue 128 to the south and Avenue 196 in Strathmore to the north. The Project's approximately nine mile area of potential effect (APE, the area that would be subject to ground-disturbing activities to construct the Project) is shown in **Figure 2-1**, and has a width of approximately 100 feet (112 acres total). The facility will consist of a Class 1 non-motorized multi-use path[1] that, within the city limit, would also include amenities such as solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. The Project would consist of a 12-foot paved path meandering through the width of the ROW in a manner best suited to avoid any irregularities of grade and to provide space for the amenities listed above. The project as proposed would facilitate the achievement of General Plan Implementation Policy PSCF-I-14[2], to "develop a safe and efficient trail network throughout the City that links parks and other key City destinations." Portions of the path that are outside of city limits, would still include the following amenities: solar lighting, drought tolerant landscaping and trash receptacles.

As part of the former UPRR right-of-way, there was a UPRR bridge which crossed the Tule River immediately west of the Main Street Bridge over the Tule River in the City of Porterville. The bridge was previously burned in a fire and the City had the superstructure removed, however the bridge foundation remains. The remaining substructure consists of a total of four concrete piers and a concrete abutment on the south side of the Tule River. Substructure elements are spaced at intervals of approximately 50-feet, resulting in a total distance of 200-feet between the northernmost pier and the abutment to the south. Based upon this information it appears that the northernmost approximately 130-feet of the railroad bridge consisted of timber trestle that was damaged in a fire and subsequently removed. It is assumed that the new bridge would construct new bridge foundations to support the superstructure instead of using the existing bridge foundations. The primary benefit of this approach is that it allows for removal of the existing piers which are within both the Central Valley Flood Protection Board (CVFPB) and Federal Emergency Management Agency (FEMA) floodways, and placing the new foundations outside of the main channel. To provide the required floodway width for the CVFPB and FEMA, this approach will consist of a three-span prefabricated steel truss with span lengths of 140'. This span configuration minimizes the number of piers within the floodways and potentially mitigations some of the permitting issues.

[1] Class 1 facilities are generally paved multi-use paths separated from motor vehicle traffic. Off-street routes are rarely constructed for the exclusive use of cyclists since other nonmotorized user types will also find such facilities attractive.
[2] Porterville General Plan. Parks, Schools and Community Facilities. http://www.ci.porterville.ca.us/depts/CommunityDevelopment/documents/Chapter5Parks_SchoolsandCommunityFacilities_000.pdf

2.1.8.2 Construction

Construction of the transportation facility for non-motorized users is anticipated to take approximately 48 months if funded as one comprehensive project. In the event the facility is funded in phases, phases would be defined to allow for 12-month construction periods, as much as feasible.

2.1.8.3 Operation and Maintenance

City staff from the Park and Recreation Department will handle the ongoing operation and maintenance of the facility.

2.1.9 Site and Surrounding Land Uses and Setting

As the facility runs through the City it is surrounded by many different land uses, including agricultural, industrial, residential and commercial. See Figure 2-7 through **Figure 2-10** and **Figure 2-11** through **Figure 2-14** for the general plan and zoning designations, respectively.

2.1.10 Other Public Agencies Whose Approval May Be Required

- San Joaquin Valley Air Pollution Control District (SJVAPCD)
- California Department of Fish & Wildlife (CDFW)
- United States Army Corps of Engineers (USACE)

2.1.11 Consultation with California Native American Tribes

Public Resources Code Section 21080.3.1, *et seq. (codification of AB 52, 2013-14)*) requires that a lead agency, within 14 days of determining that it will undertake a project, must notify in writing any California Native American Tribe traditionally and culturally affiliated with the geographic area of the project if that Tribe has previously requested notification about projects in that geographic area. The notice must briefly describe the project and inquire whether the Tribe wishes to initiate request formal consultation. Tribes have 30 days from receipt of notification to request formal consultation. The lead agency then has 30 days to initiate the consultation, which then continues until the parties come to an agreement regarding necessary mitigation or agree that no mitigation is needed, or one or both parties determine that negotiation occurred in good faith, but no agreement will be made.

The City of Porterville has received written correspondence from the Santa Rosa Rancheria Tachi Yokut Tribe pursuant to Public Resources Code Section 21080.3.1 requesting notification of all proposed projects. A formal notification letter was sent to the Tribe on April 21, 2021. No correspondence requesting further consultation has been received from the Tribe in return.

Chapter 3 Impact Analysis

3.1 Environmental Factors Potentially Affected

As indicated by the discussions of existing and baseline conditions, and impact analyses that follow in this Chapter, environmental factors not checked below would have no impacts or less than significant impacts resulting from the project. Environmental factors that are. checked below would have potentially significant impacts resulting from the project. Mitigation measures are recommended for each of the potentially significant impacts that would reduce the impact to less than significant.

☐ Aesthetics	☐ Agriculture & Forestry Resources	☐ Air Quality
☒ Biological Resources	☒ Cultural Resources	☐ Energy
☐ Geology/Soils	☐ Greenhouse Gas Emissions	☒ Hazards & Hazardous Materials
☐ Hydrology/Water Quality	☐ Land Use/Planning	☐ Mineral Resources
☐ Noise	☐ Population/Housing	☐ Public Services
☐ Recreation	☐ Transportation	☒ Tribal Cultural Resources
☐ Utilities/Service Systems	☐ Wildfire	☐ Mandatory Findings of Significance

The analyses of environmental impacts here in are separated into the following categories:

Potentially Significant Impact. This category is applicable if there is substantial evidence that an effect may be significant, and no feasible mitigation measures can be identified to reduce impacts to a less than significant level. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

Less than Significant with Mitigation Incorporated. This category applies where the incorporation of mitigation measures would reduce an effect from a "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measure(s), and briefly explain how they would reduce the effect to a less than significant level (mitigation measures from earlier analyses may be cross-referenced).

Less than Significant Impact. This category is identified when the project would result in impacts below the threshold of significance, and no mitigation measures are required.

No Impact. This category applies when a project would not create an impact in the specific environmental issue area. "No Impact" answers do not require a detailed explanation if they are adequately supported by the information sources cited by the lead agency, which show that the impact does not apply to the specific project (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis)

3.2 Aesthetics

Table 3-1. Aesthetics Impacts

Aesthetics Impacts				
Except as provided in Public Resources Code Section 21099, would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a) Have a substantial adverse effect on a scenic vista?	☐	☐	☒	☐
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☐	☐	☒	☐
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☒	☐

3.2.1 Environmental Setting and Baseline Conditions

The City of Porterville is located in the southern portion of the San Joaquin Valley and sits at the base of the Sierra Nevada Mountains. Much of Porterville has views of the mountains and associated foothills to the east of the City and of surrounding urban development within the City and primarily agricultural landscapes beyond to the north, west and south. The Project site is located on the San Joaquin Valley floor in the City of Porterville, California.

The aesthetic character of the Project site and the surrounding area is a mix of urban, rural and agricultural uses. Most properties adjacent to the Project site within the City limits are developed with residential or commercial uses of varying intensity, while properties outside of the City limits are generally agriculture uses. **Figure 2-7**, **Figure 2-8**, **Figure 2-9** and **Figure 2-10** show all of the varying land uses along the approximately nine mile Project site.

There are no designated scenic resources within the City of Porterville, however eastward views to the Sierra Nevada foothills and mountains within the city are considered scenic vistas. The General Plan identifies the Tule River and Rocky Hill as prominent landmarks within the City and has adopted guiding policies around preserving these areas as open space. In addition, the General Plan considers the agricultural foundation of the City's development patterns, surrounding topography, and landscape important for both community identity, aesthetic value, and environmental quality.

3.2.2 Impact Assessment

The City of Porterville's General Plan EIR, certified in November of 2007, addresses thresholds for potential significant adverse effects on visual resources[3]. These thresholds state that a significant adverse effect on visual resources would occur in the event that a project would:

- Block panoramic views or views of significant landscape features or landforms as seen from public viewing areas;
- Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway;
- Substantially degrade the existing visual character or quality of the study area and its surroundings; or
- Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area.

a) Would the project have a substantial adverse effect on a scenic vista?

Less than Significant Impact. The Project area does not propose significant obstruction to the general public view of natural features, but would afford pedestrians and bicyclists opportunities for new vantage points for viewing the mountains and other surrounding landscapes and features. Accordingly, the Project would not have a substantial adverse effect on a scenic vista. Any impacts would be less than significant.

b) Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

No Impact. There are no identified scenic resources, trees, rock outcroppings, or historic buildings on or near the subject site. There are no state scenic highways within the Project's vicinity[4]. Therefore, the Project would have no impact on scenic resources such as trees and rock outcroppings, historic buildings, or state scenic highways.

c) In non-urbanized areas, would the project substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public view are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? and

d) Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Less than Significant Impact. The Project will introduce new sources of light and glare, by adding solar lights along the non-motorized multi-use path as well as controlled lighted road crossings. Any lighting would be designed to be hooded and directed downward in order to reduce effects from light and glare. The Project would traverse wide range and variety of adjacent land uses within the City, ranging from urban, rural, to agricultural, however, along the path there are various existing sources of light and glare. Lighting sources within the Project's vicinity provide for direction/way finding and security, as well as contributing visually to the developing landscape. Existing light sources within the Project's vicinity currently affect day and nighttime views in the Project area to a degree equal to or greater than the light sources proposed by the Project. Compliance with California Building Code (Title 24, California Code of Regulations) standards would ensure that light and glare impacts from the proposed project would be less than significant.

3.3 Agriculture and Forestry Resources

Table 3-2. Agriculture and Forest Impacts

Agriculture and Forest Impacts				
Would the project:	**Potentially Significant Impact**	**Less than Significant With Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☒	☐
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	☐	☐	☐	☒
d) Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒

3.3.1 Environmental Setting and Baseline Conditions

The Project non-motorized multi-use path is located along an approximately nine mile stretch of an abandoned railway line. Segments one and four of the path are located in a more rural/agriculture setting, while segments two and three are located in mostly urbanized portions of the City of Porterville. Surrounding uses are predominately commercial, residential, or agriculture.

In order to determine the status of the Project site as being within lands considered an agricultural resource, the California State Department of Conservation's (DOC) Farmland Mapping and Monitoring Program (FMMP) has been utilized. According to the FMMP, the Project site is located on mostly urban, built up land. It also is located on some Semi-Ag/Rural Commercial, Farmland of State Importance, Vacant or Disturbed Land, Farmland of Local Importance, Grazing Land, and Rural Residential land (**Figure 3-1**). The entire site encompasses an abandoned railway line. No farmland will be taken out of production as a result of the proposed Project.

Farmland Mapping and Monitoring Program (FMMP):

The California DOC's 2012 FMMP is a non-regulatory program that produces "Important Farmland" maps and statistical data used for monitoring conversion of California's agricultural resources to non-agricultural

uses. The maps are updated every two years with the use of a computer mapping system, aerial imagery, public review, and field reconnaissance. The Important Farmland maps identify eight land use categories, five of which are agriculture related: prime farmland, farmland of statewide importance, unique farmland, farmland of local importance, and grazing land – rated according to soil quality and irrigation status. Each is summarized below[5]:

• PRIME FARMLAND (P): Farmland with the best combination of physical and chemical features able to sustain long term agricultural production. This land has the soil quality, growing season, and moisture supply

needed to produce sustained high yields. Land must have been used for irrigated agricultural production at some time during the four years prior to the mapping date.

• FARMLAND OF STATEWIDE IMPORTANCE (S): Farmland similar to Prime Farmland but with minor shortcomings, such as greater slopes or less ability to store soil moisture.

Land must have been used for irrigated agricultural production at some time during the four years prior to the mapping date.

• UNIQUE FARMLAND (U): Farmland of lesser quality soils used for the production of the state's leading agricultural crops. This land is usually irrigated but may include non- irrigated orchards or vineyards as found in some climatic zones in California. Land must have been cropped at some time during the four years prior to the mapping date.

• FARMLAND OF LOCAL IMPORTANCE (L): Land of importance to the local agricultural economy as determined by each county's board of supervisors and a local advisory committee.

• GRAZING LAND (G): Land on which the existing vegetation is suited to the grazing of livestock. The minimum mapping unit for Grazing Land is 40 acres.

• URBAN AND BUILT-UP LAND (D): Land occupied by structures with a building density of at least 1 unit to 1.5 acres, or approximately 6 structures to a 10-acre parcel. This land is used for residential, industrial, commercial, institutional, public administrative purposes, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes.

• OTHER LAND (X): Land not included in any other mapping category. Common examples include low density rural developments; brush, timber, wetland, and riparian areas not suitable for livestock grazing; confined livestock, poultry or aquaculture facilities; strip mines, borrow pits; and water bodies smaller than 40 acres. Vacant and nonagricultural land surrounded on all sides by urban development and greater than 40 acres is mapped as Other Land.

•WATER (W): Perennial water bodies with an extent of at least 40 acres.

3.3.2 Impact Assessment

a) Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

Less than Significant Impact. The Project site is not designated Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) by the FMMP, as demonstrated in **Figure 3-1**. Prime Farmland can be

[5] California Department of Conservation. FMMP – Report and Statistics. https://www.conservation.ca.gov/dlrp/fmmp/Pages/Important-Farmland-Categories.aspx Accessed July 2020.

found directly adjacent to portions of segments three and four. The Project would not directly convert Prime Farmland. Therefore, the Project will have Less than Significant impact on Important Farmland.

b) Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. The Project site is not under a Williamson Act contract. The Project site consists primarily of existing right-of-way and land that was previously a railroad line. The Project site is not currently an agricultural use or zone district. Therefore, the proposed Project on the subject site will not affect existing agriculturally zoned or Williamson Act contract parcels. There would be no impact.

c) Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? and

d) Would the project result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. The Project is not within the vicinity of a forest as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g)). Therefore, the Project will not conflict with existing zoning for, or cause rezoning of, forest land nor result in the loss of forest land or conversion of forest land to non-forest use.

e) Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

No Impact. The Project consists of converting an abandoned rail line into a non-motorized multi-use path. The proposed Project will help to provide a transportation facility for non-motorized users. The path itself would consist of a 12-foot wide paved path meandering through the width of the ROW in a manner best suited to avoid any irregularities of grade. This path would not result in a conversion of farmland, or forest land. There would be no impact.

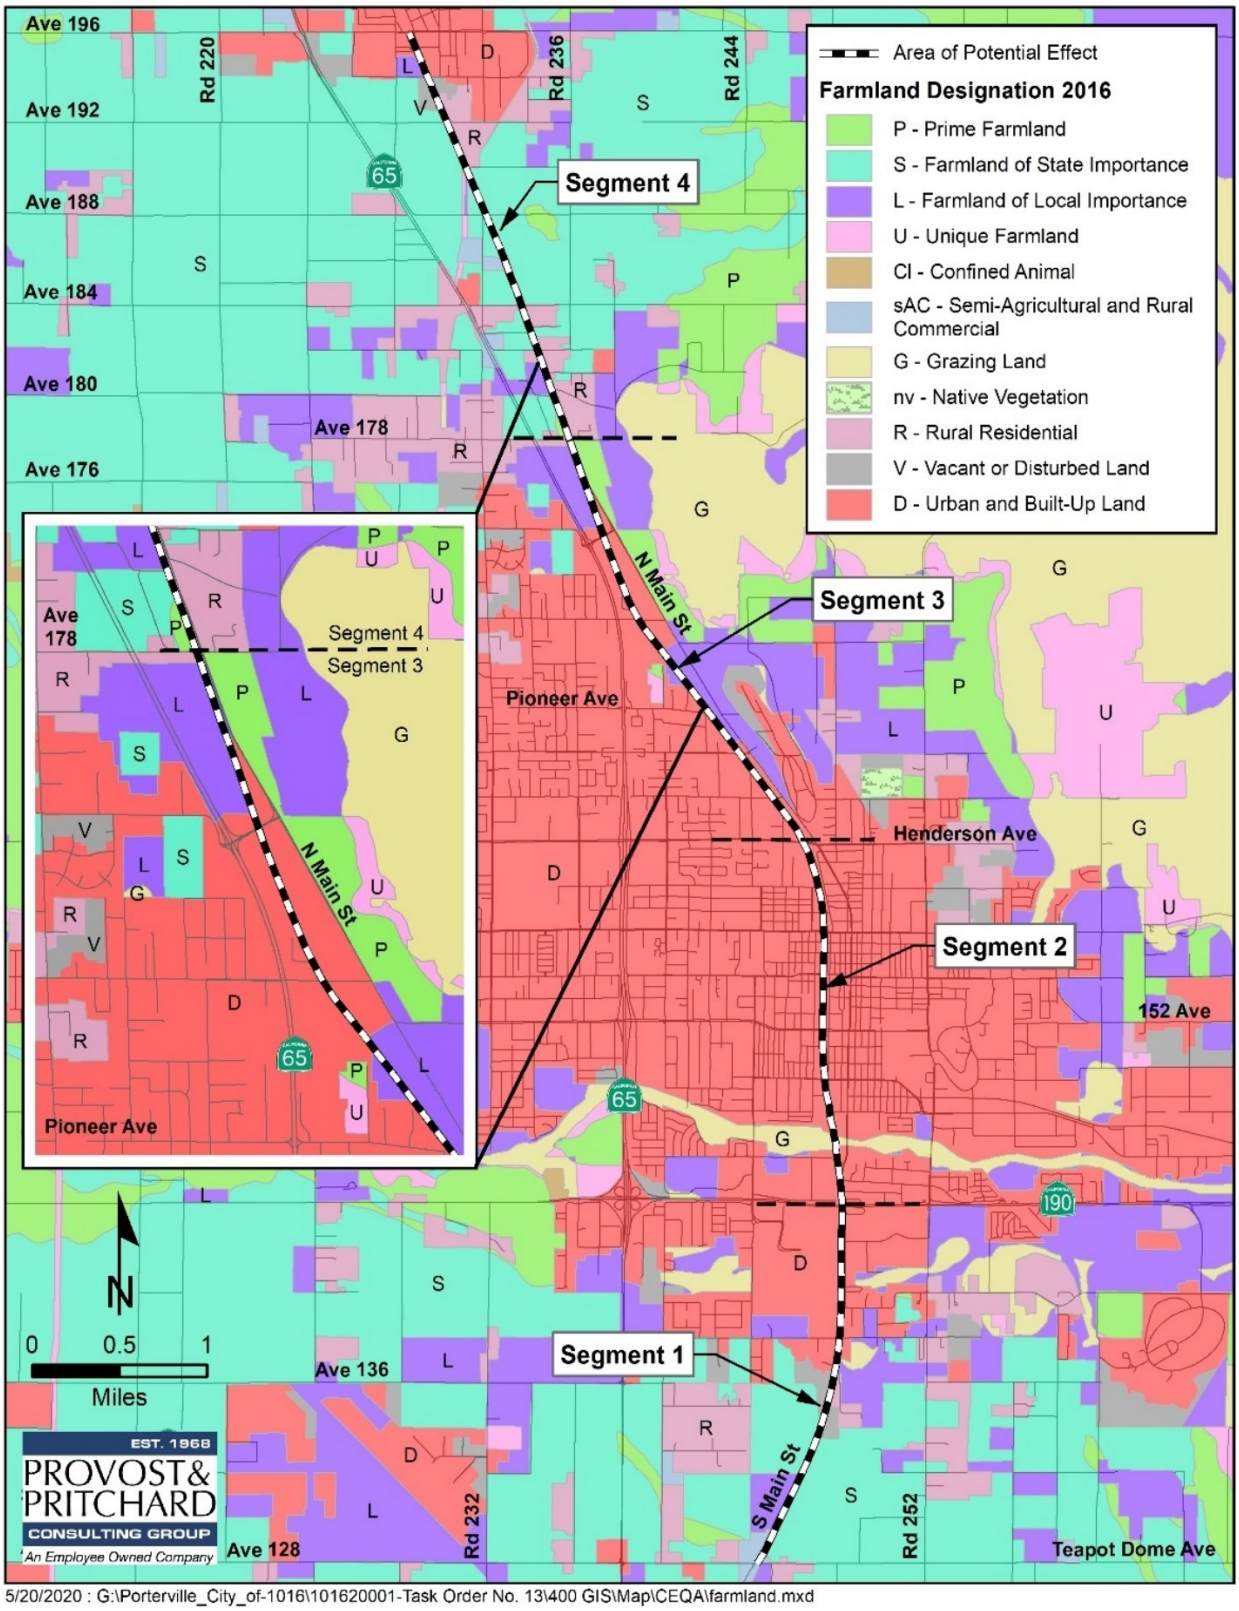

Figure 3-1. Farmland Designation Map

3.4 Air Quality

Table 3-3. Air Quality Impacts

Air Quality Impacts					
Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project:		**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a)	Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☒	☐
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☐	☐	☒	☐
c)	Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☒	☐
d)	Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	☐	☐	☐	☒

3.4.1 Environmental Setting and Baseline Conditions

The Project is located in the San Joaquin Valley Air Basin (SJVAB or air basin). The San Joaquin Valley Air Pollution Control District (SJVAPCD) provides Guidelines for Assessing and Mitigating Air Quality Impacts (GAMAQI) for quantification of emissions and evaluation of potential impacts to air resources[6] and Guidance for Land-Use Agencies in addressing greenhouse gas (GHG) Emission Impacts for New Projects under CEQA.[7]

3.4.1.1 Regulatory Attainment Designations

Under the California Clean Air Act (CCAA), the California Air Resources Board (CARB) is required to designate areas of the State as attainment, nonattainment, or unclassified with respect to applicable standards. An "attainment" designation for an area signifies that pollutant concentrations did not violate the applicable standard in that area. A "nonattainment" designation indicates that a pollutant concentration violated the applicable standard at least once, excluding those occasions when a violation was caused by an exceptional event, as defined in the criteria. Depending on the frequency and severity of pollutants exceeding applicable standards, the nonattainment designation can be further classified as serious nonattainment, severe nonattainment, or extreme nonattainment, with extreme nonattainment being the most severe of the classifications. An "unclassified" designation signifies that the data does not support either an attainment or nonattainment designation. The CCAA divides districts into moderate, serious, and severe air pollution categories, with increasingly stringent control requirements mandated for each category.

The EPA designates areas for ozone, CO, and NO_2 as "does not meet the primary standards," "cannot be classified," or "better than national standards." For SO_2, areas are designated as "does not meet the primary standards," "does not meet the secondary standards," "cannot be classified," or "better than national

[6] SJVAPCD GAMAQI https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMAQI.PDF. Accessed July 2020.
[7] Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA. http://www.valleyair.org/Programs/CCAP/12-17-09/3%20CCAP%20-%20FINAL%20LU%20Guidance%20-%20Dec%2017%202009.pdf Accessed September 2020.

standards." However, the CARB terminology of attainment, nonattainment, and unclassified is more frequently used. The EPA uses the same sub-categories for nonattainment status: serious, severe, and extreme. In 1991, EPA assigned new nonattainment designations to areas that had previously been classified as Group I, II, or III for PM_{10} based on the likelihood that they would violate national PM_{10} standards. All other areas are designated "unclassified."

The State and national attainment status designations pertaining to the SJVAB are summarized in **Appendix A**. The SJVAB is currently designated as a nonattainment area with respect to the State PM_{10} standard, ozone, and $PM_{2.5}$ standards. The SJVAB is designated nonattainment for the NAAQS 8-hour ozone and $PM_{2.5}$ standards. On September 25, 2008, the EPA re-designated the San Joaquin Valley to attainment status for the PM_{10} NAAQS and approved the PM_{10} Maintenance Plan.

Table 3-4. Summary of Ambient Air Quality Standards and Attainment Designation

Pollutant	Averaging Time	California Standards*		National Standards*	
		Concentration*	Attainment Status	Primary	Attainment Status
Ozone (O_3)	1-hour	0.09 ppm	Nonattainment/ Severe	–	No Federal Standard
	8-hour	0.070 ppm	Nonattainment	0.075 ppm	Nonattainment (Extreme)**
Particulate Matter (PM_{10})	AAM	20 µg/m^3	Nonattainment	–	Attainment
	24-hour	50 µg/m^3		150 µg/m^3	
Fine Particulate Matter ($PM_{2.5}$)	AAM	12 µg/m^3	Nonattainment	12 µg/m^3	Nonattainment
	24-hour	No Standard		35 µg/m^3	
Carbon Monoxide (CO)	1-hour	20 ppm	Attainment/ Unclassified	35 ppm	Attainment/ Unclassified
	8-hour	9 ppm		9 ppm	
	8-hour (Lake Tahoe)	6 ppm		–	
Nitrogen Dioxide (NO_2)	AAM	0.030 ppm	Attainment	53 ppb	Attainment/ Unclassified
	1-hour	0.18 ppm		100 ppb	
Sulfur Dioxide (SO_2)	AAM	–	Attainment	--	Attainment/ Unclassified
	24-hour	0.04 ppm		--	
	3-hour	–		0.5 ppm	
	1-hour	0.25 ppm		75 ppb	
Lead (Pb)	30-day Average	1.5 µg/m^3	Attainment	–	No Designation/ Classification
	Calendar Quarter	–		--	
	Rolling 3-Month Average	–		0.15 µg/m^3	
Sulfates (SO_4)	24-hour	25 µg/m^3	Attainment	No Federal Standards	
Hydrogen Sulfide (H_2S)	1-hour	0.03 ppm (42 µg/m^3)	Unclassified		
Vinyl Chloride (C_2H_3Cl)	24-hour	0.01 ppm (26 µg/m^3)	Attainment		
Visibility-Reducing Particle Matter	8-hour	Extinction coefficient: 0.23/km-visibility of 10 miles or more due to particles when the relative humidity is less than 70%.	Unclassified

3.4.2 Methodology of Determining the Significance of Air Quality Impacts

Conclusions in this Air Quality Impact Assessment rely on model calculations (CalEEMod version 2016.3.2), and information found in the Air Quality and Greenhouse Gas Emissions Report (**Appendix A**). The sections below detail these conclusions and recommendations and utilize its conclusions in the impact determinations.

To assist local jurisdictions in the evaluation of air quality impacts, the SJVAPCD published the GAMAQI. This guidance document includes recommended thresholds of significance to be used for the evaluation of short-term construction, long-term operational, odor, toxic air contaminant, and cumulative air quality impacts. Accordingly, the SJVAPCD-recommended thresholds of significance are used to determine whether implementation of the Project would result in a significant air quality impact. Projects that exceed these recommended thresholds would be considered to have a potentially significant impact to human health and welfare. The thresholds of significance are included in **Table 3-7** through **Table 3-8** to provide for a comparative significance determination.

Assessment of the significance of project air quality impacts may be considered on a regional or localized level. Determination of project impacts on achieving the goal of air quality plans and evaluating impacts related to emissions of criteria pollutants are considered on both regional and localized levels in this analysis. Evaluation of impacts to sensitive receptors considers the project's localized criteria pollutant emissions in this analysis. Sources of the project's localized criteria pollutant emissions would include: reactive organic gases (ROG), Nitrogen oxides (NO_x), $PM_{2.5}$, PM_{10}, CO, NO_2, and Toxic Air Contaminants (TACs) which include acetaldehyde, benzene, 1.3 butadiene, carbon tetrachloride, hexavalent chromium, paradichlorobenzene, formaldehyde, methylene chloride, perchloroethylene, and diesel particulate matter a complex mixture of substances.

3.4.2.1 Short-Term Construction-Generated Emissions

Short-term construction emissions associated with the Project were estimated using CalEEMod. The emissions modeling includes emissions generated by construction and grading equipment most commonly associated with the site work, equipment delivery, and vehicle, equipment, and worker fuel usage. Emissions were quantified based on anticipated construction schedules and construction equipment requirements that would occur over approximately 48 months. All remaining assumptions were based on the default parameters contained in the model. Modeling assumptions and output files are included in **Appendix A.**

The SJVAPCD is responsible for controlling emissions primarily from stationary sources. However, the SJVAPCD also coordinates with the APCD's eight county Councils of Government (COGs) or Metropolitan Planning Organizations (MPOs) that are responsible for regional transportation planning and funding programs. The COG and MPO Transportation Planning Programs are used by SJVAPCD in its responsibilities in developing, updating, and implementing air quality attainment plans for the air basin. The SJVAPCD has adopted ozone plans and particulate matter plans for purposes of controlling harmful emissions and achieving attainment of state and national attainment standards. A project that would exceed established thresholds for criteria pollutants would be considered to have a significant impact on the implementation of air quality plans and would also constitute a cumulatively considerable net increase of criteria pollutants for which the air basin is in non-attainment.

Construction of the Project is expected to begin after Project approval with full buildout completed in 2024. The results of the emissions modeling for the Project are presented in **Table 3-5.**

Table 3-5 Short-Term - Construction-Generated Emissions of Criteria Air Pollutants

Year	Annual Emissions (Tons/Year)				
	ROG	NO_X	CO	PM_{10}	$PM_{2.5}$
2021	0.4440	4.3849	2.8605	0.7849	0.5088
2022	0.4680	4.8860	3.5659	1.7814	0.8704
2023	0.3033	3.0063	2.8084	0.8949	0.3508
2024	0.0619	0.5685	0.8896	0.0350	0.0276
Maximum Annual Proposed Project Emissions:	**0.4680**	**4.8860**	**3.5659**	**1.7814**	**0.8704**
SJVAPCD Significance Thresholds:	***10***	***10***	***100***	***15***	***15***
Exceed SJVAPCD Thresholds?	***No***	***No***	***No***	***No***	***No***

3.4.2.2 Long-Term - Operational Emissions

The unmitigated long-term operational emissions for the Project are listed in **Table 3-6**. Operational emissions would occur over the lifetime of the Project and result from two main Project-specific sources: path maintenance, and motor vehicles (operations and maintenance crew) usage categorized as mobile sources in the table. Area source emissions are defined as emissions resulting from landscaping and painting. Energy source emissions would be from things on the site that require additional power. Completion of the Project is expected as early as 2024 and was used as the Project buildout modeling year as a conservative assumption. The SJVAPCD considers construction and operational assumptions separately when making significance determinations. Modeling assumptions and output files are included in **Appendix A**.

Table 3-6. Unmitigated Long-Term Operational Emissions

Source	Annual Emissions (Tons/Year)				
	ROG	NO_X	CO	PM_{10}	$PM_{2.5}$
Area	0.0460	<0.01	<0.01	0.00	0.00
Energy:	0.00	*0.00*	*0.00*	0.00	0.00
Mobile	0.00	*0.00*	*0.00*	0.00	0.00
Highest Operational Emissions Any Year	**0.0460**	**<0.01**	**<0.01**	**0.00**	**0.00**
SJVAPCD Significance Thresholds:	***10***	***10***	***100***	***15***	***15***
Exceed SJVAPCD Thresholds?	***No***	***No***	***No***	***No***	***No***

3.4.3 Screening Thresholds for Determining Impacts to Sensitive Receptors

Impacts to sensitive receptors would occur primarily during Project construction. Construction activities could produce short-term emissions that have the potential in large concentrations to contribute to cancer risk over a 70-year exposure period. The Air Quality and GHG reports (**Appendix A**) provide technical information on the types of pollutants that have the potential to affect sensitive receptors.

The SJVAB includes screening thresholds for identifying projects that need detailed analysis for localized impacts. Projects with on-site emission increases from construction activities that exceed the 100 pounds per day screening level of any criteria pollutant after compliance with Rule 9510 and implementation of all applicable mitigation measures would require preparation of an ambient air quality analysis. The criteria

pollutants of concern are NO_x, CO, PM_{10}, and $PM_{2.5}$. There is no localized emission standard for ROG and most types of ROG are not toxic and have no health-based standard, however, ROG was included for informational purposes only.

Table 3-7 lists the maximum daily air pollutant emissions generated by the Project during construction.

Table 3-7. Maximum Daily Air Pollutant Emissions During Construction

Maximum Daily Emissions by Year	Emissions (Pounds/Daily)				
	ROG	NO_X	CO	PM_{10}	$PM_{2.5}$
Construction 2021	3.9773	40.5438	22.0659	20.2596	11.8517
Construction 2022	3.7163	38.8897	29.6484	19.8276	11.4543
Construction 2023	3.4063	34.5568	28.6013	10.2631	4.9515
Construction 2024	1.0471	9.5523	15.0058	0.5925	0.4644
Maximum Daily Proposed Project Emissions:	**3.9773**	**40.5438**	**29.6484**	**20.2596**	**11.8517**
SJVAPCD Screening Thresholds	***100***	***100***	***100***	***100***	***100***

Operational emission would begin to accrue upon completion of the project. The Project is anticipated to be completed in 2024. **Table 3-8** lists the maximum daily air pollutant emissions generated by the Project during its operation.

Table 3-8. Maximum Daily Air Pollutant Emissions During Operation

Maximum Daily Emissions	Emissions (Pounds/Daily)				
	ROG	NO_X	CO	PM_{10}	$PM_{2.5}$
Area	0.2524	<0.01	0.0114	0.00	<0.01
Energy	0.00	0.00	0.00	0.00	0.00
Mobile	0.00	0.00	0.00	0.00	0.00
Total Daily Emissions	**0.2524**	**<0.01**	**0.0114**	**0.00**	**<0.01**
SJVAPCD Screening Thresholds	***100***	***100***	***100***	***100***	***100***
Exceed SJVAPCD Thresholds?	***No***	***No***	***No***	***No***	***No***

Table 3-7 and **Table 3-8** demonstrate the Project's impacts as evaluated against SJVAPCD screening thresholds for criteria pollutant emissions used to determine significance in accordance with health-based standards would not exceed and would be considerably below the significance thresholds

3.4.4 Impact Assessment

a) Would the project conflict with or obstruct implementation of the applicable air quality plan?

Less than Significant Impact. The CEQA Guidelines indicate that a significant impact would occur if the Project would conflict with or obstruct implementation of the applicable air quality plan. The GAMAQI does not provide specific guidance on analyzing conformity with the Air Quality Plan (AQP). Therefore, the Air Quality and GHG report (Appendix A) assumed the following criteria for determining Project consistency with the current AQPs:

1. Will the project result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations, or delay timely attainment of air quality standards or the interim emission reductions specified in the AQPs?

   Whether this criterion is met is determined by comparison of Project emissions to the regional and localized thresholds identified by the SJVAPCD for regional and local air pollutants.

2. Will the project comply with applicable control measures set forth in the AQPs?

   The primary control measures applicable to development projects in the SJVAPCD is the required compliance with *Regulation VIII-Fugitive PM_{10} Prohibitions* and *Rule 9510-Indirect Source Review*.

Regional air quality impacts and attainment of standards are the result of cumulative impacts of all emission sources within the air basin. Individual projects are generally not large enough to contribute measurably to an existing violation of air quality standards. Therefore, the cumulative impact of the Project is important because it is based on its cumulative contribution combined with one or more other closely related past, present, and reasonably foreseeable probably future projects emitting similar emissions. Because of the region's non-attainment status for ozone, $PM_{2.5}$, and $PM_{10,}$ if Project generated emission of either of the ozone precursor pollutants ROG, NO_x, PM_{10}, or $PM_{2.5}$ would exceed the SJVAPCD's significance thresholds, then the Project would be considered to contribute to violations of the applicable standards and conflict with the attainment plans. As demonstrated in **Table 3-5** for construction-generated emissions, and in **Table 3-6**, operational emissions of criteria pollutants would not exceed the SJVAPCD's significance thresholds. Therefore, the Project will not contribute to air quality violations in conflict with attainment plans.

As stated in No. 2 above, the AQP contains a number of control measures, including *Regulation VIII-Fugitive PM_{10} Prohibitions* and *Rule 9510-Indirect Source Review* which are applicable to the Project. Both of these are adopted by the SJVAPCD and constitute enforceable requirements with which the Project must comply. The Project is expected to comply with all applicable SJVAPCD rules and regulations; therefore, the Project complies with the criterion and would not conflict with or obstruct implementation of the applicable air quality attainment plans and the impact would be less than significant.

b) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less than Significant Impact. To result in a less than significant impact, the following criteria must be true:

1. Regional analysis: emission of non-attainment pollutants must be below the SJVAPCD's regional significance thresholds.

   This is an approach recommended by the SJVAPCD in its GAMAQI.

2. Summary of projections: the project must be consistent with current air quality attainment plans including control measures and regulations.

   This is an approach consistent with Section 15130(b) of the CEQA Guidelines.

3. Cumulative health impacts: the project must result in less than significant cumulative health effects from the non-attainment pollutants.

> This approach correlates the significance of the regional analysis with health effects, consistent with the court decision in Bakersfield Citizens for Local Control v. City of Bakersfield (2004) 124 Cal.App.4th 1184, 1219-20.

As discussed in impact question a) above, Project generated emissions are below the SJVAPCD's regional significance thresholds and the Project is consistent with current air quality attainment plans including control measures and regulations.

With respect to cumulative health impacts, the air basin is in non-attainment for ozone, $PM_{2.5}$, and PM_{10} (state only), which means that the background levels of those pollutants are at times higher than the ambient air quality standards. The air quality standards were set to protect public health, including the health of sensitive individuals (such as children, the elderly, and persons with pre-existing respiratory or cardiovascular illnesses (the infirm)). Therefore, when the concentration of those pollutants exceeds the standard, it is likely that some sensitive individuals in the population would experience adverse health effects. Since the air basin is already in non-attainment, it is considered to have an existing significant cumulative health impact without the Project. The issue is whether the Project's contribution to the existing violation of air quality standards is cumulatively considerable.

The SJVAPCD through its GAMAQI has determined that projects that exceed regional thresholds would have a cumulatively considerable health impact. As demonstrated in **Table 3-7** and **Table 3-8,** the project would not exceed the SJVAPCD's significance thresholds and its cumulatively considerable impacts would be less than significant.

c) Would the project expose sensitive receptors to substantial pollutant concentrations?

Less than Significant Impact. Sensitive receptors are those who are sensitive to air pollution, including children, the elderly, and the infirm. The SJVAPCD considers a sensitive receptor a location that houses or attracts children, the elderly, people with illnesses, or others who are especially sensitive to the effects of air pollutants. Examples of sensitive receptors include hospitals, residences, convalescent facilities, and schools. The closest existing off-site sensitive receptors are single-family homes located on adjacent properties. Sensitive receptors, including schools and residences, are located adjacent to the project site on the east and west sides.

As demonstrated in **Table 3-7** and **Table 3-8**, the Project would not exceed the SJVAPCD's thresholds established in accordance with health-based standard for determining significance of criteria pollutant emissions. Therefore, in accordance with these standards, the Project would have a less than significant impact related to exposure of sensitive receptors to substantial pollutant concentrations.

d) Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

No Impact. Land uses that are typically identified as sources of objectionable odors include landfills, transfer stations, sewage treatment plants, wastewater pump stations, composting facilities, feed lots, coffee roaster, asphalt batch plants, and rendering plants, among other uses. The Project does not include any of these activities or land uses. The Project would therefore have no impact with respect to generation of emissions leading to odors or other adverse or objectionable emissions.

3.5 Biological Resources

Table 3-9. Biological Resources Impacts

Biological Resources Impacts				
Would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☒	☐	☐
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☒	☐
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☒	☐
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☒	☐
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

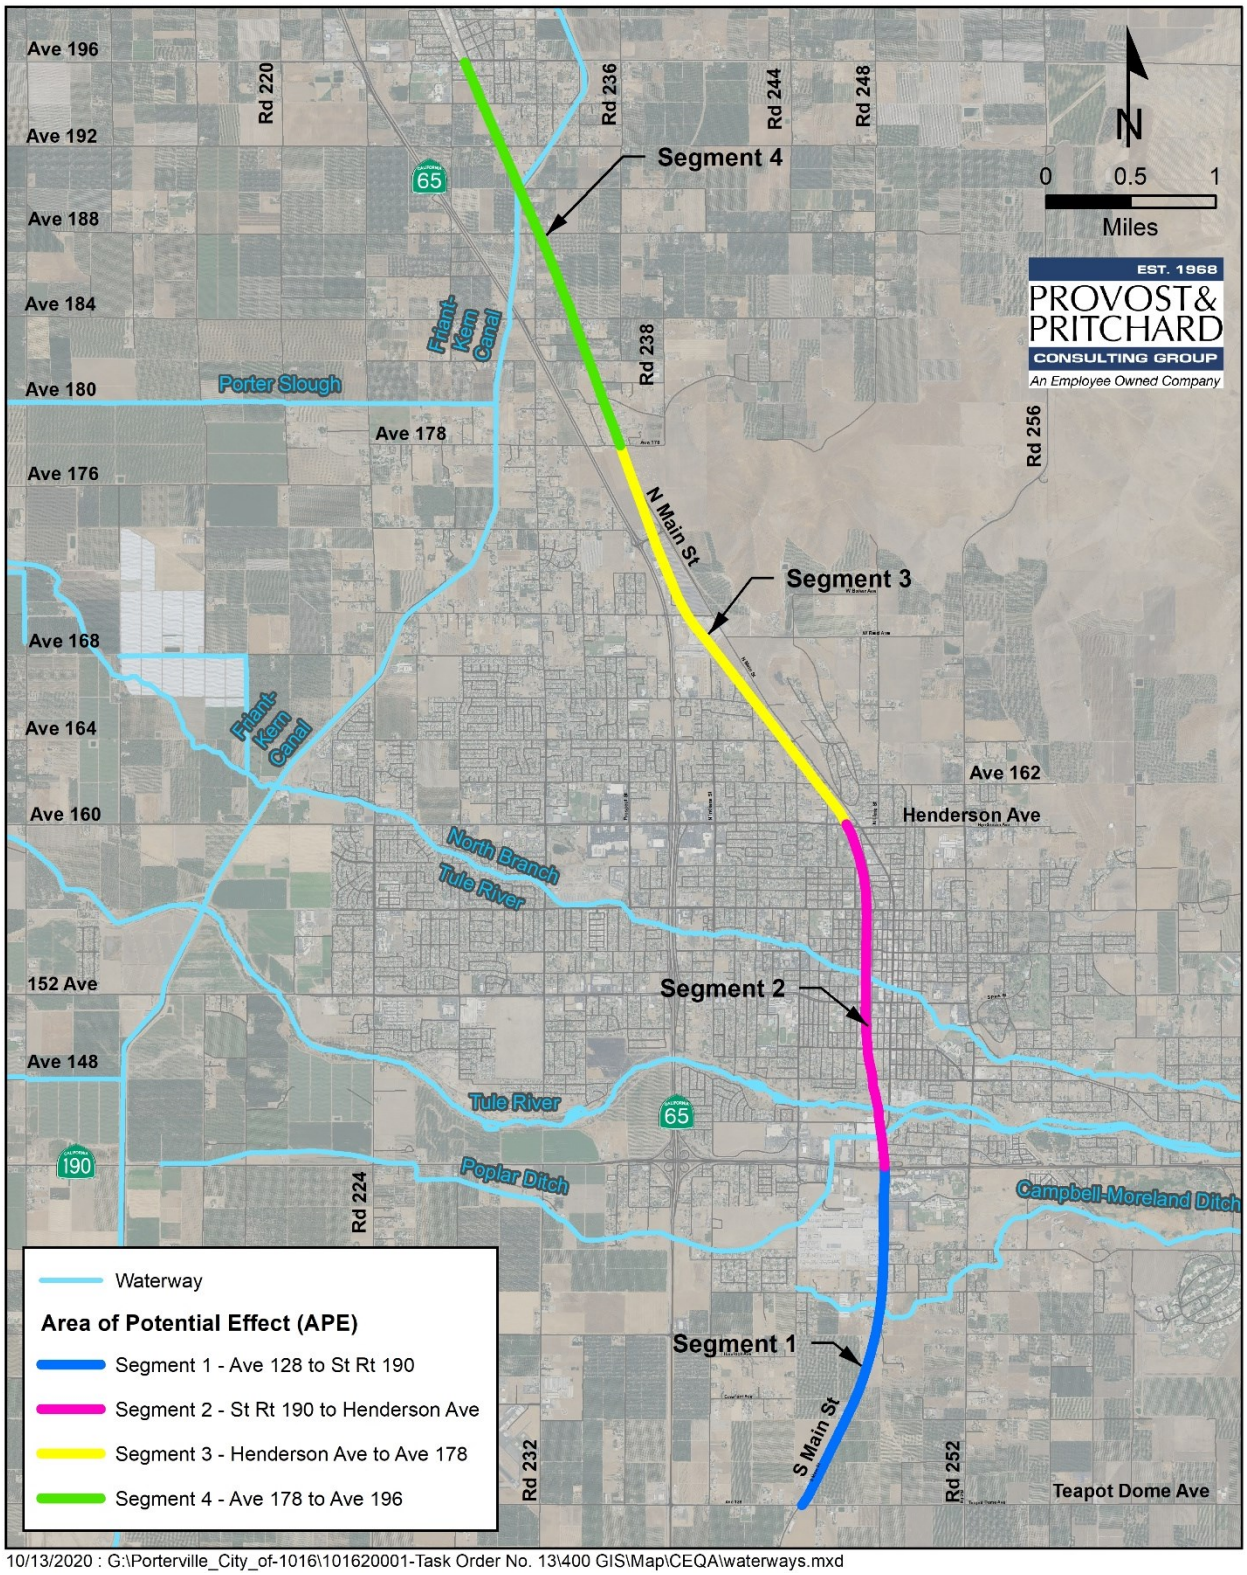
3.5.1 Environmental Setting and Baseline Conditions

A biological reconnaissance survey of the Area of Potential Effect (APE) was conducted by Provost and Pritchard biologists on May 22, 2020. The full written report of biological findings in contained in **Appendix B**. The Project's APE is illustrated in **Figure 2-1**. The field survey consisted of a combination of walking and driving along the proposed alignment while identifying and noting land uses, biological habitats and communities, and plant and animal species encountered. Additionally, the site and surrounding areas were assessed for suitable habitats of various wildlife species.

The Project is located on the eastern edge of valley floor near the base of the Sierra Nevada foothills in Tulare County, California. This area is geographically situated in the lower San Joaquin Valley, part of the Great Valley

of California (See **Figure 2-2**). The Valley is bordered by the Sierra Nevada Mountain Ranges to the east, the Coast Ranges to the west, the Klamath Mountains and Cascade Range to the north, and the Transverse Ranges and Mojave Desert to the south.

There are three biological communities found within the project area: Ruderal/developed; Riverine; and Riparian. The proposed Butterfield Stage Corridor is located on the former Union Pacific Railroad right of way nearly the entire Project area is composed of barren, compacted dirt and gravel associated with railroad crossings. While the railroad tracks have been removed, most of the crossings are still in place and the soil along the center of the alignment is essentially devoid of vegetation from years of heavy disturbance and compaction. Riverine habitat is present within the channels of Tule River, Porter Slough, Friant-Kern Canal, and other channelized canals/ditches along the alignment (see **Figure 3-2**). The man-made and concrete-lined Friant-Kern Canal is the only perennial aquatic feature in the vicinity. Tule River and Porter Slough are both intermittent streams with flows controlled by releases from Success Dam. Poplar Ditch receives flood water releases and overflow from the Tule River, which delivers water to the Friant-Kern Canal. The other channelized canals/ditches in the vicinity are used for agriculture and stormwater runoff. Although frequent disturbance was evident, riparian habitat was also present along the banks of Tule River, Porter Slough, Poplar Ditch, and some of the other unlined canals/ditches.



10/13/2020 : G:\Porterville_City_of-1016\101620001-Task Order No. 13\400 GIS\Map\CEQA\waterways.mxd

Figure 3-2. Waterways Map

Provost & Pritchard performed the written analysis of potential Project-related impacts to biological resources based on the field survey and a research of literature resources describing biological resources already known to exist or with potential to exist within the Project site and surrounding areas or similar habitats. Sources of information used in preparation of this analysis included: the California Department of Fish and Wildlife (CDFW) California Natural Diversity Database (CNDDB); the U.S. Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPaC) system; the California Native Plant Society (CNPS) Online Inventory of Rare and Endangered Vascular Plants of California; CalFlora's online database of California native plants; the Jepson Herbarium online database (Jepson eFlora); the USFWS Environmental Conservation Online System (ECOS); the NatureServe Explorer online database; the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Plants Database; the CDFW California Wildlife Habitat Relationships (CWHR) database; the California Herps online database; and various manuals, reports, and references related to plants and animals of the San Joaquin Valley region.

A thorough search of the CNDDB for published accounts of special status plant and animal species was conducted for the *Porterville* and *Lindsay* 7.5-minute quadrangles that contains the Project site in its entirety, and for the 10 surrounding quadrangles: *Cairns Corner, Frazier Valley, Success Dam, Sausalito School, Ducor, Rocky Hill, Exeter, Woodville, Chickencoop Canyon,* and *Fountain Springs*. An official species list was obtained using the USFWS IPaC system for federally-listed species with potential to be affected by the Project. These species and their potential to occur within the Project area are listed in **Table 3-10** and **Table 3-11** on the following pages.

This page left intentionally blank.

Table 3-10. List of Special Status Plants with Potential to Occur Onsite and/or in the Vicinity

Species	Status	Habitat	Occurrence on Project Site
brittlescale *(Atriplex depressa)*	CNPS 1B	Found in the San Joaquin Valley and Sacramento Valley in alkaline or clay soils, typically in meadows or annual grassland in at elevations below 1050 feet. Sometimes associated with vernal pools. Blooms June–October.	**Absent.** Suitable habitat is absent from the Project area.
calico monkeyflower *(Diplacus pictus / Mimulus pictus / Eunanus pictus)*	CNPS 1B	Found in the Sierra Nevada foothills and the Tehachapi mountains in bare, sunny, shrubby areas, and around granite outcrops within foothill woodland communities at elevations between 450 feet and 4100 feet. Blooms March – May.	**Absent.** Suitable habitat is absent from the Project area.
California alkali grass *(Puccinellia simplex)*	CNPS 1B	Found in the San Joaquin Valley and other parts of California in saline flats and mineral springs within valley grassland and wetland-riparian communities at elevations below 3000 feet. Blooms March–May.	**Absent.** Suitable habitat is absent from the Project area.
California jewelflower *(Caulanthus californicus)*	FE, CE, CNPS 1B	Found in the San Joaquin Valley and Western Transverse Ranges in sandy soils. Occurs on flats and slopes, generally in non-alkaline grassland at elevations between 230 feet and 6100 feet. Blooms February–April.	**Absent.** Suitable habitat is absent, and this species is presumed to be extirpated from Tulare County.
Chaparral ragwort *(Senecio aphanactis)*	CNPS 2B	Found in chaparral, cismontane woodland, and coastal scrub, typically within drying alkaline flats at elevations between 65–2800 feet. Blooms February–May.	**Absent.** Suitable habitat is absent from the project area.
Earlimart orache *(Atriplex cordulata var. erecticaulis)*	CNPS 1B	Found in the San Joaquin Valley in saline or alkaline soils, typically within valley and foothill grassland at elevations below 375 feet. Blooms August–September.	**Absent.** Suitable habitat is absent from the Project area.
Kaweah brodiaea *(Brodiaea insignis)*	CE, CNPS 1B	Found in the Sierra Nevada foothills in foothill woodland and valley grassland communities at elevations between 650 feet and 1650 feet. Blooms May – June.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.
Keck's checkerbloom *(Sidalcea keckii)*	FE, CNPS 1B	Occurs in cismontane woodland, valley and foothill grassland, typically on grassy slopes in clay soils at elevations between 275 feet – 1650 feet. Blooms April – May.	**Absent.** Typical soils and habitat are absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
lesser saltscale *(Atriplex minuscula)*	CNPS 1B	Found in the San Joaquin Valley in sandy, alkaline soils in alkali scrub, valley and foothill grassland, and alkali sink communities at elevations below 750 feet. Blooms April–October.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
Lost Hills crownscale *(Atriplex coronata var. vallicola)*	CNPS 1B	Found in the San Joaquin Valley in dried ponds and alkaline soils in alkali scrub, valley and foothill grassland, and vernal pools at elevations below 2900 feet. Blooms April–September.	**Absent.** Suitable habitat is absent from the Project area.

Species	Status	Habitat	Occurrence on Project Site
Madera leptosiphon *(Leptosiphon serrulatus)*	CNPS 1B	Found in openings in foothill woodland, often yellow-pine forest, and chaparral at elevations between 1000 feet and 4300 feet. Blooms April – May.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.
recurved larkspur *(Delphinium recurvatum)*	CNPS 1B	Occurs in poorly drained, fine, alkaline soils in grassland and alakli scrub communities at elevations between 100 feet and 2600 feet. Blooms March–June.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
San Joaquin adobe sunburst *(Pseudobahia peirsonii)*	FT, CE, CNPS 1B	Found in the San Joaquin Valley and the Sierra Nevada Foothills in bare dark clay soils in valley and foothill grassland and cismontane woodland communities at elevations between 325 feet and 2950 feet. Blooms March–May.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
San Joaquin woollythreads *(Monolopia congdonii)*	FE, CNPS 1B	Occurs in the San Joaquin Valley in sandy soils on alkaline or loamy plains in valley and foothill grassland and alkali scrub communities at elevations between 180 feet and 2750 feet. Blooms February–May.	**Absent.** The developed and disturbed habitats of the Project area are generally unsuitable for this species.
shining navarretia *(Navarretia nigelliformis ssp. radians)*	CNPS 1B	Found in cismontane woodland and valley and foothill grassland communities, sometimes in vernal pools. Occurs at elevations between 200 feet and 3200 feet. Blooms May – July.	**Absent.** The developed and disturbed habitats of the Project area are generally unsuitable for this species.
spiny-sepaled button-celery *(Eryngium spinosepalum)*	CNPS 1B	Found in the Sierra Nevada Foothills and the San Joaquin Valley. Occurs in vernal pools, swales, and roadside ditches. Often associated with clay soils in vernal pools within grassland communities. Occurs at elevations between 50 feet and 4160 feet. Blooms April–July.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
Springville clarkia (*Clarkia springvillensis*)	FT, CE, CNPS 1B	Endemic to the woodlands and grasslands of the southern portion of the Sierra Nevada range, occurring primarily in the Tule River watershed. Found at elevations between 690-7400 feet. Blooms in May.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.
striped adobe-lily *(Fritillaria striata)*	CT, CNPS 1B	Found in the Sierra Nevada foothills in adobe soil within valley grassland and foothill woodland communities at elevations below 3300 feet. Blooms February – April.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
subtle orache *(Atriplex subtilis)*	CNPS 1B	Found in the San Joaquin Valley in saline depressions in alkaline soils within valley and foothill grassland communities at elevations below 330 feet. Blooms June–October.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
vernal pool smallscale *(Atriplex persistens)*	CNPS 1B	Occurs in the San Joaquin Valley and Sacramento Valley in alkaline vernal pools at elevations below 375 feet. Blooms June–September.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.

Table 3-11. List of Special Status Animals with Potential to Occur Onsite and/or in the Vicinity

Species	Status	Habitat	Occurrence on Project Site
American badger *(Taxidea taxus)*	CSC	Grasslands, savannas, and mountain meadows near timberline are preferred. Most abundant in drier open spaces of shrub and grassland. Burrows in soil.	**Possible.** The disturbed and developed habitats of the Project area are generally unsuitable for this species; however, this species may inhabit fallow fields, margins of agricultural lands, and rangeland adjacent to portions of Segment 1, Segment 3, and Segment 4 of the proposed alignment. Ground squirrel burrows of suitable dimensions were observed onsite, and while it is unlikely that an American badger would find the Project area suitable for denning, this species could pass through the site while foraging or during dispersal movements.
blunt-nosed leopard lizard *(Gambelia sila)*	FE, CE, CFP	Inhabits semi-arid grasslands, alkali flats, low foothills, canyon floors, large washes, and arroyos, usually on sandy, gravelly, or loamy substrate, sometimes on hardpan. Often found in open areas with scarce vegetation or scattered shrubs. Cannot survive on lands under cultivation. Known to bask on kangaroo rat mounds and often seeks shelter at the base of shrubs, in small mammal burrows, or in rock piles. Adults may excavate shallow burrows but rely on deeper pre-existing rodent burrows for hibernation and reproduction.	**Absent.** Suitable habitat is absent, and the Project area is outside of the distribution range of this species.
California condor *(Gymnogyps californianus)*	FE, CE, CFP	Typically nests in cavities in canyon or cliff faces but has also been recorded nesting in giant sequoias in Tulare County. Requires vast expanse of open savannah, grassland, and/or foothill chaparral in mountain ranges of moderate altitude. Forages up to 100 miles from roost/nest site.	**Unlikely.** This species has been reported nesting in Blue Ridge National Wildlife Refuge approximately 15 miles northeast of the Project. Nesting habitat is absent from the Project area and foraging habitat is marginal within the grassland adjacent to segment 3 of the alignment.
California red-legged frog *(Rana draytonii)*	FT, CSC	Inhabits perennial rivers, creeks, and stock ponds with vegetative cover within the Coast Range and northern Sierra foothills.	**Absent.** Suitable habitat is absent, and the Project area is outside of the distribution range of this species.
California tiger salamander *(Ambystoma californiense)*	FT, CT, CWL	Requires vernal pools or seasonal ponds for breeding and small mammal burrows for aestivation. Generally found in grassland and oak savannah plant communities in central California from sea level to 1500 feet in elevation.	**Absent.** Suitable habitat is absent, and the Project area is outside of the distribution range of this species.
Crotch bumble bee (*Bombus crotchii*)	CCE	Occurs throughout coastal California, as well as east to the Sierra-Cascade crest, and south in to	**Unlikely.** Although the Project is located within the historical range of this species, suitable grassland habitat is absent from the APE. The

Species	Status	Habitat	Occurrence on Project Site
		Mexico. Food plant genera include *Antirrhinum, Phacelia, Clarkia, Dendromecon, Eschscholzia*, and *Eriogonum*.	disturbed and developed habitats along the proposed alignment are generally unsuitable for this species, and vegetative cover is dominated by weedy, non-native plants. Furthermore, the ongoing use of commercial honeybees, herbicides, and pesticides in adjacent agricultural lands makes the Project area unsuitable for native pollinators.
Delta smelt *(Hypomesus transpacificus)*	FT, CE	This pelagic and euryhaline species is Endemic to the Sacramento-San Joaquin River Delta, upstream through Contra Costa, Sacramento, San Joaquin, and Solano Counties.	**Absent.** The Project area is outside of the distribution range of this species.
foothill yellow-legged frog *(Rana boylii)*	CCT, CSC	Frequents rocky streams and rivers with rocky substrate and open, sunny banks in forests, chaparral, and woodlands. Occasionally found in isolated pools, vegetated backwaters, and deep, shaded, spring-fed pools.	**Absent.** Suitable habitat is absent, and the Project is below the typical altitudinal range of this species.
giant gartersnake *(Thamnophis gigas)*	FT, CT	Occurs in marshes, sloughs, drainage canals, irrigation ditches, rice fields, and adjacent uplands. Prefers locations with emergent vegetation for cover and open areas for basking. This species uses small mammal burrows adjacent to aquatic habitats for hibernation in the winter and to escape from excessive heat in the summer.	**Absent.** Suitable habitat is absent, and the Project area is located outside of the distribution range of this species.
northern California legless lizard *(Anniella pulchra)*	CSC	Found primarily underground, burrowing in moist, loose soil. Forages in loose soil and leaf litter during the day. Occasionally observed on the surface at dusk and night.	**Absent.** The disturbed and developed habitats of the Project area are unsuitable for this species.
pallid bat *(Antrozous pallidus)*	CSC	Found in grasslands, chaparral, and woodlands, where it feeds on ground- and vegetation-dwelling arthropods, and occasionally takes insects in flight. Prefers to roost in rock crevices, but may also use tree cavities, caves, bridges, and other man-made structures.	**Possible.** Roosting habitat for this species is present in the form of bridges, crossings, and trees.
San Joaquin kit fox *(Vulpes macrotis mutica)*	FE, CT	Underground dens with multiple entrances in alkali sink, valley grassland, and woodland in valleys and adjacent foothills.	**Possible.** There has been only one reported occurrence of this species in the vicinity of the Project within the past 25 years. The disturbed and developed habitats of the Project area are generally unsuitable; however, this species may inhabit fallow fields, margins of agricultural lands, and rangeland adjacent to portions of Segment 1,

Species	Status	Habitat	Occurrence on Project Site
			Segment 3, and Segment 4 of the proposed alignment. Ground squirrel burrows of suitable dimensions were observed onsite during the biological survey, and while it seems unlikely that a San Joaquin kit fox would find the Project area suitable for denning, this species could pass through the site while foraging or during dispersal movements.
Swainson's hawk *(Buteo swainsoni)*	CT	Nests in large trees in open areas adjacent to grasslands, grain or alfalfa fields, or livestock pastures suitable for supporting rodent populations.	**Possible.** Swainson's hawks are relatively uncommon in the eastern portion of the valley floor; however, there is one recent nesting occurrence approximately 4 miles west of the proposed alignment and trees large enough to support a raptor nest were present in the Project vicinity at the time of the survey. Typical nesting habitat was absent and frequent human disturbance along the proposed alignment may deter this species from nesting within or adjacent to the APE. This species could pass over the Project site while foraging or during migratory movements.
Tipton kangaroo rat *(Dipodomys nitratoides nitratoides)*	FE, CE	Burrows in soil. Often found in grassland and shrubland.	**Absent.** Typical suitable habitat is absent. This species has never been recorded east of the Friant-Kern Canal in Tulare County.
Townsend's big-eared bat *(Corynorhinus townsendii)*	CSC	Occurs in a variety of habitats, but prefers cool, dark roost sites, and are often found in caves and mines. They roost in the open, hanging from walls and ceilings. Western populations typically forage on moths in areas of dense foliage.	**Unlikely.** Suitable roosting habitat is absent from the Project area and adjacent lands. At most, this species could forage nocturnally over the site.
tricolored blackbird *(Agelaius tricolor)*	CT, CSC	Nests colonially near fresh water in dense cattails or tules, or in thickets of riparian shrubs. Forages in grassland and cropland. Large colonies are often found on dairy farm forage fields.	**Unlikely.** Suitable nesting habitat was not observed within the Project area during the field survey. At most, this species could potentially nest in triticale or alfalfa fields in the vicinity and occasionally pass through the Project site.
valley elderberry longhorn beetle *(Desmocerus californicus dimorphus)*	FT	Lives in mature elderberry shrubs of the Central Valley and foothills. Adults are active March to June.	**Absent.** The Project is not located within the presumed historical range or presumed current distribution of this species. In 2014, USFWS published findings suggesting that previous CNDDB observations of this species within Tulare County should be discounted. (See expanded discussion in Section 3).
vernal pool fairy shrimp *(Branchinecta lynchi)*	FT	Occupies vernal pools, clear to tea-colored water, in grass or mud-bottomed swales, and basalt depression pools.	**Absent.** Vernal pools are absent from the Project area.
western mastiff bat *(Eumops perotis californicus)*	CSC	Found in open, arid to semi-arid habitats, including dry desert washes, flood plains, chaparral, oak woodland, open ponderosa pine forest, grassland, and agricultural areas, where it	**Unlikely.** Suitable roosting habitat is absent from the Project area and adjacent lands. At most, this species could forage nocturnally over the Project site.

Species	Status	Habitat	Occurrence on Project Site
		feeds on insects in flight. Roosts most commonly in crevices in cliff faces but may also use high buildings and tunnels.	
western pond turtle *(Emys marmorata)*	CSC	An aquatic turtle of ponds, marshes, slow-moving rivers, streams, and irrigation ditches with riparian vegetation. Requires adequate basking sites and sandy banks or grassy open fields to deposit eggs.	**Possible.** Although the disturbed and developed habitats of the Project area are suboptimal, this species could conceivably occur within the Tule River, Porter Slough, or unlined ditches and canals in the Project area.
western spadefoot *(Spea hammondii)*	CSC	Prefers open areas with sandy or gravelly soils, in a variety of habitats including mixed woodlands, grasslands, coastal sage scrub, chaparral, sandy washes, lowlands, river floodplains, alluvial fans, playas, alkali flats, foothills, and mountains. Vernal pools or temporary wetlands, lasting a minimum of three weeks, which do not contain bullfrogs, fish, or crayfish are necessary for breeding.	**Unlikely.** The Project is located within the historic and current range of this species. Rodent burrows which could be used for aestivation were observed along the alignment; however, typical vernal pool habitat was not observed within Project areas or surrounding lands. While this species could potentially breed within seasonal pools, ponds, and tire depressions, the presence of bullfrogs, an apex predator, further reduces the quality of the habitat.
Yellow-billed Cuckoo (*Coccyzus americanus*)	CT	Distribution in California is currently limited to the Sacramento River from Red Bluff to Colusa and the South Fork Kern River from Isabella Reservoir to Canebrake Ecological Reserve. Breeding pairs are also occasionally found along the Feather River, the Amargosa River, and the Colorado River in San Bernardino County and Inyo County. Nests in concealed willow foliage in riparian areas.	**Absent.** Suitable nesting habitat is absent from the Project area. This species has not been recorded in Tulare County in more than 100 years and is believed to be extirpated from the region.

EXPLANATION OF OCCURRENCE DESIGNATIONS AND STATUS CODES FOR TABLES 3-8 & 3-9

Present:	Species observed on the site at time of field surveys or during recent past
Likely:	Species not observed on the site, but it may reasonably be expected to occur there on a regular basis
Possible:	Species not observed on the site, but it could occur there from time to time
Unlikely:	Species not observed on the site, and would not be expected to occur there except, perhaps, as a transient
Absent:	Species not observed on the site, and precluded from occurring there due to absence of suitable habitat

STATUS CODES

FE	Federally Endangered
FT	Federally Threatened
FPE	Federally Endangered (Proposed)
FPT	Federally Threatened (Proposed)
FC	Federal Candidate
CE	California Endangered
CT	California Threatened
CCT	California Threatened (Candidate)
CFP	California Fully Protected
CSC	California Species of Special Concern
CWL	California Watch List
CCE	California Endangered (Candidate)
CR	California Rare

CNPS LISTING

1A	Plants Presumed Extinct in California
1B	Plants Rare, Threatened, or Endangered in California and elsewhere
2	Plants Rare, Threatened, or Endangered in California, but more common elsewhere

3.5.2 Impact Assessment

a) Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Less than Significant Impact with Mitigation Incorporated.

3.5.2.1 Project-Related Impacts to Special Status Plant Species

Research literature indicates that 20 special status plant species have been documented in the Project vicinity, including brittlescale (*Atriplex depressa*), calico monkeyflower (*Diplacus pictus/Mimulus pictus/Eunanus pictus*), California alkali grass (*Puccinellia simplex*), California jewelflower (*Caulanthus californicus*), Chaparral ragwort (*Senecio aphanactis*), Earlimart orache (*Atriplex cordulata var. erecticaulis*), Kaweah brodiaea (*Brodiaea insignis*), Keck's checkerbloom (*Sidalcia keckii*), lesser saltscale (*Atriplex minuscula*), Lost Hills crownscale (*Atriplex coronate var. vallicola*), Madera leptosiphon (*Leptosiphon serrulatus*), recurved larkspur (*Delphinium recurvatum*), San Joaquin adobe sunburst (*Pseudobahia perisonii*), San Joaquin woollythreads (*Monolopia congdonii*), shining navarretia (*Navarretia nigelliformis ssp. radians*), spiny-sepaled button-celery (*Eryngium spinosepalum*), Springville clarkia (*Clarkia springvillensis*), striped adobe-lily (*Fritillaria striata*), subtle orache (*Atriplex subtilis*), and vernal pool smallscale (*Atriplex persistens*). However, none of these species were observed during the field survey, which was conducted in Summer, during the typical blooming season for many of these species. As explained in **Table 3-8**, all of the aforementioned special status plant species are absent from the Project area due to past and ongoing disturbance and/or the absence of suitable habitat. Therefore, the implementation of the Project will have no effect on individual plants or regional populations of these special status plant species. Mitigation measures are not warranted.

3.5.2.2 Project-Related Impacts to Special Status Animal Species

Research literature indicates that 22 special status animal species have been documented in the Project vicinity, including: American badger (*Taxidea taxus*), blunt-nosed leopard lizard (*Gambelia sila*), California condor (*Gymnogyps californianus*), California red-legged frog (*Rana draytonii*), California tiger salamander (*Ambystoma californiense*), Crotch bumble bee (*Bombus crotchii*), Delta smelt (*Hypomesus transpacificus*), foothill yellow-legged frog (*Rana boylii*), giant gartersnake (*Thamnophis gigas*), northern California legless lizard (*Anniella pulchra*), pallid bat (*Antrozous pallidus*), San Joaquin kit fox (Vulpes *macrotis mutica*), Swainson's hawk (*Buteo swainsoni*), Tipton kangaroo rat (*Dipodomys nitratoides nitratoides*), Townsend's big-eared bat (*Corynorhinus townsendii*), trycolored blackbird (*Agelaius tricolor*), valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*), vernal pool fairy shrimp (*Branchinecta lynchi*), western mastiff bat (*Eumops perotis californicus*), western pond turtle (*Emysmarmorata*), western spadefoot (*Spea hammondii*), and Yellow-billed Cuckoo (*Coccyzus americanus*).

Five of the 22 special status animal species have the potential to be impacted by the proposed Project and include: American badger, pallid bat, San Joaquin kit fox, Swainson's hawk, and the western pond turtle. Species specific discussions are discussed thoroughly in the Biological Evaluation and can be found in **Appendix B** and are summarized below.

3.5.2.3 American Badger

American badger has been documented in the vicinity and burrowing rodent activity was observed along the Project alignment, which could represent potential denning and foraging opportunities. This species could inhabit margins of agricultural parcels and grasslands in the vicinity and pass through the Project area during nocturnal foraging or dispersal movements.

3.5.2.4 Pallid Bat

Roosting habitat for the pallid bat is absent from the Project area, but this species could potentially forage nocturnally over the Project site. Pallid bats typically prefer to use rock crevices or horizontal gaps in structures for maternal roosts and often utilizes cement bridges and structures, particularly those located over water, as night roosts.

3.5.2.5 San Joaquin Kit Fox

The Project is within the regulatory range of the San Joaquin kit fox, and burrowing rodent activity was detected throughout the Project area, indicating potential denning and foraging opportunities for this species.

3.5.2.6 Swainson's Hawk

Suitable raptor nest trees and optimal foraging habitat were not observed within the Project area at the time of the field survey, in the absence of higher quality habitat, some raptors such as the special status Swainson's hawk could potentially become acclimatized to human disturbance and nest in large ornamental trees in the vicinity. Swainson's hawks are fairly uncommon in this portion of the San Joaquin Valley. While typical Swainson's hawk nesting and foraging habitat was not observed within the Project area at the time of the field survey, this species could conceivably nest or forage in the vicinity in the absence of higher quality habitat.

3.5.2.7 Western Pond Turtle

This species is known to occur in the Tule River upstream of Lake Success, and while frequent disturbance, controlled releases, and seasonal or unpredictable flows make the channels in the Project area suboptimal for western pond turtle, there is at least some potential for occurrence. Although no western pond turtle individuals were observed during biological survey, potentially suitable habitat was present within the Tule River, Porter Slough, and unlined ditches and canals. This species is highly mobile and is known to travel great distances while seeking an adequate upland nesting site.

With corresponding mitigation measure the impacts to the American badger, pallid bat, San Joaquin kit fox, Swainson's hawk, and the western pond turtle would be reduced to less than significant with mitigation.

Mitigation Measures:

BIO-1 (WEAP Training): Prior to initiating construction activities (including staging and mobilization), all personnel associated with Project construction shall attend mandatory Worker Environmental Awareness Program (WEAP) training, conducted by a qualified biologist, to aid workers in identifying special status species that may occur in the Project area. The specifics of this program shall include identification of the sensitive species and suitable habitats, a description of the regulatory status and general ecological characteristics of these species, and review of the mitigation measures required to reduce impacts to biological resources within the work area. A fact sheet conveying this information, along with photographs or illustrations of sensitive species with potential to occur onsite, shall also be prepared for distribution to all contractors, their employees, and all other personnel involved with construction of the Project. All employees shall sign a form documenting that they have attended WEAP training and understand the information presented to them.

BIO-2 (Operational Hours): Construction shall be conducted during daylight hours to reduce disturbance to wildlife that could be foraging nocturnally within work areas.

BIO-3 (Avoidance): The Project's construction activities shall occur, if feasible, between September 16 and January 31 (outside of nesting bird season) in an effort to avoid impacts to nesting birds.

BIO-4 (Nesting Bird Pre-construction Surveys): If activities must occur within nesting bird season (February 1 to September 15), a qualified biologist shall conduct pre-construction surveys for active nests within 30 days prior to the start of construction. The survey shall include the proposed work area and surrounding lands within 500 feet. If no active nests are observed, no further mitigation is required. Raptor nests are considered "active" upon the nest-building stage.

BIO-5 (Pre-construction Survey): A qualified biologist will perform a pre-construction survey of the Project area for roosting bats, American badger, San Joaquin kit fox (200 feet of proposed work) and the western pond turtle within 30 days prior to the start of construction. The biologist shall determine the appropriate construction setback distances or provide instructions to ensure compliance with State and federal laws protecting the species.

b) Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Less than Significant Impact. Riparian habitat was present along the banks of Tule River, Porter Slough, Poplar Ditch, and some of the other unlined canals/ditches during the biological field survey. Vegetation associated with riparian habitat includes: Fremont cottonwood (*Pupulus fremontii*), tree of heaven (*Ailanthus altissima*), willows (*Salix*), interior live oak (*Quercus wislizeni*), and valley oak (*Quercus lobate*) trees were observed. Typical vegetative cover in these riparian areas included sandbar willow (*Salix exigua*), castor bean (*Ricinus communis*), giant reed (*Arundo donaz*), cocklebur (*Xanthium*), flatsedge (*Cyperus eragrostis*), curly dock (*Rumex crispus*), sunflower (*Helianthus annuus*), and mugwort (*Artemisia douglasiana*) mixed with various ruderal upland grasses and forbs.

Historically, the Tule River and Porter Slough supported a dense corridor of riparian vegetation and provided an important linkage between natural habitats of the Sierra Nevada and the Tulare Basin, including the Pixley National Wildlife Refuge and Elk Bayou. However, both Porter Slough and Tule River in the Project's vicinity contain numerous breaks in vegetation and choke points.[8]

The Tulare County 2030 General Plan has goals and policies that protect riparian areas and include:

- ***ERM-1.4*** *Protect Riparian Areas. The County shall protect riparian areas through habitat preservation, designation as open space or recreational land uses, bank stabilization, and development controls.*
- ***ERM-1.6*** *Management of Wetlands. The County shall support the preservation and management of wetland and riparian plant communities for passive recreation, groundwater recharge, and wildlife habitats.*
- ***ERM-1.8*** *Open Space Buffers. The County shall require buffer areas between development projects and significant watercourses, riparian vegetation, wetlands, and other sensitive habitats and natural communities. These buffers should be sufficient to assure the continued existence of the waterways and riparian habitat in their natural state.*

Project activities with potential to alter a river, stream, or lake, including the floodplain and associated riparian habitat, would be within CDFW's jurisdiction, pursuant to Section 1602 of the California Fish and Game Code, and are required to notify CDFW if the Project's activities have potential to impact rivers, streams, or the riparian corridor of any aquatic features onsite that may be beneficial to fish or wildlife resources. If CDFW determines that the Project could potentially adversely riparian resources, a Lake or Streambed Agreement

[8] Tulare Basin Wildlife Partners. (2009). Fresno County Measure C Riparian-Wildlife Corridor Report. Fresno County: Council of Fresno County Governments. Accessed September 2020.

(LSA) would be submitted to CDFW and issued prior to the start of construction. LSA Agreement would provide mandatory avoidance and minimization measures, protective measures for special status species, and may require compensatory mitigation for removal of riparian trees, shrubs, and herbaceous cover along the banks. Compliance with measures of the LSA Agreement will ensure that the Project's impacts to aquatic features and riparian habitat within CDFW's jurisdiction would be less-than-significant.

c) Would the project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Less than Significant Impact. The Project alignment crosses over Tule River, Porter Slough, Campbell Moreland Ditch, Poplar Ditch, Pioneer Ditch, and the Friant-Kern Canal. Because the path will be constructed on the former Union Pacific Railroad (UPRR) right-of-way, there are existing crossings at each of these aquatic features, except for Tule River. There was a UPRR bridge which crossed the Tule River immediately west of the Main Street Bridge over the Tule River in the City of Porterville. The bridge was previously burned in a fire and the City had the superstructure removed, however the bridge foundation remains. It is assumed that the 130-feet of bridge span that originally existed at the site will need to be reconstructed to facilitate the Project path to bridge the floodway of the Tule River. The other existing crossings may also require modifications to support the proposed path.

The Tule River, Poplar Ditch, Friant-Kern Canal, and Porter Slough have historically been considered Waters of the United States, because of their downstream connections to traditionally navigable waters (can we name it?). Although an aquatic resources delineation was not conducted as part of the scope of work for this Project, it is reasonable to assume that these water features could potentially fall under the jurisdiction of USACE and RWQCB and that Project activities conducted within the Ordinary High Watermark (OHWM) of a Water of the United States. will be subject to permit requirements of the USACE, pursuant to Section 404 of the Clean Water Act.

This Project would likely be authorized under a Nationwide Permit. Such permits are typically issued on the condition that the applicant agrees to provide mitigation that results in no net loss of wetland functions or values. No USACE permit can be issued until the RWQCB issues a Section 401 Water Quality Certification, which also includes additional measures to ensure that the proposed activity will meet State water quality standards. Project activities conducted below OHWM within Waters of the State that are not also Waters of the U.S. will be subject to Waste Discharge Requirements (WDRs), or a waiver of WDRs. If the Project's construction work at any of the crossings will result in impacts to Waters of the United States and/or Waters of the State, the City of Porterville would be required to secure permits from USACE and/or RWQCB. Compliance with each permit's required avoidance, minimization, and mitigation measures will ensure that Project-related impacts to these potentially jurisdictional waters are less-than-significant in nature.

d) Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Less than Significant Impact. The Project area does not contain features that would be likely to function as important wildlife movement corridors, and the Project is located in a region often disturbed by human activities associated with urban environments and agricultural production which would discourage dispersal and migration. Furthermore, the Project does not propose the placement of permanent fencing or any type of barrier that would impede movement of native wildlife. Therefore, implementation of the proposed Project would have no impact on wildlife movement corridors.

e) Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

No Impact. The City of Porterville does not currently have a tree preservation ordinance but does have various biological resources protective language in the 2030 General Plan and in the Porterville Area Community Plan. The City of Porterville County 2030 General Plan has goals and policies that protect biological resources and include:

- ***OSC-G-7:*** *Protect habitat for special status species, designated under State and federal law.*
- ***OSC-I-27****: Protect and enhance the natural habitat features of the Tule River and open space corridors within the Planning Area.*
- ***OSC-I-28:*** *Require protection of sensitive habitat areas and special status species in new development site designs in the following order: 1) avoidance; 2) onsite mitigation; 3) offsite mitigation, and 4) purchase of mitigation credits.*
- ***OSC-I-30:*** *Adopt regulations to promote water-conserving landscape plans, including the use of drought tolerant plants.*
- ***OSC-I-32:*** *Identify and protect wildlife movement corridors that serve critical habitats to minimize wildlife-urban conflicts.*
- ***OSC-I-34:*** *Continue to require street tree planting in new development and support the City's tree planting fund.*
- ***OSC-I-35:*** *Consult with all responsible agencies about wetland and vernal pool habitat potentially affected by development.*

Proposed Project design appears to be consistent with the goals and policies that protect biological resources. As such there would be no impact.

f) Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. The proposed Project design appears to be consistent with the goals and policies of the City of Porterville 2030 General Plan. There are no known habitat conservation plans in the Project vicinity. As such there would be no impact local, regional, or State habitat conservation plans.

3.6 Cultural Resources

Table 3-12. Cultural Resources Impacts

Cultural Resources Impacts					
Would the project:		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Cause a substantial adverse change in the significance of a historical resource pursuant to in §15064.5?	☐	☒	☐	☐
b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	☐	☒	☐	☐
c)	Disturb any human remains, including those interred outside of dedicated cemeteries?	☐	☒	☐	☐

3.6.1 Environmental Setting and Baseline Conditions

The proposed project consists of the development of a multi-modal non-motorized vehicular corridor which will include a Class 1 non-motorized multi-use path, complete with solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. The horizontal APE consists of the approximately nine mile segment of the former Union Pacific Railroad right-of-way (ROW) with a 45-foot buffer on either side, creating a total area of 110-acres. The vertical APE, estimated at 5-feet, is the maximum depth of excavation for foundations, footings and underground electrical and water utilities.

An intensive Class III cultural resources inventory/Phase I survey was conducted for the proposed Project by ASM Affiliates, Inc. A records search of site files and maps was conducted by ASM at the Southern San Joaquin Valley Archaeological Information Center, California State University, Bakersfield. ASM also submitted a Sacred Lands File Request to the Native American Heritage Commission (NAHC). The Class III inventory/Phase I survey fieldwork was conducted in May 2020 with parallel transects spaced at 15-meter (m) intervals walked along the approximately 110-ac APE. (ASM's complete cultural evaluation report is contained in **Appendix C.**)

3.6.2 Impact Assessment

a) Would the project cause a substantial adverse change in the significance of a historical resource pursuant to in §15064.5?; and

b) Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Less than Significant Impact with Mitigation Incorporated. A Phase I survey/Class III inventory demonstrated that the Butterfield Corridor Project APE contains five cultural resources, all of which had been previously recorded. Three of them have been demolished, and therefore, lacking integrity, are not significant or eligible for listing in the NRHP or CRHR. The proposed Butterfield Corridor would cross over and not impact or effect the other two previously recorded resources. Based on the results of the cultural study, the proposed Project does not have the potential to result in significant impacts or adverse effects to historical resources or historic properties, and a determination of no historic properties affected was recommended for the Project.

However, in the unlikely event that cultural resources are encountered during Project construction or use, implementation of mitigation measure **CULT-1** would reduce impacts to less than significant.

Mitigation Measures

> **CULT-1 (Archaeological Remains):** Should archaeological remains or artifacts be unearthed during any stage of Project activities, work in the area of discovery shall cease until the area is evaluated by a qualified archaeologist. If mitigation is warranted, the Project proponent shall abide by recommendations of the archaeologist.

c) Would the project disturb any human remains, including those interred outside of dedicated cemeteries?

Less than Significant Impact with Mitigation Incorporated. There is no evidence or record that the Project has the potential to be an unknown burial site or the site of buried human remains. In the unlikely event of such a discovery, mitigation shall be implemented. With incorporation of mitigation measure **CULT-2**, impacts resulting from the discovery of remains interred on the Project site would be less than significant.

Mitigation Measures

> **CULT-2 (Human Remains):** In the event that any human remains are discovered on the Project site, the Tulare County Coroner must be notified of the discovery (California Health and Safety Code, Section 7050.5) and all activities in the immediate area of the find or in any nearby area reasonably suspected to overlie adjacent human remains must cease until appropriate and lawful measures have been implemented. If the Coroner determines that the remains are not recent, but rather of Native American origin, the Coroner shall notify the Native American Heritage Commission (NAHC) in Sacramento within 24 hours to permit the NAHC to determine the Most Likely Descendent of the deceased Native American.

3.7 Energy

Table 3-13. Energy Impacts

Energy Impacts					
	Would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a)	Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	☐	☐	☒	☐
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☒	☐

3.7.1 Environmental Setting and Baseline Conditions

Southern California Edison provides electric service to Porterville residents. Natural gas service is primarily provided by the Southern California Gas Company. There are three major companies that provide communications services in Porterville: AT&T, Sprint, and Verizon. Charter Communications is the primary cable television and internet provider.

3.7.2 Impact Assessment

a) Would the project result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation? And;

b) Would the project conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Less than Significant Impact. Operation of the non-motorized multi-use path would directly consume a negligible amount of energy. Thus, energy use during operation would be similar to, or less than, existing conditions. Construction of the Project would require energy use, but this use would not be wasteful or inefficient, nor would it require new or expanded electric power or natural gas facilities. Energy used during construction would allow the operation of the multi-use path, which, as discussed above, could result in a reduction of long-term energy use. No features of the Project would conflict with or obstruct state or local plans for renewable energy or energy efficiency. The Project would not require the relocation or construction of new or expanded electric power or natural gas facilities. The impact on energy use and energy plans would be less than significant.

3.8 Geology and Soils

Table 3-14. Geology and Soils Impacts

Geology and Soils Impacts				
Would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☒	☐
ii) Strong seismic ground shaking?	☐	☐	☒	☐
iii) Seismic-related ground failure, including liquefaction?	☐	☐	☒	☐
iv) Landslides?	☐	☐	☒	☐
b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☒	☐
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994) creating substantial direct or indirect risks to life or property?	☐	☐	☒	☐
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of wastewater?	☐	☐	☒	☐
f) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?	☐	☐	☐	☒

3.8.1 Environmental Setting and Baseline Conditions

The City of Porterville sits on top of the alluvial fans of the Tule River and its distributaries. The alluvial fans are soft near the river and other waterways and firm in the north, northeast and downtown, areas as a transition to the granitic bedrock deposits in the foothills. The City of Porterville contains a wide variety of soil types which have a significant bearing on land planning and development. Porterville Clay is the most prominent soil

type located within the City.[9] While State and federal laws regulate soil quality, as indicated by the farmland classification system, local land use planning is important for limiting erosion potential.

3.8.1.1 Geology and Soils

The Project is located in the City of Porterville, in the central section of California's Great Valley Geomorphic Province, or Central Valley. The Sacramento Valley makes up the northern third and the San Joaquin Valley makes up the southern two-thirds of the geomorphic province. Both valleys are watered by large rivers flowing west from the Sierra Nevada Range, with smaller tributaries flowing east into the valley from the Coast Ranges. Most of the surface of the Great Valley is covered by Quaternary (present day to 1.6 million years ago) alluvium. The sedimentary formations are steeply upturned along the western margin due to the uplifted Sierra Nevada Range.[10] From the time the Valley first began to form, sediments derived from erosion of igneous and metamorphic rocks and consolidated marine sediments in the surrounding mountains have been transported into the Valley by streams. The City of Porterville 2030 General Plan, Figure 7-1 identifies geological and soil hazards throughout the planning area. According to this source, the Project site is located in an area with a high susceptibility for erosion (0.32-0.43 K Factor).

3.8.1.2 Faults and Seismicity

The Project site is not located within an Alquist-Priolo Earthquake Fault Zone and no known faults cut through the local soil at the site. The nearest unnamed fault is 2.1 miles south of Segment 1 of the non-motorized multi-use path. The nearest named fault is the Pond fault, located approximately 26.3 miles to the southwest of Segment 1. The San Andreas fault zone, Cholame-Carrizo section is 66.1 miles to the southwest of Segment 1 as well.

3.8.1.3 Liquefaction

The potential for liquefaction, which is a phenomenon whereby unconsolidated and/or near-saturated soils lose cohesion and are converted to a fluid state as a result of severe vibratory motion, is dependent on soil types and density, depth to groundwater, and the duration and intensity of ground shaking. Although no specific liquefaction hazard areas have been identified in the county, this potential is recognized throughout the San Joaquin Valley where unconsolidated sediments and a high-water table coincide. Liquefaction risk in the project area is low. Using the USDA NRCS soil survey of Fresno County, an analysis of the soils onsite was performed.

3.8.1.4 Soil Subsidence

Subsidence occurs when a large land area settles due to over-saturation or extensive withdrawal of ground water, oil, or natural gas. These areas are typically composed of open-textured soils that become saturated. These areas are high in silt or clay content. The Project site is comprised of many soil types, as shown in the table below. These soils are mostly well drained to moderately well drained.

Table 3-15. Project Soil Characteristics

Map unit name	Rating	Acres in AOI	Percent of AOI
Centerville clay, 2 to 9 percent slopes	Well drained	0.4	1.4%
Exeter loam, 0 to 2 percent slopes	Well drained	0.6	2.0%
Havala loam, 2 to 5 percent slopes	Well drained	0.2	0.8%
Porterville clay, 2 to 9 percent slopes	Well drained	9.6	34.3%
San Emigdio loam	Well drained	5.3	19.1%

[9] Porterville General Plan Public Health and Safety Element, http://www.ci.porterville.ca.us/depts/communitydevelopment/documents/Chapter7PublicHealthandSafety_000.pdf , Accessed July 2020.
[10] Harden, D.R. 1998, California Geology, Prentice Hall, 479 pages

Map unit name	Rating	Acres in AOI	Percent of AOI
San Joaquin loam, 0 to 2 percent slopes	Moderately well drained	6.1	21.9%
San Joaquin loam, 2 to 9 percent slopes	Moderately well drained	0.7	2.5%
Tujunga sand	Somewhat excessively drained	1.7	6.0%
Exeter loam, 0 to 2 percent slopes	Moderately well drained	2.4	8.6%
San Joaquin loam, 0 to 2 percent slopes	Moderately well drained	0.6	2.3%
Water	N/A	0.2	0.6%
Water-perennial	N/A	0.2	0.5%
	Totals for Project Area	**28**	**100%**

3.8.1.5 Dam and Levee Failure

Lake Success is approximately 5.4 miles east of Segment 2 of the Project. The entirety of Segment 2, and portions of segments one and three are located within the dam failure inundation zone for Lake Success[11].

3.8.2 Impact Assessment

a) Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

a-i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

a-ii) Strong seismic ground shaking?

Less than Significant Impact. The Project site and its vicinity are located in an area traditionally characterized by relatively low seismic activity. The site is not located in an Alquist-Priolo Earthquake Fault Zone as established by the Alquist-Priolo Fault Zoning Act (Section 2622 of Chapter 7.5, Division 2 of the California Public Resources Code).

There are no known earthquake faults within the Project area, strong ground shaking is unlikely, and the Project does not include any habitable structures. Additionally, construction of the proposed multi-use path, related amenities and waterway crossings would comply with the most recent seismic standards as set forth in the California Building Standards Code. Compliance with these standards are expected to ensure potential impacts related to strong seismic ground shaking would be less than significant.

a-iii) Seismic-related ground failure, including liquefaction?

Less than Significant Impact. Seismic-related ground failures, such as ruptures, lateral spreading, ground lurching, seiches, or mudslides, are unlikely to occur in the City because of its relatively stable geologic formation and distance to active faults. However, the City's General Plan states that there is a moderate risk of liquefaction near the Tule River due to the hillside topography and soil slumping. Because the Project site is generally level and does not involve the construction of any habitable structures, the Project would not expose

[11] City of Porterville General Plan. Public Safety Element, Figure 7-3 Flood Hazards Map. http://www.ci.porterville.ca.us/depts/CommunityDevelopment/documents/Chapter7PublicHealthandSafety_000.pdf Accessed October 2020.

people or structures to potential substantial effects associated with seismic-related ground failure, including liquefaction. Therefore, this impact is less than significant.

a-iv) Landslides?

Less than Significant Impact. According to the City of Porterville General Plan, Public Health and Safety Element, the Project site is in the Seismic 3 zone meaning the site has a moderate to high risk of ground motion that could result in structural damage. However, the potential landslide impact at this location is minimal as the Project site is essentially flat and level and not adjacent to slopes susceptible to landslide. The impact is less than significant.

b) Would the project result in substantial soil erosion or the loss of topsoil?

Less than Significant Impact. Earthmoving activities associated with the Project would include excavation, grading, and construction over an area of approximately 112 acres. These activities could expose soils to erosion processes however, the extent of erosion would vary depending on slope steepness/stability, vegetation/cover, concentration of runoff, and weather conditions. Dischargers whose projects disturb one (1) or more acres of soil or whose projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, are required to obtain coverage under the Statewide General Permit for Discharges of Storm Water Associated with Construction Activity (Construction General Permit Order 2009-0009-DWQ). Construction activity subject to this permit includes clearing, grading and disturbances to the ground such as stockpiling, or excavation, and construction of linear underground or overhead facilities associated with path construction, but does not include regular maintenance activities performed to restore the original lines, grade, or capacity of the overhead or underground facilities. The Construction General Permit requires the development of a SWPPP by a certified Qualified SWPPP Developer. Since the Project site has relatively flat terrain with a low potential for soil erosion and would comply with the State Water Resources Control Board (SWRCB) requirements, the Project's impacts would be less than significant.

c) Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Less than Significant Impact. As discussed in Section a-ii and a-iv above, the potential for landslide or liquefaction is considered unlikely. Lateral spreading, subsidence, and collapse both on-site and off-site are also considered unlikely or less than significant for reasons previously discussed in these sections. Furthermore, the aforementioned physical properties of these soils make subsidence, liquefaction, lateral spreading, or other ground failure unlikely. Any impacts would be less than significant.

d) Would the project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

Less than Significant Impact. The soils types within the Project area consist of approximately eight soils types as listed in **Table 3-15**. These soils types are characterized as being well-drained to moderately well-drained. The northern portion of the non-motorized multi-use path is located on soils with a high expansion potential; however this Project does not involve the construction of habitable structures and would therefore not create substantial risks to life or property. Any impacts would be less than significant.

e) Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

No Impact. The Project will not require connection to a septic tank, nor sewer system, as the Project does not generate wastewater. There will be no impact.

f) Would the project directly or indirectly destroy a unique paleontological resource or site or unique geological feature?

Less than Significant Impact. No known paleontological resources exist within the Project area. The Project site has previously been a railroad line. Construction activities associated with the Project are not expected to be conducted significantly below grade, at a level where they would have the potential to disturb any previously unknown paleontological resources or geologic features. Impacts would be less than significant.

3.9 Greenhouse Gas Emissions

Table 3-16. Greenhouse Gas Emissions Impacts

Greenhouse Gas Emissions Impacts					
	Would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a)	Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☐	☐	☒	☐
b)	Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☒	☐

3.9.1 Environmental Setting and Baseline Conditions

The Earth's climate has been warming for the past century. Experts believe this warming trend is related to the release of certain gases into the atmosphere. Greenhouse gases (GHG) absorb infrared energy that would otherwise escape from the Earth. As the infrared energy is absorbed, the air surrounding the Earth is heated. An overall warming trend has been recorded since the late 19th century, with the most rapid warming occurring over the past 35 years, with 16 of the 17 warmest years on record occurring since 2001. Not only was 2016 the warmest year on record, but eight of the 12 months that make up the year—from January through September, with the exception of June—were the warmest on record for those respective months. October, November, and December of 2016 were the second warmest of those months on record—in all three cases, behind records set in 2015.[12] Human activities have been attributed to an increase in the atmospheric abundance of greenhouse gases. The following is a brief description of the most commonly recognized GHGs.

3.9.1.1 Greenhouse Gases

Carbon dioxide (CO_2) is an odorless, colorless natural greenhouse gas. CO_2 is emitted from natural and anthropogenic sources. Natural sources include the following: decomposition of dead organic matter; respiration of bacteria, plants, animals, and fungus; evaporation from oceans; and volcanic out gassing. Anthropogenic sources include the burning of coal, oil, natural gas, and wood.

Methane (CH_4) is a flammable greenhouse gas. A natural source of methane is the anaerobic decay of organic matter. Geological deposits, known as natural gas fields, also contain methane, which is extracted for fuel. Other sources are from landfills, fermentation of manure, and ruminants such as cattle.

Nitrous oxide (N_2O), also known as laughing gas, is a colorless greenhouse gas. Nitrous oxide is produced by microbial processes in soil and water, including those reactions that occur in fertilizer containing nitrogen. In addition to agricultural sources, some industrial processes (fossil fuel-fired power plants, nylon production, nitric acid production, and vehicle emissions) also contribute to its atmospheric load.

Water vapor is the most abundant, and variable greenhouse gas. It is not considered a pollutant; in the atmosphere, it maintains a climate necessary for life.

[12] NASA, NOAA Data Show 2016 Warmest Year on Record Globally. https://www.nasa.gov/press-release/nasa-noaa-data-show-2016-warmest-year-on-record-globally. January 18, 2017. Accessed 14 February 2020.

Ozone (O_3) is known as a photochemical pollutant and is a greenhouse gas; however, unlike other greenhouse gases, ozone in the troposphere is relatively short-lived and, therefore, is not global in nature. Ozone is not emitted directly into the atmosphere but is formed by a complex series of chemical reactions between volatile organic compounds, nitrogen oxides, and sunlight.

Aerosols are suspensions of particulate matter in a gas emitted into the air through burning biomass (plant material) and fossil fuels. Aerosols can warm the atmosphere by absorbing and emitting heat and can cool the atmosphere by reflecting light.

Chlorofluorocarbons (CFCs) are nontoxic, nonflammable, insoluble, and chemically unreactive in the troposphere (the level of air at the earth's surface). CFCs were first synthesized in 1928 for use as refrigerants, aerosol propellants, and cleaning solvents. CFCs destroy stratospheric ozone; therefore, their production was stopped as required by the Montreal Protocol in 1987.

Hydrofluorocarbons (HFCs) are synthetic chemicals that are used as a substitute for CFCs. Of all the greenhouse gases, HFCs are one of three groups (the other two are perfluorocarbons and sulfur hexafluoride) with the highest global warming potential. HFCs are human-made for applications such as air conditioners and refrigerants.

Perfluorocarbons (PFCs) have stable molecular structures and do not break down through the chemical processes in the lower atmosphere; therefore, PFCs have long atmospheric lifetimes, between 10,000 and 50,000 years. The two main sources of PFCs are primary aluminum production and semiconductor manufacture.

Sulfur hexafluoride (SF_6) is an inorganic, odorless, colorless, nontoxic, nonflammable gas. It has the highest global warming potential of any gas evaluated. Sulfur hexafluoride is used for insulation in electric power transmission and distribution equipment, in the magnesium industry, in semiconductor manufacturing, and as a tracer gas for leak detection.

3.9.1.2 Effects of Climate Change

The impacts of climate change have yet to fully manifest. A hotter planet is causing the sea level to rise, disease to spread to non-endemic areas, as well as more frequent and severe storms, heat events, and air pollution episodes. Also affected are agricultural production, the water supply, the sustainability of ecosystems, and therefore the economy. The magnitude of these impacts is unknown.

Emissions of GHGs contributing to global climate change are largely attributable to human activities associated with the industrial/manufacturing, utility, transportation, residential, and agricultural sectors. GHG emissions are typically expressed in carbon dioxide-equivalents (CO_2e), based on the GHG's Global Warming Potential (GWP). The GWP is dependent on the lifetime, or persistence, of the gas molecule in the atmosphere. For example, one ton of CH_4 has the same contribution to the greenhouse effect as approximately 21 tons of CO_2. Therefore, CH_4 is a much more potent GHG than CO_2.

3.9.2 Methodology

An Air Quality and Greenhouse Gas Emissions Report (**Appendix A**) was prepared in May 2020. The sections below detail the methodology of the report and its conclusions.

3.9.2.1 Short-Term Construction-Generated Emissions

Short-term construction emissions associated with the Project were calculated using CalEEmod, Version 2016.3.2. Emissions' modeling was assumed to occur over an approximate 48 month period and covering a site area of approximately nine miles of path with 100 foot width (approximately 112 acres). Remaining assumptions were based on the default parameters contained in the model. Modeling assumptions and output files are included in **Appendix A**.

3.9.2.2 Long-Term Operational Emissions

Long-term operational emissions associated with the Project are estimated to be minimal in nature. Modeling assumptions and output files are included in **Appendix A**.

3.9.3 Impact Assessment

3.9.3.1 Thresholds of Significance

In accordance with SJVAPCD's *CEQA Greenhouse Gas Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects*[13], proposed projects complying with Best Performance Standards (BPS) would be determined to have a less-than-significant impact. Projects not complying with BPS would be considered less than significant if operational GHG emissions would be reduced or mitigated by a minimum of 29 percent, in comparison to business-as-usual (year 2004) conditions. In addition, project-generated emissions complying with an approved plan or mitigation program would also be determined to have a less-than-significant impact.

Bay Area Air Quality Management District's Thresholds for Significance: Bay Area Air Quality Management District's approach to developing a threshold of significance for GHG emissions is to identify the emissions level for which a project would not be expected to substantially conflict with existing California legislation adopted to reduce Statewide GHG emissions. If a project would generate GHG emissions above the threshold level, it would be considered to contribute substantially to a cumulative impact, and would be considered significant. If mitigation can be applied to lessen the emissions such that the project meets its share of emission reductions needed to address the cumulative impact, the project would normally be considered less than significant. Although the proposed Project is not located in the Bay Area, the Bay Area Air Quality Management District's thresholds for significance are based on the Statewide AB 32 objectives, are scientifically supported and are more appropriate to assess potential impacts related to GHG emissions. For land use development projects, the threshold is compliance with a qualified GHG Reduction Strategy or annual emissions less than 1,100 metric tons per year (MT/yr) of CO2e. For stationary source projects, such as those requiring a permit from a local air district to operate, the threshold is 10,000 MT/yr of CO2e. Although the BAAQMD thresholds are generally intended for ongoing sources of emissions (e.g., manufacturing facilities, refineries), their use in CEQA is appropriate for construction projects that occur over a relatively short period and contribute a relatively low total amount of GHGs, as compared to a land use development project that would generate substantial annual emissions indefinitely.

a) Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? And;

b) Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Less than Significant Impact.

Short-Term Construction-Generated Emissions

Estimated construction-generated emissions are summarized in **Table 3-17**. As indicated, construction of the Project would generate maximum annual emissions of approximately 668.2055 $MTCO_{2}e$. Construction-related production of GHGs would be temporary and last approximately four years. These emissions are totaled and amortized over 30 years and added to the operational emissions in **Table 3-18** below.

[13] Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA. http://www.valleyair.org/Programs/CCAP/12-17-09/3%20CCAP%20-%20FINAL%20LU%20Guidance%20-%20Dec%2017%202009.pdf Accessed September 2020

Table 3-17. Short-Term Construction-Generated GHG Emissions

Year	Emissions (MT CO_2e)[1]
2021	458.7961
2022	668.2055
2023	517.2596
2024	125.4018
Amortized over 30 years	*58.99*

1. *Emissions were quantified using the CalEEmod, Version 2016.3.2. Refer to* ***Appendix A*** *for modeling results and assumptions. Totals may not sum due to rounding.*

Long-Term Operational Emissions

Estimated long-term operational emissions are summarized in **Table 3-18**.

Table 3-18. Long-Term Operational GHG Emissions

	Emissions (MT CO_2e)[1]
Estimated Annual Operation CO2e Emissions	154.1930
Amortized Construction Emissions	58.99
Total Estimated Annual Operational CO2e Emissions	213.183
*AB 32 Consistency Threshold for Land-Use Development Projects**	*1,100*
Exceed Threshold?	*No*

1. *Emissions were quantified using the CalEEmod, Version 2016.3.2. Refer to* ***Appendix A*** *for modeling results and assumptions. Totals may not sum due to rounding.*

* As published in the Bay Area Air Quality Management District's CEQA Air Quality Guidelines. Available online at http://www.baaqmd.gov/~/media/files/planning-and-research/ceqa/ceqa_guidelines_may2017-pdf.pdf?la=en Accessed September 2020.

The City does not have an adopted GHG plan or MT/yr thresholds for CO_2e. The San Joaquin Valley Air Pollution Control District (SJVAPCD) CEQA guidance for GHG emissions recommends that a project not be considered to have a significant impact if it complies with an applicable air quality plan, results in a 29% reduction from business as usual (BAU) GHG emissions (2004 levels), or implements applicable Best Performance Standards (BPS). The SJVAPCD metrics (reduction from BAU, implementation of BPS) are not appropriate for this Project. The thresholds provided by the Bay Area Air Quality Management District, while not in our area, are very stringent and based on Statewide AB 32 objectives. Because they are designed to avoid significant impacts from global climate change, which occurs at a global scale, they do not depend on site-specific characteristics. The City has determined that the Bay Area Air Quality Management District's thresholds are the most appropriate threshold for this Project, which has predominantly short-term construction emissions, and extremely low operational emissions (213.183 CO_2e). Any impacts would be less than significant.

3.10 Hazards and Hazardous Materials

Table 3-19. Hazards and Hazardous Materials Impacts

Hazards and Hazardous Materials Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☒	☐	☐
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☒	☐	☐
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☒	☐	☐
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☒	☐
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☐	☒
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐
g)	Expose people or structures, either directly or indirectly to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

3.10.1 Environmental Setting and Baseline Conditions

The Project area was a railroad line since at least 1891. The tracks are no longer present on the site, but the railroad grade is still apparent. The area surrounding the site has historically been agricultural, industrial, and residential.

Pursuant to a Phase I Environmental Site Assessment Report (ESA) prepared by Provost & Pritchard for the Project (see additional details in the next section, the historical use of the Project site as a railroad represents a Business Environmental Risk (BER) depending on intended future use for the site. Soils of rail corridors have likely been impacted in some manner by the maintenance and use of the corridor. Arsenic is often the primary contaminant of concern from railroads, but impacts can also include hydrocarbons from various sources and other heavy metals. Additionally, because of the prevalence of agriculture and agricultural chemical storage on

and around the Property, agricultural pesticides may represent a BER at the site depending on intended future use for the Property.

3.10.1.1 Hazardous Materials

A Phase 1 Environmental Site Assessment Report (ESA) was prepared by Provost & Pritchard for the Project property. This ESA was performed in accordance with the scope and limitations of the American Society of Testing and Materials (ASTM) Standard Practice for Phase 1 Environmental Site Assessment Process E1527-13. This ESA was conducted to document the general environmental condition of the site prior to development of a non-motorized multi-use path.

The ESA process consisted of:

a. A review and evaluation of state and federal (i.e., U.S. EPA) environmental databases that list sites of potential impact within specified search distances;

b. A review and evaluation of reasonably ascertainable local agency records and environmental databases for historical and current documentation pertaining to the site;

c. A review and evaluation of reasonably ascertainable historical use information, including aerial photographs and maps (e.g., USGS, fire insurance, etc.), tax improvement records, city directories, and building department permit records;

d. Interviews with clients and government officials, as appropriate;

e. Site reconnaissance to determine current and past uses and conditions of both the property and adjoining properties;

f. Preparation of a report detailing findings, and conclusions generated from components 'a' through 'd'.

Much of the information in this impact section came from the ESA. The full ESA can be seen in **Appendix D** at the end of this document.

3.10.1.2 Airports

Segment 1 of the Project area is approximately 1.6 miles from the Porterville Municipal Airport. Segment 4 of the Project area is approximately 1.2 miles from Eckert Field Airport.

3.10.1.3 Emergency Response Plan

The City of Porterville has an adopted Emergency Response Plan which is available at the local Fire Department.

3.10.1.4 Sensitive Receptors

Sensitive receptors within the Project's vicinity consist of single-family residential development, parks and two school sites that are within 700 feet of the proposed path. No other identified concentrations of sensitive receptors, such as hospitals or nursing homes are within the Project's vicinity.

3.10.2 Impact Assessment

a) Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? And;

b) Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? And;

c) Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Less than Significant Impact with Mitigation Incorporated. The Project site is adjacent to several schools. In addition, the Project is adjacent to existing residential development. Construction of the Project will involve the use of hazardous materials associated with construction equipment, such as diesel fuel, lubricants, and solvents. However, the contractor will implement a SWPPP and will comply with all California Occupational Safety and Health Administration (Cal/OSHA) regulations regarding regular maintenance and inspection of equipment, spill prevention, and spill remediation in order to reduce the potential for incidental release of pollutants or hazardous substances onsite. Furthermore, any potential accidental hazardous materials spills during construction are the responsibility of the contractor to remediate in accordance with industry best management practices and State and county regulations. The Project site was previously surrounded by agricultural uses, and the presence of pesticides and other petrochemical fluids could be in the ground.

Environmental records sources are available for review from Federal, state, and local regulatory agencies. The purpose of the records review is to obtain and review records that would help to identify recognized environmental conditions in connection with the Property. Provost & Pritchard contracted with a commercial database service, Environmental Data Resources (EDR), to review the regulatory agency lists for reference to the Property and any listings within the appropriate ASTM minimum search distance from the site. The federal and state databases reviewed are listed below with a brief description of the potential environmental risk, if applicable. The Phase I ESA done for the Project site showed that there was no evidence of recognized environmental conditions (REC)s on the Project site, however the following RECs are recorded property adjacent to the site that have not been remediated or are currently undergoing remediation. The adjacent RECs are as follows: Porterville PCE Plume, Porterville MGP, Bobs Petro Products and the Eyster Property. Further info on these sites can be found in **Appendix D**. In addition, historical use of the Project site as a railroad represents a BER due to the likely presence of arsenic, hydrocarbons, heavy metals, or other contaminants in the soil typically associated with railroad use. Any ground disturbance on the Project site could potentially release these contaminants into the air. The operational phase of the Project will not involve the use or transport of hazardous materials and is not anticipated to release any hazardous materials.

The following mitigation measures would reduce any impacts from construction to less than significant:

Mitigation Measures

HAZ-1: Prior to the issuance of a grading permit or the planting of any trees, the City shall ensure that a Phase II ESA shall be conducted to determine the presence or absence of a significant impact to the subject site from hazardous materials. The Phase II ESA may include but may not be limited to the following: (1) Collection and laboratory analysis of soils and/or groundwater samples to ascertain the presence or absence of significant concentrations of constituents of concern; (2) Collection and laboratory analysis of soil vapors and/or indoor air to ascertain the presence or absence of significant concentrations of volatile constituents of concern; and/or (3) Geophysical surveys to ascertain the presence or absence of subsurface features of concern such as USTs, drywells, drains, plumbing, and septic systems. The findings and conclusions of the

Phase II ESA shall become the basis for potential recommendations for follow-up investigation, site characterization, and/or remedial activities, if found to be warranted.

HAZ-2: In the event the findings and conclusions of the Phase II ESA reveal the presence of significant concentrations of hazardous materials warranting further investigation, the City shall ensure that site characterization shall be conducted in the form of additional Phase II ESAs in order to characterize the source and maximum extent of impacts from constituents of concern. The findings and conclusions of the site characterization shall become the basis for formation of a remedial action plan and/or risk assessment.

HAZ-3: If the findings and conclusions of the Phase II ESAs, site characterization and/or risk assessment demonstrate the presence of concentrations of hazardous materials exceeding regulatory threshold levels, prior to the issuance of a grading permit, the City shall complete site remediation and potential risk assessment with oversight from the applicable regulatory agency including, but not limited to, the Cal-EPA Department of Toxic Substances Control (DTSC) or Regional Water Quality Control Board (RWQCB), and Tulare County Department of Environmental Health Services. Potential remediation could include the removal or treatment of water and/or soil. If removal occurs, hazardous materials shall be transported and disposed at a hazardous materials permitted facility.

d) Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Less than Significant. The Project does not involve land that is listed as a hazardous materials site pursuant to Government Code Section 65962.5 and is not included on a list compiled by the Department of Toxic Substances Control. However, as discussed above, there are several sites listed that are adjacent to the Project site. Impacts will be less than significant.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

No Impact. The Project is more than one mile away from the nearest airports and is not constructing habitable buildings. Therefore, the project does not result in a safety hazard or excessive noise from an airport for people residing or working in the project area. There is no impact.

f) Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less than Significant Impact. The Project involves the construction and development of a non-motorized multi-use path. Construction traffic associated with the Project would be minimal and temporary, construction would take place over an approximate 4-year span. Operational traffic will consist of path maintenance by City staff. Therefore, Project-related impacts to emergency evacuation routes or emergency response routes on local roadways would be considered less than significant.

g) Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

No Impact. According to CAL FIRE's Fire Hazard Safety Zone Maps[14] the Project site is not located in a wildlands area. The Project would not exacerbate wildfire risks, interfere with emergency response or

[14] CalFire Fire Hazard Severity Zones Maps https://osfm.fire.ca.gov/divisions/wildfire-planning-engineering/wildland-hazards-building-codes/fire-hazard-severity-zones-maps/. Accessed July 2020.

evacuation plans, require fire-related infrastructure, or expose people, directly or indirectly, to significant risks associated with wildfire. There would be no impact.

3.11 Hydrology and Water Quality

Table 3-20. Hydrology and Water Quality Impacts

Hydrology and Water Quality Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	☐	☐	☒	☐
b)	Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐
c)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
	i) result in substantial erosion or siltation on- or off-site;	☐	☐	☒	☐
	ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	☐	☐	☒	☐
	iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	☐	☐	☒	☐
	iv) impede or redirect flood flows?				
d)	In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☒	☐
e)	Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☐	☒

3.11.1 Environmental Setting and Baseline Conditions

The Project is located within the floor area of the San Joaquin Valley. The Valley is bordered by the Sierra Nevada Mountain Ranges to the east, the Coast Ranges to the west, the Klamath Mountains and Cascade Range to the north, and the Transverse Ranges and Mojave Desert to the south. Large groundwater basins underlay the Valley floor and are fed primarily from stormwater run-off from these mountain watersheds and other natural surface water recharge.

Like most of California, the San Joaquin Valley experiences a Mediterranean climate. Warm, dry summers are followed by cool, moist winters. Summer temperatures often reach above 90 degrees Fahrenheit, and the humidity is generally low. Winter temperatures are often below 60 degrees Fahrenheit during the day and rarely

exceed 70 degrees. Precipitation falls in the form of rainfall yearly, most of which occurs between October and March.

Climactic and topographic features of the site are typical of those found in California's San Joaquin Valley. The Project site is relatively flat and consists of vacant, urban land. One portion of the site (in Segment 2), immediately west of the Main Street Bridge, crosses the Tule River.

3.11.2 Impact Assessment

a) Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Less than Significant Impact. In compliance with state regulations, all development within the Project area would be required to comply with state regulations adopted to reduce groundwater degradation. The Regional Water Quality Control Board (RWQCB) requires the preparation of a SWPPP for projects that exceed specified size limits. The Project would be required to obtain RWQCB approval of its SWPPP prior to construction. As discussed in Chapter 2, a portion of the Project involves the reconstruction of the UPRR railroad bridge as a pedestrian bridge. This work will take place within the Tule River and will involve the construction of new bridge foundations to support the superstructure instead of using the existing bridge foundations. The primary benefit of this approach is that it allows for removal of the existing piers which are within the CVFPB and FEMA floodways, and placing the new foundations outside of the main channel. To provide the required floodway width for the CVFPB and FEMA, this approach will consist of a three span prefabricated steel truss with span lengths of 140'. This span configuration minimizes the number of piers within the floodways and potentially mitigations some of the permitting issues. Hydraulic analysis will be required during design and permitting of the bridge to justify to both FEMA and CVFPB that their respective floodways and design water surface elevations are not impacted by the proposed bridge, and to determine appropriate scour design parameters. The City will obtain any of the required permits for the new bridge. Additionally, as discussed in further detail in section 3.5 above, Project activities conducted within the OHWM of a Water of the United States. will be subject to permit requirements of the USACE, pursuant to Section 404 of the Clean Water Act. This Project would likely be authorized under a Nationwide Permit. Such permits are typically issued on the condition that the applicant agrees to provide mitigation that results in no net loss of wetland functions or values. No USACE permit can be issued until the RWQCB issues a Section 401 Water Quality Certification, which also includes additional measures to ensure that the proposed activity will meet State water quality standards. Therefore, the Project would have a less than significant impact through implementation of planned Project design features, compliance with any permitting requirements, and through compliance with adopted SWPPP regulations.

b) Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less than Significant Impact. The Project site will have a non-motorized multi-use path that is approximately 12 feet wide and paved, the remainder of the Project area will be a permeable surface. Once construction is completed the Project will use a minimal amount of water annually for drinking fountains and drought tolerant landscaping. Therefore, the Project will not substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the Project would impede sustainable groundwater management of the basin.

c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

c-i) result in substantial erosion or siltation on- or off-site;

c-ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;

c-iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

c-iv) impede or redirect flood flows?

Less than Significant Impact. The Project will not substantially alter an existing drainage pattern of the site or area and will not alter the course of the Tule River. In order to minimize runoff and erosion during construction activities a SWPPP must be implemented, and the contractor shall be required to comply with all Cal/OSHA regulation regarding regular inspection of equipment, spill prevention, and spill remediation in order to reduce the potential for incidental release of pollutants or hazardous substances onsite. The non-motorized multi-use path will be designed so as not to substantially increase the rate or amount of surface runoff. Stormwater flows would be directed into storm drains in the nearby roadways. The non-motorized multi-use path would not impede or redirect flood flows. Impacts resulting from alterations to drainage patters would be less than significant.

d) Would the project in flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundations?

Less than Significant Impact. The Project is a non-motorized multi-use path, and does not involve any habitable structures or the storing of any pollutants. The Project would not have the potential to release pollutants due to inundations. Any impacts would be less than significant.

e) Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

No Impact. The Project will not conflict with or obstruct implementation of any water quality control plan or sustainable groundwater management plan. There will be no impact.

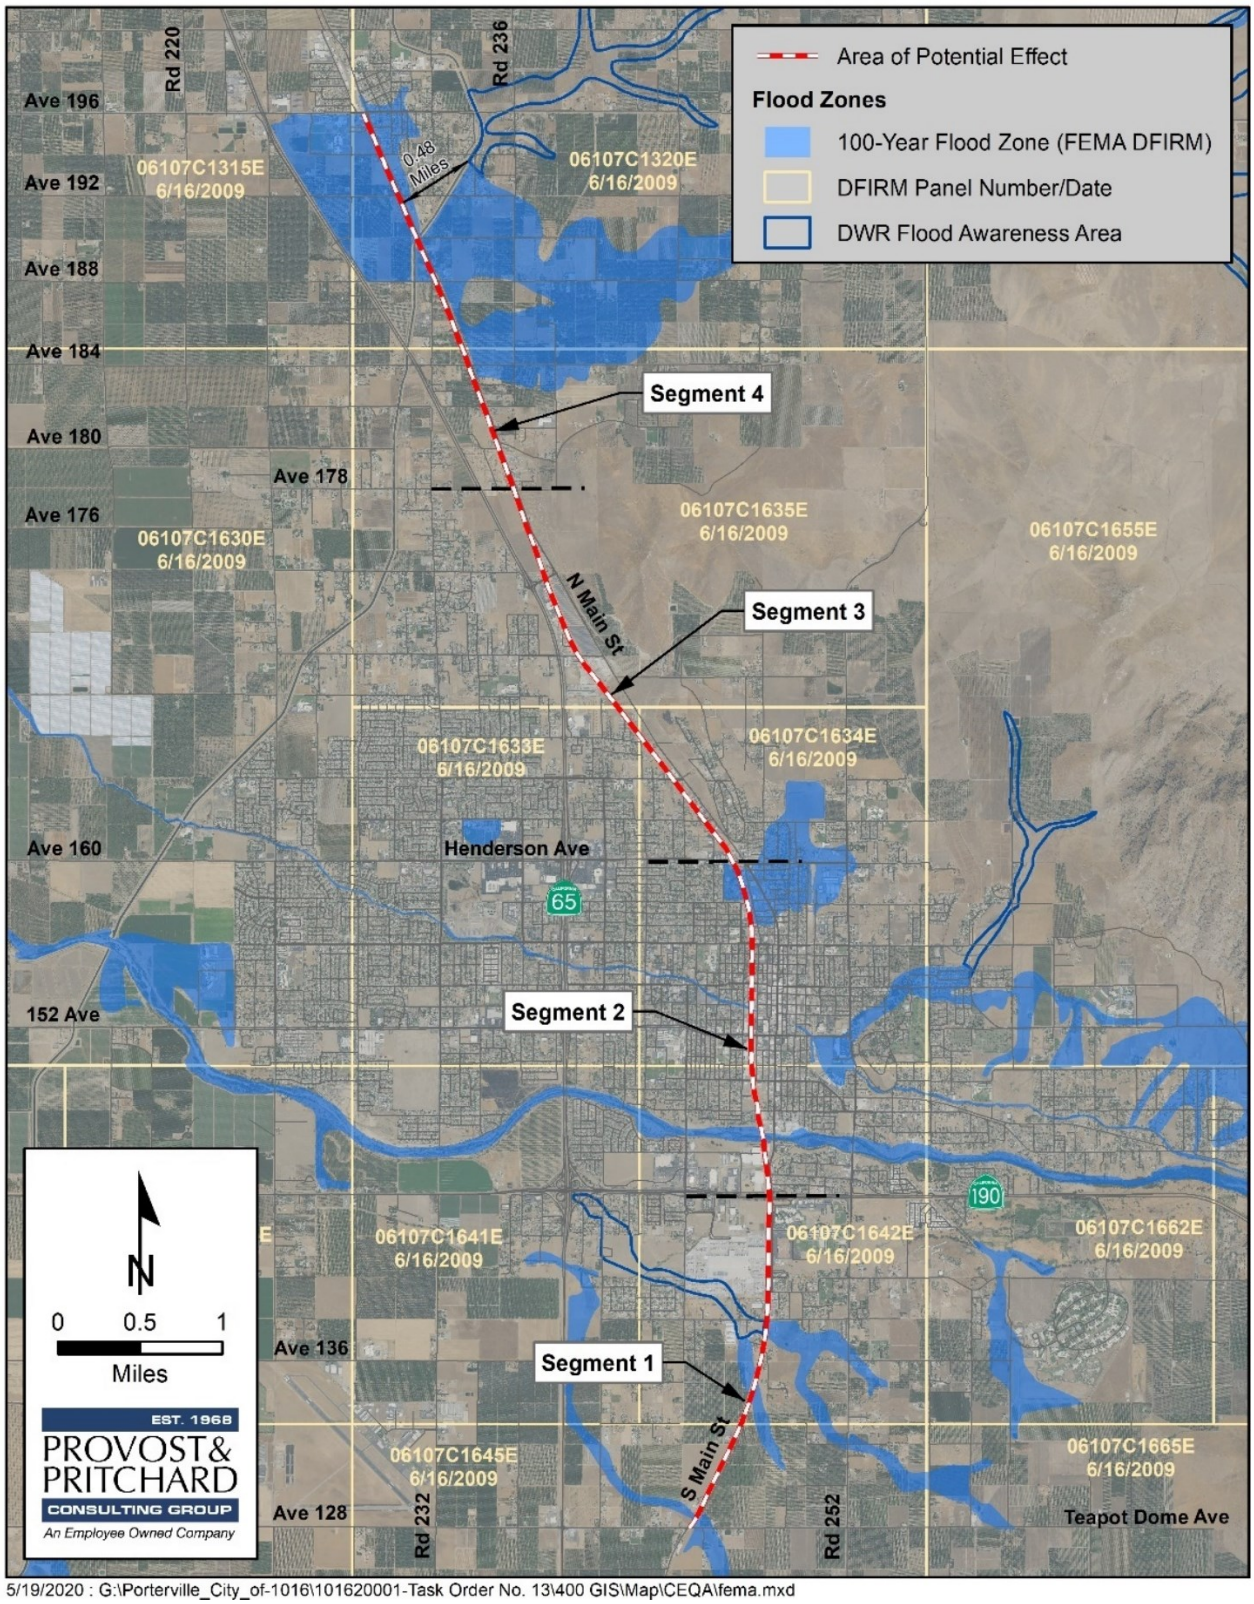


Figure 3-3. FEMA Map

3.12 Land Use and Planning

Table 3-21. Land Use and Planning Impacts

Land Use and Planning Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Physically divide an established community?	☐	☐	☐	☒
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☒	☐

3.12.1 Environmental Setting and Baseline Conditions

General Plan Land Use Designations and Zone Districts are illustrated in **Figure 2-7** through **Figure 2-10,** and **Figure 2-11** through **Figure 2-14**, respectively.

3.12.2 Impact Assessment

a) Would the project physically divide an established community?

No Impact. The Project involves the construction of a non-motorized multi-use non-motorized vehicle path along an abandoned railway line that runs mostly north/south through the City. The Project would give pedestrian and bicycle users (primarily) safe, improved access to education, retail opportunities, job centers, housing and the city's transit center. The Project would not physically divide an established community. There would be no impact.

b) Would the project cause a significant environmental conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less than Significant Impact. The Project proposes to construct a non-motorized multi-use path along an abandoned railway that runs mostly north-south through the City. Impacts to biological resources, cultural resources, hazards and hazardous materials and tribal cultural resources are possible, however the implementation of mitigation measures found in those respective sections of this Initial Study will result in a less than significant impact.

3.13 Mineral Resources

Table 3-22. Mineral Resources Impacts

Mineral Resources Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☒	☐
b)	Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

3.13.1 Environmental Setting and Baseline Conditions

The Porterville 2030 General Plan outlines current significant mineral sources in Tulare County and within the planning area. The most significant mineral resources in Tulare County are sand, gravel, and crushed stone, used as sources for aggregate. The two major sources of aggregate are alluvial deposits (riverbeds, and floodplains), and hard rock quarries. Consequently, most Tulare County mines are located along rivers at the base of the Sierra foothills[15]. According to the Tulare County General Plan Background Report, all of the known potential mineral resource locations are mapped within the foothills and/or along major watercourses (Tule River).

California Department of Conservation's Division of Oil, Gas, and Geothermal Resources (DOGGR) maintains a database of oil wells in the Project. According to the DOGGR Well Finder there is one plugged and oil well approximately 0.24 miles from Segment 3 of the Project.

The Project site is not delineated on a local land use plan as a locally important mineral recovery site.

3.13.2 Impact Assessment

a) Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? And

Less than Significant Impact. Although there are currently 25 mines permitted to operate in Tulare County, none of them are in or adjacent to the City of Porterville[16] As shown in Figure 6-3 of the 2030 General Plan, the proposed Project area is not included in a State classified mineral resource zones, it is however adjacent to MRZ-3 zone. The Project would not result in the loss of an available known mineral resource. There would be no impact.

[15]City of Porterville 2030 General Plan, Open Space and Conservation Element, Page 123
[16] State of California Department of Conservation, Mine Reclamation – AB 3098 List, ftp://ftp.consrv.ca.gov/pub/omr/AB3098%20List/AB3908List.pdf, accessed on June 10th, 2019.

b) Would the project result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

No Impact. The Project site is not delineated on a local land use plan as a locally important mineral resource recovery site; therefore, the existence of the Project would not result in the loss of availability of any mineral resources. There would be no impact.

3.14 Noise

Table 3-23. Noise Impacts

Noise Impacts					
	Would the project result in:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐
b)	Generation of excessive ground borne vibration or ground borne noise levels?	☐	☐	☐	☒
c)	For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

3.14.1 Environmental Setting and Baseline Conditions

The Project site is a 100-foot wide abandoned UPRR right-of-way that runs through the City. The Project site as it would traverse the City would be surrounded by a mixture of commercial, residential, industrial and agricultural uses. Various roadways cross the Project site throughout its approximately nine miles.

The applicable noise standards governing the Project site may be found within policies outlined in the City of Porterville 2030 General Plan Noise Element[17] and the City's Noise Ordinance.[18] The major noise sources audible along the Project site are related to adjacent and nearby roadways and vehicle traffic. Other noise sources include industrial operations and overhead aircraft.

Certain land uses are considered more sensitive to noise than others. Examples of these include residential areas, educational facilities, hospitals, childcare facilities, and senior housing. Residential uses are located predominately in Segment 2 and three of the path. Primary existing noise sources in these areas surrounding the Project area are traffic noises from nearby and intersecting streets and other noise from motor vehicles generated by engine vibrations, the interaction between the tires and the road, and vehicle exhaust systems.

[17] Porterville General Plan Noise Element. http://www.ci.porterville.ca.us/depts/communitydevelopment/documents/Chapter9Noise_000.pdf , Accessed February 13, 2019.
[18] Porterville Municipal Code Noise Ordinance. https://www.sterlingcodifiers.com/codebook/index.php?book_id=679 , Accessed February 13, 2019

3.14.2 Impact Assessment

a) Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less Than Significant Impact. The Project site is situated along an abandoned railroad track that has been removed. The Project's location places portions of Segment 2 and 3 within an established noise contour identified in Figure 9-2 of the City's General Plan Noise Element as having noise level greater than 55-60 dB. Noise generated from the Project will primarily be during construction and would generally include noise from vehicles, and other equipment. During construction, noise from construction activities would contribute to the noise environment in the immediate Project vicinity. Activities involved in construction would generate maximum noise levels, as indicated in Table 3-24, ranging from 79 to 91 dBA at a distance of 50 feet, without feasible noise control (e.g. mufflers) and ranging from 75 to 80 dBA at a distance of 50 feet, with feasible noise control. The distinction between short-term construction noise impacts and long-term operational noise impacts is a typical one in both CEQA documents and local noise ordinances, which generally recognize the reality that short-term noise from construction is inevitable and cannot be mitigated beyond a certain level. Thus, local agencies frequently tolerate short-term noise at levels that they would not accept for permanent noise sources. All construction related activities will comply with the standards set forth by the City of Porterville General plan. Construction activities would take place during daylight hours between 7 a.m. and 7 p.m. on weekdays and 7 a.m. and 5 p.m. on weekends.

Table 3-24. Typical Construction Noise Levels[19]

Type of Equipment	dBA at 50 ft.	
	Without Feasible Noise Control	With Feasible Noise Control[1]
Dozer or Tractor	80	75
Excavator	88	80
Scraper	88	80
Front End Loader	79	75
Backhoe	85	75
Grader	85	75
Truck	91	75

[1] *Feasible noise control includes the use of intake mufflers, exhaust mufflers and engine shrouds operating in accordance with manufacturers specifications.*

Since the project site is located within an area of other similar urbanized uses, and portions of it sit within an established noise contour, and is adjacent to a heavily traveled roadways, it is not expected that the Project will result in significant noise increase to surrounding land uses during normal business hours. As a passive recreational use, the Project may generate intermittent low-level noise from human conversation at the Project site. Therefore impacts would be considered less than significant.

b) Would the project result in generation of excessive ground borne vibration or ground borne noise levels?

Less Than Significant Impact. Vibration is the periodic oscillation of a medium or object. Vibration sources may be continuous, such as factory machinery, or transient, such as explosions. As is the case with airborne sound, ground borne vibrations may be described by amplitude and frequency. Vibration amplitudes are usually expressed in peak particle velocity (PPV) or root mean squared (RMS), as in RMS vibration velocity. The PPV and RMS (VbA) vibration velocity are normally described in inches per second (in/sec). PPV is defined as the

[19] U.S. Department of Transportation, Federal Transit Administration FHWA Highway Construction Noise Handbook - PDF. 2006. Accessed July 2020.

maximum instantaneous positive or negative peak of a vibration signal and is often used in monitoring of blasting vibration because it is related to the stresses that are experienced by buildings[20].

Although PPV is appropriate for evaluating the potential for building damage, it is not always suitable for evaluating human response. As it takes some time for the human body to respond to vibration signals, it is more prudent to use vibration velocity when measuring human response. The vibration velocity level is reported in decibels relative to a level of $1x10^{-6}$ inches per second and is denoted as VdB. The typical background vibration-velocity level in residential areas is approximately 50 VdB. Ground borne vibration is normally perceptible to humans at approximately 65 VdB. For most people, a vibration-velocity level of 75 VdB is the approximate dividing line between barely perceptible and distinctly perceptible levels[21].

Typical outdoor sources of perceptible ground borne vibration are construction equipment, steel-wheeled trains, and traffic on rough roads. Construction vibrations can be transient, random, or continuous. The approximate threshold of vibration perception is 65 VdB, while 85 VdB is the vibration acceptable only if there are an infrequent number of events per day (FTA 2006). **Table 3-7** describes the typical construction equipment vibration levels.

Table 3-25. Typical Construction Vibration Levels[22]

Equipment	VdB at 25 ft[2]
Small Bulldozer	58
Jackhammer	79

Based on the typical vibration levels identified in the table above, any temporary vibration levels associated with construction activities are not expected to exceed the FTA threshold for the nearest residences which are adjacent to the Project site. All noise generated by the construction of the Project would be temporary in nature. The impact would be less than significant.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. The Segment 4 of the Project path is located approximately 1.2 miles away from Eckert Field, and Segment 1 of the Project path is located approximately 1.6 miles from Porterville Municipal Airport. The proposed Project would not involve any habitable structures, and would not expose people to excessive noise from nearby airports beyond baseline conditions of pedestrians and bicyclists already outside in the area. Therefore, there is no impact.

[20] U.S. Department of Transportation. Federal Transit Administration, Transit Noise and Vibration Impact Assessment. 2006.
[21] Ibid.
[22] Ibid.

3.15 Population and Housing

Table 3-26. Population and Housing Impacts

Population and Housing Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☐	☒
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

3.15.1 Environmental Setting and Baseline Conditions

According to the City of Porterville's Housing Element, Porterville is the third largest city in Tulare county, with a population of 55,852 as of 2015. The City estimates a population growth rate of 37% by 2040, resulting in a population of 97,097 residents. Porterville's housing stock is currently made up of predominately single-family homes, with a homeownership rate of approximately 57%. The City of Porterville has an average household size of 3.39 which is slightly greater than the countywide average of 3.36.

The zoning for almost the entirety of the project area is Public & Semi-Public (D-PS, with two small segments being zoned General Commercial (D-GC) and Mixed Use (D-MX). Parks and recreational uses are allowed in all three of these zone designations.

3.15.2 Impact Assessment

a) Would the project induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? and

b) Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. The proposed Project involves construction of a new non-motorized multi-use path, and associated related pedestrian and bicycle amenities and infrastructure. The goal of the Project is not to induce population growth, but rather to provide a recreational opportunity for the City. The Project would not encourage population growth directly or indirectly beyond that previously analyzed by the City of Porterville General Plan. No housing or habitable structures would be built, nor will any be removed. Implementation of the Project will not result in displacement of people or existing housing. Therefore, there will be no impact.

3.16 Public Services

Table 3-27. Public Services Impacts

Public Services Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
	Fire protection?	☐	☐	☒	☐
	Police protection?	☐	☐	☒	☐
	Schools?	☐	☐	☒	☐
	Parks?	☐	☐	☒	☐
	Other public facilities?	☐	☐	☒	☐

3.16.1 Environmental Setting and Baseline Conditions

Fire Protection: The Closest fire station is Tulare County Fire Station 16, it is approximately 321 feet north east of Segment 4. The Porterville Fire Department Station 2, is located approximately 1.6 miles west of Segment 3.

Police Protection: The closest law enforcement is the Tulare County Sheriff's station located approximately 0.25 miles from Segment 2 of the non-motorized multi-use path. The City of Porterville Police Department would provide primary police services to any incidents that happen within the City limits, and the Tulare County Sheriff would provide primary services to the parts of the path that are outside of the City limits or if called by City to assist inside the City.

Schools: The closest school is St. Anne Elementary School, located approximately 566 feet west of Segment 2 of the Project. The next closest school is Belleview Elementary School, which is approximately 672 miles west of Segment 2 of the Project.

Parks: The closest park is the Tule River Parkway, which intersects with Segment 2 of the non-motorized multi-use path. The second closest park is Zalud Park, which is located approximately 65 feet west of Segment 2.

Landfills: The closest landfill to the project site is the Teapot Dome Landfill, a Mid Valley Disposal site, located approximately 4 miles outside of the City of Porterville.

3.16.2 **Impact Assessment**

a) **Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:**

Less than Significant Impact:

Fire Protection – The City of Porterville and Tulare County Fire will provide fire protection services to the proposed Project non-motorized multi-use path. Station 2 is the closest City of Porterville Fire Station and is located approximately 1.6 miles to the west of Segment 2. Tulare County Fire Station 16 is located approximately 321 feet northeast of Segment 4. The Project would be required to comply with requirements of the City Fire Department/California Fire Code regarding access, water mains, hydrants, and review of engineering plans. Standard fire suppression conditions for multi-use paths are incorporated as part of the project. The Project path has adequate emergency access from the various roads that intersect the path. The implementation of the proposed Project would not adversely impact existing fire protection or emergency services within the City and would not require the construction of an additional fire protection facility in Porterville. Impacts to fire services would be less than significant.

Police Protection – The Project area within City limits will continue to be served by the City of Porterville Police Department. The Project area outside of the City limits will continue to be served by the Tulare County Sheriff's Department. Implementation of the proposed Project would not result in a substantial increase in demand for police services. Any increase would be minimal compared to the number of officers currently employed by the Police Department and Sheriff's Department and would not result in significant demand for additional police services or additional staffing. Implementation of the Project would not require the construction of new police facilities to serve the Project, nor would it create a negative impact to existing emergency response times and existing police protection service levels. Impacts to police services would be less than significant.

Schools – The Project path sits within the Porterville Unified School District. The non-motorized multi-use path would not create any housing or encourage any population growth. There would be no increase in the demand for school services. Additionally, the path would provide additional pedestrian access to schools that are adjacent to the path. Therefore, there is no impact to schools.

Parks – The Project is seen as a recreational facility. The project as proposed would facilitate the achievement of General Plan Implementation Policy PSCF-I-14, to "develop a safe and efficient trail network throughout the City that links parks and other key City destinations." As a result, the Project would not create a need for more parks but would instead provide pedestrian access to recreational facilities that are adjacent to the path. There is no impact to parks.

Other public facilities – The proposed Project is not growth inducing, and as such would not result in a significant increase in demand on other public facilities such as library services that has not already been planned for.

3.17 Recreation

Table 3-28. Recreation Impacts

Recreation Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐
b)	Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	☐	☐	☒	☐

3.17.1 Environmental Setting and Baseline Conditions

The City of Porterville provides several types of parks and facilities, as defined in the Porterville 2030 General Plan. In general, parks are defined by the general plan as land owned or leased by the City and used for public recreational purposes. The Porterville 2030 General Plan outlines several types of park facilities ranging in size from 0.1-acre pocket parks up to a 95 acre Sports Complex. Each park will fall into one of five categories: Pocket Park, Neighborhood Park, Community Park, Specialized Recreation, or Trails/Parkways. In total, the City of Porterville provides 15 parks. As discussed in Section 3.18, the Project would link to portions of the Tule River Parkway bicycle and pedestrian path.

3.17.2 Impact Assessment

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Less than Significant Impact. The Project as proposed would facilitate the achievement of General Plan Implementation Policy PSCF-I-14, to "develop a safe and efficient trail network throughout the City that links parks and other key City destinations." As the Project includes construction of a non-motorized multi-use path, the Project will have a less than significant impact on the physical deterioration of park and recreational facilities and would not contribute to the acceleration of such deterioration. Rather, the path would provide better connectivity between recreational facilities within the City. Any impacts would be less than significant.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Less than Significant Impact. The Project is the construction of a non-motorized multi-use path, the construction of it could cause adverse physical effects on the environment, as demonstrated by the impact assessments found in this chapter (**Impact Analysis**). Therefore, impacts related to the construction or expansion of recreational facilities will be less than significant with the mitigation measures identified in **Mitigation Monitoring** and Reporting Program implemented.

3.18 Transportation

Table 3-29. Transportation Impacts

Transportation Impacts					
	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☐	☐	☐	☒
b)	Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)??	☐	☐	☐	☒
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☒	☐
d)	Result in inadequate emergency access?	☐	☐	☒	☐

3.18.1 Environmental Settings and Baseline Conditions

The pedestrian circulation in Porterville is mainly comprised of sidewalks. Currently, the street environment is mostly auto oriented with roadways and discontinuous sidewalks. The City's General Plan states that all streets should be designed to accommodate pedestrians and bicyclists and new neighborhoods should be designed to be "pedestrian friendly", with wide sidewalks.[23] Porterville has recently completed eight miles of bikeway segments and eleven bike parking facilities, however few of the segments are linked. The proposed Project would link to portions of the Tule River Parkway bicycle and pedestrian path.

3.18.2 Impact Assessment

a) Would the project conflict with a plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

No Impact. The Porterville General Plan's Circulation Element establishes the following policies for the addition of bicycle and pedestrian routes and trails:

C-I-4: Develop a multi-modal transit system map integrating bicycle, public transportation, pedestrian and vehicle linkages within the City to ensure circulation gaps are being met.

C-G-9: Promote the use of bicycles to alleviate vehicle traffic and improve public health.

C-G-10: Promote Pedestrian Activity.

C-I-17: Establish bicycle lanes, bike routes and bike paths consistent with the General Plan.

The Circulation Element outlines many proposed trials and multi-use paths (Figure 4-3 of the Circulation Element). This Project would help further the established goals and polices by developing a multi-modal path that runs across the City and connects to other existing trails and paths. Therefore, the Project helps to

[23] Porterville General Plan Circulation Element. http://www.ci.porterville.ca.us/depts/communitydevelopment/documents/Chapter4Circulation_000.pdf , Accessed October 2020.

implement the above policies and does not conflict with a plan, ordinance or policy addressing the circulation system. There will be no impact.

b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3 subdivision (b)?

No Impact. The Project consists of the construction of an approximately nine mile, non-motorized multi-use path. The Project will serve to reduce vehicle miles traveled as it encourages persons to seek methods of transportation other than vehicle. There is no impact.

c) Would the project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? And

d) Would the project result in inadequate emergency access?

Less than Significant Impact. The Project has been designed to utilize existing right-of-way along the former railroad corridor and proposes lighted pedestrian crossings within the City limits. As the path is predominately physically separated from vehicular traffic, any impact is less than significant.

3.19 Tribal Cultural Resources

Table 3-30. Tribal Cultural Resources Impacts

Tribal Cultural Resources Impacts				
Would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:	☐	☒	☐	☐
i. Listed or eligible for listing in the California Register of Historical Resources, or in the local register of historical resources as defined in Public Resources Code section 5020.1(k), or	☐	☒	☐	☐
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☒	☐	☐

3.19.1 Environmental Setting and Baseline Conditions

Public Resources Code Section 21080.3.1, et seq. (codification of AB 52, 2013-14) requires that a lead agency, within 14 days of determining that it would undertake a project, must notify in writing any California Native American Tribe traditionally and culturally affiliated with the geographic area of the project if that Tribe has previously requested notification about projects in that geographic area. The notice must briefly describe the project and inquire whether the Tribe wishes to initiate request formal consultation. Tribes have 30 days from receipt of notification to request formal consultation. The lead agency then has 30 days to initiate the consultation, which then continues until the parties come to an agreement regarding necessary mitigation or agree that no mitigation is needed, or one or both parties determine that negotiation occurred in good faith, but no agreement would be made.

Tribal Consultation was conducted by ASM Affiliates, Inc. for the Project on behalf the City of Porterville. A Sacred Lands File search was performed on April 13, 2020 (see **Appendix C)**.

3.19.2 **Impact Assessment**

a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

a-i) Listed or eligible for listing in the California Register of Historical Resources, or in the local register of historical resources as defined in Public Resources Code section 5020.1(k), or

a-ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

a-i) and a-ii) Less than Significant Impact with Mitigation Incorporated. The City of Porterville received a letter from the Santa Rosa Rancheria Tachi Yokut Tribe pursuant to PRC § 21080.3.1 officially requesting notification of Projects within the Santa Rosa Rancheria's geographic area of traditional and cultural affiliation. On April 21, 2021, the City sent to the Yokut Tribe a formal Notification of a Decision to Undertake a Project, and Notification of Consultation Opportunity, including a Project description of the Project applications. In accordance with the law, the letter provided 30 days from receipt of the letter to request consultation in writing. No request for consultation was made for the Project and less than significant impacts to tribal resources are expected. **Mitigation Measures CUL-1** and **CUL-2**, described above in **Section 3.6 Cultural Resources**, are recommended in the event cultural materials or human remains are unearthed during excavation or construction.

3.20 Utilities and Service Systems

Table 3-31. Utilities and Service Systems Impacts

Utilities and Service Systems Impacts					
	Would the project:	**Potentially Significant Impact**	**Less than Significant with Mitigation Incorporated**	**Less than Significant Impact**	**No Impact**
a)	Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	☐	☐	☒	☐
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐
c)	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☐	☒
d)	Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☒	☐

3.20.1 Environmental Setting and Baseline Conditions

Utilities required to serve the Project would include water, solid waste (trash) management, and storm drainage. Water service, and solid waste collection would be provided by the City of Porterville. Storm-water run-off would be accommodated by path design and would be directed to existing city storm drain facilities.

3.20.1.1 Water Supply

The City has historically relied on groundwater to supply municipal water to its residents. Water usage for Project operation would be minimal and limited to drinking fountains and drought tolerant landscaping.

3.20.1.2 Wastewater Collection and Treatment

The City of Porterville Wastewater Treatment Facility (WWTF) is located at the southwest corner of West Grand Avenue and North Prospect Street. The sewer collection system consists of 150 miles of pipes, including 18 sewage lift stations and associated force mains.[24]

[24] City of Porterville General Plan, Public Utilities Element, page 191

3.20.1.3 Landfills

Solid waste disposal services in Porterville are provided by the Tulare County Consolidated Waste Management Authority. Porterville's solid waste is currently disposed at Teapot Dome Landfill, located four miles outside of the City limits. As of 2004, the landfill was at 84.7 percent capacity and had an anticipated closure date of 2012.[25]. Tulare County has indicated that they will not expand Teapot Dome Landfill. When it reaches capacity, the County anticipates setting up a transfer facility which would divert waste to either the Woodville or Visalia Landfills, both of which are below 50 percent capacity.

3.20.2 Impact Assessment

a) Would the project require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? and

b) Would the project have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less than Significant Impact. The Project will require the consumption of water for irrigation purposes and drinking fountains. Landscaping will utilize non-potable water, and the Project will be required to comply with the Model Water Efficient Landscape Ordinance. The City has sufficient water supplies available to serve the Project and its existing commitments during normal, dry, and multiple dry years. The Project will not require the relocation of or expansion of existing utility facilities, and thus will not cause significant environment effects.

c) Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

No Impact. The Project will not generate wastewater. There is no impact.

d) Would the project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? and

e) Would the project comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Less than Significant Impact. Solid waste (trash) would be generated by short-term period of construction and by long term Project operations. Construction contractors would be required to collect and carry out all solid waste and trash and dispose of at an approved landfill or recycling center. The Project's proposed amenities will include trash receptacles located along the path to collect trash generated by the public using the path. The City will be responsible to empty the trash receptacles on a regular basis based on scheduled pick-up days in the area of the various pathway Segments. Teapot Dome Landfill receives solid waste from the City of Porterville and has a maximum permitted throughput of 2,220 tons per day. Therefore, the Project would have a less than significant impact.

[25] Ibid

3.21 Wildfire

Table 3-32. Wildfire Impacts

Wildfire Impacts					
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒
b)	Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrollable spread of wildfire?	☐	☐	☐	☒
c)	Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☐	☒
d)	Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☐	☐	☒

3.21.1 Environmental Setting and Baseline Conditions

The City of Porterville is located in the south eastern part of the San Joaquin Valley, in close proximity to the foothills of the Sierra Nevada Mountain Range. The fire season between the months of May and October has over 100 days of temperatures in excess of 90 degrees Fahrenheit. Figure 7-4 of the Porterville 2030 General Plan, identifies that approximately 43% of the City is considered to have a moderate fire hazard, as classified by the California Department of Forestry and Fire Protection. The General Plan also identifies areas with the highest levels of risk are located in northeast sections of the planning area, due to the presence of wooded foothills. More recent data is provided by Cal Fire who produces California Fire Hazard Severity Zone Maps. The Project is not located in a state responsibility areas or lands classified as very high fire hazard severity zones.

Urban uses, which can be subject to structural fires, are considered a greater threat to life and property than wildland fires. As a result, the City of Porterville requires all new development to meet or exceed the Uniform Fire Code Provisions, as outlined in the Porterville City Code: Chapter 12. This code addresses topography, geology, climate, and development conditions. New development is reviewed by the Public Works Department and Fire Department for adherence to these regulations. The non-motorized multi-use path is located in areas that are predominately designated as Urban Unzoned or Non Wildland. One portion of Segment 3 is less than a mile from an area designated as Moderate by CalFire (see **Figure 3-4**).

3.21.2 **Impact Assessment**

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:

a) Substantially impair an adopted emergency response plan or emergency evacuation plan? and

b) Due to slope, prevailing winds, and other factors exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? and

c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? and

d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. Portions of the Project site are less than one mile from the moderate state responsibility zone. The Project involves the installation of an approximately nine mile non-motorized multi-use path. There will be no habitable structures built, and the Project area is relatively level. Therefore, the Project would not impact any emergency response plan or evacuation plan. It would not have any occupants and would therefore not expose people to pollutant concentrations from wildfire or uncontrolled spread of wildfire. No new infrastructure would need to be constructed to reduce fire risks as a result of the Project, and no people or structures would be exposed to flooding or landslides as a result of the Project. There would be no impacts.

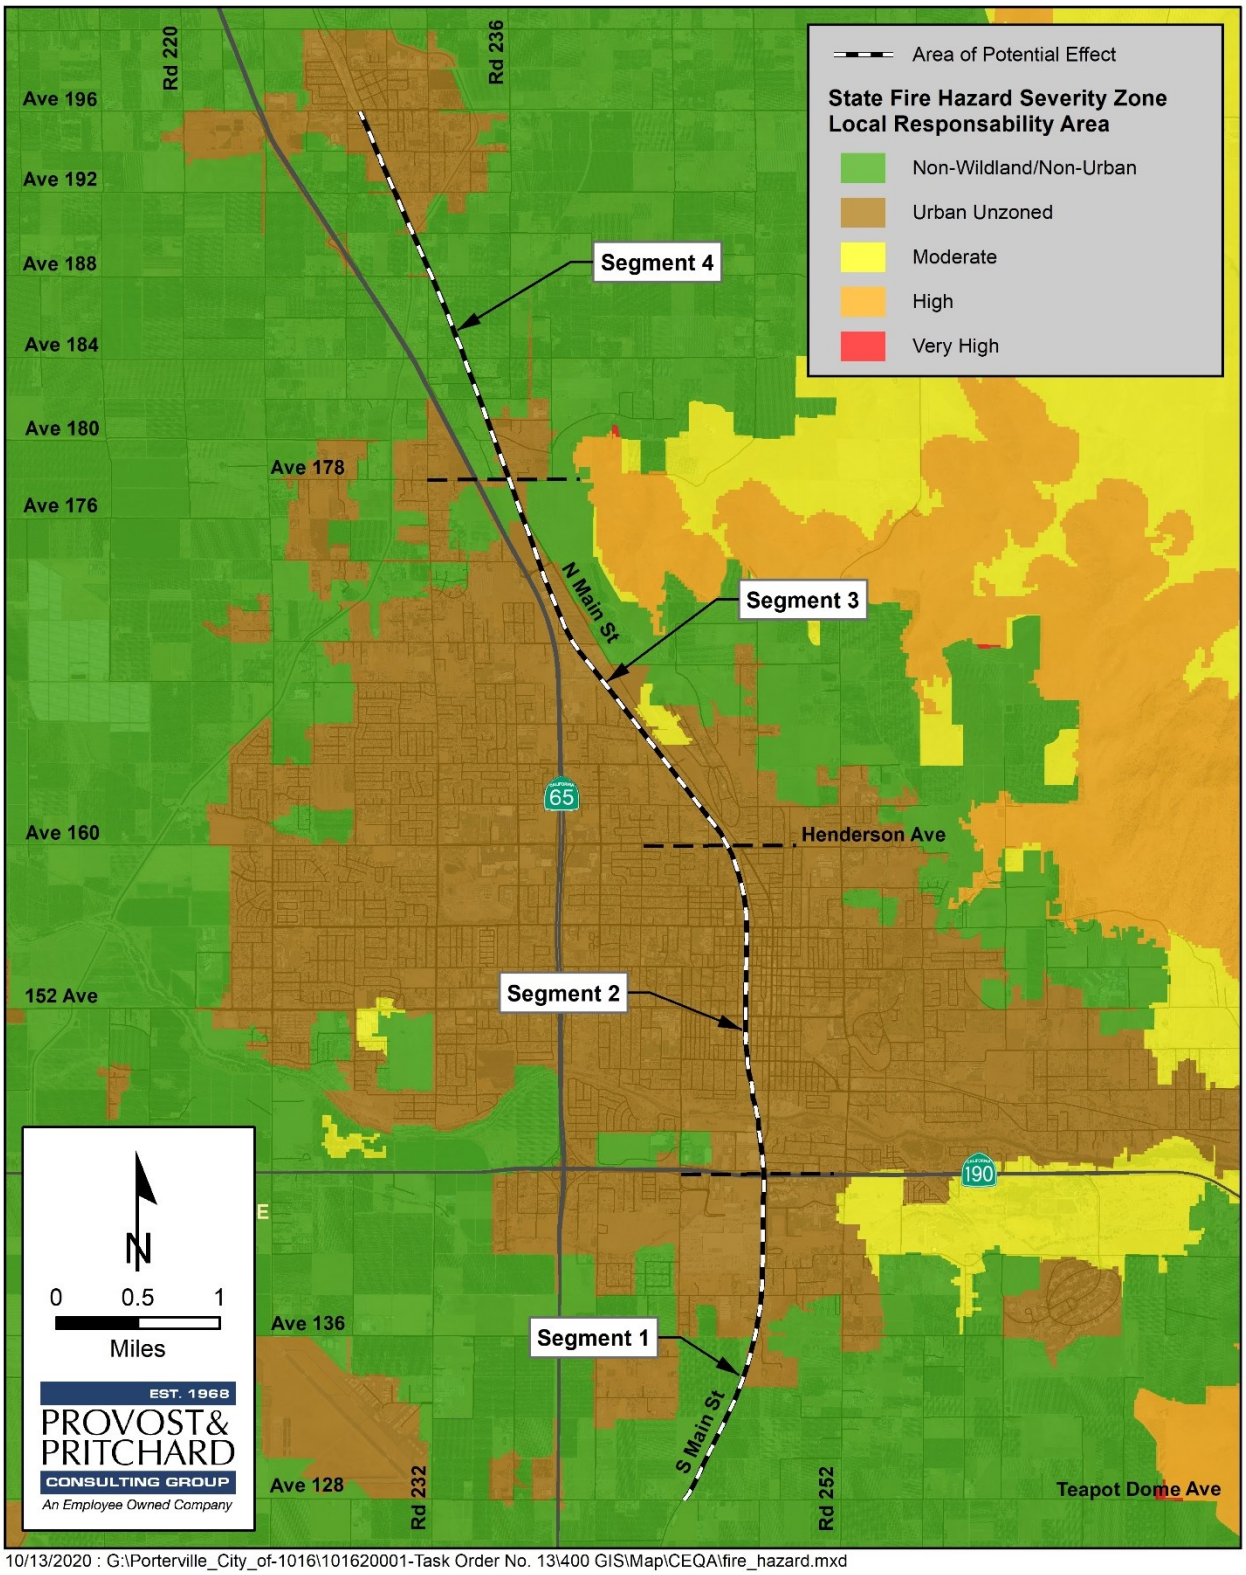

Figure 3-4. State Fire Hazard Map

3.22 CEQA Mandatory Findings of Significance

Table 3-33. Mandatory Findings of Significance Impacts

Mandatory Findings of Significance Impacts					
Does the project:		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☒	☐
b)	Have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	☐	☐	☒	☐
c)	Have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☒	☐

3.22.1 Impact Assessment

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Less than Significant Impact. Based on the analysis conducted in this Initial Study, impacts to Aesthetics, Agriculture and Forestry Resources, Air Quality, Energy, Greenhouse Gas Emissions, Land Use and Planning, Mineral Resources, Noise, Population/Housing, Public Services, Recreation, Transportation/Traffic, Utility/Services Systems, and Wildfire would be less than significant. Potential impacts to Biological Resources, Cultural Resources, Hazards and Hazardous Materials, and Tribal Cultural Resources would be less than significant with implementation of mitigation measures as identified in the respective Impact Analyses in Chapter 3 and as outlined in Chapter 4, **Table 4-1 – Mitigation Monitoring and Reporting Program**. Additionally, with implementation of the Best Management Practices for construction activities and obtaining the applicable permits and approvals required by state law, the proposed Project's potential to degrade the quality of the environment, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a protected species or eliminate important examples of the major periods of California history or prehistory would be less than significant with implementation of the above noted mitigation measure. The analysis conducted in this Initial

Study/Mitigated Negative Declaration results in a determination that the Project would have a less than significant effect on the local environment.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

Less than Significant Impact. As discussed in the initial study, impacts associated with the Project are incremental and minor in nature, and would result in less than significant impacts to the environment with incorporation of all the recommended mitigation measures BIO-1, BIO-2, BIO-3, BIO-4, BIO-5, CUL-1, CUL-2, HAZ-1, HAZ-2, and HAZ-3. As the construction of the path will be broken down depending on funding opportunities, cumulative impacts from construction would be spread out. Operation impacts have been found to be less than significant. The impact of this Project on the environment is minimal and therefore even if combined with past, present, and reasonably foreseeable future projects would not cause a significant cumulative impact. In addition, the mitigation measures determined will further reduce Project level impacts to less than significant, the proposed Project will not have impacts that are cumulatively considerable.

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Less than Significant Impact. The Project will not result in substantial adverse effects on human beings, either directly or indirectly. With implementation of Best Management Practices, requirements and regulations of state law, and adoption and implementation of recommended mitigation measures during construction and maintenance of the proposed Project, all identified impacts will be less than significant.

3.23 Determination: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Chapter 4 Mitigation Monitoring and Reporting Program

This Mitigation Monitoring and Reporting Program (MMRP) has been formulated based upon the findings of the Initial Study/Mitigated Negative Declaration (IS/MND) for the Butterfield Stage Corridor Project in the City of Porterville. The MMRP lists mitigation measures recommended in the IS/MND for the Project and identifies monitoring and reporting requirements.

Table 4-1 presents the mitigation measures identified for the proposed Project. Each mitigation measure is numbered with a symbol indicating the topical section to which it pertains, a hyphen, and the impact number. For example, AIR-2 would be the second mitigation measure identified in the Air Quality analysis of the IS/MND.

The first column of **Table 4-1** identifies the mitigation measure. The second column, entitled "When Monitoring is to Occur," identifies the time the mitigation measure should be initiated. The third column, "Frequency of Monitoring," identifies the frequency of the monitoring of the mitigation measure. The fourth column, "Agency Responsible for Monitoring," names the party ultimately responsible for ensuring that the mitigation measure is implemented. The last columns will be used by the City to ensure that individual mitigation measures have been complied with and monitored.

Mitigation Monitoring and Reporting Program				
Mitigation Measure/Condition of Approval	**When Monitoring is to Occur**	**Agency Responsible for Implementing Migigation**	**Agency Responsible for Monitoring**	**Verification of Compliance (name/date)**
Biological Resources				
BIO-1: WEAP Training				
Prior to initiating construction activities (including staging and mobilization), all personnel associated with Project construction shall attend mandatory Worker Environmental Awareness Program (WEAP) training, conducted by a qualified biologist, to aid workers in identifying special status species that may occur in the Project area. The specifics of this program shall include identification of the sensitive species and suitable habitats, a description of the regulatory status and general ecological characteristics of these species, and review of the mitigation measures required to reduce impacts to biological resources within the work area. A fact sheet conveying this information, along with photographs or illustrations of sensitive species with potential to occur onsite, shall also be prepared for distribution to all contractors, their employees, and all other personnel involved with construction of the Project. All employees shall sign a form documenting that they have attended WEAP training and understand the information presented to them.	Prior to Construction	City of Porterville	City of Porterville	
BIO-2: Operational Hours				
Prior to initiating construction activities (including staging and mobilization), all personnel associated with Project construction shall attend mandatory Worker Environmental Awareness Program (WEAP) training, conducted by a qualified biologist, to aid workers in identifying special status species that may occur in the Project area. The specifics of this program shall include identification of the sensitive species and suitable habitats, a description of the regulatory status and general ecological characteristics of these species, and review of the mitigation measures required to reduce impacts to biological resources within the work area. A fact sheet conveying this information, along with photographs or illustrations of sensitive species with potential to occur onsite, shall also be prepared for distribution to all contractors, their employees, and all other personnel involved with construction of the Project. All employees shall sign a form	During Construction	City of Porterville	City of Porterville

documenting that they have attended WEAP training and understand the information presented to them.				
BIO-3: Avoidance				
The Project's construction activities shall occur, if feasible, between September 16 and January 31 (outside of nesting bird season) in an effort to avoid impacts to nesting birds.	September 16 and January 31	City of Porterville	City of Porterville	
BIO-4: Nesting Bird Pre-Construction Survey				
If activities must occur within nesting bird season (February 1 to September 15), a qualified biologist shall conduct pre-construction surveys for active nests within 30 days prior to the start of construction. The survey shall include the proposed work area and surrounding lands within 500 feet. If no active nests are observed, no further mitigation is required. Raptor nests are considered "active" upon the nest-building stage.	February 1 to September 15	City of Porterville	City of Porterville	
BIO-5: Pre-Construction Surveys				
A qualified biologist will perform a pre-construction survey of the Project area for roosting bats, American badger, San Joaquin kit fox (200 feet of proposed work) and the western pond turtle within 30 days prior to the start of construction. The biologist shall determine the appropriate construction setback distances or provide instructions to ensure compliance with State and federal laws protecting the species.	30 days prior to the start of construction	City of Porterville	City of Porterville	
Cultural Resources				
CULT-1: Archaeological Remains				
Should archaeological remains or artifacts be unearthed during any stage of Project activities, work in the area of discovery shall cease until the area is evaluated by a qualified archaeologist. If mitigation is warranted, the Project proponent shall abide by recommendations of the archaeologist.	During Construction	City of Porterville	City of Porterville	
CULT-2: Human Remains				
In the event that any human remains are discovered on the Project site, the Tulare County Coroner must be notified of the discovery (California Health and Safety Code, Section 7050.5) and all activities in the immediate area of the find or in any nearby area reasonably suspected to overlie adjacent human remains must cease until appropriate and lawful measures have been implemented. If the	During Construction	City of Porterville	City of Porterville

Mitigation Measure/Condition of Approval	**When Monitoring is to Occur**	**Agency Responsible for Implementing Migigation**	**Agency Responsible for Monitoring**	**Verification of Compliance (name/date)**
Coroner determines that the remains are not recent, but rather of Native American origin, the Coroner shall notify the Native American Heritage Commission (NAHC) in Sacramento within 24 hours to permit the NAHC to determine the Most Likely Descendent of the deceased Native American.				
Hazards and Hazardous Materials				
HAZ-1: Transportation of Hazardous Materials				
Prior to the issuance of a grading permit or the planting of any trees, the City shall ensure that a Phase II ESA shall be conducted to determine the presence or absence of a significant impact to the subject site from hazardous materials. The Phase II ESA may include but may not be limited to the following: (1) Collection and laboratory analysis of soils and/or groundwater samples to ascertain the presence or absence of significant concentrations of constituents of concern; (2) Collection and laboratory analysis of soil vapors and/or indoor air to ascertain the presence or absence of significant concentrations of volatile constituents of concern; and/or (3) Geophysical surveys to ascertain the presence or absence of subsurface features of concern such as USTs, drywells, drains, plumbing, and septic systems. The findings and conclusions of the Phase II ESA shall become the basis for potential recommendations for follow-up investigation, site characterization, and/or remedial activities, if found to be warranted.	Phase II ESA	City of Porterville	City of Porterville	
HAZ-2: Presence of Hazardous Materials				
In the event the findings and conclusions of the Phase II ESA reveal the presence of significant concentrations of hazardous materials warranting further investigation, the City shall ensure that site characterization shall be conducted in the form of additional Phase II ESAs in order to characterize the source and maximum extent of impacts from constituents of concern. The findings and conclusions of the site characterization shall become the basis for formation of a remedial action plan and/or risk assessment.	Phase II ESA	City of Porterville	City of Porterville	
HAZ-3: Presence of Hazardous Materials - Assessment				
If the findings and conclusions of the Phase II ESAs, site characterization and/or risk assessment demonstrate the presence of concentrations of hazardous materials exceeding regulatory threshold	Phase II ESA	City of Porterville	City of Porterville	

Mitigation Monitoring and Reporting Program				
Mitigation Measure/Condition of Approval	**When Monitoring is to Occur**	**Agency Responsible for Implementing Migigation**	**Agency Responsible for Monitoring**	**Verification of Compliance (name/date)**
levels, prior to the issuance of a grading permit, the City shall complete site remediation and potential risk assessment with oversight from the applicable regulatory agency including, but not limited to, the Cal-EPA Department of Toxic Substances Control (DTSC) or Regional Water Quality Control Board (RWQCB), and Tulare County Department of Environmental Health Services. Potential remediation could include the removal or treatment of water and/or soil. If removal occurs, hazardous materials shall be transported and disposed at a hazardous materials permitted facility.				
Tribal Cultural Resources				
TRC-1: See MM CULT-1				
Should archaeological remains or artifacts be unearthed during any stage of Project activities, work in the area of discovery shall cease until the area is evaluated by a qualified archaeologist. If mitigation is warranted, the Project proponent shall abide by recommendations of the archaeologist.	During Construction	City of Porterville	City of Porterville

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use -

Construction Phase - Project will take place over 4 years. It is a multi use trail, no buildings will be constructed. No parking will be a part of this project.

Trips and VMT - The project is a multi modal trail. No structures are being built.

Vehicle Trips - The project is a multi use trail, no parking is provided, no operational vehicle trips are anticipated.

Energy Use - Any trail lighting will be solar powered.

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation -

I. Introduction

The City of Porterville (City) plans to develop the Butterfield Stage Corridor along approximately eight (8) miles of the former Union Pacific Railroad (UPRR) right-of-way (ROW) in Tulare County from Tea Pot Dome Avenue to Avenue 196 (Project).

The following technical report, prepared by Provost & Pritchard Consulting Group in compliance with the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA), includes a description of the biological resources present or with potential to occur within the Project site and surrounding areas, and evaluates potential Project-related impacts to those resources.

Project Description

The Project proposes the development of a multi-modal corridor utilizing eight (8) miles of former UPRR ROW between Tea Pot Dome Avenue to the south and Avenue 196 to the north. The corridor will consist of a Class 1 multi-use path that includes amenities such as solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings.

Report Objectives

Linear projects and construction activities such as that proposed by the City could potentially damage biological resources or modify habitats that are crucial for sensitive plant and wildlife species. In cases such as these, development may be regulated by state or federal agencies, subject to provisions of CEQA, and/or NEPA, and/or addressed by local regulatory agencies. In the case of The City of Porterville: Butterfield Stage Corridor Project, environmental review under both CEQA and NEPA may be required.

This report addresses issues related to the following:

1) The presence of sensitive biological resources onsite, or with the potential to occur onsite.
2) The federal, state, and local regulations regarding these resources.
3) Mitigation measures that may be required to reduce the magnitude of anticipated impacts and/or comply with permit requirements of state and federal resource agencies.

Therefore, the objectives of this report are:

1) Summarize all site-specific information related to existing biological resources.
2) Make reasonable inferences about the biological resources that could occur onsite based on habitat suitability and the proximity of the site to a species' known range.
3) Summarize all state and federal natural resource protection laws that may be relevant to the Project.
4) Identify and discuss Project impacts to biological resources likely to occur onsite within the context of CEQA or state or federal laws.

5) Identify and publish a set of avoidance and mitigation measures that would reduce impacts to a less-than-significant level (as identified by CEQA) and are generally consistent with recommendations of the resource agencies for affected biological resources.

Study Methodology

Provost & Pritchard conducted a reconnaissance-level field survey of the Project site and surrounding areas on May 22, 2020. The Project's Area of Potential Effect (APE) is illustrated in **Figure 3**. The survey consisted of a combination of walking and driving along the proposed alignment while identifying and noting land uses, biological habitats and communities, and plant and animal species encountered. Additionally, the site and surrounding areas were assessed for suitable habitats of various wildlife species.

Provost & Pritchard performed an analysis of potential Project-related impacts to biological resources based on the resources known to exist or with potential to exist within the Project site and surrounding areas. Sources of information used in preparation of this analysis included: the California Department of Fish and Wildlife (CDFW) California Natural Diversity Database (CNDDB); the U.S. Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPaC) system; the California Native Plant Society (CNPS) Online Inventory of Rare and Endangered Vascular Plants of California; CalFlora's online database of California native plants; the Jepson Herbarium online database (Jepson eFlora); the USFWS Environmental Conservation Online System (ECOS); the NatureServe Explorer online database; the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Plants Database; the CDFW California Wildlife Habitat Relationships (CWHR) database; the California Herps online database; and various manuals, reports, and references related to plants and animals of the San Joaquin Valley region.

The field investigation did not include a wetland delineation or focused surveys for special status species. The field survey conducted included an appropriate level of detail to assess the significance of potential impacts to sensitive biological resources resulting from the Project. Furthermore, the field survey was sufficient to generally describe those features of the Project that could be subject to the jurisdiction of federal and/or State agencies, such as the U.S. Army Corps of Engineers (USACE), CDFW, and the Regional Water Quality Control Board (RWQCB).

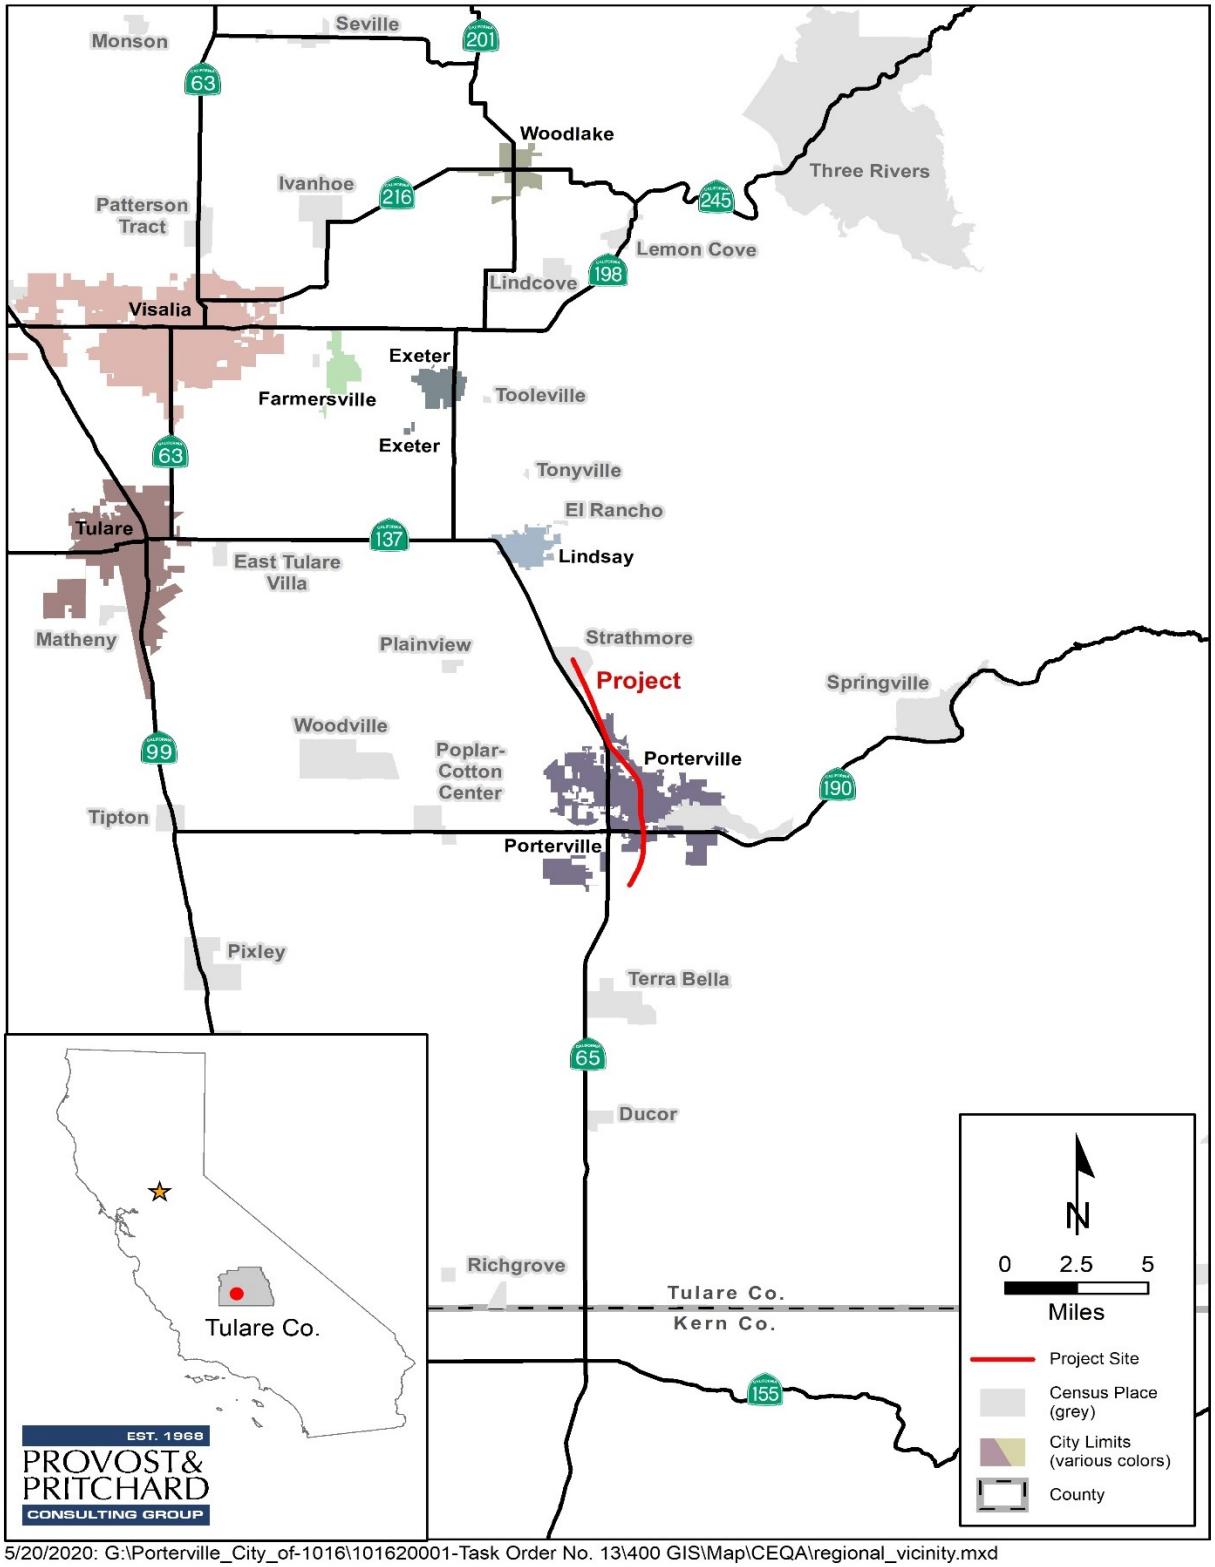

Figure 1 Regional Vicinity Map

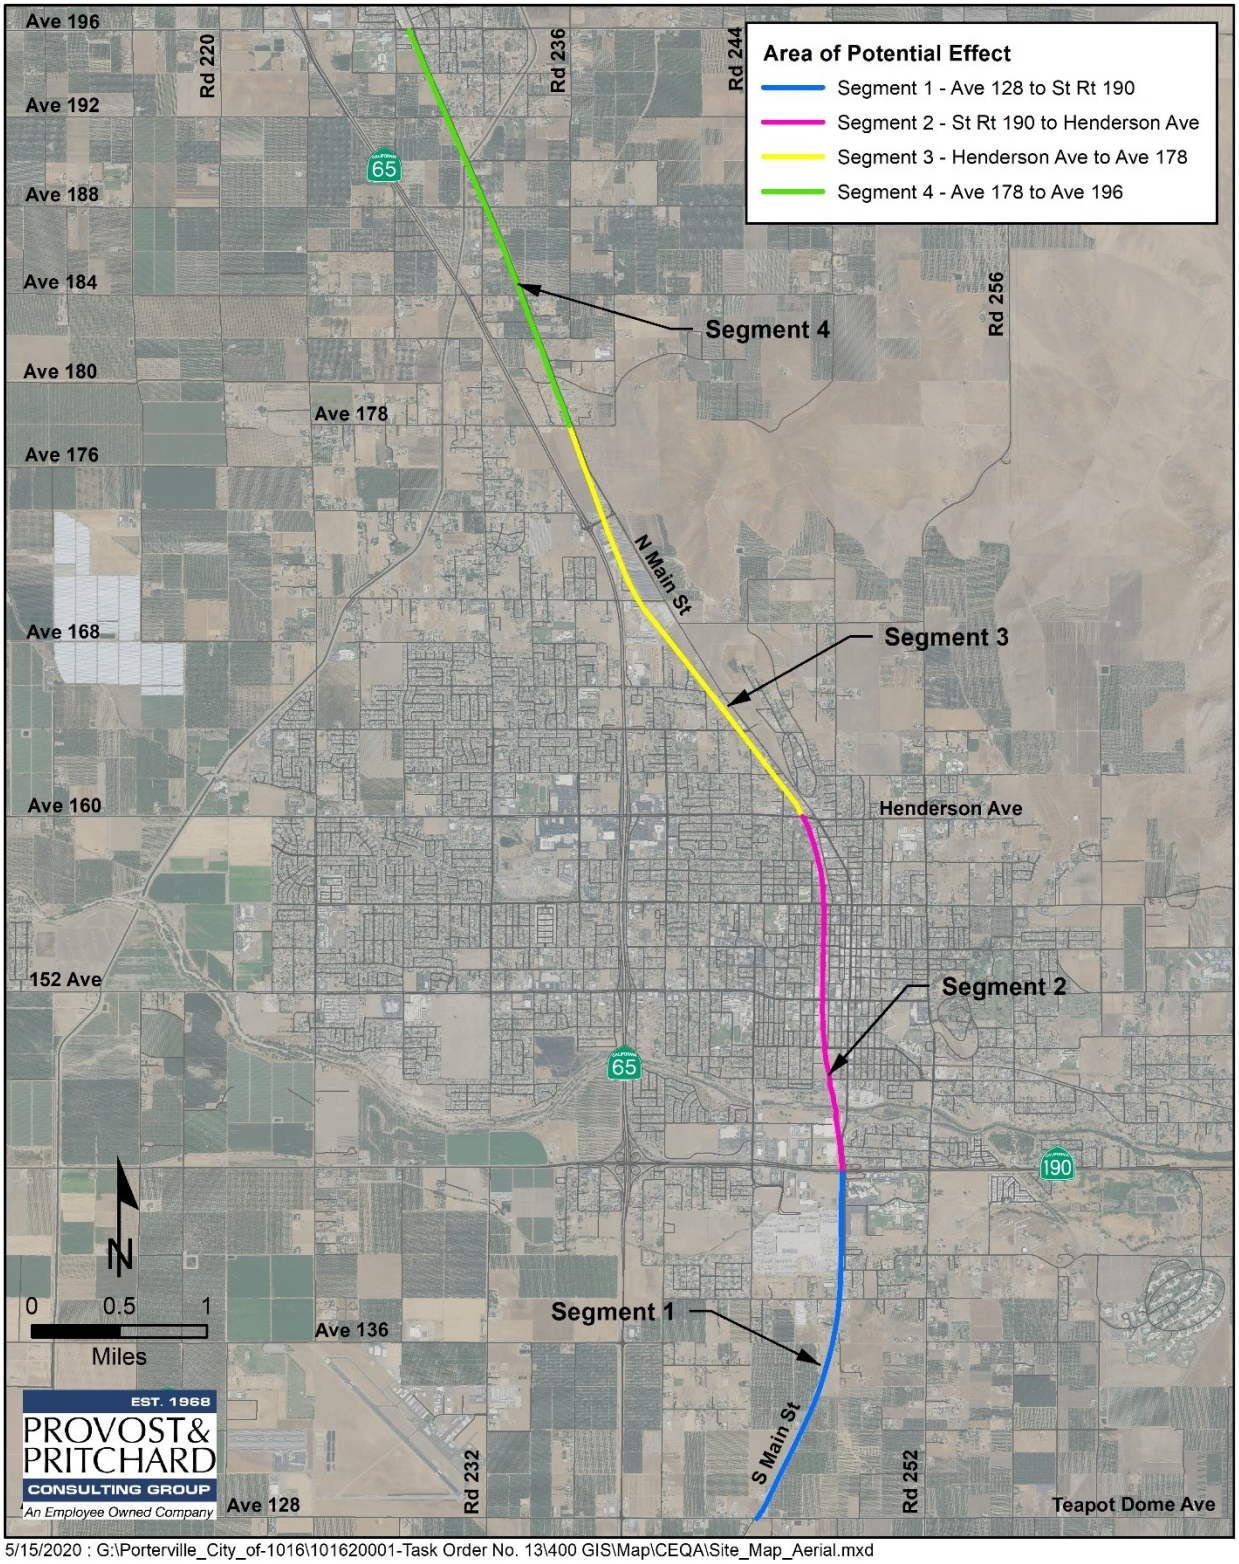

Figure 2 Area of Potential Effect Map

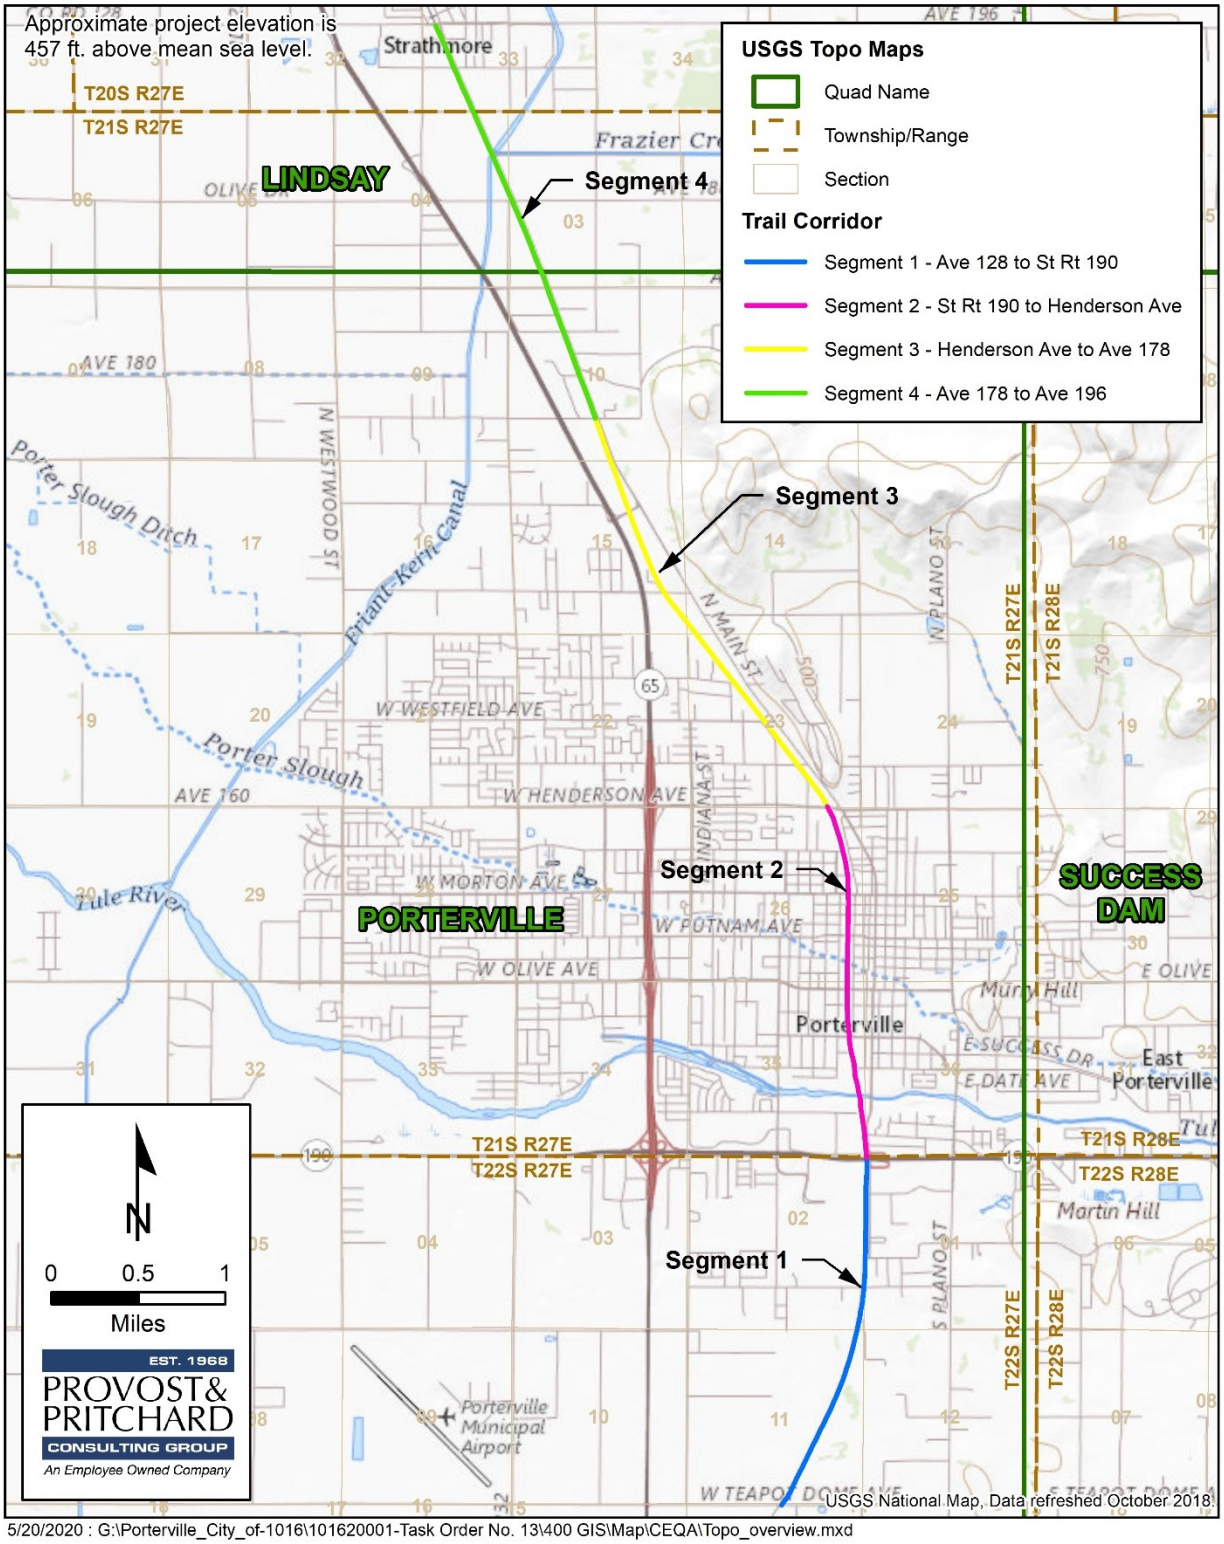

Figure 3 Topographic Quadrangle Map

II. Existing Conditions

Regional Setting

The Project is located on the eastern edge of valley floor near the base of the Sierra Nevada foothills in Tulare County, California. This area is geographically situated in the lower San Joaquin Valley, part of the Great Valley of California (See **Figure 1**). The Valley is bordered by the Sierra Nevada Mountain Ranges to the east, the Coast Ranges to the west, the Klamath Mountains and Cascade Range to the north, and the Transverse Ranges and Mojave Desert to the south.

Like most of California, the San Joaquin Valley experiences a Mediterranean climate. Warm, dry summers are followed by cool, moist winters. Summer temperatures often reach above 90 degrees Fahrenheit, and the humidity is generally low. Winter temperatures are often below 60 degrees Fahrenheit during the day and rarely exceed 70 degrees. On average, the San Joaquin Valley receives approximately 12 inches of precipitation in the form of rainfall yearly, most of which occurs between October and March.

Most of the proposed trail alignment lies within the following three watersheds: Elk Bayou; Hydrologic Unit Code (HUC): 1803000608, Upper Tule River; HUC: 1803000607, and Lower Deer Creek; HUC: 1803000509. The Project crosses over Tule River, Porter Slough, Campbell Moreland Ditch, Poplar Ditch, Pioneer Ditch, and the Friant-Kern Canal. The mid-section of the alignment is located approximately 5.5 miles west of Success Dam and Lake Success on the Tule River.

Project Area

The Project area includes the former UPRR ROW from Tea Pot Dome Avenue to Avenue 196. The overall alignment is divided into four segments, numbered 1 through 4, from south to north. Nearly the entire railroad alignment is barren, compacted dirt and/or gravel, as shown on **Figures 2 and 3**.

Segment 1

Segment 1, illustrated in blue on **Figure 2**, begins at Tea Pot Dome Avenue and travels north along Main Street to Poplar Avenue. The majority of this segment lies within rural TulareCounty, but the northern terminus is in the Porterville City limits. Surrounding lands and adjacent uses include ruderal roadside ditches and Campbell-Moreland Ditch, ruderal non-native grassland, cultivated agricultural lands, rural residences, auto dismantling yards, Porterville College, and various industrial uses, including factories and distribution centers.

Segment 2

Segment 2, illustrated in pink on **Figure 2**, begins at Poplar Avenue and travels north between the D and E street alignments to Henderson Avenue in the City of Porterville. This portion of the alignment crosses Poplar Ditch, Tule River, Porter Slough, and unnamed ruderal ditches. At the time of the field survey, there were existing bridges over each of the water features, except Tule River. Large cement supports were present within the channel, but the bridge deck had been removed. Segment 2 passes through significant urban development in the form of residential, commercial, and industrial uses within the Porterville City limits.

Segment 3

Segment 3, illustrated in yellow on **Figure 2**, begins at Henderson Avenue and travels north on the east side of Main Street/Orange Belt Drive to Mountain View Avenue through both City and County areas. Surrounding lands and adjacent uses include ruderal roadside ditches, cultivated agricultural lands, residences, ruderal non-native grassland and pasture, and various commercial and industrial uses, including a solar farm.

Segment 4

Segment 3, illustrated in green on **Figure 2**, begins at Mountain View Avenue in a rural area of Tulare County and travels north along Orange Belt Drive to Avenue 196 in the census-designated place of Strathmore. This portion of the alignment crosses the Friant-Kern Canal and unnamed agricultural ditches. Surrounding lands and uses include cultivated agricultural lands, residences, ruderal non-native grassland and pasture, and various commercial and industrial uses.

Biological Communities

Three biological communities were observed within the Project area at the time of the field survey: ruderal/developed, riverine, and riparian.

Ruderal/Developed

Ruderal habitats are characterized by a high level of human disturbance and absence of vegetation or dominated by non-native plant species. Because the proposed Butterfield Stage Corridor is located on the former UPRR ROW, nearly the entire Project area is composed of barren, compacted dirt and gravel associated with railroad crossings. While the railroad tracks have been removed, most of the crossings are still in place and the soil along the center of the alignment is essentially devoid of vegetation from years of heavy disturbance and compaction. Weedy grasses and forbs commonly associated with disturbed areas were present to the east and to the west of the former railroad tracks. While vegetative cover was somewhat variable along different portions of the alignment, for the most part, the following species were dominant: wild oats (*Avena fatua*), ripgut brome (*Bromus diandrus*), foxtail chess (*Bromus madritensis*), foxtail barley (*Hordeum murinum*), horseweed (*Erigeron canadensis*), big heron bill (*Erodium botrys*), horse nettle (*Solanum elaeagnifolium),* Russian thistle (*Salsola tragus*), prickly lettuce (*Lactuca serriola*), pigweed amaranth (*Amaranthus albus*), cheeseweed (*Malva parviflora*), and ragweed (*Ambrosia psilostachya*). In some areas, interior live oaks (*Quercus wislizeni*) and valley oaks (*Quercus lobata*) were observed adjacent to the alignment.

The wildlife habitat of the ruderal/developed lands within the Project area are of relatively low quality for most native wildlife due to past and ongoing human disturbance. At the time of the field survey, an abundance of ground squirrel and other rodent burrows were observed within ruderal areas along the alignment. The following species were observed within ruderal/developed habitats during the survey: California ground squirrel (*Otospermophilus beecheyi*), desert cottontail (*Sylvilagus audubonii*), San Joaquin fence lizard (*Sceloporus occidentalis biseriatus*), northern mockingbird (*Mimus polyglottos*), American crow (*Corvus brachyrhynchos*), California scrub jay (*Aphelocoma californica*), house finch (*Haemorhous mexicanus*), mourning dove (*Zenaida macroura*), and European starling (*Sturnus vulgaris*). Although not observed during the survey, the disturbance tolerant killdeer (*Charadrius vociferus*) commonly nests on bare ground or within gravel of the ruderal and developed areas. Additional reptiles expected to occur within ruderal areas include western side-blotched lizard (*Uta stansburiana elegans*), Pacific gophersnake (*Pituophis catenifer catenifer*), and California kingsnake (*Lampropeltis californiae*). Common native amphibians, such as the California toad (*Anaxyrus boreas*

halophilus) or Sierran treefrog (*Pseudacris sierra*) could breed within seasonally inundated areas and disperse into adjacent ruderal habitats.

In addition to the California ground squirrels and desert cottontails observed, the following fossorial and semi-fossorial mammalian species would be expected to occur within ruderal habitats: black-tailed jackrabbit (*Lepus californicus*), Botta's pocket gopher (*Thomomys bottae*), deer mouse (*Peromyscus maniculatus*), and California vole (*Microtus californicus*). The presence of burrowing rodents could attract mammalian predators, such as gray fox (*Urocyon cinereoargenteus*), red fox (*Vulpes vulpes*), striped skunk (*Mephitis mephitis*), opossum (*Didelphis virginiana*), raccoon (*Procyon lotor*), and coyote (*Canis latrans*). There is at least some potential for American badger (*Taxidea taxus*) and San Joaquin kit fox (*Vulpes macrotis mutica*) to occur onsite, especially in areas surrounded by grassland and fallow agricultural lands.

Riverine

Riverine habitat is present within the channels of Tule River, Porter Slough, Friant-Kern Canal, and other channelized canals/ditches along the alignment. The man-made and concrete-lined Friant-Kern Canal is the only perennial aquatic feature in the vicinity. Tule River and Porter Slough are both intermittent streams with flows controlled by releases from Success Dam. Poplar Ditch receives flood water releases and overflow from the Tule River, which delivers water to the Friant-Kern Canal. The other channelized canals/ditches in the vicinity are used for agriculture and stormwater runoff.

At the time of the field survey, sandbars were evident within Tule River, and depressions within the channel were inundated with standing pools of water. The channel was significantly disturbed and eroded. Vagrant camps and trash were observed in Tule River, Porter Slough, Poplar Ditch and several other canals/ditches. Vegetation was absent from Friant-Kern Canal. The Tule River, Porter Slough, and Poplar Ditch channels supported a vegetative cover dominated by the following species: tree of heaven (*Ailanthus altissima*), castor bean (*Ricinus communis*), cattail (*Typha domingensis*), willows (*Salix* spp.), giant reed (*Arundo donax*), cocklebur (*Xanthium strumarium*), water primrose (*Ludwigia peploides*), smartweed (*Persicaria hydropiper*), curly dock (*Rumex crispus*), flatsedge (*Cyperus eragrostis*), and duckweed (*Lemna* spp.).

Numerous American bullfrogs (*Lithobates catesbeianus*) were observed at the time of the field survey. Additional amphibians and reptiles expected to occur within riverine habitats of the streams and canals/ditches of the Project area include California toad, Sierran treefrog, and valley gartersnake (*Thamnophis sirtalis fitchi*). There is also at least some potential for western pond turtle (*Actinemys marmorata*) to inhabit portions of the Tule River, Porter Slough, or unlined canals/ditches in the vicinity. Since natural perennial water features are absent from the Project area, self-sustaining fish populations are absent and native fish are not expected to occur. At most, introduced game fish could be washed down from Lake Success. A few common non-native fish species that tend to occur in the Friant-Kern Canal and other local intermittent streams and canals/ditches include common carp (*Cyprinus carpio*), bluegill (*Lepomis macrochirus*), mosquito fish (*Gambusia affinis*), channel catfish (*Ictalurus punctatus*), and white catfish (*Ameiurus catus*).

Riverine communities and adjacent riparian vegetation typically provide suitable nesting habitat for waterfowl, migratory birds, and shorebirds. Some common avian species expected to occur within riverine habitat include great blue heron (*Ardea herodias*), American bittern (*Botaurus lentiginosus*), and great egret (*Ardea alba*). Nesting colonies of cliff swallows (*Petrochelidon pyrrhonota*) and black phoebes (*Sayornis nigricans*) were observed at several bridges over water features at the time of the field survey. Riverine systems serve as foraging

habitat for a variety of native bat species, and associated bridges, crossings, and large box culverts provide roosting sites.

Many of the animal species occurring within adjacent communities would also be expected to use the aquatic habitat to drink water or forage on other aquatic species. The following mammals are relatively tolerant of human disturbance and are likely to pass through the riverine habitat of the Project site: coyote, opossum, raccoon, striped skunk, gray fox, and red fox.

Riparian

Although frequent disturbance was evident, riparian habitat was present along the banks of Tule River, Porter Slough, Poplar Ditch, and some of the other unlined canals/ditches. Fremont cottonwood, tree of heaven, willows, interior live oak, and valley oak trees were observed. Typical vegetative cover in these riparian areas included sandbar willow (*Salix exigua*), castor bean, giant reed, cocklebur, flatsedge, curly dock, sunflower (*Helianthus annuus*), and mugwort (*Artemisia douglasiana*) mixed with various ruderal upland grasses and forbs.

Riparian habitats typically provide valuable habitat for a variety of animal species in the form of abundant vegetation that can be used for food and/or cover. Amphibians may breed in shallow pools of standing water within the riverbed and disperse to the adjacent riparian habitat. Reptiles and amphibians expected to occur within riparian habitat are the same as those mentioned for riverine habitat, and therefore will not be discussed further. Mammals, such as those mentioned in the section above, may seek cover in riparian vegetation or burrow along the banks of streams and unlined canals/ditches. Many of the mammalian species occurring within adjacent communities would also be expected to pass through the riparian corridor in search of water or foraging grounds in riverine communities. A variety of bat species could be attracted by the presence of water and flying insects, and may find potential roosting habitat in riparian trees along the banks.

Ground-nesting birds may build nests within the tall grass or shrubs, and cavity-nesting birds may seek refuge in cavities in the cottonwoods or oaks lining the banks of Tule River. The sturdy cottonwood canopies could support a large stick nest suitable for a variety of native raptor species. Riparian songbirds may nest within the cottonwoods or the smaller trees and shrubs. At the time of the field survey, colonies of invasive European starlings were present, and the following native avian species were observed: cliff swallow, black phoebe, California scrub jay, northern mockingbird, American crow, and mourning dove. Some additional native species not observed, but expected to occur within this habitat include the Bullock's oriole (*Icterus bullockii*), song sparrow (*Melospiza melodia*), Bewick's wren (*Thryomanes bewickii*), barn owl (*Tyto alba*), great horned owl (*Bubo virginianus*), and American kestrel (*Falco sparverius*).

Soils

The NRCS Soil Resource Report identified 12 soil mapping units, representing 7 soil series within the Project area. See **Table 1** below for a brief summary and description. The complete Web Soil Survey report is available in **APPENDIX D** to this document.

Table 1. Soils

Map Unit Name	Percent of Project Area	Hydric Soil Map Unit	Hydric Soil Minor Component	Depth	Drainage	Source
Centerville clay, 2 to 9 percent slopes	1.4%	No	No	Deep	Well Drained	Granitic
Exeter loam, 0 to 2 percent slopes	10.6%	No	Yes -Unnamed, ponded. 5% of map unit.	Moderately Deep to a Duripan	Moderately Well Drained	Granitic
Havala loam, 2 to 5 percent slopes	0.8%	No	No	Deep	Well Drained	Mixed Alluvium
Porterville clay, 2 to 9 percent slopes	34.3%	No	Yes -Clear lake. 4% of map unit. -Unnamed, ponded. 1% of map unit.	Deep	Well Drained	Basic and Metabasic Igneous
San Emigdio loam	19.1%	No	No	Very Deep	Well Drained	Sedimentary Alluvium
San Joaquin loam, 0 to 2 percent slopes	24.2%	No	Yes -Unnamed, ponded. 1% of map unit.	Moderately Deep to a Duripan	Well and Moderately Well Drained	Granitic
San Joaquin loam, 2 to 9 percent slopes	2.5%	No	Yes -Unnamed, ponded. 1% of map unit.	Moderately Deep to a Duripan	Well and Moderately Well Drained	Granitic
Tujunga sand	6.0%	No	No	Very Deep	Somewhat Excessively Drained	Granitic
Water-perennial	0.5%	100% Water	N/A	N/A	N/A	N/A
Water	0.6%	100% Water	N/A	N/A	N/A	N/A

Natural Communities of Special Concern

Natural communities of special concern are those that are of limited distribution, distinguished by significant biological diversity, or home to special status species. CDFW is responsible for the classification and mapping of all natural communities in California. Just like the special status plant and animal species, these natural communities of special concern can be found within the CNDDB.

According to CNDDB, there are no recorded observations of natural communities of special concern along the proposed alignment. Additionally, no natural communities of special concern were observed during the biological survey.

Designated Critical Habitat

The USFWS often designates areas of "Critical Habitat" when it lists species as threatened or endangered. Critical Habitat is a specific geographic area that contains features essential for the conservation of a threatened or endangered species and that may require special management and protection.

According to CNDDB and IPaC, designated Critical Habitat is absent from the Project area.

Wildlife Movement Corridors

Wildlife movement corridors are routes that animals regularly and predictably follow during seasonal migration, dispersal from native ranges, daily travel within home ranges, and inter-population movements. Movement corridors in California are typically associated with valleys and ridgelines, natural landscape blocks, and rivers and creeks supporting riparian vegetation.

Historically, the Tule River and Porter Slough supported a dense corridor of riparian vegetation and provided an important linkage between natural habitats of the Sierra Nevada and the Tulare Basin, including the Pixley National Wildlife Refuge and Elk Bayou. However, both Porter Slough and Tule River in the Project's vicinity contain numerous breaks in vegetation and choke points, and therefore, represent extremely low quality movement corridors for native wildlife (Tulare Basin Wildlife Partners, 2009). Some disturbance tolerant mammals, such as coyotes, raccoons, and gray foxes may travel along canal banks in the vicinity in the same way they would use compacted dirt margins between agricultural lands. In general, the Project area does not contain features that would be likely to function as important wildlife movement corridors. Furthermore, the Project is located in a region often disturbed by human activities related to urban development and intensively cultivated agricultural crops which would discourage dispersal and migration.

Special Status Plants and Animals

California contains several "rare" plant and animal species, defined as species known to have low populations or limited distributions. As the human population grows, resulting in urban expansion which encroaches on the already limited suitable habitat, these sensitive species become increasingly more vulnerable to extirpation. State and federal regulations have provided CDFW and USFWS with a mechanism for conserving and protecting the diversity of plant and animal species native to California. Numerous native plants and animals have been formally designated as "threatened" or "endangered" under State and federal endangered species legislation. Other formal designations include "candidate" for listing or "species of special concern" by CDFW. The CNPS maintains a list of native plants considered rare, threatened, or endangered. Collectively, these plants and animals are referred to as "special status species."

A thorough search of the CNDDB for published accounts of special status plant and animal species was conducted for the *Porterville* and *Lindsay* 7.5-minute quadrangles that contains the Project site in its entirety, and for the 10 surrounding quadrangles: *Cairns Corner, Frazier Valley, Success Dam, Sausalito School, Ducor, Rocky Hill, Exeter, Woodville, Chickencoop Canyon,* and *Fountain Springs*. An official species list was obtained using the USFWS IPaC system for federally-listed species with potential to be affected by the Project. These

species and their potential to occur within the Project area are listed in **Table 2** and **Table 3** on the following pages. Additionally, Section 7 determinations are made in Table 4. Raw data obtained from CNDDB and IPaC are available in **APPENDIX B** and **APPENDIX C**, respectively, to this document. Other sources of information utilized in the preparation of this analysis were discussed in Section 1: Study Methodology and are listed in Section 4: References. **Figure 3** shows the Project's 7.5-minute quadrangle, according to USGS Topographic Maps.

Table 2. List of Special Status Animals with Potential to Occur Onsite and/or in the Vicinity

Species	Status	Habitat	Occurrence on Project Site
American badger *(Taxidea taxus)*	CSC	Grasslands, savannas, and mountain meadows near timberline are preferred. Most abundant in drier open spaces of shrub and grassland. Burrows in soil.	**Possible.** The disturbed and developed habitats of the Project area are generally unsuitable for this species; however, this species may inhabit fallow fields, margins of agricultural lands, and rangeland adjacent to portions of Segment 1, Segment 3, and Segment 4 of the proposed alignment. Ground squirrel burrows of suitable dimensions were observed onsite, and while it is unlikely that an American badger would find the Project area suitable for denning, this species could pass through the site while foraging or during dispersal movements.
blunt-nosed leopard lizard *(Gambelia sila)*	FE, CE, CFP	Inhabits semi-arid grasslands, alkali flats, low foothills, canyon floors, large washes, and arroyos, usually on sandy, gravelly, or loamy substrate, sometimes on hardpan. Often found in open areas with scarce vegetation or scattered shrubs. Cannot survive on lands under cultivation. Known to bask on kangaroo rat mounds and often seeks shelter at the base of shrubs, in small mammal burrows, or in rock piles. Adults may excavate shallow burrows but rely on deeper pre-existing rodent burrows for hibernation and reproduction.	**Absent.** Suitable habitat is absent, and the Project area is outside of the distribution range of this species.

Species	Status	Habitat	Occurrence on Project Site
California condor *(Gymnogyps californianus)*	FE, CE, CFP	Typically nests in cavities in canyon or cliff faces, but has also been recorded nesting in giant sequoias in Tulare County. Requires vast expanse of open savannah, grassland, and/or foothill chaparral in mountain ranges of moderate altitude. Forages up to 100 miles from roost/nest site.	**Unlikely.** This species has been reported nesting in Blue Ridge National Wildlife Refuge approximately 15 miles northeast of the Project. Nesting habitat is absent from the Project area and foraging habitat is marginal within the grassland adjacent to segment 3 of the alignment.
California red-legged frog *(Rana draytonii)*	FT, CSC	Inhabits perennial rivers, creeks, and stock ponds with vegetative cover within the Coast Range and northern Sierra foothills.	**Absent.** Suitable habitat is absent, and the Project area is outside of the distribution range of this species.
California tiger salamander *(Ambystoma californiense)*	FT, CT, CWL	Requires vernal pools or seasonal ponds for breeding and small mammal burrows for aestivation. Generally found in grassland and oak savannah plant communities in central California from sea level to 1500 feet in elevation.	**Absent.** Suitable habitat is absent, and the Project area is outside of the distribution range of this species.
Crotch bumble bee (*Bombus crotchii*)	CCE	Occurs throughout coastal California, as well as east to the Sierra-Cascade crest, and south in to Mexico. Food plant genera include *Antirrhinum, Phacelia, Clarkia, Dendromecon, Eschscholzia*, and *Eriogonum*.	**Unlikely.** Although the Project is located within the historical range of this species, suitable grassland habitat is absent from the APE. The disturbed and developed habitats along the proposed alignment are generally unsuitable for this species, and vegetative cover is dominated by weedy, non-native plants. Furthermore, the ongoing use of commercial honeybees, herbicides, and pesticides in adjacent agricultural lands makes the Project area unsuitable for native pollinators.
Delta smelt *(Hypomesus transpacificus)*	FT, CE	This pelagic and euryhaline species is Endemic to the Sacramento-San Joaquin River Delta, upstream through Contra Costa, Sacramento, San Joaquin, and Solano Counties.	**Absent.** The Project area is outside of the distribution range of this species.

Species	*Status*	*Habitat*	*Occurrence on Project Site*
foothill yellow-legged frog *(Rana boylii)*	CCT, CSC	Frequents rocky streams and rivers with rocky substrate and open, sunny banks in forests, chaparral, and woodlands. Occasionally found in isolated pools, vegetated backwaters, and deep, shaded, spring-fed pools.	**Absent.** Suitable habitat is absent, and the Project is below the typical altitudinal range of this species.
giant gartersnake *(Thamnophis gigas)*	FT, CT	Occurs in marshes, sloughs, drainage canals, irrigation ditches, rice fields, and adjacent uplands. Prefers locations with emergent vegetation for cover and open areas for basking. This species uses small mammal burrows adjacent to aquatic habitats for hibernation in the winter and to escape from excessive heat in the summer.	**Absent.** Suitable habitat is absent, and the Project area is located outside of the distribution range of this species.
northern California legless lizard *(Anniella pulchra)*	CSC	Found primarily underground, burrowing in moist, loose soil. Forages in loose soil and leaf litter during the day. Occasionally observed on the surface at dusk and night.	**Absent.** The disturbed and developed habitats of the Project area are unsuitable for this species.
pallid bat *(Antrozous pallidus)*	CSC	Found in grasslands, chaparral, and woodlands, where it feeds on ground- and vegetation-dwelling arthropods, and occasionally takes insects in flight. Prefers to roost in rock crevices, but may also use tree cavities, caves, bridges, and other man-made structures.	**Possible.** Roosting habitat for this species is present in the form of bridges, crossings, and trees.
San Joaquin kit fox *(Vulpes macrotis mutica)*	FE, CT	Underground dens with multiple entrances in alkali sink, valley grassland, and woodland in valleys and adjacent foothills.	**Possible.** There has been only one reported occurrence of this species in the vicinity of the Project within the past 25 years. The disturbed and developed habitats of the Project area are generally unsuitable; however, this species may inhabit fallow fields, margins of agricultural lands, and rangeland adjacent to portions of Segment 1, Segment 3, and Segment 4 of the proposed alignment.

Species	Status	Habitat	Occurrence on Project Site
			Ground squirrel burrows of suitable dimensions were observed onsite during the biological survey, and while it seems unlikely that a San Joaquin kit fox would find the Project area suitable for denning, this species could pass through the site while foraging or during dispersal movements.
Swainson's hawk *(Buteo swainsoni)*	CT	Nests in large trees in open areas adjacent to grasslands, grain or alfalfa fields, or livestock pastures suitable for supporting rodent populations.	**Possible.** Swainson's hawks are relatively uncommon in the eastern portion of the valley floor; however, there is one recent nesting occurrence approximately 4 miles west of the proposed alignment and trees large enough to support a raptor nest were present in the Project vicinity at the time of the survey. Typical nesting habitat was absent and frequent human disturbance along the proposed alignment may deter this species from nesting within or adjacent to the APE. This species could pass over the Project site while foraging or during migratory movements.
Tipton kangaroo rat *(Dipodomys nitratoides nitratoides)*	FE, CE	Burrows in soil. Often found in grassland and shrubland.	**Absent.** Typical suitable habitat is absent. This species has never been recorded east of the Friant-Kern Canal in Tulare County.
Townsend's big-eared bat *(Corynorhinus townsendii)*	CSC	Occurs in a variety of habitats, but prefers cool, dark roost sites, and are often found in caves and mines. They roost in the open, hanging from walls and ceilings. Western populations typically forage on moths in areas of dense foliage.	**Unlikely.** Suitable roosting habitat is absent from the Project area and adjacent lands. At most, this species could forage nocturnally over the site.

Species	Status	Habitat	Occurrence on Project Site
tricolored blackbird *(Agelaius tricolor)*	CT, CSC	Nests colonially near fresh water in dense cattails or tules, or in thickets of riparian shrubs. Forages in grassland and cropland. Large colonies are often found on dairy farm forage fields.	**Unlikely.** Suitable nesting habitat was not observed within the Project area during the field survey. At most, this species could potentially nest in triticale or alfalfa fields in the vicinity and occasionally pass through the Project site.
valley elderberry longhorn beetle *(Desmocerus californicus dimorphus)*	FT	Lives in mature elderberry shrubs of the Central Valley and foothills. Adults are active March to June.	**Absent.** The Project is not located within the presumed historical range or presumed current distribution of this species. In 2014, USFWS published findings suggesting that previous CNDDB observations of this species within Tulare County should be discounted. (See expanded discussion in Section 3).
vernal pool fairy shrimp *(Branchinecta lynchi)*	FT	Occupies vernal pools, clear to tea-colored water, in grass or mud-bottomed swales, and basalt depression pools.	**Absent.** Vernal pools are absent from the Project area.
western mastiff bat *(Eumops perotis californicus)*	CSC	Found in open, arid to semi-arid habitats, including dry desert washes, flood plains, chaparral, oak woodland, open ponderosa pine forest, grassland, and agricultural areas, where it feeds on insects in flight. Roosts most commonly in crevices in cliff faces but may also use high buildings and tunnels.	**Unlikely.** Suitable roosting habitat is absent from the Project area and adjacent lands. At most, this species could forage nocturnally over the Project site.
western pond turtle *(Emys marmorata)*	CSC	An aquatic turtle of ponds, marshes, slow-moving rivers, streams, and irrigation ditches with riparian vegetation. Requires adequate basking sites and sandy banks or grassy open fields to deposit eggs.	**Possible.** Although the disturbed and developed habitats of the Project area are suboptimal, this species could conceivably occur within the Tule River, Porter Slough, or unlined ditches and canals in the Project area.

Species	Status	Habitat	Occurrence on Project Site
western spadefoot *(Spea hammondii)*	CSC	Prefers open areas with sandy or gravelly soils, in a variety of habitats including mixed woodlands, grasslands, coastal sage scrub, chaparral, sandy washes, lowlands, river floodplains, alluvial fans, playas, alkali flats, foothills, and mountains. Vernal pools or temporary wetlands, lasting a minimum of three weeks, which do not contain bullfrogs, fish, or crayfish are necessary for breeding.	**Unlikely.** The Project is located within the historic and current range of this species. Rodent burrows which could be used for aestivation were observed along the alignment; however, typical vernal pool habitat was not observed within Project areas or surrounding lands. While this species could potentially breed within seasonal pools, ponds, and tire depressions, the presence of bullfrogs, an apex predator, further reduces the quality of the habitat.
Yellow-billed Cuckoo (*Coccyzus americanus*)	CT	Distribution in California is currently limited to the Sacramento River from Red Bluff to Colusa and the South Fork Kern River from Isabella Reservoir to Canebrake Ecological Reserve. Breeding pairs are also occasionally found along the Feather River, the Amargosa River, and the Colorado River in San Bernardino County and Inyo County. Nests in concealed willow foliage in riparian areas.	**Absent.** Suitable nesting habitat is absent from the Project area. This species has not been recorded in Tulare County in more than 100 years and is believed to be extirpated from the region.

Table 3. List of Special Status Plants with Potential to Occur Onsite and/or in the Vicinity

Species	Status	Habitat	Occurrence on Project Site
brittlescale *(Atriplex depressa)*	CNPS 1B	Found in the San Joaquin Valley and Sacramento Valley in alkaline or clay soils, typically in meadows or annual grassland in at elevations below 1050 feet. Sometimes associated with vernal pools. Blooms June–October.	**Absent.** Suitable habitat is absent from the Project area.
calico monkeyflower *(Diplacus pictus / Mimulus pictus / Eunanus pictus)*	CNPS 1B	Found in the Sierra Nevada foothills and the Tehachapi mountains in bare, sunny, shrubby areas, and around granite outcrops within foothill woodland communities at elevations between 450 feet and 4100 feet. Blooms March – May.	**Absent.** Suitable habitat is absent from the Project area.
California alkali grass *(Puccinellia simplex)*	CNPS 1B	Found in the San Joaquin Valley and other parts of California in saline flats and mineral springs within valley grassland and wetland-riparian communities at elevations below 3000 feet. Blooms March–May.	**Absent.** Suitable habitat is absent from the Project area.
California jewelflower *(Caulanthus californicus)*	FE, CE, CNPS 1B	Found in the San Joaquin Valley and Western Transverse Ranges in sandy soils. Occurs on flats and slopes, generally in non-alkaline grassland at elevations between 230 feet and 6100 feet. Blooms February–April.	**Absent.** Suitable habitat is absent, and this species is presumed to be extirpated from Tulare County.
Chaparral ragwort *(Senecio aphanactis)*	CNPS 2B	Found in chaparral, cismontane woodland, and coastal scrub, typically within drying alkaline flats at elevations between 65–2800 feet. Blooms February–May.	**Absent.** Suitable habitat is absent from the project area.

Species	Status	Habitat	Occurrence on Project Site
Earlimart orache *(Atriplex cordulata var. erecticaulis)*	CNPS 1B	Found in the San Joaquin Valley in saline or alkaline soils, typically within valley and foothill grassland at elevations below 375 feet. Blooms August–September.	**Absent.** Suitable habitat is absent from the Project area.
Kaweah brodiaea *(Brodiaea insignis)*	CE, CNPS 1B	Found in the Sierra Nevada foothills in foothill woodland and valley grassland communities at elevations between 650 feet and 1650 feet. Blooms May – June.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.
Keck's checkerbloom *(Sidalcea keckii)*	FE, CNPS 1B	Occurs in cismontane woodland, valley and foothill grassland, typically on grassy slopes in clay soils at elevations between 275 feet – 1650 feet. Blooms April – May.	**Absent.** Typical soils and habitat are absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
lesser saltscale *(Atriplex minuscula)*	CNPS 1B	Found in the San Joaquin Valley in sandy, alkaline soils in alkali scrub, valley and foothill grassland, and alkali sink communities at elevations below 750 feet. Blooms April–October.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
Lost Hills crownscale *(Atriplex coronata var. vallicola)*	CNPS 1B	Found in the San Joaquin Valley in dried ponds and alkaline soils in alkali scrub, valley and foothill grassland, and vernal pools at elevations below 2900 feet. Blooms April–September.	**Absent.** Suitable habitat is absent from the Project area.
Madera leptosiphon *(Leptosiphon serrulatus)*	CNPS 1B	Found in openings in foothill woodland, often yellow-pine forest, and chaparral at elevations between 1000 feet and 4300 feet. Blooms April – May.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.
recurved larkspur *(Delphinium recurvatum)*	CNPS 1B	Occurs in poorly drained, fine, alkaline soils in grassland and alakli scrub communities at elevations between 100 feet and 2600 feet. Blooms March–June.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.

Species	Status	Habitat	Occurrence on Project Site
San Joaquin adobe sunburst *(Pseudobahia peirsonii)*	FT, CE, CNPS 1B	Found in the San Joaquin Valley and the Sierra Nevada Foothills in bare dark clay soils in valley and foothill grassland and cismontane woodland communities at elevations between 325 feet and 2950 feet. Blooms March–May.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
San Joaquin woollythreads *(Monolopia congdonii)*	FE, CNPS 1B	Occurs in the San Joaquin Valley in sandy soils on alkaline or loamy plains in valley and foothill grassland and alkali scrub communities at elevations between 180 feet and 2750 feet. Blooms February–May.	**Absent.** The developed and disturbed habitats of the Project area are generally unsuitable for this species.
shining navarretia *(Navarretia nigelliformis ssp. radians)*	CNPS 1B	Found in cismontane woodland and valley and foothill grassland communities, sometimes in vernal pools. Occurs at elevations between 200 feet and 3200 feet. Blooms May – July.	**Absent.** The developed and disturbed habitats of the Project area are generally unsuitable for this species.
spiny-sepaled button-celery *(Eryngium spinosepalum)*	CNPS 1B	Found in the Sierra Nevada Foothills and the San Joaquin Valley. Occurs in vernal pools, swales, and roadside ditches. Often associated with clay soils in vernal pools within grassland communities. Occurs at elevations between 50 feet and 4160 feet. Blooms April–July.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
Springville clarkia (*Clarkia springvillensis*)	FT, CE, CNPS 1B	Endemic to the woodlands and grasslands of the southern portion of the Sierra Nevada range, occurring primarily in the Tule River watershed. Found at elevations between 690-7400 feet. Blooms in May.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.

Species	Status	Habitat	Occurrence on Project Site
striped adobe-lily *(Fritillaria striata)*	CT, CNPS 1B	Found in the Sierra Nevada foothills in adobe soil within valley grassland and foothill woodland communities at elevations below 3300 feet. Blooms February – April.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
subtle orache *(Atriplex subtilis)*	CNPS 1B	Found in the San Joaquin Valley in saline depressions in alkaline soils within valley and foothill grassland communities at elevations below 330 feet. Blooms June–October.	**Absent.** Typical suitable habitat for this species is absent from the Project area. Development and ongoing disturbance further make the proposed alignment unsuitable.
vernal pool smallscale *(Atriplex persistens)*	CNPS 1B	Occurs in the San Joaquin Valley and Sacramento Valley in alkaline vernal pools at elevations below 375 feet. Blooms June–September.	**Absent.** Suitable habitat is absent, and the Project area is outside of the altitudinal range of this species.

EXPLANATION OF OCCURRENCE DESIGNATIONS

Present: Species observed on the site at time of field surveys or during recent past
Likely: Species not observed on the site, but it may reasonably be expected to occur there on a regular basis
Possible: Species not observed on the site, but it could occur there from time to time
Unlikely: Species not observed on the site, and would not be expected to occur there except, perhaps, as a transient
Absent: Species not observed on the site, and precluded from occurring there due to absence of suitable habitat

STATUS CODES

FE Federally Endangered
FT Federally Threatened
CCT California Threatened (Candidate)
CFP California Fully Protected
CSC California Species of Special Concern
CE California Endangered
CT California Threatened
CWL California Watch List
CCE California Endangered (Candidate)

CNPS RARE PLANT RANKS

1B Plants Rare, Threatened, or Endangered in California and elsewhere
2B Plants Rare, Threatened, or Endangered in California but more common elsewhere

III. Impacts and Mitigation

Significance Criteria

CEQA

General plans, area plans, and specific projects are subject to the provisions of CEQA. The purpose of CEQA is to assess the impacts of proposed projects on the environment prior to project implementation. Impacts to biological resources are just one type of environmental impact assessed under CEQA and vary from project to project in terms of scope and magnitude. Projects requiring removal of vegetation may result in the mortality or displacement of animals associated with this vegetation. Animals adapted to humans, roads, buildings, and pets may replace those species formerly occurring on a site. Plants and animals that are state and/or federally listed as threatened or endangered may be destroyed or displaced. Sensitive habitats such as wetlands and riparian woodlands may be altered or destroyed. Such impacts may be considered either "significant" or "less-than-significant" under CEQA. According to *California Environmental Quality Act, Statute and Guidelines* (AEP 2012), "significant effect on the environment" means a substantial, or potentially substantial, adverse change in any of the physical conditions within the area affected by the project including land, air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic interest. Specific project impacts to biological resources may be considered "significant" if they would:

- Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS;
- Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the CDFW or USFWS;
- Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means;
- Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites;
- Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance; or
- Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan.

Furthermore, CEQA Guidelines Section 15065(a) states that a project may trigger the requirement to make a "mandatory finding of significance" if the project has the potential to:

> "Substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species cause a fish or wildlife population to drop below self-sustaining levels threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare

or threatened species, or eliminate important examples of the major periods of California history or prehistory."

NEPA

Federal projects are subject to the provisions of NEPA. The purpose of NEPA is to assess the effects of a proposed action on the human environment, assess the significance of those effects, and recommend measures that if implemented would mitigate those effects. As used in NEPA, a determination that certain effects on the human environment are "significant" requires considerations of both context and intensity (CFR 1508.27).

Context means that the significance of an action must be analyzed in terms of the affected environment in which a proposed action would occur. For the purposes of assessing effects of an action on biological resources, the relevant context is often local, which means the analysis requires a comparison of the action area's biological resources to the biological resources of the local area. However, the analysis may also require a comparison of the action area's biological resources with the biological resources of an entire region.

Intensity refers to the severity of impact. In considering intensity of impact to biological resources, it is necessary to address the unique qualities of wetlands and ecologically critical areas that may be affected, the degree to which the action will be controversial, the degree to which the effects will be controversial, the degree to which the effects will be uncertain, the degree to which the action will establish a precedent for future actions with potentially significant effects, and the potential for the action to result in cumulatively significant effects.

The effects of an action on some biological resources are generally considered to be "significant." An action that adversely affects federally listed threatened or endangered species, waters of the U.S., or migratory movements of fish and wildlife are some examples of significant effects.

NEPA requires disclosure of feasible mitigation measures for the effects of an action on the environment. Suitable measures include the following:

- Avoidance of the effect by not taking a certain action or parts of an action;
- Mitigation of the effect by limiting the degree or magnitude of the action and its implementation;
- Rectifying the effect by repairing, rehabilitating, or restoring the affected environment;
- Reducing or eliminating the effect over time by preservation and maintenance operations throughout the life of the action; or
- Compensating for the effect by replacing or providing substitute resources or environments.

This report identifies likely effects of an action, identifies those that may be considered significant pursuant to the provisions of NEPA, and provides mitigation measures to avoid adverse effects to biological resources.

Relevant Goals, Policies, and Laws

City of Porterville 2030 General Plan

The City of Porterville 2030 General Plan sets forth the following goals and policies that protect biological resources and that have potential relevance to the Project's environmental review:

OSC-G-7: Protect habitat for special status species, designated under State and federal law.

OSC-I-27: Protect and enhance the natural habitat features of the Tule River and open space corridors within the Planning Area.

OSC-I-28: Require protection of sensitive habitat areas and special status species in new development site designs in the following order: 1) avoidance; 2) onsite mitigation; 3) offsite mitigation, and 4) purchase of mitigation credits.

OSC-I-30: Adopt regulations to promote water-conserving landscape plans, including the use of drought tolerant plants.

OSC-I-32: Identify and protect wildlife movement corridors that serve critical habitats to minimize wildlife-urban conflicts.

OSC-I-34: Continue to require street tree planting in new development and support the City's tree planting fund.

OSC-I-35: Consult with all responsible agencies about wetland and vernal pool habitat potentially affected by development.

OSC-I-39: Adopt the Regional Water Quality Control Board's policies on soil disturbance activities in order to minimize the disturbance of soil, vegetation, organic debris, and other materials that control runoff.

OSC-I-45: Continue to require use of feasible and practical best management practices (BMPs) and other mitigation measures designed to protect surface water and groundwater from the adverse effects of construction activities and urban runoff in coordination with the Regional Water Quality Control Board.

Tulare County 2030 General Plan

The Tulare County 2030 General Plan sets forth the following goals and policies that protect biological resources and that have potential relevance to the Project's environmental review:

ERM-1.1 Protection of Rare and Endangered Species. The County shall ensure the protection of environmentally sensitive wildlife and plant life, including those species designated as rare, threatened, and/or endangered by State and/or Federal government, through compatible land use development.

ERM-1.2 Development in Environmentally Sensitive Areas. The County shall limit or modify proposed development within areas that contain sensitive habitat for special status species and direct development into less significant habitat areas. Development in natural habitats shall be controlled so as to minimize erosion and maximize beneficial vegetative growth.

ERM-1.4 Protect Riparian Areas. The County shall protect riparian areas through habitat preservation, designation as open space or recreational land uses, bank stabilization, and development controls.

ERM-1.6 Management of Wetlands. The County shall support the preservation and management of wetland and riparian plant communities for passive recreation, groundwater recharge, and wildlife habitats.

ERM-1.7 Planting of Native Vegetation. The County shall encourage the planting of native trees, shrubs, and grasslands in order to preserve the visual integrity of the landscape, provide habitat conditions suitable for native vegetation and wildlife, and ensure that a maximum number and variety of well-adapted plants are maintained.

ERM-1.8 Open Space Buffers. The County shall require buffer areas between development projects and significant watercourses, riparian vegetation, wetlands, and other sensitive habitats and natural communities. These buffers should be sufficient to assure the continued existence of the waterways and riparian habitat in their natural state.

ERM-5.8 Watercourse Development. The County, in approving recreational facilities along major watercourses, shall require a buffer of at least 100 feet from the high-water line edge/bank and screening vegetation as necessary to address land use compatibility issues. The establishment of a buffer may not be required when mitigated or may not apply to industrial uses that do not impact adjoining uses.

ERM-7.3 Protection of Soils on Slopes. Unless otherwise provided for in this General Plan, building and road construction on slopes of more than 30 percent shall be prohibited, and development proposals on slopes of 15 percent or more shall be accompanied by plans for control or prevention of erosion, alteration of surface water runoff, soil slippage, and wildfire occurrence.

Threatened and Endangered Species

Permits may be required from the USFWS and/or CDFW if activities associated with a project have the potential to result in the take of a species listed as threatened or endangered under the federal and/or State Endangered Species Acts. "Take" is defined by the State of California as "to hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture or kill" (California Fish and Game Code Section 86). "Take" is more broadly defined by the federal Endangered Species Act to include "harm" (16 USC Section 1532(19), 50 CFR Section 17.3). The CDFW and the USFWS are responding agencies under CEQA and NEPA. Both agencies review CEQA and NEPA documents in order to determine the adequacy of their treatment of endangered species issues and to make project-specific recommendations for their conservation.

Designated Critical Habitat

When species are listed as threatened or endangered, the USFWS often designates areas of Critical Habitat as defined by section 3(5)(A) of the federal Endangered Species Act (ESA). "Critical Habitat" is a term defined in the ESA as a specific geographic area that contains features essential for the conservation of a threatened or endangered species and that may require special management and protection. Critical Habitat is a tool that supports the continued conservation of imperiled species by guiding cooperation with the federal government. Designations only affect federal agency actions or federally funded or permitted activities. Critical Habitat does not prevent activities that occur within the designated area. Only activities that involve a federal permit, license, or funding and are likely to destroy or adversely modify Critical Habitat will be affected.

Migratory Birds

The Federal Migratory Bird Treaty Act ((MBTA): 16 USC 703-712) prohibits killing, possessing, or trading in any bird species covered in one of four international conventions to which the U.S. is a party except in accordance with regulations prescribed by the Secretary of the Interior. The name of the Act is misleading, as it actually

covers almost all birds native to the U.S., even those that are non-migratory. The MBTA encompasses whole birds, parts of birds, and bird nests and eggs. Additionally, California Fish and Game Code makes it unlawful to take or possess any non-game bird covered by the MBTA (Section 3513), as well as any other native non-game bird (Section 3800).

Birds of Prey

Birds of prey are protected in California under provisions of Fish and Game Code Section 3503.5, which states that it is unlawful to take, possess, or destroy any birds in the order Falconiformes (hawks and eagles) or Strigiformes (owls), as well as their nests and eggs. The bald eagle and golden eagle are afforded additional protection under the federal Bald and Golden Eagle Protection Act (16 USC 668), which makes it unlawful to kill birds or their eggs.

Nesting Birds

In California, protection is afforded to the nests and eggs of all birds. California Fish and Game Code Section 3503 states that it is "unlawful to take, possess, or needlessly destroy the nest or eggs of any bird except as otherwise provided by this code or any regulation adopted pursuant thereto". Breeding-season disturbance that causes nest abandonment and/or loss of reproductive effort is considered a form of "take" by CDFW.

Wetlands and other "Jurisdictional Waters"

Natural drainage channels and adjacent wetlands may be considered "waters of the U.S." or "jurisdictional waters" and subject to the jurisdiction of the USACE. The extent of jurisdiction has been defined in the Code of Federal Regulations but has also been subject to interpretation of the federal courts. Jurisdictional waters generally include:

- All waters which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;
- All interstate waters including interstate wetlands;
- All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate or foreign commerce;
- All impoundments of waters otherwise defined as waters of the U.S. under the definition; and,
- Tributaries of waters identified in paragraphs (a)(1)-(4) (i.e. the bulleted items above).

As determined by the U.S. Supreme Court in its 2001 *Solid Waste Agency of Northern Cook County v. U.S. Army Corps of Engineers* (*SWANCC*) decision, channels and wetlands isolated from other jurisdictional waters cannot be considered jurisdictional on the basis of their use, hypothetical or observed, by migratory birds. Similarly, in its 2006 consolidated *Carabell/Rapanos* decision, the Supreme Court ruled that a significant nexus between a wetland and other navigable waters must exist for the wetland itself to be considered navigable and therefore, a jurisdictional water. Furthermore, the Supreme Court clarified that the Environmental Protection Agency (EPA) and the USACE will not assert jurisdiction over ditches excavated wholly in and draining only uplands and that do not carry a relatively permanent flow of water.

The USACE regulates the filling or grading of Waters of the U.S. under the authority of Section 404 of the Clean Water Act. The extent of jurisdiction within drainage channels is defined by "ordinary high-water marks" on opposing channel banks. All activities that involve the discharge of dredge or fill material into Waters of the U.S. are subject to the permit requirements of the USACE. Such permits are typically issued on the condition that the applicant agrees to provide mitigation that results in no net loss of wetland functions or values. No permit can be issued until the RWQCB issues a Section 401 Water Quality Certification (or waiver of such certification) verifying that the proposed activity will meet State water quality standards.

Under the Porter-Cologne Water Quality Control Act of 1969, the State Water Resources Control Board has regulatory authority to protect the water quality of all surface water and groundwater in the State of California ("Waters of the State"). Nine RWQCBs oversee water quality at the local and regional level. The RWQCB for a given region regulates discharges of fill or pollutants into Waters of the State through the issuance of various permits and orders. Discharges into Waters of the State that are also Waters of the U.S. require a Section 401 Water Quality Certification from the RWQCB as a prerequisite to obtaining certain federal permits, such as a Section 404 Clean Water Act permit. Discharges into all Waters of the State, even those that are not also Waters of the U.S., require Waste Discharge Requirements (WDRs), or waivers of WDRs, from the RWQCB. The RWQCB also administers the Construction Storm Water Program and the federal National Pollution Discharge Elimination System (NPDES) program. Projects that disturb one acre or more of soil must obtain a Construction General Permit under the Construction Storm Water Program. A prerequisite for this permit is the development of a Storm Water Pollution Prevention Plan (SWPPP) by a certified Qualified SWPPP Developer and implemented by a Qualified SWPPP Practitioner. Projects that discharge wastewater, storm water, or other pollutants into a Water of the U.S. may require a NPDES permit.

CDFW has jurisdiction over the bed and bank of natural drainages and lakes according to provisions of Section 1601 and 1602 of the California Fish and Game Code. Activities that may substantially modify such waters through the diversion or obstruction of their natural flow, change or use of any material from their bed or bank, or the deposition of debris require a notification of Lake or Streambed Alteration (LSA). If CDFW determines that the activity may adversely affect fish and wildlife resources, an LSA Agreement will be prepared. Such an agreement typically stipulates that certain measures will be implemented to protect the habitat values of the lake or drainage in question.

Potentially Significant Project-Related Impacts and Mitigation

Species identified as candidate, sensitive, or special status species in local or regional plans policies or regulations by CDFW or the USFWS that have the potential to be impacted by the Proposed Project are identified below with corresponding mitigation measures.

General Mitigation Measures

Prior to the start of construction, all personnel associated with construction of the Project shall be trained to be able to identify special status species in order to prevent impacts to sensitive resources; therefore, the following general mitigation measures shall be implemented:

Mitigation Measure GEN-1a (WEAP Training): Prior to initiating construction activities (including staging and mobilization), all personnel associated with Project construction shall attend mandatory Worker Environmental

Awareness Program (WEAP) training, conducted by a qualified biologist, to aid workers in identifying special status species that may occur in the Project area. The specifics of this program shall include identification of the sensitive species and suitable habitats, a description of the regulatory status and general ecological characteristics of these species, and review of the mitigation measures required to reduce impacts to biological resources within the work area. A fact sheet conveying this information, along with photographs or illustrations of sensitive species with potential to occur onsite, shall also be prepared for distribution to all contractors, their employees, and all other personnel involved with construction of the Project. All employees shall sign a form documenting that they have attended WEAP training and understand the information presented to them.

Mitigation Measure GEN-1b (Operational Hours): Construction shall be conducted during daylight hours to reduce disturbance to wildlife that could be foraging nocturnally within work areas.

Project-Related Mortality and/or Disturbance of Nesting Raptors, Migratory Birds, and Special Status Birds

The developed and ruderal nature of the Project area provides sub-optimal nesting and foraging habitat for raptors, resident and migratory birds, and special status birds, such as the Swainson's hawk. Valley oak trees, interior live oak trees, and several other non-native and ornamental trees were observed along the proposed alignment. The Project could potentially impact or remove trees within the proposed trail alignment. Even if the oaks were removed, it would not be considered a loss of nesting or foraging habitat because implementation of the Butterfield Stage Corridor Project as envisioned would include planting approximately 1,750 additional native trees which would serve as nesting and foraging habitat. Furthermore, in the unlikely event that a Swainson's hawk or other avian species is foraging within the Project site during construction activities, the individual would be expected to fly away from disturbance they encounter, subsequently eliminating the risk of injury or mortality while foraging. However, if birds were nesting within these trees at the time of construction, Project-related activities could result in the abandonment of active nests or direct mortality to these birds, which would be considered a significant impact under CEQA and NEPA and a violation of State and federal regulations protecting avian species.

Although typical suitable raptor nest trees and optimal foraging habitat were not observed within the Project area at the time of the field survey, in the absence of higher quality habitat, some raptors such as the red-tailed hawk (*Buteo jamaicensis*), American kestrel, barn owl, Cooper's hawk, and even the special status Swainson's hawk could potentially become acclimatized to human disturbance and nest in large ornamental trees in the vicinity. Swainson's hawks are fairly uncommon in this portion of the San Joaquin Valley. While typical Swainson's hawk nesting and foraging habitat was not observed within the Project area at the time of the field survey, this species could conceivably nest or forage in the vicinity in the absence of higher quality habitat. Typically, a 0.5-mile disturbance-free buffer is implemented around active Swainson's hawk nests; however, sometimes it is reasonable to consider a reduction in the buffer distance when there is a compelling biological or ecological reason to do so, such as when the nest is located in an area with a baseline high level of ongoing disturbance or when the Project area is outside of the viewshed of the nest. The Butterfield Stage Corridor Project area is surrounded by urban and agricultural development. In the unlikely event that a Swainson's hawk were nesting in the vicinity of the Project, it is likely that this individual would be relatively accustomed to human disturbance, and therefore a 500-foot nest buffer should suffice.

Smaller trees and shrubs could be inhabited by a variety of migratory and resident passerines, and bridges and culverts could be utilized by the black phoebe or cliff swallows. Disturbance tolerant ground nesting birds, such

as the killdeer could nest on the compacted bare ground or within gravel along the proposed alignment. If birds were nesting within or adjacent to Project areas at the time of construction, Project-related activities could result in the abandonment of active nests or direct mortality to these birds. Construction activities that adversely affect nesting success or result in mortality of individual birds constitute a violation of State and federal laws and would be considered a significant impact under CEQA and NEPA.

Nesting bird season is generally accepted as February 1 through August 31; however, Swainson's hawk nesting season is generally accepted as March 1 through September 15. For simplicity, these timeframes have been combined.

Implementation of the following measures will reduce potential impacts to nesting raptors, migratory birds, and special status birds, including Swainson's hawk to a less-than-significant level under CEQA and NEPA, and will ensure compliance with State and federal laws protecting these avian species.

Mitigation. The following measures will be implemented prior to the start of construction:

Mitigation Measure NEST-1a (Avoidance): The Project's construction activities shall occur, if feasible, between September 16 and January 31 (outside of nesting bird season) in an effort to avoid impacts to nesting birds.

Mitigation Measure NEST-1b (Pre-construction Surveys): If activities must occur within nesting bird season (February 1 to September 15), a qualified biologist shall conduct pre-construction surveys for active nests within 30 days prior to the start of construction. The survey shall include the proposed work area and surrounding lands within 500 feet. If no active nests are observed, no further mitigation is required. Raptor nests are considered "active" upon the nest-building stage.

Mitigation Measure NEST-1c (Establish Buffers): On discovery of any active nests near work areas, the biologist shall determine appropriate construction setback distances based on applicable CDFW and/or USFWS guidelines and/or the biology of the species in question. Construction buffers shall be identified with flagging, fencing, or other easily visible means, and shall be maintained until the biologist has determined that the nestlings have fledged and are no longer dependent on the nest.

Project-Related Impacts to Roosting Bats and/or Special Status Bat Species

Roosting habitat for the pallid bat is absent from the Project area, but this species could potentially forage nocturnally over the Project site. Pallid bats typically prefer to use rock crevices or horizontal gaps in structures for maternal roosts; however, this species often utilizes cement bridges and structures, particularly those located over water, as night roosts. Projects that adversely affect the reproductive success of special status species or result in the mortality of special status species is considered a violation of State and federal laws and are considered a potentially significant impact under CEQA and NEPA.

Bridges, structures, and crossings could serve as potential roosting habitat for a variety of bat species, and *Yuma myotis* has been known to roost in abandoned swallow nests. Although *Yuma myotis* is not protected by the federal or State Endangered Species Act, Project-related impacts to native wildlife nursery sites, such as maternal bat roosts could be considered a significant impact under CEQA. Implementation of General Mitigation Measure GEN-1b (Operational Hours) listed above will avoid potential Project-related impacts to foraging bats or individuals using the Project area as a night roost by limiting construction hours to sunrise to sunset. However,

structures that could serve as roosting habitat along the alignment should be inspected for potential maternal colonies prior to construction in order to avoid impacts to native bat nursery sites.

Implementation of the following measures will reduce potential impacts to special status bats and native maternal bat roosts to a less-than-significant level under CEQA and NEPA and will ensure compliance with State and federal laws protecting these species.

Mitigation. The following measure will be implemented during or prior to the start of construction:

Mitigation Measure BAT-1 (Pre-construction Survey): A qualified biologist will perform a pre-construction survey of the Project area for roosting bats within 30 days prior to the start of construction. If day roosts or maternal roosts are observed onsite during the pre-construction survey, all construction activities shall be delayed, and CDFW shall be consulted to determine the best course of action.

Project-Related Impacts to San Joaquin Kit Fox

The Project is within the regulatory range of the San Joaquin kit fox, and burrowing rodent activity was detected throughout the Project area, indicating potential denning and foraging opportunities for this species. If a kit fox were present onsite during ground-disturbance, it could be injured or killed by construction activities. Projects that result in the mortality of special status species are considered a violation of State and federal laws and are considered a potentially significant impact under CEQA and NEPA.

General Mitigation Measure GEN-1a (WEAP Training) requires all construction personnel to attend a mandatory education program, which will include a detailed description of the San Joaquin kit fox and habitat requirements, color photographs or illustrations, an explanation of the conservation status of this species and its coverage under State and federal regulations, penalties for violating said regulations, and a list of required measures to reduce impacts to the species during construction. General Mitigation Measure GEN-1b (Operational Hours) limits construction activities to daylight hours which would reduce the likelihood of encountering a kit fox onsite.

For clarification, the USFWS 2011 *Standardized Recommendations for Protection of the Endangered San Joaquin Kit Fox Prior to or During Ground Disturbance*, which is referenced multiple times below, is included, in entirety, as **APPENDIX A** of this document.

Implementation of the following measures will further reduce potential impacts to the San Joaquin kit fox to a lessthan-significant level under CEQA and NEPA, and will ensure compliance with State and federal laws protecting this species.

Mitigation. The following measures derived from the USFWS 2011 *Standardized Recommendations for Protection of the San Joaquin Kit Fox Prior to or During Ground Disturbance* will be implemented:

Mitigation Measure SJKF-1a (Pre-construction Survey): Within 30 days prior to the start of construction, a pre-construction survey for San Joaquin kit fox shall be conducted on and within 200 feet of proposed work areas. If kit fox sign and potential dens are detected within or adjacent to the Project area, potential dens shall be monitored for a period of three consecutive nights with a remote-sensing camera and/or tracking medium.

Mitigation Measure SJKF-1b (Den Destruction): If there is no sign of kit fox activity at a den after monitoring with a remote-sensing camera and/or tracking medium for a period of three consecutive nights, the den will be

closed, excavated, or destroyed to prevent subsequent use by a kit fox during construction activities. There will be no destruction of "known dens" without a take authorization/permit from USFWS and CDFW.

Mitigation Measure SJKF-1c (Incidental Take Permit): If a known den or natal/pupping den is detected, the Project proponent will contact CDFW and USFWS for instructions on how to proceed, which will likely include application for an Incidental Take Permit (ITP).

Mitigation Measure SJKF-1d (Minimization): The Project shall observe all minimization and protective measures from the Construction and On-Going Operational Requirements of the USFWS 2011 *Standardized Recommendations for Protection of the Endangered San Joaquin Kit Fox Prior to or During Ground Disturbance*, including, but not limited to: construction speed limits, covering of pipes, installation of escape structures, restriction of herbicide and rodenticide use, proper disposal of food items and trash, prohibition of pets and firearms, and completion of an employee education program.

Mitigation Measure SJKF-1e (Mortality Reporting): The Sacramento Field Office of USFWS and the Fresno Field Office of CDFW will be notified in writing within three working days in the case of the accidental death or injury to a San Joaquin kit fox during construction. Notification must include the date, time, and location of the incident and any other pertinent information.

Project-Related Impacts to American Badger

American badger has been documented in the vicinity and burrowing rodent activity was observed along the Project alignment, which could represent potential denning and foraging opportunities. This species could inhabit margins of agricultural parcels and grasslands in the vicinity and pass through the Project area during nocturnal foraging or dispersal movements. If an American badger were present onsite during ground-disturbance, it could be injured or killed by construction activities. Projects that result in the mortality of special status species are considered a violation of State and federal laws and are considered a potentially-significant-impact under CEQA and NEPA.

General Mitigation Measure GEN-1b (Operational Hours) limits construction activities to daylight hours which would reduce the likelihood of encountering nocturnal foragers onsite, and implementation of the following measure will further reduce potential impacts to the American badger to a less-than-significant level under CEQA and NEPA, and will ensure compliance with State and federal laws protecting this species.

Mitigation. The following measure will be implemented prior to the start of construction:

Mitigation Measure AMBA-1a (Pre-construction Survey): Concurrent with the pre-construction survey for San Joaquin kit fox discussed above, and within 30 days prior to the start of construction, a pre-construction survey for American badger dens shall be conducted on and within 100 feet of proposed work areas.

Mitigation Measure AMBA-1b (Avoidance): If an active American badger den is detected within or adjacent to the Project area, a 100-foot disturbance-free buffer shall be maintained around the den until a qualified biologist has determined that all badgers have left the Project area of their volition. If complete avoidance is infeasible, the Project proponent will consult with CDFW regarding potential options for humane eviction. Badgers will not be evicted from dens without written approval from CDFW.

Project-Related Impacts to Western Pond Turtle

This species is known to occur in the Tule River upstream of Lake Success, and while frequent disturbance, controlled releases, and seasonal or unpredictable flows make the channels in the Project area suboptimal for western pond turtle, there is at least some potential for occurrence. Although no western pond turtle individuals were observed during biological survey, potentially suitable habitat was present within the Tule River, Porter Slough, and unlined ditches and canals. This species is highly mobile and is known to travel great distances while seeking an adequate upland nesting site. If a western pond turtle individual were present onsite during ground-disturbance, it could be injured or killed by construction activities. Projects that result in the mortality of special status species are considered a violation of State and federal laws and are considered a potentially significant impact under CEQA and NEPA.

Implementation of the following measure will reduce potential impacts to western pond turtle to a less-than-significant level under CEQA and NEPA, and will ensure compliance with State and federal laws protecting this species.

Mitigation. The following measure will be implemented prior to the start of construction:

Mitigation Measure WPT-1 (Pre-construction Survey): Within 30 days prior to the start of construction, a qualified biologist will perform a pre-construction survey for the western pond turtle in riparian and aquatic habitat and 500-foot radius. If no western pond turtles are observed, construction may begin. If western pond turtles are observed during the pre-construction survey, the individuals will be relocated out of harm's way to the nearest suitable habitat beyond the influence of the Project work area.

Less Than Significant Project-Related Impacts

Project-Related Impacts to Special Status Plant Species

Twenty (20) special status plant species have been documented in the Project vicinity, including brittlescale, calico monkeyflower, California alkali grass, California jewelflower, Chaparral ragwort, Earlimart orache, Kaweah brodiaea, Keck's checkerbloom, lesser saltscale, Lost Hills crownscale, Madera leptosiphon, recurved larkspur, San Joaquin adobe sunburst, San Joaquin woollythreads, shining navarretia, spiny-sepaled button-celery, Springville clarkia, striped adobe-lily, subtle orache, and vernal pool smallscale. None of these species were observed during the biological survey, which was conducted in Summer, during the typical blooming season for many of these species. As explained in **Table 3**, all of the aforementioned special status plant species are absent from the Project area due to past and ongoing disturbance and/or the absence of suitable habitat. Therefore, the implementation of the Project will have no effect on individual plants or regional populations of these special status plant species. Mitigation measures are not warranted.

Project-Related Impacts to Special Status Animal Species Absent From, or Unlikely to Occur on, the Project Site

After completing a biological survey, 11 of the 22 published accounts of regionally occurring special status animal species were declared absent from the Project area, one of which is the valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*).

In 2014, USFWS published *Withdrawal of the Proposed Rule To Remove the Valley Elderberry Longhorn Beetle From the Federal List of Endangered and Threatened Wildlife*, in which the presumed historical range

and the presumed extant range of the valley elderberry longhorn beetle is redefined. Very few of the records involve observation of an adult valley elderberry longhorn beetle; the majority are based exclusively on observation of exit holes, which may not be an accurate depiction of occupancy. There are several problems with recording an observation of a sensitive species based on an ambiguous sign, such as an exit hole. Two subspecies of elderberry longhorn beetle exist: the valley elderberry longhorn beetle and the California elderberry longhorn beetle. These two subspecies are so similar that experts are only able to distinguish between the two with certainty by adult male coloration. Thus, species accounts may be unreliable in areas where range overlaps and the sex of the subject is not specified. The document further states that all observations within Tulare County should be discounted as they likely represent the California elderberry longhorn beetle.

Of the 22 recorded regionally occurring special status species, 17 are considered absent or unlikely to occur within the Project area due to past or ongoing disturbance and/or absence of suitable habitat. As explained in Table 2, the following 11 species were deemed absent from the Project area: blunt-nosed leopard lizard, California red-legged frog, California tiger salamander, Delta smelt, foothill yellow-legged frog, giant gartersnake, northern California legless lizard, Tipton kangaroo rat, valley elderberry longhorn beetle, vernal pool fairy shrimp, and yellow-billed Cuckoo; and the following 6 species were deemed unlikely to occur onsite: California condor, Crotch bumble bee, Townsend's big-eared bat, tricolored blackbird, western mastiff bat, and western spadefoot. Since it is highly unlikely that these species would occur onsite, implementation of the Project should have no impact on these 17 special status species through construction mortality, disturbance, or loss of habitat. Mitigation measures are not warranted.

Project-Related Impacts to Jurisdictional Waters, Wetlands, Navigable Waters, Wild and Scenic Rivers, or other Water Features, and Riparian Habitat

The Project alignment crosses over Tule River, Porter Slough, Campbell Moreland Ditch, Poplar Ditch, Pioneer Ditch, and the Friant-Kern Canal. Because the trail will be constructed on the former UPRR right-of-way, there are existing crossings at each of these aquatic features, except for Tule River. There was a UPRR bridge which crossed the Tule River immediately west of the Main Street Bridge over the Tule River in the City of Porterville. The bridge was previously burned in a fire and the City had the superstructure removed, however the bridge foundation remains. It is assumed that the 130-feet of bridge span that originally existed at the site will need to be reconstructed in order to span the new bridge superstructure over the floodway of the Tule River. The other existing crossings may also require modifications to support the proposed trail.

The Tule River, Poplar Ditch, Friant-Kern Canal, and Porter Slough have historically been considered Waters of the U.S. because of their downstream connections to traditionally navigable waters. Although an aquatic resources delineation was not conducted, it is reasonable to assume that these water features could potentially fall under the jurisdiction of USACE and RWQCB. In order to determine jurisdictional status, an aquatic resources delineation should be conducted for all of the aquatic features crossing the proposed alignment. Even if USACE denies jurisdiction over an aquatic feature, it may still fall under the jurisdiction of RWQCB and/or CDFW.

Project activities conducted within the Ordinary High Watermark (OHWM) of a Water of the U.S. will be subject to permit requirements of the USACE, pursuant to Section 404 of the Clean Water Act. This Project would likely be authorized under a Nationwide Permit. Such permits are typically issued on the condition that the applicant agrees to provide mitigation that results in no net loss of wetland functions or values. No USACE permit can be issued until the RWQCB issues a Section 401 Water Quality Certification, which also includes additional

measures to ensure that the proposed activity will meet State water quality standards. Project activities conducted below OHWM within Waters of the State that are not also Waters of the U.S. will be subject to Waste Discharge Requirements (WDRs), or a waiver of WDRs. If the Project's construction work at any of the crossings will result in impacts to Waters of the U.S. and/or Waters of the State, the Project proponent will be required to secure permits from USACE and/or RWQCB. Compliance with each permit's required avoidance, minimization, and mitigation measures will ensure that Project-related impacts to these potentially jurisdictional waters are less-than-significant in nature or are fully mitigated.

Project activities with potential to alter a river, stream, or lake, including the floodplain and associated riparian habitat, would be within CDFW's jurisdiction, pursuant to Section 1602 of the California Fish and Game Code. The Project proponent is required to notify CDFW if the Project's activities have potential to impact rivers, streams, or the riparian corridor of any aquatic features onsite that may be beneficial to fish or wildlife resources. If CDFW determines that the Project could potentially adversely affect fish and wildlife resources, LSA Agreement will be issued prior to construction. LSA Agreements are typically issued with mandatory avoidance and minimization measures, protective measures for special status species, and required compensatory mitigation for removal of riparian trees, shrubs, and herbaceous cover along the banks. Compliance with measures of the LSA Agreement will ensure that the Project's impacts to aquatic features and riparian habitat within CDFW's jurisdiction remain less-than-significant or are fully mitigated.

There are no designated wild and scenic rivers within the Project area, and none of the aquatic features onsite are included on USACE Sacramento District's list of navigable waters. Therefore, the Project will not result in direct impacts to wild and scenic rivers or navigable waters. Compliance with USACE, RWQCB, and CDFW permits, certifications, and agreements will ensure there are no indirect downstream effects to water quality.

Project-Related Impacts to Wildlife Movement Corridors

As discussed in Section 2: Wildlife Movement Corridors, the Project area does not contain features that would be likely to function as important wildlife movement corridors, and the Project is located in a region often disturbed by human activities associated with urban environments and agricultural production which would discourage dispersal and migration. Furthermore, the Project does not propose the placement of permanent fencing or any type of barrier that would impede movement of native wildlife. Therefore, implementation of the Project will have no impact on wildlife movement corridors. Mitigation is not warranted.

Project-Related Impacts to Critical Habitat

Designated critical habitat is absent from the Project area and surrounding lands. Therefore, there will be no impact to critical habitat, and mitigation is not warranted.

Local Policies or Habitat Conservation Plans

Proposed Project design appears to be consistent with the goals and policies of the City of Porterville 2030 General Plan. There are no known habitat conservation plans in the Project vicinity. Mitigation is not warranted.

Coastal Zone and Coastal Barriers Resources Act

The Project is not located within the coastal zone. The Project will not impact or be located within or near the Coastal Barrier Resources System or its adjacent wetlands, marshes, estuaries, inlets, and near-shore waters. Mitigation is not warranted.

Project-Related Impact to Essential Fish Habitat

Essential Fish Habitat (EFH) and Habitat Areas of Particular Concern (HAPC) are absent from the Project area and surrounding lands, and consultation with the National Marine Fisheries (NMFS) Service will not be required. Query results of the NMFS EHF Mapper can be found as **APPENDIX F** of this document. Mitigation is not warranted.

Section 7 Determinations

In addition to the effects analysis performed in Sections 2 and 3 of this document, Table 4 summarizes Project effect determinations for Federally Listed Species found on the USFWS IPaC list generated on May 18, 2020 (APPENDIX C), in accordance with Section 7 of the Endangered Species Act.

Table 4. Section 7 Determinations

Federally Listed Species Identified by IPaC		
Species	***Determination***	***Rationale for Determination***
San Joaquin kit fox (*Vulpes macrotis mutica*)	May affect; not likely to adversely affect	Habitats onsite are generally unsuitable. There has been only one recorded occurrence in the vicinity in the past 25 years. Implementation of avoidance and minimization measures will avoid "take" in the extremely unlikely event that this species was inhabiting the site.
Tipton Kangaroo Rat (*Dipodomys nitratoides nitratoides*)	No effect	Habitat absent.
Yellow-billed Cuckoo (*Coccyzus americanus*)	No effect	Habitat absent.
blunt-nosed leopard lizard (*Gambelia sila*)	No effect	Habitat absent, and the Project area is outside of the distribution range of this species.
giant gartersnake (*Thamnophis gigas*)	No effect	Habitat absent, and the Project area is outside of the distribution range of this species.
California red-legged frog (*Rana draytonii*)	No effect	Habitat absent, and the Project area is outside of the distribution range of this species.
California tiger salamander (*Ambystoma californiense*)	No effect	Habitat absent, and the Project area is outside of the distribution range of this species.
Delta smelt (*Hypomesus transpacificus*)	No effect	Habitat absent, and the Project area is outside of the distribution range of this species.
vernal pool fairy shrimp (*Branchinecta lynchi*)	No effect	Habitat absent.
San Joaquin Adobe (*Sunburst Pseudobahia peirsonii*)	No effect	Habitat absent.
Springville Clarkia (*Clarkia springvillensis*)	No effect	Habitat absent.
Additional Federally Listed Species Identified by CNDDB		
California condor (*Gymnogyps californianus*)	No effect	Habitat absent.

Species	*Determination*	*Rationale for Determination*
California jewelflower (*Caulanthus californicus*)	No effect	Habitat absent.
Keck's checkerbloom (*Sidalcea keckii*)	No effect	Habitat absent.
San Joaquin woollythreads (*Monolopia congdonii*)	No effect	Habitat absent.
valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*)	No effect	Habitat absent, and the Project area is outside of the distribution range of this species.

Sacramento, CA 95825-1846
Phone: (916) 414-6600 Fax: (916) 414-6713

In Reply Refer To: May 18, 2020
Consultation Code: 08ESMF00-2020-SLI-1944
Event Code: 08ESMF00-2020-E-06067
Project Name: Butterfield Stage Corridor Project

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, under the jurisdiction of the U.S. Fish and Wildlife Service (Service) that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the Service under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Please follow the link below to see if your proposed project has the potential to affect other species or their habitats under the jurisdiction of the National Marine Fisheries Service:

http://www.nwr.noaa.gov/protected_species/species_list/species_lists.html

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (http://www.fws.gov/windenergy/) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm; http://www.towerkill.com; and http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Project Summary

Consultation Code: 08ESMF00-2020-SLI-1944

Event Code: 08ESMF00-2020-E-06067

Project Name: Butterfield Stage Corridor Project

Project Type: LAND - RESTORATION / ENHANCEMENT

Project Description: The Project consists of the development of a multi-modal corridor utilizing eight (8) miles of former
Union Pacific Railroad (UPRR) right of way between Tea Pot Dome Avenue to the south and Avenue
196 in Strathmore to the north. The corridor will consist of a Class 1 multi-use path that includes
amenities such as solar lighting, drought tolerant landscaping, drinking water stations, refuse
receptacles, benches, wayfinding, and controlled lighted crossings.

Project Location:

Approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/place/36.0838440538174N119.02411630534684W

Counties: Tulare, CA

Endangered Species Act Species

There is a total of 11 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Mammals

NAME	STATUS
San Joaquin Kit Fox *Vulpes macrotis mutica* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/2873	Endangered

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

APPENDIX D NRCS SOILS REPORT

CITY OF PORTERVILLE

BUTTERFIELD STAGE CORRIDOR PROJECT

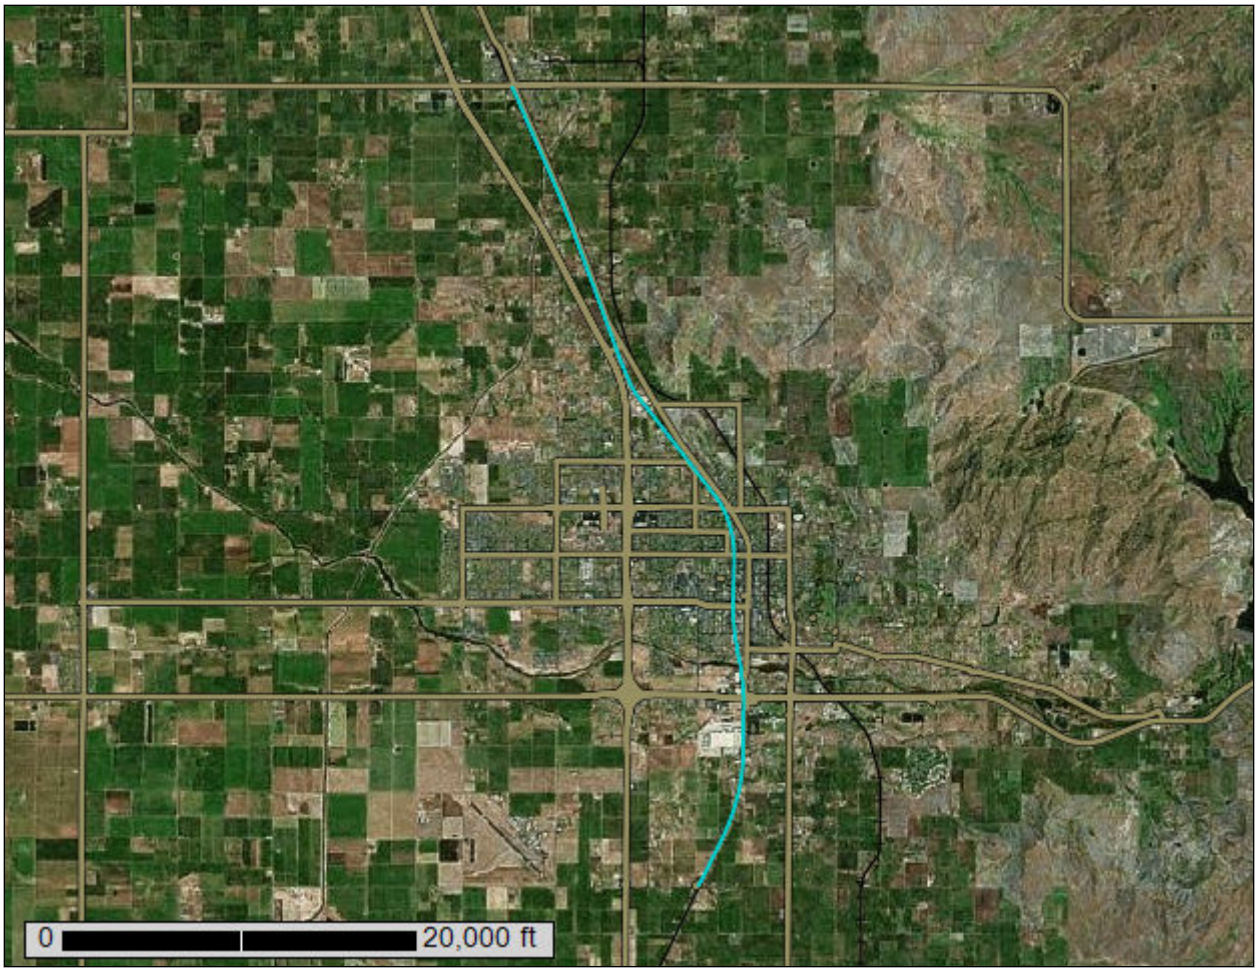
United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Tulare County, California, Central Part; and Tulare County, Western Part, California



May 18, 2020

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Tulare County, California, Central Part
Survey Area Data: Version 13, Sep 16, 2019

Soil Survey Area: Tulare County, Western Part, California
Survey Area Data: Version 13, Sep 16, 2019

Your area of interest (AOI) includes more than one soil survey area. These survey areas may have been mapped at different scales, with a different land use in mind, at different times, or at different levels of detail. This may result in map unit symbols, soil properties, and interpretations that do not completely agree across soil survey area boundaries.

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 5, 2010—Oct 23, 2017

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without

including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Tulare County, California, Central Part

110—Centerville clay, 2 to 9 percent slopes

Map Unit Setting

National map unit symbol: hkd1
Elevation: 300 to 850 feet
Mean annual air temperature: 63 degrees F
Frost-free period: 250 to 300 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Centerville and similar soils: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Centerville

Setting

Landform: Alluvial fans, terraces
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Base slope
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Alluvium derived from granitoid

Typical profile

A - 0 to 18 inches: clay
C - 18 to 37 inches: sandy clay, clay
C - 18 to 37 inches:

Properties and qualities

Slope: 2 to 9 percent
Depth to restrictive feature: 20 to 40 inches to paralithic bedrock
Natural drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum in profile: 5 percent
Salinity, maximum in profile: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water storage in profile: Moderate (about 7.8 inches)

Interpretive groups

Land capability classification (irrigated): 3e
Land capability classification (nonirrigated): 3e
Hydrologic Soil Group: D
Ecological site: CLAYEY (R017XE001CA)
Hydric soil rating: No

Minor Components

Exeter

Hydric soil rating: No

Porterville

Percent of map unit: 5 percent
Hydric soil rating: No

San joaquin

Percent of map unit: 5 percent
Hydric soil rating: No

Unnamed, steeper slopes

Percent of map unit: 5 percent
Hydric soil rating: No

124—Exeter loam, 0 to 2 percent slopes

Map Unit Setting

National map unit symbol: hkdh
Elevation: 20 to 700 feet
Mean annual precipitation: 7 to 20 inches
Mean annual air temperature: 61 to 64 degrees F
Frost-free period: 250 to 300 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Exeter and similar soils: 75 percent
Minor components: 25 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Exeter

Setting

Landform: Terraces
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Alluvium derived from granitoid

Typical profile

Ap - 0 to 14 inches: loam
Bt - 14 to 30 inches: sandy clay loam, clay loam, loam
Bt - 14 to 30 inches: duripan
Bt - 14 to 30 inches: sand, gravelly sand
Cqm - 30 to 43 inches: stratified sandy loam to silt loam
C1 - 43 to 47 inches:
C1 - 43 to 47 inches:
C2 - 47 to 60 inches:

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: 20 to 40 inches to duripan

Natural drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.57 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum in profile: 5 percent
Salinity, maximum in profile: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water storage in profile: High (about 9.7 inches)

Interpretive groups

APPENDIX E USFWS Standardized Recommendations for Protection of the Endangered San Joaquin Kit Fox Prior to or During Ground Disturbance

CITY OF PORTERVILLE

BUTTERFIELD STAGE CORRIDOR PROJECT

U.S. FISH AND WILDLIFE SERVICE STANDARDIZED RECOMMENDATIONS FOR PROTECTION OF THE ENDANGERED SAN JOAQUIN KIT FOX PRIOR TO OR DURING GROUND DISTURBANCE

Prepared by the Sacramento Fish and Wildlife Office
January 2011

INTRODUCTION

The following document includes many of the San Joaquin kit fox (*Vulpes macrotis mutica*) protection measures typically recommended by the U. S. Fish and Wildlife Service (Service), prior to and during ground disturbance activities. **However, incorporating relevant sections of these guidelines into the proposed project is not the only action required under the Endangered Species Act of 1973, as amended (Act) and does not preclude the need for section 7 consultation or a section 10 incidental take permit for the proposed project.** Project applicants should contact the Service in Sacramento to determine the full range of requirements that apply to your project; the address and telephone number are given at the end of this document. Implementation of the measures presented in this document may be necessary to avoid violating the provisions of the Act, including the prohibition against "take" (defined as killing, harming, or harassing a listed species, including actions that damage or destroy its habitat). These protection measures may also be required under the terms of a biological opinion pursuant to section 7 of the Act resulting in incidental take authorization (authorization), or an incidental take permit (permit) pursuant to section 10 of the Act. The specific measures implemented to protect kit fox for any given project shall be determined by the Service based upon the applicant's consultation with the Service.

The purpose of this document is to make information on kit fox protection strategies readily available and to help standardize the methods and definitions currently employed to achieve kit fox protection. The measures outlined in this document are subject to modification or revision at the discretion of the Service.

IS A PERMIT NECESSARY?

Certain acts need a permit from the Service which includes destruction of any known (occupied or unoccupied) or natal/pupping kit fox dens. Determination of the presence or absence of kit foxes and /or their dens should be made during the environmental review process. All surveys and monitoring described in this document must be conducted by a qualified biologist and these activities do not require a permit. A qualified biologist (biologist) means any person who has completed at least four years of university training in wildlife biology or a related science and/or has demonstrated field experience in the identification and life history of the San Joaquin kit fox. In addition, the biologist(s) must be able to identify coyote, red fox,

gray fox, and kit fox tracks, and to have seen a kit fox in the wild, at a zoo, or as a museum mount. Resumes of biologists should be submitted to the Service for review and approval prior to an6y survey or monitoring work occurring.

SMALL PROJECTS

Small projects are considered to be those projects with small foot prints, of approximately one acre or less, such as an individual in-fill oil well, communication tower, or bridge repairs. These projects must stand alone and not be part of, or in any way connected to larger projects (i.e., bridge repair or improvement to serve a future urban development). The Service recommends that on these small projects, the biologist survey the proposed project boundary and a 200-foot area outside of the project footprint to identify habitat features and utilize this information as guidance to situate the project to minimize or avoid impacts. If habitat features cannot be completely avoided, then surveys should be conducted and the Service should be contacted for technical assistance to determine the extent of possible take.

Preconstruction/preactivity surveys shall be conducted no less than 14 days and no more than 30 days prior to the beginning of ground disturbance and/or construction activities or any project activity likely to impact the San Joaquin kit fox. Kit foxes change dens four or five times during the summer months, and change natal dens one or two times per month (Morrell 1972). Surveys should identify kit fox habitat features on the project site and evaluate use by kit fox and, if possible, assess the potential impacts to the kit fox by the proposed activity. The status of all dens should be determined and mapped (see Survey Protocol). Written results of preconstruction/preactivity surveys must be received by the Service within five days after survey completion and prior to the start of ground disturbance and/or construction activities.

If a natal/pupping den is discovered within the project area or within 200-feet of the project boundary, the Service shall be immediately notified and under no circumstances should the den be disturbed or destroyed without prior authorization. If the preconstruction/preactivity survey reveals an active natal pupping or new information, the project applicant should contact the Service immediately to obtain the necessary take authorization/permit.

If the take authorization/permit has already been issued, then the biologist may proceed with den destruction within the project boundary, except natal/pupping den which may not be destroyed while occupied. A take authorization/permit is required to destroy these dens even after they are vacated. Protective exclusion zones can be placed around all known and potential dens which occur outside the project footprint (conversely, the project boundary can be demarcated, see den destruction section).

OTHER PROJECTS

It is likely that all other projects occurring within kit fox habitat will require a take authorization/permit from the Service. This determination would be made by the Service during the early evaluation process (see Survey Protocol). These other projects would include, but are not limited to: Linear projects; projects with large footprints such as urban development; and projects which in themselves may be small but have far reaching impacts (i.e., water storage or conveyance facilities that promote urban growth or agriculture, etc.).

The take authorization/permit issued by the Service may incorporate some or all of the protection measures presented in this document. The take authorization/permit may include measures specific to the needs of the project and those requirements supersede any requirements found in this document.

EXCLUSION ZONES

In order to avoid impacts, construction activities must avoid their dens. The configuration of exclusion zones around the kit fox dens should have a radius measured outward from the entrance or cluster of entrances due to the length of dens underground. The following distances are **minimums**, and if they cannot be followed the Service must be contacted. Adult and pup kit foxes are known to sometimes rest and play near the den entrance in the afternoon, but most above-ground activities begin near sunset and continue sporadically throughout the night. Den definitions are attached as Exhibit A.

Potential den**	50 feet
Atypical den**	50 feet
Known den*	100 feet
Natal/pupping den (occupied and unoccupied)	Service must be contacted

*Known den: To ensure protection, the exclusion zone should be demarcated by fencing that encircles each den at the appropriate distance and does not prevent access to the den by kit foxes. Acceptable fencing includes untreated wood particle-board, silt fencing, orange construction fencing or other fencing as approved by the Service as long as it has openings for kit fox ingress/egress and keeps humans and equipment out. Exclusion zone fencing should be maintained until all construction related or operational disturbances have been terminated. At that time, all fencing shall be removed to avoid attracting subsequent attention to the dens.

**Potential and Atypical dens: Placement of 4-5 flagged stakes 50 feet from the den entrance(s) will suffice to identify the den location; fencing will not be required, but the exclusion zone must be observed.

Only essential vehicle operation on existing roads and foot traffic should be permitted. Otherwise, all construction, vehicle operation, material storage, or any other type of surface-disturbing activity should be prohibited or greatly restricted within the exclusion zones.

DESTRUCTION OF DENS

Limited destruction of kit fox dens may be allowed, if avoidance is not a reasonable alternative, provided the following procedures are observed. The value to kit foxes of potential, known, and natal/pupping dens differ and therefore, each den type needs a different level of protection. **Destruction of any known or natal/pupping kit fox den requires take authorization/permit from the Service**.

Destruction of the den should be accomplished by careful excavation until it is certain that no kit foxes are inside. The den should be fully excavated, filled with dirt and compacted to ensure that kit foxes cannot reenter or use the den during the construction period. If at any point during excavation, a kit fox is discovered inside the den, the excavation activity shall cease immediately and monitoring of the den as described above should be resumed. Destruction of the den may be completed when in the judgment of the biologist, the animal has escaped, without further disturbance, from the partially destroyed den.

Natal/pupping dens: Natal or pupping dens which are occupied will not be destroyed until the pups and adults have vacated and then only after consultation with the Service. Therefore, project activities at some den sites may have to be postponed.

Known Dens: Known dens occurring within the footprint of the activity must be monitored for three days with tracking medium or an infra-red beam camera to determine the current use. If no kit fox activity is observed during this period, the den should be destroyed immediately to preclude subsequent use.

If kit fox activity is observed at the den during this period, the den should be monitored for at least five consecutive days from the time of the observation to allow any resident animal to move to another den during its normal activity. Use of the den can be discouraged during this period by partially plugging its entrances(s) with soil in such a manner that any resident animal can escape easily. Only when the den is determined to be unoccupied may the den be excavated under the direction of the biologist. If the animal is still present after five or more consecutive days of plugging and monitoring, the den may have to be excavated when, in the judgment of a biologist, it is temporarily vacant, for example during the animal's normal foraging activities.

The Service encourages hand excavation, but realizes that soil conditions may necessitate the use of excavating equipment. However, extreme caution must be exercised.

Potential Dens: If a take authorization/permit has been obtained from the Service, den destruction may proceed without monitoring, unless other restrictions were issued with the take authorization/permit. If no take authorization/permit has been issued, then potential dens should be monitored as if they were known dens. If any den was considered to be a potential den, but is later determined during monitoring or destruction to be currently, or previously used by kit fox (e.g., if kit fox sign is found inside), then all construction activities shall cease and the Service shall be notified immediately.

CONSTRUCTION AND ON-GOING OPERATIONAL REQUIREMENTS

Habitat subject to permanent and temporary construction disturbances and other types of ongoing project-related disturbance activities should be minimized by adhering to the following activities. Project designs should limit or cluster permanent project features to the smallest area possible while still permitting achievement of project goals. To minimize temporary disturbances, all project-related vehicle traffic should be restricted to established roads, construction areas, and other designated areas. These areas should also be included in preconstruction surveys and, to the extent possible, should be established in locations disturbed by previous activities to prevent further impacts.

1. Project-related vehicles should observe a daytime speed limit of 20-mph throughout the site in all project areas, except on county roads and State and Federal highways; this is particularly important at night when kit foxes are most active. Night-time construction should be minimized to the extent possible. However if it does occur, then the speed limit should be reduced to 10-mph. Off-road traffic outside of designated project areas should be prohibited.

2. To prevent inadvertent entrapment of kit foxes or other animals during the construction phase of a project, all excavated, steep-walled holes or trenches more than 2-feet deep should be covered at the close of each working day by plywood or similar materials. If the trenches cannot be closed, one or more escape ramps constructed of earthen-fill or wooden planks shall be installed. Before such holes or trenches are filled, they should be thoroughly inspected for trapped animals. If at any time a trapped or injured kit fox is discovered, the Service and the California Department of Fish and Game (CDFG) shall be contacted as noted under measure 13 referenced below.

3. Kit foxes are attracted to den-like structures such as pipes and may enter stored pipes and become trapped or injured. All construction pipes, culverts, or similar structures with a diameter of 4-inches or greater that are stored at a construction site for one or more overnight periods should be thoroughly inspected for kit foxes before the pipe is subsequently buried, capped, or otherwise used or moved in any way. If a kit fox is

discovered inside a pipe, that section of pipe should not be moved until the Service has been consulted. If necessary, and under the direct supervision of the biologist, the pipe may be moved only once to remove it from the path of construction activity, until the fox has escaped.

4. All food-related trash items such as wrappers, cans, bottles, and food scraps should be disposed of in securely closed containers and removed at least once a week from a construction or project site.

5. No firearms shall be allowed on the project site.

6. No pets, such as dogs or cats, should be permitted on the project site to prevent harassment, mortality of kit foxes, or destruction of dens.

7. Use of rodenticides and herbicides in project areas should be restricted. This is necessary to prevent primary or secondary poisoning of kit foxes and the depletion of prey populations on which they depend. All uses of such compounds should observe label and other restrictions mandated by the U.S. Environmental Protection Agency, California Department of Food and Agriculture, and other State and Federal legislation, as well as additional project-related restrictions deemed necessary by the Service. If rodent control must be conducted, zinc phosphide should be used because of a proven lower risk to kit fox.

8. A representative shall be appointed by the project proponent who will be the contact source for any employee or contractor who might inadvertently kill or injure a kit fox or who finds a dead, injured or entrapped kit fox. The representative will be identified during the employee education program and their name and telephone number shall be provided to the Service.

9. An employee education program should be conducted for any project that has anticipated impacts to kit fox or other endangered species. The program should consist of a brief presentation by persons knowledgeable in kit fox biology and legislative protection to explain endangered species concerns to contractors, their employees, and military and/or agency personnel involved in the project. The program should include the following: A description of the San Joaquin kit fox and its habitat needs; a report of the occurrence of kit fox in the project area; an explanation of the status of the species and its protection under the Endangered Species Act; and a list of measures being taken to reduce impacts to the species during project construction and implementation. A fact sheet conveying this information should be prepared for distribution to the previously referenced people and anyone else who may enter the project site.

10. Upon completion of the project, all areas subject to temporary ground disturbances, including storage and staging areas, temporary roads, pipeline corridors, etc. should be

re-contoured if necessary, and revegetated to promote restoration of the area to pre-project conditions. An area subject to "temporary" disturbance means any area that is disturbed during the project, but after project completion will not be subject to further disturbance and has the potential to be revegetated. Appropriate methods and plant species used to revegetate such areas should be determined on a site-specific basis in consultation with the Service, California Department of Fish and Game (CDFG), and revegetation experts.

11. In the case of trapped animals, escape ramps or structures should be installed immediately to allow the animal(s) to escape, or the Service should be contacted for guidance.

12. Any contractor, employee, or military or agency personnel who are responsible for inadvertently killing or injuring a San Joaquin kit fox shall immediately report the incident to their representative. This representative shall contact the CDFG immediately in the case of a dead, injured or entrapped kit fox. The CDFG contact for immediate assistance is State Dispatch at (916)445-0045. They will contact the local warden or Mr. Paul Hoffman, the wildlife biologist, at (530)934-9309. The Service should be contacted at the numbers below.

13. The Sacramento Fish and Wildlife Office and CDFG shall be notified in writing within three working days of the accidental death or injury to a San Joaquin kit fox during project related activities. Notification must include the date, time, and location of the incident or of the finding of a dead or injured animal and any other pertinent information. The Service contact is the Chief of the Division of Endangered Species, at the addresses and telephone numbers below. The CDFG contact is Mr. Paul Hoffman at 1701 Nimbus Road, Suite A, Rancho Cordova, California 95670, (530) 934-9309.

14. New sightings of kit fox shall be reported to the California Natural Diversity Database (CNDDB). A copy of the reporting form and a topographic map clearly marked with the location of where the kit fox was observed should also be provided to the Service at the address below.

Any project-related information required by the Service or questions concerning the above conditions or their implementation may be directed in writing to the U.S. Fish and Wildlife Service at:

Endangered Species Division
2800 Cottage Way, Suite W2605
Sacramento, California 95825-1846
(916) 414-6620 or (916) 414-6600

EXHIBIT "A" - DEFINITIONS

"Take" - Section 9 of the Endangered Species Act of 1973, as amended (Act) prohibits the "take" of any federally listed endangered species by any person (an individual, corporation, partnership, trust, association, etc.) subject to the jurisdiction of the United States. As defined in the Act, take means " . . . to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct". Thus, not only is a listed animal protected from activities such as hunting, but also from actions that damage or destroy its habitat.

"Dens" - San Joaquin kit fox dens may be located in areas of low, moderate, or steep topography. Den characteristics are listed below, however, the specific characteristics of individual dens may vary and occupied dens may lack some or all of these features. Therefore, caution must be exercised in determining the status of any den. Typical dens may include the following: (1) one or more entrances that are approximately 5 to 8 inches in diameter; (2) dirt berms adjacent to the entrances; (3) kit fox tracks, scat, or prey remains in the vicinity of the den; (4) matted vegetation adjacent to the den entrances; and (5) manmade features such as culverts, pipes, and canal banks.

"Known den" - Any existing natural den or manmade structure that is used or has been used at any time in the past by a San Joaquin kit fox. Evidence of use may include historical records, past or current radiotelemetry or spotlighting data, kit fox sign such as tracks, scat, and/or prey remains, or other reasonable proof that a given den is being or has been used by a kit fox. The Service discourages use of the terms "active" and "inactive" when referring to any kit fox den because a great percentage of occupied dens show no evidence of use, and because kit foxes change dens often, with the result that the status of a given den may change frequently and abruptly.

"Potential Den" - Any subterranean hole within the species' range that has entrances of appropriate dimensions for which available evidence is insufficient to conclude that it is being used or has been used by a kit fox. Potential dens shall include the following: (1) any suitable subterranean hole; or (2) any den or burrow of another species (e.g., coyote, badger, red fox, or ground squirrel) that otherwise has appropriate characteristics for kit fox use.

"Natal or Pupping Den" - Any den used by kit foxes to whelp and/or rear their pups. Natal/pupping dens may be larger with more numerous entrances than dens occupied exclusively by adults. These dens typically have more kit fox tracks, scat, and prey remains in the vicinity of the den, and may have a broader apron of matted dirt and/or vegetation at one or more entrances. A natal den, defined as a den in which kit fox pups are actually whelped but not necessarily reared, is a more restrictive version of the pupping den. In practice, however, it is difficult to distinguish between the two, therefore, for purposes of this definition either term applies.

"Atypical Den" - Any manmade structure which has been or is being occupied by a San Joaquin kit fox. Atypical dens may include pipes, culverts, and diggings beneath concrete slabs and buildings.

APPENDIX F NOAA EFH MAPPER DATA

CITY OF PORTERVILLE

BUTTERFIELD STAGE CORRIDOR PROJECT

EFH Data Notice: Essential Fish Habitat (EFH) is defined by textual descriptions contained in the fishery management plans developed by the regional Fishery Management Councils. In most cases mapping data can not fully represent the complexity of the habitats that make up EFH. This report should be used for general interest queries only and should not be interpreted as a definitive evaluation of EFH at this location. A location-specific evaluation of EFH for any official purposes must be performed by a regional expert. Please refer to the following links for the appropriate regional resources.

MANAGEMENT SUMMARY

An intensive Class III cultural resources inventory/Phase I survey was conducted for the Butterfield Corridor Project (Project), Porterville, Tulare County, California. ASM Affiliates, Inc., conducted this study, with David S. Whitley, Ph.D., RPA, serving as principal investigator. The study was undertaken to assist with compliance with Section 106 of the National Historic Preservation Act of 1966, as amended, and the California Environmental Quality Act. The Project area consists of 9.1 linear miles following the former Union Pacific Railroad right-of-way (ROW) with a 45-foot (ft) buffer along either side of the route. The horizontal area of potential effect (APE) for the Project consists of the 90-foot wide, 9.1-mile (mi) long corridor, totaling approximately 110-acres (ac).

A records search of site files and maps was conducted at the Southern San Joaquin Valley Archaeological Information Center, California State University, Bakersfield. A Sacred Lands File Request was also submitted to the Native American Heritage Commission (NAHC). The records search indicated that 18 previous reports had covered portions of the APE, and that 8 previously recorded resources or historical districts were known to exist within the it. The Sacred Lands File Request indicated that no tribal cultural resources were known to exist within APE. No tribal cultural resources were identified as a result of outreach letters sent to tribal organizations on the NAHC contact list.

The Class III inventory/Phase I survey fieldwork was conducted in May 2020 with parallel transects spaced at 15-meter (m) intervals walked along the approximately 110-ac APE. Five previously recorded resources were identified and their site records updated during the survey. The APE also crosses three historic districts within Porterville; however, no district elements were within the APE. Two resources consist of segments of ditches (P-54-002208/Poplar Ditch and P-54-004354/Pioneer Ditch [destroyed and no longer present within Project APE]), a segment of the Friant-Kern Canal (P-54-004614), remnants of the Tule River Bridge (P-54-002205), and a segment of the Southern Pacific Railroad (P-54-004626) which runs the length of the Project APE. No previously unidentified cultural resources were recorded during the survey.

Three of the previously recorded cultural resources within the Project APE have been demolished, therefore lack integrity, and are not significant or eligible for listing in the National Register of Historic Places (NRHP) or California Register of Historical Resources (CRHR). The proposed Butterfield Corridor will cross over and not impact or effect the other two previously recorded resources (segments of the Friant-Kern Canal and the Poplar Ditch). Based on these results, the Butterfield Corridor Project does not have the potential to result in significant impacts or adverse effects to historical resources or historic properties, a determination of no historic properties affected is recommended.

Page is intentionally blank

1. INTRODUCTION AND REGULATORY CONTEXT

ASM Affiliates, Inc., was retained by the Provost and Pritchard Consulting Group to conduct an intensive Class III inventory/Phase I cultural resources survey for the Butterfield Corridor Project, located in Porterville, Tulare County, California (Figures 1a-e). The study was undertaken to assist with compliance with Section 106 of the National Historic Preservation Act (NHPA) of 1966, as amended, and the California Environmental Protection Act (CEQA). The investigation was conducted, specifically, to ensure that significant impacts or adverse effects to historical resources or historic properties do not occur as a result of project construction.

This current study included:

- A background records search and literature review to determine if any known cultural resources were present in the project zone and/or whether the area had been previously and systematically studied by archaeologists;
- An on-foot, intensive inventory of the study area to identify and record previously undiscovered cultural resources and to examine known sites; and
- A preliminary assessment of any such resources found within the subject property.

David S. Whitley, Ph.D., RPA, served as principal investigator and ASM Associate Archaeologist Robert Azpitarte, B.A., and ASM Assistant Archaeologist Stacey Escamilla, B.A., conducted the fieldwork.

This document constitutes a report on the Class III inventory/Phase I survey. Subsequent chapters provide background to the investigation, including historic context studies; the findings of the archival records search; Native American outreach; a summary of the field surveying techniques employed; and the results of the fieldwork. We conclude with management recommendations for the Project area.

1.1 PROJECT LOCATION

The Project is located within, and in the vicinity of, Porterville, Tulare County, California. The Project area extends for 9.1 linear miles along the former Union Pacific Railroad ROW between Frazier Highway (Avenue 196) in Strathmore on the north and Tea Pot Dome Avenue (Avenue 128) on the south and crosses numerous sections and Townships and Ranges (Table 1). The Project area generally follows Main Street through Porterville, crossing numerous streets and passing through both residential and industrial areas. Between Porterville and Strathmore to the north, the Project area generally parallels Orange Belt Drive and passes through agricultural land and light residential areas, including the community of Zante approximately 3.5-mi north-northwest of Porterville.

This places the Project area on the open flats of the San Joaquin Valley. Elevation within the project area, which is essentially flat, ranges from approximately 400-ft above mean sea level (amsl) at the north end at Strathmore, to 480-ft asml at the south end near Tea Pot Dome Avenue.

Table 1. Townships/Ranges/Sections for the Project

Township:	Sections:
T20S/R27E	33
T21S/R27E	3, 4, 10, 14, 15, 23, 26, 35, and 36
T22S/R27E	1, 2, and 11

1.2 PROJECT DESCRIPTION AND APE

The proposed project consists of the development of a multi-modal corridor which will include a Class 1 multi-use path, complete with solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. The Area of Potential Effect (APE) will include all construction, staging, and lay-down areas for the Project. The horizontal APE consists of the 9.1-mi segment of the former Union Pacific Railroad ROW with a 45-ft buffer on either side, creating a total area of 110-ac. The vertical APE, estimated at 5-feet, is the maximum depth of excavation for foundations, footings and underground utilities.

1.3 REGULATORY CONTEXT

1.3.1 CEQA

CEQA is applicable to discretionary actions by state or local lead agencies. Under CEQA, lead agencies must analyze impacts to cultural resources. Significant impacts under CEQA occur when "historically significant" or "unique" cultural resources are adversely affected, which occurs when such resources could be altered or destroyed through project implementation. Historically significant cultural resources are defined by eligibility for or by listing in the California Register of Historical Resources (CRHR). In practice, the federal NRHP criteria (below) for significance applied under Section 106 are generally (although not entirely) consistent with CRHR criteria (see PRC § 5024.1, Title 14 CCR, Section 4852 and § 15064.5(a)(3)).

Significant cultural resources are those archaeological resources and historical properties that:

(A) Are associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;

(B) Are associated with the lives of persons important in our past;

(C) Embody the distinctive characteristics of a type, period, region, or method of construction, or represent the work of an important creative individual, or possess high artistic values; or

(D) Have yielded, or may be likely to yield, information important in prehistory or history.

Unique resources under CEQA, in slight contrast, are those that represent:

> An archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

(1) Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.

(2) Has a special and particular quality such as being the oldest of its type or the best available example of its type.

(3) Is directly associated with a scientifically recognized important prehistoric or historic event or person (PRC § 21083.2(g)).

Preservation in place is the preferred approach under CEQA to mitigating adverse impacts to significant or unique cultural resources.

1.3.2 NHPA Section 106

NHPA Section 106 is applicable to federal undertakings, including projects financed or permitted by federal agencies regardless of whether the activities occur on federally managed or privately-owned land. Its purpose is to determine whether adverse effects will occur to significant cultural resources, defined as "historical properties" that are listed in or determined eligible for listing in the National Register of Historic Places (NRHP). The criteria for NRHP eligibility are defined at 36 CFR § 60.4 as follows:

> The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and that:
>
> (A) are associated with events that have made a significant contribution to the broad patterns of our history; or
>
> (B) are associated with the lives of persons significant in our past; or
>
> (C) embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
>
> (D) have yielded or may be likely to yield, information important in prehistory or history.

There are, however, restrictions on the kinds of historical properties that can be NRHP listed. These have been identified by the Advisory Council on Historic Preservation (ACHP), as follows:

> Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. However, such properties will qualify if they are integral parts of districts that do meet the criteria or if they fall within the following categories:

(a) A religious property deriving primary significance from architectural or artistic distinction or historical importance; or

(b) A building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or

(c) A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building directly associated with his productive life.

(d) A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or

(e) A reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; or

(f) A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own exceptional significance; or

(g) A property achieving significance within the past 50 years if it is of exceptional importance. (A.C.H.P. n.d.)

2. ENVIRONMENTAL AND CULTURAL BACKGROUND

2.1 ENVIRONMENTAL BACKGROUND AND GEOARCHAEOLOGICAL SENSITIVITY

As noted above, the APE is located at between about 400-ft and 480-ft elevation on the open flats of the San Joaquin Valley. The APE crosses the Tule River, which is now perennial only above Porterville, with seasonal flow occurring in drainages below that point. A series of large promontories, including Scenic Heights, are located a short distance east of the Project APE to the north of Porterville. The largest promontory, just north of Scenic Heights, rises to 1,140-ft amsl.

Prior to the appearance of agriculture, starting in the nineteenth century, this location would have been prairie grasslands, grading into tree savannas in the foothills to the east (Preston 1981). Historically, and likely prehistorically, riparian environments would have been present along the drainages, waterways and marshes. The study area and immediate surroundings have been farmed and grazed for many years, and in certain areas have been urbanized, and no native vegetation is present. Perennial bunchgrasses such as purple needlegrass and nodding needlegrass most likely would have been the dominant plant cover in the study area prior to cultivation.

The APE falls almost entirely on the Tule River Fan. According to the geoarchaeological model developed by Meyer et al. (2010), the Project APE through Porterville has low to very high potential for buried archaeological deposits. The Project APE outside of Porterville to the north and south has a very low potential for buried archaeological deposits. Despite the potential suggested by Meyer et al. (2010), buried sites and cultural resources are considered to be unlikely within the Project APE given the disturbed nature of the area and the location of the APE on an existing rail grade.

2.2 ETHNOGRAPHIC BACKGROUND

Penutian-speaking Yokuts tribal groups occupied the southern San Joaquin Valley region and much of the nearby Sierra Nevada. Ethnographic information about the Yokuts was collected primarily by Powers (1971, 1976 [originally 1877]), Kroeber (1925), Gayton (1930, 1948), Driver (1937), Latta (1977) and Harrington (n.d.). For a variety of historical reasons, existing research information emphasizes the central Yokuts tribes who occupied both the valley and particularly the foothills of the Sierra. The northernmost tribes suffered from the influx of Euro-Americans during the Gold Rush and their populations were in substantial decline by the time ethnographic studies began in the early twentieth century. In contrast, the southernmost tribes were partially removed by the Spanish to missions and eventually absorbed into multi-tribal communities on the Sebastian Indian Reservation (on Tejon Ranch), and later the Tule River Reservation and Santa Rosa Rancheria to the north. The result is an unfortunate scarcity of ethnographic detail on southern Valley tribes, especially in relation to the rich information collected from the central foothills tribes where native speakers of the Yokuts dialects are still found. Regardless, the general details of indigenous life-ways were similar across the broad expanse of Yokuts territory,

particularly in terms of environmentally influenced subsistence and adaptation and with regard to religion and belief, which were similar everywhere.

Following Kroeber (1925: Plate 47), the study area most likely lies in Koyete Yokuts territory. The principal historic village for this group was *Chokowisho,* located on the north bank of the Tule River, a short distance east of Porterville (Kroeber 1925: Plate 47; Latta1977:195). No historic villages are recorded for the immediate project area, per se, by Kroeber (1925) or by Latta (1977), however.

The Yokuts settlement pattern was largely consistent, regardless of specific tribe involved. Winter villages were typically located along lakeshores and major stream courses (as these existed circa AD 1800), with dispersal phase family camps located at elevated spots on the valley floor and near gathering areas in the foothills.

Most Yokuts groups, again regardless of specific tribal affiliation, were organized as a recognized and distinct tribelet; a circumstance that almost certainly pertained to the tribal groups noted above. Tribelets were land-owning groups organized around a central village and linked by shared territory and descent from a common ancestor. The population of most tribelets ranged from about 150 to 500 peoples (Kroeber 1925).

Each tribelet was headed by a chief who was assisted by a variety of assistants, the most important of whom was the *winatum*, a herald or messenger and assistant chief. A shaman also served as religious officer. While shamans did not have any direct political authority, as Gayton (1930) has illustrated, they maintained substantial influence within their tribelet.

Shamanism is a religious system common to most Native American tribes. It involves a direct and personal relationship between the individual and the supernatural world enacted by entering a trance or hallucinatory state (usually based on the ingestion of psychotropic plants, such as jimsonweed or more typically native tobacco). Shamans were considered individuals with an unusual degree of supernatural power, serving as healers or curers, diviners, and controllers of natural phenomena (such as rain or thunder). Shamans also produced the rock art of this region, depicting the visions they experienced in vision quests believed to represent their spirit helpers and events in the supernatural realm (Whitley 1992, 2000).

The centrality of shamanism to the religious and spiritual life of the Yokuts was demonstrated by the role of shamans in the yearly ceremonial round. The ritual round, performed the same each year, started in the spring with the jimsonweed ceremony, followed by rattlesnake dance and (where appropriate) first salmon ceremony. After returning from seed camps, fall rituals began in the late summer with the mourning ceremony, followed by first seed and acorn rites and then bear dance (Gayton 1930:379). In each case, shamans served as ceremonial officials responsible for specific dances involving a display of their supernatural powers (Kroeber 1925).

Subsistence practices varied from tribelet to tribelet based on the environment of residence. Throughout Native California, and Yokuts territory in general, the acorn was a primary dietary component, along with a variety of gathered seeds. Valley tribes augmented this resource with lacustrine and riverine foods, especially fish and wildfowl. As with many Native California tribes,

the settlement and subsistence rounds included the winter aggregation into a few large villages, where stored resources (like acorns) served as staples, followed by dispersal into smaller camps, often occupied by extended families, where seasonally available resources would be gathered and consumed.

Although population estimates vary and population size was greatly affected by the introduction of Euro-American diseases and social disruption, the Yokuts were one of the largest, most successful groups in Native California. Cook (1978) estimates that the Yokuts region contained 27 percent of the aboriginal population in the state at the time of contact; other estimates are even higher. Many Yokuts people continue to reside in the southern San Joaquin Valley today.

2.3 PRE-CONTACT ARCHAEOLOGICAL BACKGROUND

The southern San Joaquin Valley region has received minimal archaeological attention compared to other areas of the state. In part, this is because the majority of California archaeological work has concentrated in the Sacramento Delta, Santa Barbara Channel, and central Mojave Desert areas (see Moratto 1984). Although knowledge of the region's prehistory is limited, enough is known to determine that the archaeological record is broadly similar to south-central California as a whole (see Gifford and Schenk 1926; Hewes 1941; Wedel 1941; Fenenga 1952; Elsasser 1962; Fredrickson and Grossman 1977; Schiffman and Garfinkel 1981). Based on these sources, the general prehistory of the region can be outlined as follows.

Initial occupation of the region occurred at least as early as the *Paleoindian Period*, or prior to about 10,000 years before present (YBP). Evidence of early use of the region is indicated by characteristic fluted and stemmed points found around the margin of Tulare Lake, in the foothills of the Sierra, and in the Mojave Desert proper.

Both fluted and stemmed points are particularly common around lake margins, suggesting a terminal Pleistocene/early Holocene lakeshore adaptation similar to that found throughout the far west at the same time; little else is known about these earliest peoples. Over 250 fluted points have been recovered from the Witt Site (CA-KIN-32), located along the western shoreline of ancient Tulare Lake northwest of the study area, demonstrating the importance of this early occupation in the San Joaquin Valley specifically (see Fenenga 1993). Additional finds consist of a Clovis-like projectile point discovered in a flash-flood cut-bank near White Oak Lodge in 1953 on Tejon Ranch (Glennan 1987a, 1987b). More recently, a similar fluted point was found near Bakersfield (Zimmerman et al. 1989), and a number are known from the Edwards Air Force Base and Boron area of the western Mojave Desert. Although human occupation of the state is well-established during the Late Pleistocene, relatively little can be inferred about the nature and distribution of this occupation with a few exceptions. First, little evidence exists to support the idea that people at that time were big-game hunters, similar to those found on the Great Plains. Second, the western Mojave Desert evidence suggests small, very mobile populations that left a minimal archaeological signature. The evidence from the ancient Tulare Lake shore, in contrast, suggests much more substantial population and settlements which, instead of relying on big game hunting, were tied to the lacustrine lake edge. Variability in subsistence and settlement patterns is thus apparent in California, in contrast to the Great Plains.

Substantial evidence for human occupation across California, however, first occurs during the middle Holocene, roughly 7,500 to 4,000 YBP. This period is known as the *Early Horizon*, or alternatively as the Early Millingstone along the Santa Barbara Channel. In the south, populations concentrated along the coast with minimal visible use of inland areas. Adaptation emphasized hard seeds and nuts with tool-kits dominated by mullers and grindstones (manos and metates). Additionally, little evidence for Early Horizon occupation exists in most inland portions of the state, partly due to a severe cold and dry paleoclimatic period occurring at this time, although a site deposit dating to this age has been identified along the ancient Buena Vista shoreline in Kern County to the south (Rosenthal et al. 2007). Regardless of specifics, Early Horizon population density was low with a subsistence adaptation more likely tied to plant food gathering than hunting.

Environmental conditions improved dramatically after about 4,000 YBP during the *Middle Horizon* (or Intermediate Period). This period is known climatically as the Holocene Maximum (circa 3,800 YBP) and was characterized by significantly warmer and wetter conditions than previously experienced. It was marked archaeologically by large population increase and radiation into new environments along coastal and interior south-central California and the Mojave Desert (Whitley 2000). In the Delta region to the north, this same period of favorable environmental conditions was characterized by the appearance of the Windmiller culture which exhibited a high degree of ritual elaboration (especially in burial practices) and perhaps even a rudimentary mound-building tradition (Meighan, personal communication, 1985). Along with ritual elaboration, Middle Horizon times experienced increasing subsistence specialization, perhaps correlating with the appearance of acorn processing technology. Penutian speaking peoples (including the Yokuts) are also posited to have entered the state roughly at the beginning of this period and, perhaps to have brought this technology with them (cf. Moratto 1984). Likewise, it appears the so-called "Shoshonean Wedge" in southern California, the Takic speaking groups that include the Gabrielino/Fernandeño, Tataviam and Kitanemuk, may have moved into the region at that time (Sutton 2009, rather than at about 1500 YBP as first suggested by Kroeber (1925).

Evidence for Middle Horizon occupation of interior south-central California is substantial. For example, in northern Los Angeles County along the upper Santa Clara River, to the south of the San Joaquin Valley, the Agua Dulce village complex indicates occupation extending back to the Intermediate Period, when the population of the village may have been 50 or more people (King et al n.d.). Similarly, inhabitation of the Hathaway Ranch region near Lake Piru, and the Newhall Ranch near Valencia, appears to date to the Intermediate Period (W & S Consultants 1994). To the west, little or no evidence exists for pre-Middle Horizon occupation in the upper Sisquoc and Cuyama River drainages; populations first appear there at roughly 3,500 YBP (Horne 1981). The Carrizo Plain, the valley immediately west of the San Joaquin, experienced a major population expansion during the Middle Horizon (W & S Consultants 2004; Whitley et al. 2007), and recently collected data indicates the Tehachapi Mountains region was first significantly occupied during the Middle Horizon (W & S Consultants 2006). A parallel can be drawn to the inland Ventura County region where a similar pattern has been identified (Whitley and Beaudry 1991), as well as the western Mojave Desert (Sutton 1988a, 1988b), the southern Sierra Nevada (W & S Consultants 1999), and the Coso Range region (Whitley et al. 1988). In all of these areas a major expansion in settlement, the establishment of large site complexes and an increase in the range of environments exploited appear to have occurred sometime roughly around 4,000 years ago. Although most efforts to explain this expansion have focused on local circumstances and events, it is increasingly

apparent this was a major southern California-wide occurrence and any explanation must be sought at a larger level of analysis (Whitley 2000). Additionally, evidence from the Carrizo Plain suggests the origins of the tribelet level of political organization developed during this period (W & S Consultants 2004; Whitley et al. 2007). Whether this same demographic process holds for the southern San Joaquin Valley, including the study area, is yet to be determined.

The beginning of the *Late Horizon* is set variously at 1,500 and 800 YBP, with a growing archaeological consensus for the shorter chronology. Increasing evidence suggests the importance of the Middle-Late Horizons transition (AD 800 to 1200) in the understanding of south-central California prehistory. This corresponds to the so-called Medieval Climatic Anomaly, followed by the Little Ice Age, and this general period of climatic instability extended to about A.D. 1860. It included major droughts matched by intermittent "mega-floods," and resulted in demographic disturbances across much of the west (Jones et al. 1999). It is believed to have resulted in major population decline and abandonments across south-central California, involving as much as 90% of the interior populations in some regions, including the Carrizo Plain (Whitley et al. 2007). It is not clear whether site abandonment was accompanied by a true reduction in population or an agglomeration of the same numbers of peoples into fewer but larger villages in more favorable locations. Population along the Santa Barbara coast appears to have spiked at about the same time that it collapsed on the Carrizo Plain (ibid). Along Buena Vista Lake, in Kern County, population appears to have been increasingly concentrated towards the later end of the Medieval Climatic Anomaly (Culleton 2006), and population intensification also appears to have occurred in the well-watered Tehachapi Mountains during this same period (W & S Consultants 2006).

What is then clear is that Middle Period villages and settlements were widely dispersed across the south-central California landscape, including in the Sierras and the Mojave Desert. Many of these sites are found at locations that lack existing or known historical fresh water sources. Late Horizon sites, in contrast, are typically concentrated in areas where fresh water was available during the historical period, if not currently.

One extensively studied site that shows evidence of intensive occupation during the Middle-Late Horizons transition (~1,500 – 500 YBP) is the Redtfeldt Mound (CA-KIN-66/H), located northwest of the current study area, near the north shore of ancient Tulare Lake. There, Siefkin (1999) reported on human burials and a host of artifacts and ecofacts excavated from a modest-sized mound. He found that both Middle Horizon and Middle-Late Horizons transition occupations were more intensive than Late Horizon occupations, which were sporadic and less intensive (Siefkin 1999:110-111).

The Late Horizon can then be understood as a period of recovery from a major demographic collapse. One result is the development of regional archaeological cultures as the precursors to ethnographic Native California; suggesting that ethnographic life-ways recorded by anthropologists extend roughly 800 years into the past.

The position of southern San Joaquin Valley prehistory relative to patterns seen in surrounding areas is still somewhat unknown. The presence of large lake systems in the valley bottoms appears to have mediated some of the desiccation seen elsewhere. But, as the reconstruction of Soda Lake in the nearby Carrizo Plain demonstrates (see Whitley et al. 2007) environmental perturbations

had serious impacts on lake systems too. Identifying certain of the prehistoric demographic trends for the southern San Joaquin Valley, and determining how these trends (if present) correlate with those seen elsewhere, is a current important research objective.

2.4 HISTORICAL BACKGROUND

Spanish explorers first visited the San Joaquin Valley in 1772, but its lengthy distance from the missions and presidios along the Pacific Coast delayed permanent settlement for many years, including during the Mexican period of control over the Californian region. In the 1840s, Mexican rancho owners along the Pacific Coast allowed their cattle to wander and graze in the San Joaquin Valley (JRP Historical Consulting 2009). The Mexican government granted the first ranchos in the southern part of the San Joaquin Valley in the early 1840s, but these did not result in permanent settlement. It was not until the annexation of California in 1848 that the exploitation of the southern San Joaquin Valley began (Pacific Legacy 2006).

The discovery of gold in northern California in 1848 resulted in a dramatic increase of population, consisting in good part of fortune seekers and gold miners, who began to scour other parts of the state. After 1851, when gold was discovered in the Sierra Nevada Mountains in eastern Kern County, the population of the area grew rapidly. Some new immigrants began ranching in the San Joaquin Valley to supply the miners and mining towns. Ranchers grazed cattle and sheep, and farmers dry-farmed or used limited irrigation to grow grain crops, leading to the creation of small agricultural communities throughout the valley (JRP Historical Consulting 2009).

After the American annexation of California, the southern San Joaquin Valley became significant as a center of food production for this new influx of people in California. The expansive unfenced and principally public foothill spaces were well suited for grazing both sheep and cattle (Boyd 1997). As the Sierra Nevada gold rush presented extensive financial opportunities, ranchers introduced new breeds of livestock, consisting of cattle, sheep and pig (Boyd 1997).

With the increase of ranching in the southern San Joaquin came the dramatic change in the landscape, as non-native grasses more beneficial for grazing and pasture replaced native flora (Preston 1981). After the passing of the Arkansas Act in 1850, efforts were made to reclaim small tracts of land in order to create more usable spaces for ranching. Eventually, as farming supplanted ranching as a more profitable enterprise, large tracts of land began to be reclaimed for agricultural use, aided in part by the extension of the railroad in the 1870s (Pacific Legacy 2006).

Following the passage of state-wide ‘No-Fence’ laws in 1874, ranching practices began to decline, while farming expanded in the San Joaquin Valley in both large land holdings and smaller, subdivided properties. As the farming population grew, so did the demand for irrigation. Settlers began reclamation of swampland in 1866 and built small dams across the Kern River to divert water into the fields. By 1880, 86 different groups were taking water from the Kern River. Ten years later, 15 major canals provided water to thousands of acres in Kern County.

During the period of reclaiming unproductive land in the southern San Joaquin Valley, grants were given to individuals who had both the resources and the finances to undertake the operation alone. One small agricultural settlement, founded by Colonel Thomas Baker in 1861 after procuring one

such grant, took advantage of reclaimed swampland along the Kern River. This settlement became the City of Bakersfield in 1869, and quickly became the center of activity in the southern San Joaquin Valley, and in the newly formed Kern County. Located on the main stage road through the San Joaquin Valley, the town became a primary market and transportation hub for stock and crops, as well as a popular stopping point for travelers on the Los Angeles and Stockton Road. The Southern Pacific Railroad reached the Bakersfield area in 1873, connecting it with important market towns elsewhere in the state, dramatically impacting both agriculture and oil production (Pacific Legacy 2006).

Three competing partnerships developed during this period which had a great impact on control of water, land reclamation and ultimately agricultural development in the San Joaquin Valley: Livermore and Chester, Haggin and Carr, and Miller and Lux, perhaps the most famous of the enterprises. Livermore and Chester were responsible, among other things, for developing the large Hollister plow (three feet wide by two feet deep), pulled by a 40-mule team, which was used for ditch digging. Haggin and Carr were largely responsible for reclaiming the beds of the Buena Vista and Kern lakes, and for creating the Calloway Canal, which drained through the Rosedale area in Bakersfield to Goose Lake (Morgan 1914). Miller and Lux ultimately became one of the biggest private property holders in the country, controlling the rights to over 22,000 square miles. Miller and Lux's impact extended beyond Kern County, however. They recognized early-on that control of water would have important economic implications, and they played a major role in the water development of the state. They controlled, for example, over 100 miles of the San Joaquin River with the San Joaquin and Kings River Canal and Irrigation System. They were also embroiled for many years in litigation against Haggin and Carr over control of the water rights to the Kern River. Descendants of Henry Miller continue to play a major role in California water rights, with his great grandson, George Nickel, Jr., the first to develop the concept of water banking, thus creating a system to buy and sell water (http://exiledonline.com/california-class-war-history-meet-the-oligarch-family-thats-been-scamming-taxpayers-for-150-years-and-counting/).

The San Joaquin Valley was dominated by agricultural pursuits until the oil boom of the early 1900s, which saw a shift in the region, as some reclaimed lands previously used for farming were leased to oil companies. Nonetheless, the shift of the San Joaquin Valley towards oil production did not halt the continued growth of agriculture (Pacific Legacy 2006). The Great Depression of the 1930s brought with it the arrival of great number of migrants from the drought-affected Dust Bowl region, looking for agricultural labor. These migrants established temporary camps in the valley, staying on long past the end of the drought and the Great Depression, eventually settling in towns such as Bakersfield where their descendants live today (Boyd 1997).

The town of Porterville was founded in 1854. It initially served as a stop for the Butterfield Overland Mail stage route which ran from Los Angeles to Stockton. Originally called the Tule River Station, it became known as Porterville in 1864, a name based on the middle name of Royal Porter Putnam who owned the area at the stage stop. It first saw development in the late 19th century with the extension of the Southern Pacific Railway branch line from Fresno in 1888. In 1902 the town was incorporated, the Chamber of Commerce was formed in 1907, and a charter was adopted from a City Manager-Council form of government in 1926. A USGS Porterville (1929, 1:31,680) topographic quadrangle indicates the town had developed to over half of its modern-day size

(excluding East Porterville) shortly after the adoption of the charter. The town has continued to grow due to industry and agriculture in the surrounding area (ibid.).

2.5 RESEARCH DESIGN

2.5.1 Pre-Contact Archaeology

Previous research and the nature of the pre-contact archaeological record suggest two significant NRHP themes, both of which fall under the general Pre-Contact Archaeology area of significance. These are the Expansion of Pre-Contact Populations and Their Adaptation to New Environments; and Adaptation to Changing Environmental Conditions.

The Expansion of Pre-Contact Populations and Their Adaptation to New Environments theme primarily concerns the Middle Horizon/Holocene Maximum. Its period of significance runs from about 4,000 to 1,500 YBP. It involves a period during which the prehistoric population appears to have expanded into a variety of new regions, developing new adaptive strategies in the process.

The Adaptation to Changing Environmental Conditions theme is partly related to the Holocene Maximum, but especially to the Medieval Climatic Anomaly. The period of significance for this theme, accordingly, extends from about 4,000 to 800 YBP. This theme involves the apparent collapse of many inland populations, presumably with population movements to better environments such as the coast. It is not yet known whether the southern San Joaquin Valley, with its system of lakes, sloughs and swamps, experienced population decline or, more likely, population increase due to the relatively favorable conditions of this region during this period of environmental stress.

The range of site types that are present in this region include:

- Villages, primarily located on or near permanent water sources, occupied by large groups during the winter aggregation season;
- Seasonal camps, again typically located at water sources, occupied during other parts of the year tied to locally and seasonally available food sources;
- Special activity areas, especially plant processing locations containing bedrock mortars (BRMs), commonly (though not exclusively) near existing oak woodlands, and invariably at bedrock outcrops or exposed boulders;
- Stone quarries and tool workshops, occurring in two general contexts: at or below naturally occurring chert exposures on the eastern front of the Temblor Range; and at quartzite cobble exposures, often on hills or ridges;
- Ritual sites, most commonly pictographs (rock art) found at rockshelters or large exposed boulders, and cemeteries, both commonly associated with villages; and
- A variety of small lithic scatters (low density surface scatters of stone tools).

The first requisites in any research design are the definition of site age/chronology and site function. The ability to determine either of these basic kinds of information may vary between survey and test excavation projects, and due to the nature of the sites themselves. BRM sites

without associated artifacts, for example, may not be datable beyond the assumption that they post-date the Early Horizon and are thus less than roughly 4,000 years old.

A second fundamental issue involves the place of site in the settlement system, especially with respect to water sources. Because the locations of the water sources have sometimes changed over time, villages and camps are not exclusively associated with existing (or known historical) water sources (W&S Consultants 2006). The size and locations of the region's lakes, sloughs and delta channels, to cite the most obvious example, changed significantly during the last 12,000 years due to major paleoclimatic shifts. This altered the area's hydrology and thus prehistoric settlement patterns. The western shoreline of Tulare Lake was relatively stable, because it abutted the Kettleman Hills. But the northern, southern and eastern shorelines comprised the near-flat valley floor. Relatively minor fluctuations up or down in the lake level resulted in very significant changes in the areal expression of the lake on these three sides, and therefore the locations of villages and camps. Although perhaps not as systematic, similar changes occurred with respect to stream channels and sloughs, and potential site locations associated with them. This circumstance has implications for predicting site locations and archaeological sensitivity. Site sensitivity is then hardest to predict in the open valley floor, where changes in stream courses and lake levels occurred on numerous occasions.

Nonetheless, the position of southern San Joaquin Valley prehistory relative to the changing settlement and demographic patterns seen in surrounding areas is still somewhat unknown (cf. Siefkin 1999), including to the two NRHP themes identified above. The presence of large lake systems in the valley bottoms can be expected to have mediated some of the effects of desiccation seen elsewhere. But, as the reconstruction of Soda Lake in the nearby Carrizo Plain demonstrates (see Whitley et al. 2007), environmental perturbations had serious impacts on lake systems too. Identifying certain of the prehistoric demographic trends for the southern San Joaquin Valley and determining how these trends (if present) correlate with those seen elsewhere, is another primary regional research objective.

Archaeological sites would primarily be evaluated for NRHP eligibility under Criterion D, research potential.

2.5.2 Historical Archaeology: Native American

Less research has been conducted on the regional historical archaeological record, both Native American and Euro-American. For Native American historical sites, the ethnographic and ethnohistoric periods in the southern San Joaquin Valley extended from first Euro-American contact, in AD 1772, to circa 1900, when tribal populations were first consolidated on reservations. The major significant historic NRHP themes during this period of significance involve the related topics of Historic-Aboriginal Archaeology, and Native American Ethnic Heritage. More specifically, these concern the Adaptation of the Indigenous Population to Euro-American Encroachment and Settlement, and their Acculturation to Western Society. These processes included the impact of missionization on the San Joaquin Valley (circa 1800 to about 1845); the introduction of the horse and the development of a San Joaquin Valley "horse culture," including raiding onto the coast and Los Angeles Basin (after about 1810); the use of the region as a refuge for mission neophyte escapees (after 1820); responses to epidemics from introduced diseases

(especially in the 1830s); armed resistance to Euro-American encroachment (in the 1840s and early 1850s); the origins of the reservation system and the development of new tribal organizations and ethnic identities; and, ultimately, the adoption of the Euro-American society's economic system and subsistence practices, and acculturation into that society.

Site types that have been identified in the region dating to the ethnographic/ethnohistoric period of significance primarily include villages and habitations, some of which contain cemeteries and rock art (including pictographs and cupules). Dispersed farmsteads, dating specifically from the reservation period or post-1853, would also be expected. The different social processes associated with this historical theme may be manifest in the material cultural record in terms of changing settlement patterns and village organization (from traditional nucleated villages to single family dispersed farmsteads); the breakdown of traditional trading networks with their replacement by new economic relationships; changing subsistence practices, especially the introduction of agriculture initially via escaped mission neophytes; the use of Euro-American artifacts and materials rather than traditional tools and materials; and, possibly, changing mortuary practices.

Inasmuch as culture change is a primary intellectual interest in archaeology, ethnographic villages and habitations may be NRHP eligible under Criterion D, research potential. Rock art sites, especially pictographs, may be eligible under Criterion C as examples of artistic mastery. They may also be eligible under Criterion A, association with events contributing to broad patterns of history. Ethnographic sites, further, may be NRHP eligible as Traditional Cultural Properties due to potential continued connections to tribal descendants, and their resulting importance in traditional practices and beliefs, including their significance for historical memory, tribal- and self-identity formation, and tribal education.

For Criteria A, C and D, eligibility requires site integrity (including the ability to convey historical association for Criterion A). These may include intact archaeological deposits for Criterion D, as well as setting and feel for Criteria C and A. Historical properties may lack physical integrity, as normally understood in heritage management, but still retain their significance to Native American tribes as Traditional Cultural Properties if they retain their tribal associations and uses.

2.5.3 Historical Archaeology: Euro-American

Approaches to historical Euro-American archaeological research relevant to the region have been summarized by Caltrans (1999, 2000, 2007, 2008). These concern the general topics of historical landscapes, agriculture and farming, irrigation (water conveyance systems), and mining. Caltrans has also identified an evaluation matrix aiding determinations of eligibility. The identified research issues include site structure and land-use (lay-out, land use, feature function); economics (self-sufficiency, consumer behavior, wealth indicators); technology and science (innovations, methods); ethnicity and cultural diversity (religion, race); household composition and lifeways (gender, children); and labor relations. Principles useful for determining the research potential of an individual site or feature are conceptualized in terms of the mnemonic AIMS-R, as follows:

> 1. *Association* refers to the ability to link an assemblage of artifacts, ecofacts, and other cultural remains with an individual household, an ethnic or socioeconomic group, or a specific activity or property use.

2. *Integrity* addresses the physical condition of the deposit, referring to the intact nature of the archaeological remains. In order for a feature to be most useful, it should be in much the same state as when it was deposited. However, even disturbed deposits can yield important information (e.g., a tightly dated deposit with an unequivocal association).

3. *Materials* refers to the number and variety of artifacts present. Large assemblages provide more secure interpretations as there are more datable items to determine when the deposit was made, and the collection will be more representative of the household, or activity. Likewise, the interpretive potential of a deposit is generally increased with the diversity of its contents, although the lack of diversity in certain assemblages also may signal important behavioral or consumer patterns.

4. *Stratigraphy* refers to the vertically or horizontally discrete depositional units that are distinguishable. Remains from an archaeological feature with a complex stratigraphic sequence representative of several events over time can have the added advantage of providing an independent chronological check on artifact diagnosis and the interpretation of the sequence of environmental or sociocultural events.

5. *Rarity* refers to remains linked to household types or activities that are uncommon. Because they are scarce, they may have importance even in cases where they otherwise fail to meet other thresholds of importance (Caltrans 2007:209).

For agricultural sites, Caltrans (2007) has identified six themes to guide research: Site Structure and Land Use Pattern; Economic Strategies; Ethnicity and Cultural Adaptation; Agricultural Technology and Science; Household Composition and Lifeways; and Labor History. Expected site types would include farm and ranch homesteads and facilities, line camps, and refuse dumps. In general terms, historical Euro-American archaeological sites would be evaluated for NRHP eligibility under Criterion D, research potential. However, they also potentially could be eligible under Criteria A and B for their associate values with major historical trends or individuals. Historical landscapes might also be considered.

Historical structures, which are most likely to be pertinent to the current study area, are typically evaluated for NRHP eligibility under Criteria A and/or B, for their associate values with major historical trends or individuals, and C for potential design or engineering importance.

3. ARCHIVAL RECORDS SEARCH

3.1 ARCHIVAL RECORDS SEARCH

In order to determine whether the study area had been previously surveyed for cultural resources, and/or whether any such resources were known to exist on any of them, an archival records search was conducted by the staff of the Southern San Joaquin Valley Information Center (IC) on 13 April 2020. The records search was completed to determine: (i) if prehistoric or historical archaeological sites had previously been recorded within the study areas; (ii) if the project area had been systematically surveyed by archaeologists prior to the initiation of this field study; and/or (iii) whether the region of the field project was known to contain archaeological sites and to thereby be archaeologically sensitive. Records examined included archaeological site files and maps, the NRHP, Historic Property Data File, California Inventory of Historic Resources, and the California Points of Historic Interest.

According to a records search of the Native American Heritage Commission Sacred Lands Files and the Southern San Joaquin Valley Information Center, California State University, 18 previous reports had been completed within the study area (Table 2). As a result of these studies, a total of 8 previous resources are known to exist within the study area (Table 3). An additional 29 surveys (Table 4) had been completed within 0.5-mi of the study area, resulting in the recording of 368 cultural resources within that same radius (see list in Confidential Appendix A).

Note that the IC records search states that 12 resources are within the Project APE. Four of these resources (P-53-003081, -003082, -003085, -003086) are all single-family residences that abut but actually are not within the APE. Three of the remaining eight previously recorded cultural resources listed by the IC, furthermore, are historical districts rather than individual resources, per se. The result is that only five individual cultural resources, all historical structures, fall within the Project APE.

A records search was also conducted at the Native American Heritage Commission (NAHC) Sacred Lands File (Confidential Appendix A). No sacred sites or tribal cultural resources were known in or in the vicinity of the APE. Outreach letters and follow-up emails were then sent to the tribal contact list provided by the NAHC. No concerns were expressed by any of the contacts, presumably indicating that there are no tribal concerns over the Project.

4. METHODS AND RESULTS

4.1 FIELD METHODS

An intensive Class III inventor/Phase I survey of the Butterfield Corridor Project APE was conducted by ASM Associate Archaeologist Robert Azpitarte, B.A., with assistance in the field by ASM Assistant Archaeologist Stacey Escamilla, B.A, on May 1st, 2020. The field methods employed included intensive pedestrian examination of the ground surface for evidence of archaeological sites in the form of artifacts, surface features (such as bedrock mortars, historical mining equipment), and archaeological indicators (e.g., organically enriched midden soil, burnt animal bone); the identification and location of any discovered sites, should they be present; tabulation and recording of surface diagnostic artifacts; site sketch mapping; preliminary evaluation of site integrity; and site recording, following the California Office of Historic Preservation Instructions for Recording Historic Resources, using DPR 523 forms. Parallel survey transects spaced at 15-m apart were employed for the inventory. These covered the entirety of the approximately 110-ac APE.

4.2 SURVEY RESULTS

The Project APE follows an existing rail grade and is surrounded by residential and industrial areas and agricultural fields. The APE, within a historical railroad grade that was abandoned with most of its structural features removed, is heavily disturbed, as discussed below. Vegetation (introduced grasses) varied from low to moderate in some areas along the margins of the rail grade. Transect spacing was narrowed in areas of denser vegetation to ensure appropriate coverage.

During the survey, photographs were taken of the study area (Figures 2, 3, 4, and 5). The site records for five previously recorded resources were updated during the survey. These resources consist of segments of two ditches (P-54-002208/Poplar Ditch and P-54-004354/Pioneer Ditch), a segment of the Friant-Kern Canal (P-54-004614), bridge remains of the Tule River Bridge (P-54-002205), and a segment of the Southern Pacific Railroad (P-54-004626) which runs the length of the Project APE. Site record updates are included in Confidential Appendix B. All site photographs are available in their respective DPR forms in Confidential Appendix B.

No previously unidentified cultural resources were identified within the Project APE during the survey.

Figure 3. Overview of the APE near West Henderson Avenue, looking northwest.

Figure 4. Overview of APE at West Belleview Avenue, looking northwest.

Figure 5. Overview of the APE near West Morton Avenue, looking southeast.

4.2.1 Previously Recorded Resources

P-54-002205H (Tule River Bridge)

This resource is an early 20th century Southern Pacific Railroad bridge crossing located within the southern boundaries of the City of Portville. Remnants of the bridge were identified in an area measuring approximately 279-ft (northwest-southeast) by 30-ft (northeast-southwest) by 30-ft high. The remains are situated at an elevation of 467-ft amsl. The resource is in poor condition.

The Tule River Bridge was initially recorded by the Center for Archaeological Research (CSUB) in 1996 (R.E. Parr and D. Schuldies). According to Parr and Schuldies, the bridge was constructed in 1888 to allow the then newly arrived Southern Pacific Railroad line to cross the Tule River. Initial construction involved an 832-ft long bridge consisting of "a 560-ft open deck pile trestle, an 80-ft wooden straining beam span on pile piers, and a 192-ft open deck pile trestle." The bridge was modified for the next 41 years until 1929 with the final addition of handrails and O.D. trestle. During the current survey, the bridge was found to be demolished and stripped of most components. All that remains are four pairs of reinforced concrete piers encased in riveted steel girders for support and two concrete and wood features resting on the north and south banks of the Tule River. Although there are minor remnants of it, resource P-54-002205H has effectively been demolished and removed, thus lack integrity. It is recommended as not significant or eligible for NRHP/CRHR listing.

Poplar Ditch (P-54-002208/CA-TUL-3077H)

The resource is a short segment of the late 19th century Poplar Ditch. It is located just the intersection of S Main Street and E Vandalia Avenue in Porterville, CA The segment measures approximately 95-ft (northeast-southwest) by 62-ft (northwest-southeast) by 10-ft deep and is situated at an elevation of 460-ft amsl. This segment of Poplar Ditch is in good condition.

Poplar Ditch was initially recorded by the Center for Archaeological Research (CSUB) in 1996 (R.E. Parr and D. Schuldies). Other segments of Poplar Ditch have previously been recorded in 2009 (JRP Historical Consulting, LLC) and 2016 (AECOM) (see Confidential Appendix A). The ditch was determined not eligible for NRHP listing by the consensus through the Section 106 process. It was recommended eligible for listing in the CRHR under Criterion 1, association with major historical events, by AECOM in 2016, however.

This portion of the Poplar Ditch within the APE is overlaid by a northwest-southeast trending wooden and steel trestle associated with the Southern Pacific Railroad (P-54-004626/CA-TUL-002880H). The ditch segment is similar to other recorded portions of it and is of earthen construction with gradually sloped banks. No associated artifacts were identified with the resource. Modern refuse (i.e. packaging, plastics) was noted in the vicinity. The recorded segment of the Poplar Ditch is currently in use and is in good condition. We concur with the previous eligibility evaluations of the ditch. The Project APE at this location, however, is within the trestle crossing, and the construction and use of the Project does not have the potential to result in adverse impacts or effects to this resource.

Pioneer Ditch (P-54-004354/CA-TUL-2655H)

This resource consists of multiple segments of the mid to late 19th century Pioneer Ditch, within the City of Portville. The ditch path meanders in and out of the Project APE, bisecting the survey corridor at least five times. Originally these locations would have been rail crossings over the ditch, similar to the Poplar Ditch crossing, above. The ditch segments within the APE have been abandoned, however, and all be filled in with dirt, with all evidence of the crossings removed. No artifacts were identified in association with any of the ditch segment locations. This resource no longer exists within the Project APE.

Friant-Kern Canal (P-54-004614/CA-TUL-2873H)

Friant-Kern Canal (FKC) is an irrigation canal completed in 1951 as part of the Central Valley Project. The canal is approximately 152-mi long. It carries water via gravity from the Friant Dam on the San Joaquin River to its terminus at the Kern River four miles west of Bakersfield. Approximately 127-mi of the canal are concrete-lined with a bottom width of 36-ft; the remaining 25-mi of canal are earth lined with a bottom width of 64-ft. The canal is approximately 15.5-ft deep.

One small segment of the FKC was identified in the Project APE. It is located at the intersection of Orange Belt Drive and Ave 190. The investigated segment measures 140-ft (northwest-southeast) by 105-ft (northeast-southwest) and situated at an elevation of 417-ft amsl. This portion of the FKC is entirely subterranean and is overlaid by Orange Belt Drive, a paved road that runs in a general northwest-southeast direction. Road rights-of-way border Orange Belt drive and abut the western portion of the canal structure which consists of a concrete cap and chain link fencing. No associated artifacts were identified with the resource. The recorded segment of the FKC is in good condition.

In 2006, the United States Bureau of Reclamation (BOR) recommended that the Friant-Kern Canal water conveyance system be considered NRHP eligible under Criterion A. The Friant-Kern Canal has also been recommended as CRHR eligible under Criterion 1 but has been recommended not NRHP or CRHR eligible under Criteria 2/B, 3/C and 4/D (ASM Affiliates 2016, Class III Inventory/Phase I Survey, Shafter-Wasco Irrigation District Recharge Project, Kern County, California; manuscript on file, SSJVIC, Bakersfield). We concur with these previous recommendations. The Project APE at this location, however, overlies the capping covering this subterranean portion of the canal, and the construction and use of the Project does not have the potential to result in adverse impacts or effects to this resource.

Southern Pacific Railroad (P-54-004626/CA-TUL-002880H)

This resource is a long segment of the Southern Pacific Railroad (SPPR; P-54-004626/CA-TUL-002880H) located between Strathmore, CA and the southern city limits of Porterville. The investigated potion of the rail grade spans multiple townships (Table 5) and bisects the current Project APE along its entirely. The recorded segment measures approximately 9.1-mi (north-south) by 10-ft wide. Elevation of the resource ranges between 400-ft amsl at the north end at

Strathmore, and 480-ft asml at the south end near Tea Pot Dome Avenue. The rail grade is no longer in use and is in poor condition.

Table 5. P-54-004626/CA-TUL-2880H Update: T/R and Sections

Township:	Sections:
T20S/R27E	33
T21S/R27E	3, 4, 10, 14, 15, 23, 26, 35, and 36
T22S/R27E	1, 2, and 11

Rail service to the San Joaquin Valley was established in 1866, with the Central Pacific Railway construction of a line through the valley, connecting Los Angeles to the Bay Area. The tracks were extended to Tulare in 1871, and they reached Bakersfield in 1873. In 1885, the Southern Pacific Transportation Company leased the Central Pacific lines, subsequently becoming commonly known as the Southern Pacific Railroad. The Union Pacific Railroad currently operates the existing railroad tracks (Baloian et al. 2017).

Segments of this railway line have been recorded in 2000, 2001, twice in 2002, 2009, multiple times in 2012, 2014, 2016, 2017, and 2019 (Confidential Appendix A). The investigated section of the railroad features the remnants of ballast grade along the majority APE; however, to conform to the height of the asphalt roads, the ballast grade has been completely leveled at all locations where asphalt roads bisect. In addition, eleven wood and concrete features comprised of trestles and conveyance features were also recorded, but the majority of the structural features of this resource (ties, rails, switches, etc.) have been removed and the resource lacks integrity. The recorded features are presented in Table 6 below. Where stable, the grade appears to be between 2 and 8-feet above the height of the ground surface elsewhere.

Table 6. P-54-004626/CA-TUL-2880H Update: Trestle/Culvert Crossing

Feature Designation:	**Location UTMs:**	**Approx. Dimensions:**	**Description:**
Feature 1	315408mE, 3999931mN	10-ft wide x 2-ft long x 3-ft height	A partially buried quadruple 2-ft diameter steel pipe culvert reinforced with large beam and plank overlay.
Feature 2	315621mE, 3999326mN	10-ft wide x 2-ft long x 2-ft height	A partially buried wood beam culvert with a 2-ft x 1/2-ft opening.
Feature 3	315768mE, 3998904mN	10-ft wide x 2-ft long x 2-ft height	A partially buried wood beam culvert with a 1-ft x 2-ft opening. Rail spikes utilized for construction. Modern refuse scattered atop and nearby.
Feature 4	316094mE, 3997954mN	10-ft wide x 8.5-ft long x 5-ft height	A partially buried 2-ft diameter steel pipe culvert encased in concrete U-shaped cast. Embossed with "1948" above east culvert opening. Modern refuse is scattered nearby.
Feature 5	317305mE, 3995745mN	10-ft wide x 8.5-ft long x 5-ft height	A mostly buried 5-ft opening culvert. Embossed with "1916" above west culvert opening. Recent modification to sewer features has occurred nearby. Abundance of modern refuse scattered atop and nearby.
Feature 6	318170mE, 3993315mN	45-ft wide x 15-ft long x 5-ft height	A triple 3-ft diameter corrugated steel culvert held by ½-in rivets that bisects Porter Slough. Abundance of modern refuse scattered and nearby.
Feature 7	318301mE, 3991222mN	100-ft x 15-ft x 20-ft tall	A trestle associated with the Southern Pacific Railroad. Comprised of steel, wood, and 3-in diameter bolts. The railing in partially destroyed. Poplar Ditch passes under this crossing.

Feature 8	318292mE, 3990814mN	70-ft x 15-ft x10-ft tall	A trestle associated with the Southern Pacific Railroad. Comprised of steel, wood, and 3-in diameter washer and bolt construction.
Feature 9	318242mE, 3990149mN	45-ft x 15-ft x 10-ft tall	A trestle associated with the Southern Pacific Railroad. Comprised of steel, wood, and 3-in diameter washer and bolt construction. Partial burning of this crossing has occurred and is nearly dilapidated.
Feature 10	318236mE, 3990102mN	10-ft wide x 4-ft long x 2-ft height	A partially buried wood beam culvert. Smaller wood pieced are scattered about. Two small concrete footings are located nearby.
Feature 11	317504mE, 3988349mN	10-ft wide x 6-ft long x 4-ft height	An early construction dual 2-ft diam. concrete culvert encased in concrete.
Feature 12	N end: 317703mE, 3988705mN E end: 317521, 3988354mN	1,290-ft long	A wood pole transmission corridor at southern end of grade. Consists of eight decommissioned cross beam poles with no attached insulators.

Other segments of this linear resource have been evaluated for NRHP eligibility on multiple occasions and have repeatedly been classified as 6Y: not NRHP eligible by consensus. In concurrence with these previous assessments, the segment of P-54-004626 within Project APE is recommended as not NRHP or CRHR significant or eligible.

Page is intentionally blank

5. SUMMARY AND RECOMMENDATIONS

An intensive Class III archaeological inventory/Phase I survey was conducted for the Butterfield Corridor Project APE, in Porterville, Tulare County, California. A records search was conducted at the Southern San Joaquin Valley Archaeological Information Center, California State University, Bakersfield. This indicated that portions of the study area had been previously surveyed and that multiple cultural resources/resource districts were known to exist within it. The Native American Heritage Commission Sacred Lands Files were also consulted, and no sacred sites or tribal cultural resources were known within or in the vicinity of the APE.

The Class III Inventory/Phase I survey fieldwork was conducted with parallel transects spaced at 15-meter intervals across the approximately 110-ac horizontal Project APE. Five previously recorded resources were updated during the survey. Two resources consist of segments of ditches (P-54-002208/Poplar Ditch and P-54-004354/Pioneer Ditch), a segment of the Friant-Kern Canal (P-54-004614), remnants of the Tule River Bridge (P-54-002205), and a segment of the Southern Pacific Railroad (P-54-004626) which runs the length of the Project APE. No previously unidentified cultural resources were recorded during the survey.

5.1 RECOMMENDATIONS

An intensive Phase I survey/Class III inventory demonstrated that the Butterfield Corridor Project APE contains five cultural resources, all of which had been previously recorded. Three of these, P-54-004354/Pioneer Ditch, remnants of the Tule River Bridge (P-54-002205) and a segment of the Southern Pacific Railroad (P-54-004626), have been demolished, therefore lack integrity, and are not significant or eligible for listing in the NRHP or CRHR. The proposed Butterfield Corridor will cross over and not impact or effect the other two previously recorded resources,which are segments of the Friant-Kern Canal and the Poplar Ditch. Based on these results, the Butterfield Corridor Project does not have the potential to result in significant impacts or adverse effects to historical resources or historic properties, and a determination of no historic properties affected is recommended for the Project. In the unlikely event that cultural resources are encountered during Project construction or use, however, it is recommended that an archaeologist be contacted to assess the discovery.

Appendix M Phase I ESA User Questionnaire, Phase I ESA Owner or Occupant Questionnaire

Executive Summary

- This Phase I Environmental Site Assessment Report has been prepared for the City of Porterville for the Butterfield Stage Corridor project property. The Property consists of eight (8) miles of former Union Pacific Railroad (UPRR) right-of-way (ROW) since at least 1891 and has historically been surrounded by industry, agriculture, and residences.
- The Property is not listed on environmental databases searched but there are numerous listings in the vicinity of the Property.
- Site reconnaissance was conducted on April 27, 2020.
- Interview questionnaires to be completed by the current owner and prospective buyer were not completed as of the date of this report. The City provided a quitclaim deed for the Corridor Property. The deed shows that there are land use restrictions placed on each of the Corridor parcels included in the deed.
- Provost & Pritchard has performed this ESA in general conformance with the scope and limitations of ASTM E 1527-13. This assessment has revealed recognized environmental conditions (REC) in connection with the Property as:
    - Environmental impacts recorded adjacent to the Property that have not been remediated or are currently undergoing remediation are considered RECs. The sites considered RECs are:
        - the Porterville PCE Plume, an active evaluation site where tetrachloroethene has been detected in groundwater from City supply wells and in soil near the Press Shop dry cleaners;
        - Porterville MGP, a State Response site with soils impacted with polynuclear aromatic hydrocarbons;
        - Bobs Petro Products, an active cleanup site with soil and groundwater impacted by petroleum hydrocarbons; and
        - the Eyster Property, a vacant lot found to be impacted by petroleum hydrocarbons during the removal of three USTs in 1992.
- In addition, non-scope considerations that do not meet the ASTM definition of a REC include:
    - The historical use of the Property as a railroad represents a BER due to the likely presence of arsenic from herbicide use), hydrocarbons, other heavy metals, or other contaminants in the soil.
    - The potential presence of environmentally persistent agricultural pesticides on the Property is considered a BER.

1 Introduction

1.1 Purpose

This Phase I Environmental Site Assessment Report (ESA) has been prepared for the City of Porterville (City) for the Butterfield Stage Corridor project property (Property or Corridor), eight (8) miles of former Union Pacific Railroad (UPRR) right-of-way (ROW) between Tea Pot Dome Avenue and Avenue 196 (Figure 1 Appendix A). This ESA was performed in accordance with the scope and limitations of the American Society of Testing and Materials (ASTM) Standard Practice for Phase 1 Environmental Site Assessment Process E1527-13. This ESA was conducted to document the general environmental condition of the Corridor prior to development of a multi-use path. The ESA was limited to the area identified on Figure 2 in Appendix A.

The objective of this ESA is to assist the client in understanding recognized environmental conditions associated with the site's past and current use. Recognized Environmental Condition (REC) is defined as "the presence or likely presence of hazardous substances or petroleum products under conditions that indicate a release into structures on the property or into the ground, groundwater or surface water of the property."

Historical Recognized Environmental Conditions (HREC) are defined by the ASTM Standard Practice E1527-13 as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.

Business Environmental Risks (BER) include risks which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the subject property, not necessarily limited to those environmental issues required to be investigated in the standard ASTM scope. BERs may affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

In addition, this ESA has also noted the presence of housekeeping and other conditions which ASTM identifies as "non-scope considerations" that may create a BER as defined above. Housekeeping conditions, a type of a BER, are generally considered de minimis conditions that in general do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of government agencies but could require regulatory permitting.

1.2 Detailed Scope of Services

The ESA process consisted of:

a. A review and evaluation of state and federal (i.e., U.S. EPA) environmental databases that list sites of potential impact within specified search distances;

b. A review and evaluation of reasonably ascertainable local agency records and environmental databases for historical and current documentation pertaining to the site;

c. A review and evaluation of reasonably ascertainable historical use information, including aerial photographs and maps (e.g., USGS, fire insurance, etc.), tax improvement records, city directories, and building department permit records;

d. Interviews with clients and government officials, as appropriate;

e. Site reconnaissance to determine current and past uses and conditions of both the property and adjoining properties;

f. Preparation of a report detailing findings, and conclusions generated from components 'a' through 'd'.

1.3 Common Acronyms

APN: Assessor's parcel number
AST: Above-ground storage tank
ASTM: American Society for Testing and Materials
CUPA: Certified Unified Program Agency
DTSC: California Department of Toxic Substance Control
DWR: California Department of Water Resources
EDR: Environmental Data Resources Inc.
EPA: United States Environmental Protection Agency
ESA: Environmental site assessment
P&P: Provost & Pritchard Consulting Group
REC: Recognized environmental condition
RWQCB: Regional Water Quality Control Board
USDA: United States Department of Agriculture
USGS: United States Geological Survey
UST: Underground storage tank

1.4 Significant Assumptions and Exceptions

The ESA is designed in principle to be a cost-effective overview of a site, which should identify indications of RECs that are observable, or recorded in readily available public records. Evaluation of the Property is limited to information available through public sources, interviews, and firsthand observation. Judgments leading to opinions and recommendations are made without a complete knowledge of subsurface conditions. Findings and recommendations are made in review of information that was prepared or provided by others. This report assumed that the information provided is accurate and correct. P&P assumes that cases closed by regulatory agencies do not continue to represent a threat of groundwater impacts or vapor migration or intrusion. Additional research beyond that required by ASTM E1527-13 may yield additional information.

1.5 Limitations

Land use, site conditions (both onsite and offsite) and other factors will change over time. Since site activities and regulations could change at any time after the completion of this report, the observations, findings and opinions can be considered valid only as of the date of the site visit.

P&P's professional services were performed consistent with generally accepted environmental principles and practices in California at the time the services were performed. Judgments leading to conclusions and recommendations are made without a complete knowledge of subsurface conditions.

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of the practice outlined in ASTM E1527-13 is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

Therefore, no warranty or guarantee is expressed or implied.

1.6 User Reliance

This report has been prepared for the sole benefit of the City of Porterville. Any other person or entity without the express written consent of Provost & Pritchard Consulting Group and/or City of Porterville may not rely upon this report.

1.7 Site Description

The site description includes information that identifies the physical setting of the site in relation to the surrounding area. Table 1 describes the General Site Characteristics including:

- Site and physical setting

- Descriptions of roads, structures, other improvements
- Current uses of the adjoining properties
- Location of the site and maps included in Appendix A

Table 1. General Site Characteristics

ADDRESS & ASSESSOR'S PARCEL NUMBER	The Corridor includes 42 parcels; see Appendix B for available APNs. Addresses are not assigned.
APPROXIMATE SIZE	The Corridor is approximately 112.04 acres.
LOCATION	The Corridor is located from Avenue 196 in Strathmore to Teapot Dome Avenue in Porterville, primarily parallel to Orange Belt Drive/Main Street.
ZONING	AE-20, Z
BUSINESS TYPE & YEARS OF OPERATION	Railroad right of way since at least 1891, based on Certified Sanborn maps.
PRIOR LAND USE	Land use prior to 1891 is unknown.
LEGAL DESCRIPTION	The Corridor is within Township 20 South, Range 27 East; Township 21 South, Range 27 East; and Township 22 South, Range 27 East, Mount Diablo Base and Meridian in the County of Tulare.
ROADS	Much of the Corridor is parallel to Orange Belt Drive/Main Street.
STRUCTURES	Buildings are not present in the corridor. They are remaining crossings and loading docks, as well as the pillars of a bridge across the Tule River.
CURRENT USES OF ADJOINING PROPERTIES	
Industrial, commercial, residential, agricultural.	

2 User Provided Information

2.1 Title Records

The Corridor parcels are vested in the City of Porterville, according to the quitclaim deed included in Appendix B, except parcels that were previously transferred to other owners. The City Resolution included with the deed describes the purchased area as the abandoned 8.2± mile rail line, bounded to the north by Avenue 196 and to the south by Teapot Dome Avenue.

2.2 Environmental Liens or Activity and Use Limitations

Restrictions on use have been set for each of the Corridor parcels included in the quitclaim deed (Appendix B). The parcels must not be used for residential, lodgings or accommodations, or educational or child-care facilities.

2.3 Specialized Knowledge

A user questionnaire was sent to staff of the City of Porterville, but a response was not received as of the date of publishing this report.

2.4 Valuation Reduction for Environmental Issues

Not applicable.

2.5 Owners, Property Manager, and Occupant Information

The Corridor parcels are owned by the City of Porterville and are currently unoccupied, with the exception of the parcel owned by the Porterville Historical Museum. No specific information was provided by any property owner.

2.6 Reasons for Performing ESA

This ESA was conducted to assist the City of Porterville with portions of its due diligence for preparation of a California Environmental Quality Act (CEQA) document for the subject Property.

3 Records Review

3.1 Standard Environmental Records Sources

Federal, state, and local regulatory agencies databases lists were available for review. The purpose of the records review is to obtain and review records that would help to identify recognized environmental conditions in connection with the Property. Provost & Pritchard contracted with a commercial database service, Environmental Data Resources (EDR), to review the regulatory agency lists for reference to the Property and any listings within the appropriate ASTM minimum search distance from the site. The federal and state databases reviewed are listed below with a brief description of the potential environmental risk, if applicable. A copy of the EDR report is included in Appendix C.

The following federal and state databases were reviewed for assessment. The respective search distances are included in the EDR Radius Map Report in the Map Findings Summary.

3.1.1 Federal and State Databases

- National Priority List (NPL), Proposed NPL, and NPL LIENS
- Delisted NPL Site List
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), Federal Facility
- CERCLIS No Further Action (CERCLIS-NFRAP)
- Corrective Action Report (CORRACTS)
- Resource Conservation and Recovery Act Information (RCRA) TSDF- RCRA small and large generators
- Federal Institutional Controls/Engineering Controls Registry
- Emergency Response Notification System (ERNS),
- State and Tribal NPL Equivalent-(RESPONSE)
- State and Tribal CERCLIS Equivalent (ENVIROSTOR)
- State and Tribal Landfill or Solid Waste Disposal Site (SWF/LF)
- State and Tribal leaking storage tanks (LUST, SLIC, and INDIAN LUST)
- State and Tribal registered storage tank list (UST, AST, INDIAN UST, FEMA UST)
- State and Tribal Voluntary Cleanup Sites (INDIAN VCP, VCP)
- State Hazardous Waste Information System (HAZNET)
- California Drug Laboratory (CDL)

3.1.2 Database Findings

There are many database listings along the Corridor, 15 of which are considered in the EDR Area / Corridor Report to be the Target Property. Although the sites listed do not appear to be part of the former railroad operation, these listings are the closest to the Corridor. Following are the site name, address, database(s) it is listed on, and details of the listing for each of the Target Property listings.

- WALLACE TOWING, 17515 ORANGE BELT DR, CUPA Listings, inactive small facility with less than 5 hazardous materials, inactive small generator of hazardous waste
- SEQUOIA ROCK COMPANY P'VILLE, 937 N GRAND, CA FID UST, historical listing
- WALLACE 24-HOUR TOWING, 927 W NORTH GRAND AVE, HWTS, hazardous waste tracking
- WALLACE TOWING, 927 W NORTH GRAND AVE, CUPA Listings, inactive small facility with less than 5 hazardous materials, inactive small generator of hazardous waste
- SIERRA MINIT MART, 101 W MORTON AVE, EDR Hist Auto, convenience store and gasoline service station
- CITIBANK, 185 NORTH D ST, HAZNET, HWTS, asbestos containing waste generated in 2012
- BONANZA MOTORS INC, 101 W OLIVE AVE, HWTS, hazardous waste tracking
- GIN AND ROBERT DAY, 1234 S MAIN ST, HAZNET, HWTS, unspecified oil-containing waste
- WHITES CHEVRON SERVICE, 1248 S MAIN, SWEEPS UST, CA FID UST, fuel UST listed in 1988
- BOBS PETRO PRODUCTS, 1248 S MAIN ST, EDR Hist Auto, gasoline service station
- VAL-E-GAS FILLING STATION, 1248 S MAIN ST, CUPA Listings, inactive UST facility
- EUGENIO GARCIA, 1248 S MAIN ST, HWTS, hazardous waste tracking
- BOBS PERNO PRODUCTS INC, 1248 S MAIN ST, HIST UST, fuel USTs, see section 3.1.8
- HEATHER MCNABB, 1248 S MAIN ST, HWTS, hazardous waste tracking
- RITA GUTIEREZ, 1991 S MAIN ST, HWTS, hazardous waste tracking

Additionally, BECKMAN COULTER, INC is listed on the Federal National Priority List (NPL) and is discussed in 3.1.7.

3.1.3 Tulare County Assessor's Office (Appendix B)

Information that was available for review for the Tulare County parcels that make up the Corridor is shown in the table in Appendix B. Twelve of the parcels had no information available.

3.1.4 CalEPA nSite

The California Environmental Protection Agency (CalEPA) maintains a data warehouse system (nSite) for the California Enviroview program. This data warehouse combines and merges facility and site information from: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Many sites are mapped adjacent to the Corridor. Sites that are mapped as hazardous chemical storage facilities, hazardous waste generators, in the US EPA Air Emission Inventory System, and/or have an underground storage tank or above ground petroleum storage indicate that a hazardous substance is present on the site but do not necessarily indicate that a release has occurred. These types of listings mapped adjacent to the Corridor include:

- Dollar General #15469, 22825 AVENUE 196, STRATHMORE CA 93267
- STRATHMORE LIQUOR, 19534 ORANGE BELT DR, STRATHMORE CA 93267
- RA MARTINEZ TRANSPORTATION LLC, 23264 AVE 188, PORTERVILLE CA 93257
- VIKING READY-MIX COMPANY, 937 W NORTH GRAND, PORTERVILLE CA 93257
- RM PARKS INC - BULK PLANT, 1061 N MAIN ST, PORTERVILLE CA 93257
- PORTERVILLE COLLISON CENTER, 721 N SUNNYSIDE ST, PORTERVILLE CA 93257
- LLOYDS TRANSMISSION, 673 N SUNNYSIDE ST, PORTERVILLE CA 93257
- MILINICH BODY WORKS, 631 N SUNNYSIDE ST, PORTERVILLE CA 93257

- PORTERVILLE UNIFIED – MAINT, 534 N E ST, PORTERVILLE CA 93257
- MORTON EXPRESS MART, 90 W MORTON AVE, PORTERVILLE CA 93257
- MYERS FUNERAL HOME, 248 NORTH E. ST, PORTERVILLE CA 93257
- QUALITY CLEANERS, 21 NORTH D ST, PORTERVILLE CA 93257
- PCI Porterville, 60 S E ST, PORTERVILLE CA 93257
- GROW PURE CITRUS LLC, 180 S E ST, PORTERVILLE CA 93257
- TONY'S RADIATOR SERVICE, 80 W ORANGE AVE, PORTERVILLE CA 93257
- TDG OPERATIONS, LLC, 600 S E ST, PORTERVILLE CA 93257
- PRO DOCUMENT SOLUTIONS, 90 W POPLAR AVE, PORTERVILLE CA 93257
- ANDERSON FENCE CO, 770 S MAIN ST, PORTERVILLE CA 93257
- FARMERS TRACTOR, 1132 S MAIN ST, PORTERVILLE CA 93257
- VPPS - PORTERVILLE PLANT & CARDLOCK, 11 E YATES AVE, PORTERVILLE CA 93257
- Caltrans-Porterville, 1331 S 2ND ST, PORTERVILLE CA 93257
- CENTRAL IRON & METAL TOWING & STORAGE, 81 E GIBBONS AVE, PORTERVILLE CA 93257

Listing types on CalEPA that do indicate the release of a hazardous substance has occurred are leaking underground storage tank (LUST) cleanup sites, tanks & ground water clean ups, and cleanup program sites. These listing types mapped adjacent to the Corridor include:

- ED'S CARS & TIRES, 19543 ORANGE BELT DR, STRATHMORE CA 93267, RWQCB, closed
- PINKY'S LIQUOR, 19534 ORANGE BELT DR, STRATHMORE CA 93267, RWQCB, closed
- Parks Petroleum Products, 1061 MAIN, PORTERVILLE CA 93257, CIWQS
- PORTERVILLE PUBLIC SCHOOLS, 534 E ST N, PORTERVILLE CA 93257, RWQCB, closed
- PORTERVILLE FEED STORE, 20 D ST S, PORTERVILLE CA 93257, RWQCB, closed
- JACK GRIGGS INC, 73 VINE W, PORTERVILLE CA 93257, RWQCB, closed
- FRIENDS LUMBER INC., 131 W. ORANGE AVENUE, PORTERVILLE CA 93257, RWQCB, closed
- Silvas Oil Company (Former R. E. Havens), 336 SOUTH E, PORTERVILLE CA 93257, RWQCB, closed
- C & S DISTRIBUTING, 65 DATE W, PORTERVILLE CA 93257, RWQCB, closed
- PORTERVILLE TRUSS & BUILDING, 477 MAIN ST S, PORTERVILLE CA 93257, RWQCB, closed
- MOBIL OIL BULK PLANT - TULARE CO. (FORMER), 720 SOUTH MAIN ST, PORTERVILLE CA 93257, RWQCB, closed
- MCCAULLEY'S TROPHY SHOP, 744 MAIN S, PORTERVILLE CA 93257, RWQCB, closed
- PORTERVILLE COLLEGE, 900 MAIN S, PORTERVILLE CA 93257, RWQCB, closed
- BOBS PETRO PRODUCTS, 11 E YATES, PORTERVILLE CA 93257, RWQCB, see section 3.1.8.

3.1.5 Building Department Records (Appendix E)

Building records were not searched as there are no buildings currently on the Property nor is there evidence of past buildings.

3.1.6 California Geologic Energy Management Division (Appendix F)

The State of California Geologic Energy Management Division (CalGEM, formerly DOGGR) maintains the Well Finder web site with maps showing the locations of oil and gas wells the department has records of. A review of Well Finder shows that several exploration dry holes (gray symbols on the map in Appendix F) were drilled in the area of the Corridor. However, no production wells are shown within one mile of the Corridor.

3.1.7 Department of Toxic Substances Control (Appendix G)

EnviroStor is the Department of Toxic Substances Control's (DTSC) data management system for tracking our cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and

sites with known contamination or sites where there may be reasons to investigate further. A review of the EnviroStor website shows the following sites mapped within one mile of the Corridor: Harmony Magnet High School, North Prospect Street Middle School, Porterville PCE Plume, Porterville New Elementary School, Porterville MGP & So Cal Gas/Porterville MGP, and Beckman Coulter, Inc.

The three school sites mapped are School Cleanups or School Investigations with Certification of Removal Action Completion or No Further Action (NFA) issued from the DTSC.

The Porterville PCE Plume is an active Evaluation site where tetrachloroethene has been detected in groundwater from City supply wells and in soil near the Press Shop dry cleaners. The most recent report available on EnviroStor indicates that remediation has not occurred. The Press Shop at 12 W. Olive Avenue is approximately 600 feet from the Corridor.

Porterville MGP is a State Response site with soils impacted with polynuclear aromatic hydrocarbons (PAHs). Remediation by excavation is planned but has not been executed. So Cal Gas/Porterville MGP is a Voluntary Cleanup, presumedly at the same site. PAH impacted soils were removed in 1994. The site was given Certification of Removal Action with Land Use Restrictions. The Porterville MGP address, 309 S. Main Street, is approximately 300 feet from the Corridor.

Beckman Coulter, Inc is mapped four times as a Non-Operating Permitted site, Tiered Permit site, Corrective Action site, and Federal Superfund site. The Non-Operating Permitted site listing includes closures issued for a permitted hazardous waste storage site and a solar pond. The Tiered Permit site was referred to another agency and does not have any information on EnviroStor. The Corrective Action listing summary states it is an active NPL site and to see Beckman Instruments, Porterville Plant which is the Federal Superfund site and NPL mentioned in 3.1.2. The Beckman Instruments facility manufactures electronic instruments and discharged waste into a solar evaporation pond. A leak was detected in the pond in 1983 and soil and groundwater were found to be affected with Freon 113, lead, and volatile organic compounds (VOCs). The site was added to the Federal NPL in June 1986. Lead impacted soils have been removed and are in the process of being delisted. Natural attenuation of VOCs is apparently the method of ongoing groundwater remediation. The Beckman Coulter site is approximately 1200 feet from the Corridor.

3.1.8 Regional Water Quality Control Board (Appendix H)

GeoTracker is the California State Water Resources Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. GeoTracker portals retrieve records and view integrated data sets from multiple State Water Board programs and other agencies. Adjacent to the Corridor, open Water Board sites include Bobs Petro Products and the Eyster Property. Many closed cleanup sites are mapped near the Corridor.

Bobs Petro Products has been a petroleum product storage facility since 1920. Petroleum hydrocarbons have been found in the soil and groundwater at the site. A bioventing remediation system is operating at the site. According to the site investigations available on GeoTracker, impacts to soil do not appear to have occurred off the site and groundwater impacts are less than 250 feet downgradient. This site is immediately adjacent to the Corridor.

The Eyster Property is a vacant lot that was found to be impacted by petroleum hydrocarbons during the removal of three USTs in 1992. No site investigation or remediation has occurred to date. This site is approximately 350 feet from the corridor.

3.1.9 San Joaquin Valley Air Pollution Control District (Appendix I)

The San Joaquin Valley Air Pollution Control District was not contacted since past use does not indicate the need for air permits.

3.2 Physical Setting

The geologic and hydrologic conditions beneath the Property were researched to evaluate whether hazardous substances are likely to migrate into groundwater or soil beneath the site, either from on or off-site sources.

3.2.1 Geological Conditions

The site is located on the eastern edge of the San Joaquin Valley. The valley is underlain generally by sedimentary deposits of silt, sand, and gravel. The valley is bordered on the east by the Sierra Nevada Mountains whose altitude ranges from less than 1,000 feet in the foothills to more than 14,000 feet above sea level near the crest of the range. The Coast Ranges, bordering the valley on the west, consist of a series of folded and faulted marine and volcanic rocks which rise to about 6,000 feet above sea level (Croft and Gordon, 1968).

The geomorphic province is known as the Great Valley, or Central Valley. The Sacramento Valley makes up the northern third and the San Joaquin Valley makes up the southern two thirds of the geomorphic province. Both valleys are watered by large rivers flowing west from the Sierra Nevada Range, with smaller tributaries flowing east from the Coast Ranges. Gently rolling plains and hills rise from the valley floor along the borders with the surrounding mountainous provinces (Harden, 1998).

Most of the surface of the Great Valley is covered by Quaternary alluvium. Sediments eroded from the Sierra Nevada and Coast Ranges are deposited on the floodplains and bottomlands of the flat-bottomed valley. In the central, lower parts of the Great Valley, young Cenozoic alluvium is underlain by an incredible thickness of older sediments and sedimentary rocks. The basin is deeper on the western side of the valley, where it is filled by as much as 20,000 meters of sediment. Along the eastern margin of the basin, the sedimentary formations are steeply upturned due to the uplifted Sierra Nevada Range (Harden, 1998).

3.2.2 Hydrogeology

The Property is within the boundary of the Kaweah and Tule Subbasins of the San Joaquin Valley Groundwater Basin. The Kaweah Subbasin includes the Kaweah and St. Johns Rivers, the former which is the main source of groundwater recharge (DWR, 2003a). The Tule Subbasin is drained primarily by the Tule River, Deer Creek, and White River and is recharged by river and stream seepage and deep percolation of irrigation water (DWR, 2003b). Groundwater generally flows west in the Tule Subbasin and southwest in the Kaweah Subbasin (DWR, 2003a & b).

The California Department of Water Resources (DWR) Fall 2018 groundwater measurements do not extend into the area of the Property (see map in Appendix I). The nearest measurements, over one mile to the west, have elevations ranging from 250 to 370 feet above mean sea level with flow direction to the northwest to southwest. This translates to depths of approximately 60 to 150 feet below the ground surface. The groundwater below the Property is likely shallower based on the gradient in the DWR data.

3.2.3 USDA Soil Survey

A Custom Soil Resource Report was created from the USDA NRCS Soil Web Survey (Appendix J). The report shows that 11 different soil types are mapped on the Property. The largest portions of the Property (77.6%) are mapped as Porterville clay, San Emigdio Loam, and San Joaquin Loam. These soil types are moderately well to well drained. The remaining soil types are other loams and clays and just 6.0% mapped as sand.

3.3 Historical Use Information

History of the previous use of the property and surrounding area was researched in order to help identify the likelihood of past uses that may have resulted in RECs in connection with the Property. The following standard historical sources were reviewed to identify past use back to at least 1940, or when first developed.

3.3.1 Aerial Photographs (Appendix K)

Years reviewed: 1937, 1940, 1952, 1957, 1969, 1972, 1977, 1984, 1994, 2005, 2009, 2012, 2016

In the aerial photos from 1937 the alignment of the railroad is apparent in sections of the Corridor. The City of Porterville is significantly developed, and some development is present in the area of Strathmore. Segment 2 of the Corridor that is within Porterville appears to be surrounded by residences in the north of

the city and industry in the south of the city near the Tule River. Segments 1, 3, and 4 of the Corridor are surrounded by agriculture. The 1940 images are missing a portion of segments 3 and 4 but appears similar to 1937. In the 1952 aerials, the Friant-Kern Canal is completed across segment 4 of the Corridor. The 1957 photos include segment 2 and a portion of segment 3. Some more development is apparent in the areas shown, including industrial development south of the Tule River, a portion of Highway 65, and what appears to be Porterville College. In the 1969 images it can be seen that Highway 65, Highway 190, and Porterville College are completed. Aerial photos from 1972 show more industrial development near the river. The images from 1977 and 1984 appear relatively similar to the previous images, with a little more development over time. In the 1994 images the large complex along segment 1 that is presently a distribution center is completed. Development continues through the reaming photographs provided, with no apparent significant changes along the Corridor with the exception of a solar facility visible along segment 3 in 2016.

3.3.2 Topographic Maps (Appendix L)

USGS 7.5-minute topographic maps of the Porterville and Lindsay quadrangles from 1928 & 1929, 1942, 1951, 1969, and 2012 were reviewed for the Property and surrounding area. The quadrangles are stitched together by year with the approximate location of the Corridor shown in Appendix L.

The Corridor is mapped as the Southern Pacific Railroad in the 1928 and 1929 combined maps. Irrigation ditches cross the railroad in several places. The present-day Main Street is shown as a highway. Many buildings are mapped near the railroad. The City of Porterville appears heavily developed and Strathmore has some dense buildings. The Property is mapped as a railroad through the 1969 map and little change is shown through the maps.

3.3.3 City Directories

Due to the lack of addresses for the Property, city directory information was not reviewed.

3.3.4 Sanborn Fire Insurance Maps (Appendix C)

Sanborn Fire Insurance Maps are available for the area for years 1891, 1896, 1906, 1912, 1923, 1925, 1932, 1950, 1956, and 1962.

In 1891 and 1896, two maps are available for each year and show that the railroad is present between at least Morton Avenue to Walnut Avenue. Adjacently mapped are dwellings and a grain field.

The 1906 maps show the railroad from at least Belleview Avenue to Date Avenue. Mapped adjacent to the Corridor are multiple citrus packing houses, ice storage, bottling works, corral, Southern Pacific depot, lumber storage, box storage, and multiple dwellings.

In 1912 the railroad is mapped from at least School Avenue to Date Avenue. Adjacent to the Corridor are many dwellings, lumber storage, lime cement, planning mill, multiple fruit packing houses, Southern Pacific depot, ice house, soda water works, and a fuel oil tank and spurs near Locust Avenue, which are still visible in aerial images.

One map is available for 1923 in Strathmore. Avenue 196 is labelled Tay and Orange Belt Drive is labelled Copley Avenue. The railroad is mapped parallel to Copley Avenue and adjacent to it are mapped a passenger station, ice house, gas & oil storage, irrigation pipe manufacturing, and two fruit packing houses.

In 1925 the railroad is shown from Laurel Avenue to Date Avenue. Dwellings, Southern Pacific depots, cement & lime storage, lumber storage, poultry & feed warehouse, planning mill, multiple fruit packing houses, stockyard, calcining plant, oil storage, grain warehouse, and a cotton gin are mapped adjacent to the main railroad line.

One map was provided in Strathmore for 1932, similar to the 1923 map. The passenger station, ice house, gas & oil storage, and two packing houses are still mapped in 1932.

The railroad line is shown from Laurel Avenue to Date Avenue in the 1950 maps. Dwellings, Southern Pacific passenger & freight depots, undertaker, lumber shed, cement & lime storage, sash & door

warehouse, auto repair, grain & feed storage, fertilizer & insecticide storage, box storage, multiple fruit packing houses, stockyard, oil storage, and So Cal Edison are mapped adjacent to the Corridor.

Maps from 1956 show the railroad main line from Laurel Avenue to Date Avenue. Facilities mapped adjacent to the Corridor are feed warehouses, oil storage, dwellings, wood working, So Cal Edison, Southern Pacific passenger & freight depots, undertaker, lumber shed, cement & lime storage, sash & door warehouse, auto repair, grain storage, box storage, multiple fruit packing houses, fertilizer & insecticide storage, and stockyard. Minimal changes are apparent from the previous maps.

On the most recent maps from 1962, the railroad is shown from Laurel Avenue to Date Avenue. Adjacent to the Corridor dwellings, undertaker, Southern Pacific passenger & freight depots, box storage, multiple fruit packing houses, stockyard, fertilizer & insecticide storage, grain & feed storage, oil storage, used furniture, wood working, electrical repairing, So Cal Edison, lumber shed, cement & lime storage, sheet metal working, upholstering, and auto repair are mapped.

3.4 Historical Use Information on Adjoining Properties

Based on aerial imagery, topographic maps, Certified Sanborn maps, and database listings reviewed, areas adjacent to the Corridor have historically been primarily residential, agricultural, and industrial. The area near Locust Avenue had multiple oil storage facilities throughout the years. The area includes two closed RWQCB petroleum hydrocarbon cleanup sites and the DTSC Porterville MGP cleanups. Lumber companies were prevalent in the area near Putnam Avenue through the maps but is currently residential.

4 Site Reconnaissance

4.1 Methodology and Limiting Conditions

An unescorted site reconnaissance was conducted on April 27, 2020 by Stephanie Gillaspy and Darylyn Tachella of Provost & Pritchard Consulting Group to document the physical setting of the site, verify information obtained from the agency records (if available), and obtain site-specific information where no records were available. The objective of a site reconnaissance is to obtain information indicating the likelihood of identifying RECs in connection with the subject property.

Table 2 lists the observations noted during the site reconnaissance. The photographs of the Property are in Appendix A.

4.2 General Site Setting

Table 2 Site Observations

Checked	Observations	Remarks
√	Property boundaries	Visually undeterminable.
√	Location and boundaries of onsite operations (present and past)	The location of the former railroad tracks is apparent by the linear path with no development.
√	Foundations of former structures	None observed.
√	Underground storage tanks	None observed.
√	Aboveground storage tanks	None observed.
√	Storage areas (including empty drum storage)	None observed.
√	Odors	None observed.
√	Pools of liquids (including standing surface water)	None observed.
√	Electrical or hydraulic equipment suspected to contain PCBs	None observed.
√	Hazardous substances and petroleum products in connections with identified uses	None observed.

Checked	Observations	Remarks
√	Hazardous substances and petroleum products in connections with unidentified uses	None observed.
√	Stained soils and pavement, corrosion and degradation of floors and walls	None observed.
√	Drains and sumps	None observed.
√	Pits, ponds, and lagoons	None observed.
√	Surface drainage pathways	No pathways onto or off of Property.
√	Stress vegetation (from something other than insufficient water)	Some stressed vegetation on margins of Corridor. Minimal growth is present on the grade of the former railroad.
√	Solid waste and wastewater	None observed.
√	Septic system	None observed.
√	Potable water supply	None observed.
√	Wells (including dry wells, domestic and irrigation wells, injection wells and monitoring wells)	None observed.

4.3 Exterior Observations

The periphery of the property was observed to evaluate evidence of an avenue for the disposal of hazardous substance or petroleum products. No pathway on to the Corridor was observed.

4.4 Interior Observations

There are no structures on the Property.

5 Interviews

5.1 Interview with Owners

The City of Porterville was sent an interview questionnaire to complete and to forward to other owners of the Corridor parcels. A response was not received as of the date of publishing this report.

5.2 Interview with Site Manager

Not applicable as there is no site manager.

5.3 Interviews with Occupants

Not applicable as there are no occupants.

5.4 Interviews with Local Government Officials

Local agencies were contacted for records and not interviewed.

5.5 Interviews with Others

No interviews with others were conducted.

6 Findings and Opinion

The Corridor Property was a railroad line since at least 1891. The tracks are no longer present on the Corridor, but the railroad grade is still apparent. The area surrounding the Corridor has historically been agricultural, industrial, and residential.

The historical use of the Property as a railroad represents a BER depending on intended future use for the Property. Soils of rail corridors have likely been impacted in some manner by the maintenance and use of the corridor. Arsenic is often the primary contaminant of concern from railroads, but impacts can also include hydrocarbons from various sources and other heavy metals. Additionally, because of the prevalence of agriculture and agricultural chemical storage on and around the Property, agricultural pesticides may represent a BER at the site depending on intended future use for the Property. Organochlorine pesticides (OCP) in particular are environmentally persistent and relatively immobile in soil and many present a human health risk above certain concentrations. Residual concentrations of some banned OCPs have been detected above regulatory criteria in areas where they were applied at manufacturer's application rates. A sampling and analyses program should be developed and executed if specific information is required on the presence or absence of pesticides, arsenic, hydrocarbons, heavy metals, or other contaminants.

Records review revealed many listing in the vicinity of the Corridor on environmental databases searched in the EDR Area / Corridor Report. The majority of the listings do not indicate contamination or have been closed by a regulatory agency. The closed sites immediately adjacent to the Corridor are considered HRECs. A few sites near the Corridor have recorded contamination and have not been remediated or are currently undergoing remediation. Though the records reviewed have not specifically investigated the Corridor Property, the proximity of the Porterville PCE Plume, Porterville MGP, Bobs Petro Products, and the Eyster Property lead them to be considered as a REC for the Corridor.

Site reconnaissance revealed that the Property is currently unoccupied. The railroad grade is still apparent, and no vegetation is present on the path of the former tracks. Many industrial and commercial businesses line the Corridor.

An interview questionnaire was sent to the City of Porterville to complete and to forward to other owners (Union Pacific Railroad, San Joaquin Railroad, and the Porterville Historical Museum) of the Corridor parcels. A response was not received as of the date of publishing this report. The City provided a quitclaim deed for the Corridor Property. The deed shows that there are land use restrictions placed on each of the Corridor parcels included in the deed.

7 Data Gaps

A data gap is a lack of or inability to obtain information required by ASTM E1527-13 despite good faith efforts to gather such information.

Aerial photographs and topographic maps provided were not at an interval of five years. Interviews were not conducted. Interview questionnaires from the User (City of Porterville) and the property owners were not returned.

These data gaps are not suspected to be significant.

8 Conclusions

We have performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM E 1527-13 of the Butterfield Stage Corridor Property in Tulare County, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of RECs in connection with the property except for the following:

- Environmental impacts recorded adjacent to the Property that have not been remediated or are currently undergoing remediation are considered RECs. The sites considered RECs are the Porterville PCE Plume, Porterville MGP, Bobs Petro Products, and the Eyster Property.

In addition, non-scope considerations that do not meet the ASTM definition of a REC include:

- The historical use of the Property as a railroad represents a BER due to the likely presence of arsenic, hydrocarbons, heavy metals, or other contaminants in the soil.

- The potential presence of environmentally persistent agricultural pesticides on the Property represents a BER.

If the presence or absence of impacts from adjacent sites, railroad activities, or agricultural activities is a concern for the intended future use of the Property, a sampling and analysis plan should be developed and executed.

9 Environmental Professional Statement

Provost & Pritchard Consulting Group declares that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in section 312.10 of 40 CFR Part 312.

Provost & Pritchard Consulting Group has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Professional Summary

Darylyn Tachella is an associate geologist at Provost & Pritchard with five years of experience in the field of environmental engineering. She has experience in soil characterization, soil and groundwater sampling, environmental remediation, drainage and percolation investigation, and well installations. She is practiced in project coordination, in-field judgment calls, and report preparation. Her previous project experience includes geologic mapping for gold exploration in Mariposa County, and an undergraduate thesis on magma chemistry of Chaos Crags in Lassen Volcanic National Park.

Relevant Experience

Environmental Site Assessment: Phase I and Phase II, Various Clients, Associate Geologist – Ms. Tachella has conducted various Phase I and Phase II Environmental Site Assessments (ESA). The Phase I work includes historical records search, site reconnaissance, and report preparation. Phase II work includes sampling plans, sample collection, and reporting findings.

Stockton Avenue Rehabilitation Project Initial Site Assessment, City of Ripon, Associate Geologist – Ms. Tachella conducted an Initial Site Assessment (ISA) for the City of Ripon for a street rehabilitation project. The goal of the ISA was to identify the potential for hazardous materials or waste before the rehabilitation project was underway. The scope of work included database and historical records reviews, site reconnaissance, and a report of findings. The report was submitted to Caltrans by the client and subsequently approved.

Colony-Hoff Traffic Signal Project Initial Site Assessment, City of Ripon, Associate Geologist & Project Manager – After the Stockton Avenue ISA, Ms. Tachella conducted and managed another ISA for the City of Ripon for a traffic signal installation project. The goal of the ISA was to identify the potential for hazardous materials or waste before the rehabilitation project was underway. The scope of work included database and historical records reviews, site reconnaissance, and a report of findings. The report was submitted to Caltrans by the client and subsequently approved.

Bridge Rehabilitation Project Hazardous Materials Memo, City of Madera, Associate Geologist – Ms. Tachella prepared a hazardous materials technical memorandum for a bridge rehabilitation project for the City of Madera. The memo provided information on hazardous materials and waste that would potentially be encountered during the rehabilitation project. It also provided recommendations on the management of hazardous materials or waste if encountered or generated.

Former Pacheco Oil Site, Kosmont Companies, Madera County, California, Associate Geologist – Ms. Tachella is assisting with the cleanup services of a former oil site located in Merced County. The project includes groundwater well installation, sampling and reporting, remediation of arsenic and hydrocarbons in the soil and groundwater. Site closure has been requested of the regulator.

Groundwater Recharge Soil Investigation, Various Clients, Associate Geologist – Ms. Tachella has assisted on various soil investigations for siting of groundwater recharge ponds. The work has generally included site selection, soil logging, and reporting findings and recommendations.

Seepage Management for San Joaquin River Restoration Program, United States Bureau of Reclamation, CDM Smith, Merced County, California, Associate Geologist – Ms. Tachella assisted the U.S. Bureau of Reclamation

and the prime contractor staff in seepage management support on the San Joaquin River and bypasses. The scope of work generally includes site evaluations, baseline monitoring, and preliminary and 60% project designs. Specific work has included monitoring of shallow groundwater wells, review of data collection methods reports, agronomic evaluations, preparation of geologic logs and soil sampling from monitor wells and hydraulic conductivity testing, and preparation of appraisal level designs for farms impacted by seepage due to restoration flows.

Wawona Wastewater Treatment Plant, Architectural Resources Group, Yosemite National Park, Associate Geologist – Ms. Tachella assisted on the field investigation for the siting of the treated waste water disposal system. Ms. Tachella was involved with the preliminary soil logging, installation of groundwater piezometers, in-situ percolation testing, and groundwater level data collection.

Crows Landing Industrial Business Park Test Wells, E-Pur, Stanislaus County, California, Associate Geologist – Ms. Tachella assisted with the groundwater supply exploration for a proposed business park near Crows Landing. The work included preliminary hydrogeologic investigation, exploratory drilling, installation of 6 test wells, and water quality and production testing. Ms. Tachella was involved with preliminary research, litholigic logging of exploratory boreholes, and testing of aquifer production and water quality in the test wells.

Well 7 Design, Riverdale Public Utilities District, Riverdale, California, Associate Geologist – Ms. Tachella assisted with the exploration and testing for a municipal well in Riverdale, California. The well was installed to provide higher quality water to the community of Riverdale. This project involved geologic logging of soils, test well installation, zone testing of water quality, and final well installation. Ms. Tachella's responsibilities included geologic logging, construction oversight of the test well, water quality sampling of test well zones, and well pump testing of the final well.

South and Highland Basin, Consolidated Irrigation District, Fresno County California, Associate Geologist – Ms. Tachella assisted with the well pump testing and installation of a well monitoring network. This project involved the evaluation of 75-acre groundwater property for development as a groundwater banking facility. The feasibility study included subsurface geologic investigation, evaluation of source water supply availability, preliminary facility design alternatives, construction cost estimates, banking operation, cost/benefit analysis, baseline groundwater monitoring around the project, establishment of a well monitoring network, Phase I Environmental Assessment, Biological/Cultural Studies, pilot basin infiltration testing, well pump testing, and identification of possible banking partners. As part of the study, the project team presented feasibility study information to the district's Board of Directors and conducted a neighboring landowner meeting.

Local Groundwater Assistance (LGA) Grant Application, Tranquility Irrigation District, Fresno County, California, Associate Geologist – Ms. Tachella assisted with preparation and submission of a grant application to the Department of Water Resources for funding to construct monitoring wells. Funding would be provided through the Local Groundwater Assistance Fund, established by AB 303.

Agricultural Well Conversions, Riverstone Development, Madera County, California, Associate Geologist – Ms. Tachella provided geological support associated with the design and construction of two agricultural well conversions, well pumps and motors, site work, electrical, auxiliary power and controls.

PCE Assessment and Cleanup, City of Merced, California, Associate Geologist – Ms. Tachella is assisting with the quarterly reporting required as part of the PCE (dry cleaning solvent) soil and groundwater cleanup program involving six dry cleaners in the downtown area of the City of Merced. The reporting consists of intensive quality assurance/quality control reviews of data gathered by others, quarterly generation of perchloroethylene (PCE) isopleths and groundwater maps for several identified aquifer zones, and hydrographs for shallow zone wells. Quarterly PCE and groundwater data is analyzed with respect to hydrostratigraphical setting, monitoring well construction details, and historical data to determine trends. The report is prepared on behalf of the City of Merced and is submitted to the Central Valley Regional Water Quality Control Board.

Geologic Mapping, Fremont Gold Mining, Mariposa, California, Consultant – Ms. Tachella worked as an independent geologic mapping consultant for Fremont Gold Mining in Mariposa, California. Responsibilities included exploration planning, geologic mapping, and field documentation.

PROVOST& PRITCHARD
CONSULTING GROUP
An Employee Owned Company

Professional Summary

Stephanie Gillaspy is an assistant engineer and environmental specialist at Provost & Pritchard, with over twleve years of experience in environmental assessment and remediation field activities. She is knowledgeable of regulatory issues with Central Valley cities and counties, the Regional Water Quality Control Board, and the San Joaquin Valley Air Pollution Control District. Ms. Gillaspy has completed over 100 Phase I and Phase II environmental site assessments, and has field experience in soil and groundwater assessment and remediation, and planning experience in the preparation of site plan review documents.

Relevant Experience

Phase I ESA, Academy Ranch, Clovis, California, Project Manager – Ms. Gillaspy conducted a Phase I ESA for property located southeast of McKinley Avenue and Academy Avenue in Fresno County. Academy Ranch is in the process of purchasing the parcel and was in need of a Phase I.

Phase I ESA for Future Municipal Well Sites, City of Fresno, California, Project Manager – Ms. Gillaspy was responsible for overseeing the preparation of four Phase I ESAs for the City of Fresno's Water Division. The property assessed was for future municipal well sites on San Madele Avenue, Bullard Avenue, Sussex Avenue and Weber Avenue. The San Madele and Bullard Avenue sites contained houses to be demolished if the test well produced sufficient clean water. The houses were in good condition but built in the late 1970s, so lead-based paint and asbestos-containing materials testing was recommended before the demolition of the house. The Sussex Avenue property was an empty lot between businesses. The Weber Avenue property was a gas station constructed in the 1960s. No records indicated that the underground storage tanks were removed. Ground Penetrating Radar (GPR) was recommended to locate underground storage tanks. All four Phase Is were completed within a short time frame and under budget.

Phase I ESA for Treat Property, City of Merced, California, Project Manager – Ms. Gillaspy was responsible for the preparation of an All Appropriate Inquiry (Phase I ESA) for property the City of Merced was in the process of purchasing for the expansion of Yosemite Avenue at the intersection with Highway 59. Multiple APNs assigned to the property over the years made it difficult to track down historical records. An unused water well was located onsite and recommended to be properly destroyed prior to construction of the road expansion.

Phase II & Phase III PCE Remediation System Optimization and Groundwater Monitoring and Reporting in Downtown Turlock, City of Turlock, California, Environmental Specialist – Ms. Gillaspy provided environmental services for this optimization project in order to increase the rate of removal of perchloroethylene (PCE) contamination in the groundwater by increasing the pump rate of the City's existing remediation system's shallow tray air stripper. Further, this project includes associated groundwater monitoring over a three-year period to assess the effectiveness of the remediation system by measuring concentrations of PCE, TCE, and other related breakdown chemicals within downtown Turlock. Provost & Pritchard is currently in the second year of this three-year project.

Phase I ESA along Dakota Avenue, Community Regional Medical Center, Fresno, California, Project Manager – Ms. Gillaspy was responsible for conducting a Phase I ESA at 1925 E. Dakota Avenue on the Community Regional Medical Center campus in Fresno. Historical records indicated a UST was onsite in the 1970's but further investigation found the UST had been properly removed with clean soil samples. An additional lead based paint and asbestos containing materials survey was recommended based on the age of the property.

Phase I & II Environmental Site Assessments, Industrial Building, Fresno, California, Project Manager – Ms. Gillaspy led the project team responsible for the completion of Phase I and II ESAs of a 50,000-square-foot industrial property located adjacent to railroad tracks in Fresno, California. The owner provided Phase I ESA and Phase II ESA to our client which identified RECs on site that appeared to warrant further investigation. Additional areas of concern were identified after a site visit and review of the Phase I and II. Ms. Gillaspy recommended that soil samples up to 20 feet below ground surface should be collected and analyzed for petroleum hydrocarbons and Stoddard solvents at several locations due to the potential of releases based on the historical use and businesses identified in the area. A lead-based paint and asbestos containing materials survey were also recommended and completed within the project timeline. Additional investigation into the onsite underground storage tank (UST) was completed by discussion closure options with the Fresno County Environmental Health Department. Based on the location of the UST, the best option for abandonment was in-place closure once it has been verified the soil was clean surrounding the UST. Geoprobe drilling down to 20 feet below ground surface soil samples were collected for this investigation. Chemicals of concerns were identified in additional locations identified in the Phase II ESA provided by the owner. Upon receiving the laboratory results for the drilling, our client decided against purchasing the property due to future liability.

Phase I Environmental Site Assessment, Gateway Village, Madera, California, Environmental Specialist – Ms. Gillaspy was responsible for the completion of an environmental site assessment for a proposed master-planned community covering over 2,000 acres.

Phase I Environmental Site Assessment, Ito Packing Company, Reedley, California, Environmental Specialist – This project consisted of completing an environmental site assessment for an existing packing plant. Historical underground storage tanks were removed prior to permits. Ms. Gillaspy worked closely with the client to complete the report in a short timeframe.

Phase I Environmental Site Assessment, Kings River Resorts, Inc, Kingsburg, California, Environmental Specialist – Ms. Gillaspy completed an environmental site assessment for an existing recreational vehicle park along the Kings River. She worked closely with the client to complete the report in a short timeframe.

Kings County Site Plan Review, Southeast Ranch, Stratford, California, Environmental Specialist – Ms. Gillaspy was responsible for project planning and completing a site plan review application to Kings County standards. She also completed the report of waste discharge for the client for submittal to the Regional Water Quality Control Board. A preliminary nutrient management plan and a waste management plan were completed. The project included perched groundwater constraints.

Kings County Site Plan Review, John L. Fragoso & Sons Dairy, Hanford, California, Project Manager – Ms. Gillaspy was responsible for project planning and completing a site plan review application for an expanding dairy to the Kings County standards. She also completed the report of waste discharge for the client for submittal to the Regional Water Quality Control Board. During this project, a preliminary nutrient management plan and waste management plan were completed.

Water Supply Study, White Paper, City of Clovis, California, Project Engineer – Ms. Gillaspy assisted the project manager in completing a water supply study report for the City of Clovis. Project responsibilities also included the preparation of Power Point slides for presentations to the City.

Report of Waste Discharge, Riverstone (formerly known as Gateway Village), County of Madera, California, Project Engineer – Ms. Gillaspy prepared a report of waste discharge for submittal to the Regional Water Quality Control Board. The report included water balance calculations to determine nutrient loading, percolation rates, and storage capacities.

Groundwater Monitoring Network Plan, Ito Packing Company, Reedley, California, Project Engineer – Ms. Gillaspy worked with the Regional Water Quality Control Board to obtain approval for a monitoring well network plan for land disposal area. The project included the installation of three monitoring wells on-site, and completion of a post-construction report for the monitoring well.

Phase II Environmental Site Assessment, Rosendahl Dehydrator, Caruthers, California, Environmental Specialist – This project consisted of the completion of an environmental site assessment and cleanup of diesel impacted soils. Ms. Gillaspy's project responsibilities included coordination with the Regional Water Quality Control Board to complete cleanup of the site in less than two months.

Report of Waste Discharge, Batth Dehydrator, Caruthers, California, Project Manager – Ms. Gillaspy provided regulatory compliance assistance to the client in a short timeframe in order to guarantee financing for purchase of the dehydrator. In order to achieve this, a new waste discharge permit was needed. While working with the Regional Water Quality Control Board, the report of waste discharge was deemed complete within 30 days of submittal.

Report of Waste Discharge, Sunview Cold Storage, Kern County, California, Project Manager – Ms. Gillaspy was responsible for Regional Water Quality Control Board compliance for adding a reverse osmosis unit to a system operation. The report included water balance calculations to determine nutrient loading rates for associated cropland.

Groundwater Monitoring Network Plan, Del Rey Packing, Del Rey, California, Project Manager – Ms. Gillaspy worked with the Regional Water Quality Control Board to obtain approval for a monitoring well network plan for a land disposal area. The project included installation of three monitoring wells on-site and completion of a post-construction report for the monitoring well.

Kings County Site Plan Review, David teVelde Dairy, Hanford, California, Project Manager – Ms. Gillaspy was responsible for project planning and completing a site plan review application to the Kings County standards. During this project, Ms. Gillaspy completed an updated a report of waste discharge for the client for submittal to the Regional Water Quality Control Board. The project included 100-year flood zone issues. A preliminary nutrient management plan and waste management plan were also completed.

Kings County Site Plan Review, Lakeview Calf Ranch, Hanford, California, Project Manager – Ms. Gillaspy was responsible for project planning and completing a site plan review application to the Kings County standards. As part of this project, a report of waste discharge was completed for client for submittal to the Regional Water Quality Control Board. A preliminary nutrient management plan and waste management plan were also completed.

Underground Storage Tank Cleanup, Redevelopment Agency, City of Merced, California, Project Manager – This project consists of the clean-up of impacted groundwater and soil, and maintenance of the soil vapor extraction (SVE) system operation. Ms. Gillaspy has been responsible for coordination of the installation of a new ozone sparge system with multiple subcontractors. In addition, she has maintained constant contact with the client throughout the process, and performs quarterly groundwater monitoring and prepares reports for the Regional Water Quality Control Board. Ms. Gillaspy also prepared a feasibility study, a final remediation plan, and remediation system updates.

PCE Remediation and Reporting, Seven Dry Cleaners, City of Merced, California, Project Manager – Based on the Regional Water Quality Control Board settlement agreement with the City of Merced, seven different dry cleaner sites were evaluated to determine the level of importance to remediate the impact of perchloroethylene (PCE). Working closely with the City of Merced's annual work plan, Parkway Cleaners was determined to be the highest importance for remediation. The SVE system was upgraded to include more vapor wells, and an ozone sparge system was installed. The SVE wells were added to the operation in December 2009, and ozone sparge wells will be added accordingly. Quarterly monitoring reports are also coordinated and submitted to the Regional Water Quality Control Board.

Professional Summary

Dave Norman has over 30 years of experience providing environmental and engineering consulting services for clients throughout California. His expertise encompasses regulatory compliance, site assessments, human health risk assessments, and remedial action. In addition, he has managed a wide range of Brownfields and redevelopment projects for many small to medium-sized cities in the central valley. Brownfields projects have ranged from significant gasoline impacts requiring assessment and remediation to the simultaneous assessment and cleanup of seven dry cleaner sites. Mr. Norman has extensive experience with a wide range of environmental assessment and compliance for project sites such as processing locations for a large winery organization, former firing ranges, burn dumps, and landfills. He also has experience with civil and development projects including pavement assessments and management plans for Yosemite National Park.

Mr. Norman has represented clients in front of city councils and county counsels, school boards, and state and federal agencies such as the U.S. Environmental Protection Agency, Regional Water Quality Control Board (RWQCB) and California Department of Toxic Substance Control (DTSC).

Relevant Experience

Phase I, Phase II and Risk Assessments

Phase I Environmental Site Assessment for San Madele Well Site, City of Fresno, California, Technical Reviewer – Mr. Norman provided technical oversight and reviews for the preparation of a Phase I environmental site assessment (ESA) for the City of Fresno's Water Division. The property assessed was for a new domestic well site on San Madele Avenue. The house was to be demolished if the test well drilled produced sufficient clean water. Recommendations were given based on the plan for the house. The house was in good condition but built in 1979, so lead-based paint and asbestos containing materials testing was recommended before the demolition of the house. The Phase I ESA was completed within a short timeframe and under budget.

Phase I & II Environmental Site Assessments for Crop Dusting Facility, Western Fresno County, California, Technical Reviewer – Mr. Norman is currently providing technical oversight and reviews for a Phase I ESA and a limited Phase II ESA for a western agriculture aviation property in western Fresno County. The property includes a crop dusting airport and runway. Based on the history of the site, soil samples were taken in areas of potential contamination. Significant detections for Toxaphene and Endosulfan were found in various places. Price estimates were calculated to estimate the approximate cost to clean up the contaminants of concern.

Phase I & II Environmental Site Assessments, Marl Springs, Mojave National Preserve, Mojave, California, Project Manager – Mr. Norman was responsible for completing a Phase I and II ESA and a human health risk assessment of a historic mine. The Marl Springs area of the Mojave National Preserve is the site of the only potable water supply for over 100 miles. The spring was used by early California explorers and mule trains to rest and water horses. Marl Springs is also the site of historic gold and silver mining. The Mojave National Preserve discovered that lead and other heavy metals were present in elevated concentrations requiring further action. The main concerns were whether the concentrations were a human or ecological risk to visitors and

the endangered desert tortoise that occupied the park. A human health risk assessment was conducted. In addition, a visitor study to evaluate the visitor travel patterns through the area was conducted. The combination of both studies was used to develop a site specific exposure scenario which showed that the exposure thresholds for lead and other heavy metals were below human health risk levels, and the ecologic risk was low for the desert tortoise and other animals because the limited uptake of metals by native plants was insignificant.

Hazardous Waste Evaluations, Red Fir Maintenance Facility, Sequoia National Park, California, Project Manager – Mr. Norman conducted several soil assessments at the Red Fir facility in support of a waste management program to evaluate potential locations for historic dumping of waste chemicals and hydrocarbons. As a result of the assessments, the area was cleared of potential remediation or other actions.

Phase II Environmental Site Assessment, Health Risk Assessment and Site Closure, Zymex Industries, Merced, California, Project Manager – Zymex Industries was interested in purchasing a parcel of land at the Airport Redevelopment Business Park from the City of Merced to construct a new tomato processing plant. The parcel and surrounding area was the location of the former Merced Rod and Game Club. For over 50 years, skeet and trap shooting was conducted at the site. Elevated concentrations of lead from the accumulations of lead shot and bullets were detected at the site after the City had conducted several remediation efforts. Mr. Norman assisted the client with formulating an agreement with the DTSC to provide oversight for a self-directed assessment, human health risk assessment and site closure through the department's voluntary cleanup program. Over 75 samples were collected and analyzed for lead, nickel and other compounds associated with clay pigeons and ammunition. On the basis of the results, a human health risk assessment was prepared finding no significant increase in risk. The DTSC issued a site closure letter free of title restrictions and the tomato packing plant was constructed.

Pollution Prevention Planning, Sequoia and Kings Canyon National Park, California, Project Manager, Lead Technical Writer – For this project, Mr. Norman focused on documenting and evaluating the waste streams for the Sequoia and Kings Canyon National Parks and developing waste minimization strategies, recycling opportunities and waste reuse plans. All of the parks' facilities including maintenance, water treatment and wastewater treatment facilities, and former landfill sites were reviewed for chemical and non-chemical waste. The project resulted in the publishing of park-wide Pollution Prevention Opportunity Assessment, and the implementation of new waste minimization programs including a one-pound propane cylinder disposal education program.

Total Petroleum Hydrocarbon Soil Assessment, Sequoia National Park, Crystal Cave, California, Project Manager– Crystal Cave is one of many naturally sensitive caves located in the Sequoia and Kings Canyon National Parks, and is one of only two open to the public for guided tours. In the early 1900s, the park installed a generator to provide electric power to a lighting system. Due to its remote location and difficult access all fuel was hand carried to the site. In the 1940s, an in-ground power line was installed and the generator was removed from service but left in place. Over the years the generator deteriorated and the remaining fuel and oil leaked from its tanks. In 2005, the park dismantled the generator and removed it by hand. During the process impacted soil was encountered underneath and surrounding the generator. Mr. Norman assisted the park in assessing the extent of impact and negotiated with the local county to allow for the impacted soil to be removed slowly (bucket by bucket) during the closed season and stored to later use in asphalt for park road projects. Over two closed (winter) seasons the soil was removed and the project was closed by the county. All equipment, including waste, samplers and replacement soil, was hand carried to the site in buckets with a 20 pound weight limit.

Environmental Assessment & Remedial Services, City of Merced, California, Principal-in-Charge – Mr. Norman is responsible for overseeing environmental assessment and remedial services for the City of Merced's R Street leaking UST assessment, remediation and site closure project. Project responsibilities include project and funding management (Brownfields Cleanup Grant, UST Fund and city redevelopment funds), quarterly monitoring and reporting, communication with the RWQCB, preparation of a focused feasibility study, groundwater monitoring, and the preparation of the final remedial plan (FRP) and implementation of the selected remedial remedy for the project site. The site is comprised of two gasoline stations and a total petroleum hydrocarbons (TPH) and methyl tert-butyl ether (MTBE) plume over half a mile in length. The remedial action includes the installation and operations of two soil vapor extraction (SVE) and ozone injection systems.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

NPL:
EPA ID: CAD048645444
Summary: Conditions at proposal October 15, 1984): Beckman Instruments manufactures electronic equipment on a site near Porterville, a small rural community in Tulare County, California. A number of solvents and electroplating chemicals are used in

EPA ID: CAD048645444
Summary: the facility s operations. A solar evaporation pond is part of the facility s waste water treatment system. The pond s liner developed a leak, allowing waste water containing heavy metals and volatile organic compounds to enter the soil.

EPA ID: CAD048645444
Summary: The liner and contaminated soil were removed from the site. Organic chemicals similar to those disposed of in the pond have been found in the upper aquifer underlying the area. Beckman has provided bottled water to the 750 residents whose wel

EPA ID: CAD048645444
Summary: ls are contaminated. The California Regional Water Quality Control Board is working with Beckman to develop a comprehensive monitoring system to determine the full extent of ground water contamination. Status June 10, 1986): Beckman has

EPA ID: CAD048645444

BECKMAN COULTER, INC. (Continued) **1000271466**

Summary: installed and is operating a ground water extraction and treatment system to control the plume of contamination. The company will also conduct a remedial investigation/feasibility study to determine the need for additional remedial measures.

EPA ID: CAD048645444
Summary: Residents previously using bottled water have been provided with a municipal drinking water supply.

Hazardous Waste Summary:

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT

BECKMAN COULTER, INC. (Continued) **1000271466**

FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002850996

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

CLEVENGER FORD BODY SHOP (Continued) **1000985094**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	12-18-2018
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95

MORTON EXPRESS MART (Continued) **S120051956**

	percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 03/27/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. 87 and 91 overfill drop tubes could not be removed during this inspection. Swivel adapters frozen to spill bucket risers. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification. Witnessed testing and verification of 95% shutoff of both 87 & 91 flapper drop tube assemblies - D. Papenhausen

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002806731

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	JA
Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Diesel
Site History:	The site is located in Porterville. The site was donated to Union Pacific Railroad (UPRR) in 1888. In 1912 Sanborn Fire Insurance list the occupants as a stone cutting business. In 1925 the maps indicate that Sierra Magnesite Company (Sierra) occupied the northern half and Associated Oil Company occupied the southern half of the site. Sierra ran magnesite furnaces at the site until 1941. Three transformers as well as least five ASTs and USTs were indicated in 1925 maps. Specifically, they note a 14 foot oil tank near the southeast corner of the underground oil tank. In 1950 the American Fruit Growers Company occupied the northern half of the site while Tidewater was added to the Associated Oil Company name. In 1975 Kings Electric Supply Company took over the property. Friends Lumber took over the property in 2005. In 2006 a Phase 1 investigation was performed. A limited Phase II investigation was conducted in early 2007. 28 soil boring locations were sampled for: total extract petroleum hydrocarbons (TEPH), total recoverable petroleum hydrocarbons (TRPH), total petroleum hydrocarbons as diesel (TPHd), volatile and semi-volatile organic compounds (VOCs and SVOCs), metals, and/or polychlorinated biphenyls (PCBs). The preliminary Phase II investigation revealed relatively high concentrations of TEPH in borings near the later discovered concrete-lined vault. In addition concrete and metal debris was found in some of the borings. The results from the soil tests for TEPH showed concentrations of 26,000 mg/kg in some spots. A groundwater sample had a concentration of 120,000 (ug/L) for TPHd with heavier hydrocarbons present. The responsible party has been asked to prepare a report evaluated remedial options for impacted soil and groundwater and to submit a work plan for installation of monitoring wells. As a result of the Phase II investigation, a remedial excavation was completed. An underground concrete vault was discovered. The vault measured 60 feet long by 20 feet wide and 9.5 feet deep. The area around the vault was characterized and the contents of the vault emptied. One of the samples had a concentration of 1,300 mg/kg for TPHg. The sides and bottom of the vault were left in place and the remainder was backfilled with clean fill after boring holes were drilled in the bottom. Impacted soil above 10 feet has been excavated. Petroleum hydrocarbons were not detected in the final groundwater monitoring event. A soil management was prepared in case deep excavations are performed in the future.

File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Diesel, Gasoline, Other Petroleum
Site History:	The Site is located at 11 East Yates Avenue in Porterville on approximately 4 acres. The Site was formerly occupied by Standard Oil Company of California from 1920 to 1979. Petroleum products were known to have been stored and handled there. In 1979, Bob Taylor purchased the property, and operated a petroleum bulk storage plant. In 1997 a site investigation indicated that petroleum had leaked into surrounding soil and to groundwater. In 2002 an extraction treatment system was installed consisting of: a bladder pump, an air compressor, an 85 gallon clarifier tank and three 250 pound activated carbon vessels connected in series. Treated water is disposed of either by pumping to a leach field or used for dust control. There are 7 monitoring wells on Site that are monitored quarterly. On June 11 or 12, 2005 an attempt to steal fuel resulted in approximately 4,000 to 5,000 gallons released into the secondary containment area. Approximately 485 gallons was released into a dirt area to the southwest of the abovegorund storage tanks (ASTs). Approximately 110 cubic yards of soil was excavated as part of the clean up efforts. A soil assessment to determine the impacts was completed in November of 2005. The report indicated that shallow soils to the southwest of the secondary containment area had been impacted by total petroleum hydrocarbons as diesel (TPHD). Accessabile soils to the southwest and south of the above ground storage tanks have been excavated and properly disposed of offsite. Petroleum hydrocarbons including liquid petroleum hydroarbons have been detected in one or more monitoring wells beneath the dispenser area of the site. The Discharger is currently installing an air and nutrient injection system to promote

Violation Date: 01-24-2018
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 01/25/2018. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date.
Violation Division: Tulare County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 15934
Site Name: Caltrans-Porterville
Violation Date: 01-24-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/07/2018. OBSERVATION: Hazardous Waste Storage Shed located along the west perimeter was observed without the following information on the label: Identify Shed as a Hazardous Waste Storage Area, Authorized Personnel Only, Apply appropriate No Smoking Sign. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	12/03/2014
Global Id:	T0610700252
Lead Agency:	CENTRAL VALLEY RWQCB (REGION 5F)
Lead Agency Case Number:	Not reported
Latitude:	36.059733
Longitude:	-119.019892
Case Type:	Cleanup Program Site
Case Worker:	JA
Local Agency:	TULARE COUNTY
RB Case Number:	5T54000255
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Diesel
Site History:	The site is located in Porterville and is currently operated by Silvas Oil. It has been used as a farming fuel supply and distribution center since the mid 1940s. In 1968: a 3000 gallon kerosene UST, a 4000 gallon Stoddard solvent UST, a 4000 gallon diesel UST and a 6000 gallon UST were installed. In 1983 a 550 gallon UST was also installed. They were all removed and replaced with ASTs for farm diesel and other solvents. In conjunction with the UST removal, 3 monitoring wells were drilled. Assessment has been conducted in the vicinity of the fuel drop for the AST's. Soils in the vicinity of the fuel drop were excavated to 20 feet. Soils in the vicinity of the loading rack were excavated. The loading rack and ASTs have been removed from the site. Confirmation sampling was conducted in both excavations. Remaining soil with petroleum hydrocarbons associated with the former fuel drop for the ASTs and the former loading rack meets the requirements of the low threat underground storage tank case closure policy.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

CLEVENGER FORD (Continued) **1000285913**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 430393
Site Name: AT&T California - SD035
Violation Date: 04-10-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 06/25/2019. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by

AT&T CALIFORNIA - SD035 (Continued) **S121783507**

certified UST service technician, and submit documentation to verify compliance. Maintain all testing records for 36 months.

Violation Date:	03-27-2018
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes:	Returned to compliance on 05/31/2018. OBSERVATION: Owner/Operator did not install or maintain spill bucket which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, or is resistant to galvanic corrosion. CORRECTIVE ACTION: Install or repair 91 Premium spill bucket so that it is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and is resistant to galvanic corrosion. Submit verification.

Alias Type: Envirostor ID Number

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 03/05/1998
Comments: The Deed Restriction allows the remediated property to be used for industrial/commercial use only and restricts this property from ever being utilized for the following purposes: residential human habitation, public or private school for persons under 21 years of age, a day care center for children, a hospital for humans.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/12/1998
Comments: CERT -- COMPLETION OF PREPARATION OF CERT PACKAGE WITH DOCUMENTATION - COMPLETION REPORT AND DEED RESTRICTION.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 01/21/1994
Comments: CEQA -- A ngeative declaration, per CEQA, was adopted for a removal action that will be conducted at the Porterville Towne Gas site. Once the removal action is completed, the site will be certified as clean. This is a walk-in business site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 06/30/1993
Comments: Consent Order issued to the Southern California Gas Company for the Porterville Towne Gas site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 01/20/1994
Comments: RAW -- REVIEW AND APPROVAL OF THE REMOVAL ACTION WORKPLAN AFTER COMPLETION OF THE CEQA PROCESS.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/29/1994
Comments: REMOVAL ACTION -- Excavation of 200 cubic yards of polycyclic aromatic hydrocarbon contaminated soil.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

SO CAL GAS/PORTERVILLE MGP (Continued) **S100539048**

Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	09/30/1992
Comments:	PEA completed which determined the lateral and vertical extent of soil contamination on-site. Also, proposed future cleanup alternatives. Approx. cost = $200,000 (RP funded)

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002819969

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

OSHA ESTABLISHMENT
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002678790
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002678790

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 170150
Site Name: Walmart Distribution Center # 6021
Violation Date: 05-17-2018
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 06/27/2018. OBSERVATION: Owner/Operator did not install or maintain spill bucket which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, or is resistant to galvanic corrosion. CORRECTIVE ACTION: Install or repair spill bucket so that it is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and is resistant to galvanic corrosion. Submit verification of satisfactory repair and retesting of Diesel spill buckets for USTs 1-4.

Violation Description:	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003.
Violation Notes:	OBSERVATION: Liquid was observed in the [91 Premium Sump, 87 East Sump, 87 East Spill Bucket] and [87 East tank annular]. If water could enter into the secondary containment by precipitation or infiltration, it must be removed and disposed of properly. CORRECTIVE ACTION: Immediately remove this liquid, make a hazardous waste determination per Title 22 hazardous waste regulations, and manage it accordingly. Ensure that the [note which piping, fill, or UDC sump] sump [or tank annular] is maintained free of liquid.

STRATHMORE HANDY MARKET (Continued) **S123512617**

Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verfiy compliance. Maintain all testing records for 36 months. 87 West spill bucket failed 60 minute lake [Truncated]

Registry ID: 110002833159
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002833159

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 217

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 52

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 48

Waste code: D009
Waste name: MERCURY

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110054824080

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 06-19-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

BR'S FOOD MART (Continued) **S121750178**

Violation Notes:	OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Unable to remove drop tube flapper assemblies for 87 and 91 to verify proper depth inside tanks and function. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Ensure that UST service company coordinates followup inspection with this department to witness compliance. Submit verification.

Violations:

Site ID:	358578
Site Name:	SUPER 7 BEER & FOOD, INC
Violation Date:	05-01-2019
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow

SUPER 7 BEER & FOOD, INC (Continued) **S120052417**

to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Unable to inspect both 87 & 91 drop tube flapper assemblies due to unsuccessful attempt to remove connected threaded piping to access drop tubes. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Reschedule overfill prevention inspection with CUPA inspector upon freeing drop tube assemblies. Submit verification.
Violation Division: Tulare County Environmental Health

FINDS:

Registry ID: 110002750194
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002750194

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Type: Cleanup Program Site
Case Worker: CKN
Local Agency: Not reported
RB Case Number: SL205734285
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons
Site History: The Site is located at 914 West Pioneer Avenue in Porterville. In 1956 Rockwell leased the property and beganin operating a facility that manufactured water and gas meters. In 1971, Rockwell purchased the property. Between 1971 and 1982, INCOM used the property for manufacturing of marine cables. In 1983, the property was aquired by Mr. Albert Levinson. Since 2000, the property has been owned by the Porterville Unified School District who currently uses the property as an adult education center. Currently, Rockwell is performing groundwater remediation activities at the Site. Constituents of

INCOM INTERNATIONAL INC (Continued) **1000334124**

concern are chlorinated organic carbons (VOCs) including 1,1,1 TCA. A groundwater extraction system is operating at the site with groundwater extracted from two downgradient wells, treated to remove VOC's, and reinjected on the upgradient site of the facility. A network of over 30 monitoring wells are tested semiannually.

Background Info:	The Beckman Instruments-Porterville facility (Beckman)

BECKMAN INSTRUMENTS, PORTERVILLE PLANT (Continued) **S104156484**

is located near the southern limit of the City of Porterville in south-central Tulare County. Beckman manufactures electronic instruments and printed circuit boards at this facility. Between 1975 and 1983 Beckman discharged its industrial waste stream to a leaking, double-lined solar evaporation pond. In 1983 the leak was identified and the solar pond liner and contaminated soil were removed down to groundwater and downgradient groundwater monitoring was initiated. Chemicals of concern identified in groundwater include, trichloroethylene (TCE), 1,1,1-trichloroethane (TCA), 1,1- dichloroethylene (DCE), 1,1- dichloroethane (DCA), and Freon 113 and in soil is lead (Pb).
The principle route of exposure and accompanying risk have been mitigated by supplying residents with drinking water and institutional controls on the two mile long plume area.
In March 1985, DTSC placed the site on the State Superfund list. The site was added to the Federal NPL in June 1986. The RI/FS were completed March 1989, and EPA's Proposed Plan was issued in June 1989. The Record of Decision (ROD) was signed by EPA in September 1989. An Order for site-wide remediation became effective in December 1990.
Beckman conducted a Pb soil removal action in March 1990. Beckman requested and was granted permission to shut-down both portions of the upper aquifer pump and treat program in January 1990. Continued quarterly groundwater sampling is required. Lower aquifer/upper aquitard pilot studies were initiated by the PRP during August 1990. A Remedial Action Workplan adequate for a 106 Order was approved by EPA in September 1990. Characterization and pilot studies for lower aquifer and aquitard pump and treat were conducted during the last half of 1990.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/28/1993
Comments: CERT -- Certification of Final Remedial Actions at the site was completed on 5/26/93. Lead contaminated soils were excavated and disposed off-site in 1990. The 2-mile long VOC contaminated upper aquifer plume was remediated between 1985 and 1990. The lower aquifer/upper aquitard groundwater pump and treat and monitoring systems were completed earlier this year and are currently in the Operations & Maintenance mode which will continue for approx. 25 years. Groundwater monitoring of the entire aquifer system at this site will continue to assure system effectiveness and ongoing complian 18 cubic feet of lead contaminated soils were disposed. 3.5+ billion gallons of groundwater treated to date. Approx. cost for remediation = $17 million.

Completed Date: 04/28/1983
Comments: Facility identified from County Health Dept tip.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedy Constructed: Operating Properly & Successfully
Completed Date: 01/27/1993
Comments: FRA GW was designed to remediate the Lower Aquifer contaminant plume as well as portions of the Upper aquitard directly under the facility. Upper Aquifer remediation was completed in 1990. The FRA includes 10 additional extractio wells, four additional monitoring wells and a pipeline to connect the extraction wells to the existing six well system Airstripping is used for treatment with discharge to on- property infiltration basins. System effectiveness will be monitored over the life of the project (+20 years) with contingencies in place to assure full remediation. Approx. cost of FRA = $1.5 million (PRP funded)

CA BOND EXP. PLAN:
Reponsible Party: NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: Beckman has funded all characterization and remedial actions accomplished to date. EPA is funding oversight activities. The company has indicated continuing interest and responsibility for the project up to final cleanup. State Bond monies may be needed for oversight work. The Department has budgeted $100,000 for oversight. If Bond monies are expended, the Department will undertake appropriate cost recovery actions.
Site Description: Beckman is an electronic circuit board manufacturing facility. Leakage from a lined waste disposal pond resulted in contamination of the ground water.
Hazardous Waste Desc: Approximately 20 organic chemicals have been found in shallow ground water downgradient from the Beckman evaporation pond. Of these chemicals, four were chosen as "indicator" compounds: 1,1 - dichloroethylene; 1,1 - dichloroethane; 1,1 - trichloroethane and trichlorotrifluoroethane.
Threat To Public Health & Env: The solvents migrate readily through soil and into the ground water. Several hundred shallow, domestic water wells have been abandoned and/or destroyed. Affected homes have been connected to the municipal water supply system, thus remediating any short-term impacts. There is a continuing threat that contaminated shallow ground waters may impact the lower lying regional aquifer of high quality water.
Site Activity Status: DHS and the RWQCB have been coordinating efforts with Beckman involving remedial investigation and cleanup actions since 1983. The evaporation pond responsible for the contamination plume has been partially closed. The pond and liner system have been excavated and transported to a Class I disposal site. DHS and EPA are proceeding with RCRA closure activities. Beckman has connected all residences with domestic wells impacted by the plume to the City of Porterville’s water system. Beckman has constructed over 180 monitoring wells and piezometers to define the plume. Extraction wells have also benn constructed and are operational. The wells have successfully contained forward migration of the plume. Extracted ground water is processed throughair stripping towers prior to spray irrigation disposal to land. County air pollution and RWQCB permits have been developed to regulate this remediation program. EPA has signed a consent order with Beckman for completion of the remedial investigation/feasibility study.

File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Sediments, Soil, Well used for drinking water supply
Potential Contaminants of Concern:	Other inorganic / salt
Site History:	Historical discharges of highly saline vegetable processing wastewater to the former ponds caused impacts to the beneficial uses of the underlying high quality groundwater in the area. Analytical results of groundwater samples taken in 2008 indicate that impacted groundwater beneath the Site has electrical conductivity (EC) values that range up to 5,500 micromhos per centimeter (a%mhos/cm) and chloride concentrations that range up to 1,400 milligrams per liter (mg/L). Migration of contaminants in groundwater has resulted in a saline plume extending at least 2,300 feet downgradient to the west, impacting several domestic supply wells. Twelve groundwater monitoring wells (MW) currently exist (MW-1, MW-3, MW-4, MW-5, MW-6, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, and MW-13). MW-13, upgradient of the Site, is considered representative of background water quality with an EC value of 630 a%mhos/cm, and a chloride concentration of 15 mg/L.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Contact: Stephanie Gillaspy

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Provost & Pritchard Eng. Group were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

PO # NA

Project 1016-20-001 ESA

* Environmental Data Resources, Inc. has been instructed by Provost & Pritchard Eng. Group to print ONLY the Sanborn Maps for the years listed below:

1962 (8)	1896 (2)
1956 (8)	1891 (2)
1950 (8)	
1932 (1)	
1925 (7)	
1923 (1)	
1912 (7)	
1906 (6)	

Total Maps: 50

Sanborn® Library search results

Certification #: FF7D-4347-8356

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Provost & Pritchard Eng. Group (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. Butterfield Stage Corridor

May 5, 2020

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Tulare County, California, Central Part
Survey Area Data: Version 13, Sep 16, 2019

Soil Survey Area: Tulare County, Western Part, California
Survey Area Data: Version 13, Sep 16, 2019

Your area of interest (AOI) includes more than one soil survey area. These survey areas may have been mapped at different scales, with a different land use in mind, at different times, or at different levels of detail. This may result in map unit symbols, soil properties, and interpretations that do not completely agree across soil survey area boundaries.

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 5, 2010—Oct 23, 2017

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without

including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Tulare County, California, Central Part

110—Centerville clay, 2 to 9 percent slopes

Map Unit Setting

National map unit symbol: hkd1
Elevation: 300 to 850 feet
Mean annual air temperature: 63 degrees F
Frost-free period: 250 to 300 days
Farmland classification: Farmland of statewide importance

Map Unit Composition

Centerville and similar soils: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Centerville

Setting

Landform: Alluvial fans, terraces
Landform position (two-dimensional): Footslope
Landform position (three-dimensional): Base slope
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Alluvium derived from granitoid

Typical profile

A - 0 to 18 inches: clay
C - 18 to 37 inches: sandy clay, clay
C - 18 to 37 inches:

Properties and qualities

Slope: 2 to 9 percent
Depth to restrictive feature: 20 to 40 inches to paralithic bedrock
Natural drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum in profile: 5 percent
Salinity, maximum in profile: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water storage in profile: Moderate (about 7.8 inches)

Interpretive groups

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Provost & Pritchard Eng. Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

SCOPING MEMORANDUM

TO:	Dawn E. Marple, Principal Planner Provost & Pritchard Consulting Group 130 North Garden Street Visalia, CA 93291	Date: Job No:	05/19/2020 2020016
FROM:	Mark A. Weaver, SE		
PROJECT:	City of Porterville Butterfield Stage Corridor Pedestrian Bridge Foundation Type Alternatives Analysis		

INTRODUCTION

The City of Porterville proposes to place a new pedestrian bridge immediately west of the Main Street Bridge over the Tule River in the City of Porterville, along right of way that was previously owned by the Union Pacific Railroad (UPRR). Formerly in this location a UPRR railroad bridge existed across the Tule River; however, this bridge was burned in a fire in 2012 and the City had the superstructure (beams and other supporting members above the foundations) removed. The abutment (the foundations at each end of the bridge) and the piers (foundations that support the bridge within the river) on the north side of Tule River were also removed after the fire, while the southern abutment and southern piers still remain. The intent of this memo is to evaluate whether these existing southern bridge foundations could be incorporated into a new foundation system for the new pedestrian bridge, or whether an all new foundation system would be more economical. For the purposes of this evaluation, the new pedestrian bridge superstructure to be used is assumed to be a prefabricated truss-type pedestrian bridge in the span range of 100'-150' which is the ideal span range for this bridge type and has been previously discussed with the City. The presumed truss type is a Contech Express type bridge with Corten weathering steel with a concrete deck to provide a long service life with minimal maintenance required by the City.

Figure 3 – Site Map

PROJECT CONSTRAINTS

Several project constraints could impact the design of the proposed bridge foundations. The following project constraints were considered in the evaluation of the bridge foundation alternatives:

Hydraulics

The Central Valley Flood Protection Board (CVFPB) floodway maps show a floodway width of approximately 330' measured along the proposed alignment of the bridge. Figure 4 overlays this CVFPB floodway map over recent imagery from Bing. The Federal Emergency Management Agency (FEMA) Flood Insurance Study mapping shows a slightly wider floodway width of approximately 400' with the floodplain extending to approximately 560' measured along the proposed alignment of the bridge. For purposes of this study, it is assumed that the FEMA floodway width will govern which will require a minimum bridge length of 400 feet presuming the abutment fill slopes have negligible impacts on the channel flows within the floodway.

The structure foundations will need to be designed to current scour criteria. Scour is the long term or short term erosion of material within waterways during storm events or due to regional changes in sedimentation such as the cut-off of sediment

Figure 4 – Central Valley Floodway Map

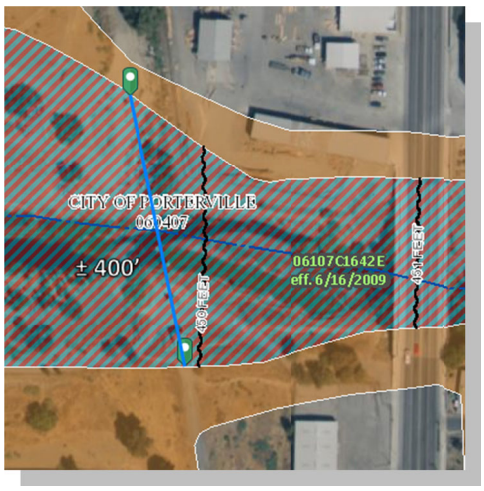

Figure 5 – FEMA Floodway Map

caused by the upstream Schafer Dam (formerly Success Dam). A hydraulic analysis will be required during design and permitting of the bridge to justify to both FEMA and Central Valley Flood Protection Board that their respective floodways and design water surface elevations are not impacted by the proposed bridge, and to determine appropriate scour design parameters.

Figure 6 – FEMA Floodplain Map

Geotechnical

Geotechnical information was not made available for this project site. However, foundation type and depth for new foundations can be estimated based upon adjacent bridges. Based upon the location of the foundations within the channel it is anticipated that large diameter Cast-In-Drilled-Hole (CIDH) piles will be utilized. We understand that the downstream Jaye Street widening encountered significant constructability issues with the installation of driven piles due to encountering cobbles during construction. The use of large diameter CIDH piles could potentially mitigate removal of cobbles that are assumed to also occur in this area. A geotechnical investigation will be required during design to provide foundation design criteria as well as seismic design parameters for use in the foundation and bridge design.

Seismic Design

The former UPRR bridge was constructed around 1890. Seismic design of bridge superstructures and foundations has been developed significantly since then. The existing foundations would be required to meet seismic demands in accordance with Caltrans Seismic Design Specifications. Given that the as-builts are not available from the City for the former UPRR bridge, the buried foundations would need to be uncovered to determine the type of foundation and the adequacy of the foundations to meet current design standards. Testing would likely include coupon testing of the steel, ground penetrating radar testing to determine the location and size of reinforcing steel and coring of the concrete to determine its strength. The labor and equipment required to perform these procedures would add significant cost to the project. In addition, if it is established that the existing foundations do not meet code requirements for seismic design, the existing foundations would need to be bolstered or replaced with all new foundations.

Figure 7 – Existing Piers

BRIDGE FOUNDATION ALTERNATIVES CONSIDERED

Based on the above project constraints, the proposed bridge foundation type will consider two alternatives, reusing the existing foundations and constructing new foundations. The alternatives considered are discussed in further detail below:

Alternative 1 – Rehabilitation of Existing Foundations

This alternative proposes rehabilitating the existing bridge foundations to support a new prefabricated steel truss superstructure. The existing foundations consist of four steel encased concrete piers and a concrete abutment on the south side of Tule River. These foundations are approximately 50' apart based on satellite imagery. The original bridge spanned approximately 340', however, the FEMA floodway map requires the south abutment be shifted further south by approximately 50'. In addition, the FEMA floodway map requires approximately 350' from the existing south abutment to the north side of the Tule River. Considering this and that the entirety of both abutments should ideally be outside the floodway, the total length of the bridge required is 420'. Given this required bridge length, using all of the existing foundations would require adding three more piers in both FEMA and CVFPB floodways, potentially leading to permitting issues. In addition, the fixed spacing of the existing foundations would lead to an unsymmetrical span length on the north end of the proposed bridge. Considering these parameters, this alternative proposes only using two of the existing piers: the first and third pier from the existing south abutment. Only adding one more pier would reduce objects within the floodways and potentially reduce permitting issues compared to using all of the foundations. Although the unused piers could remain, it would be recommended to remove them to reduce obstructions in the floodways. This layout would provide two spans of 100' and two spans of 110', which are ideal span lengths for the superstructure in consideration. These span lengths would also provide a more symmetrical bridge than using all of the foundations.

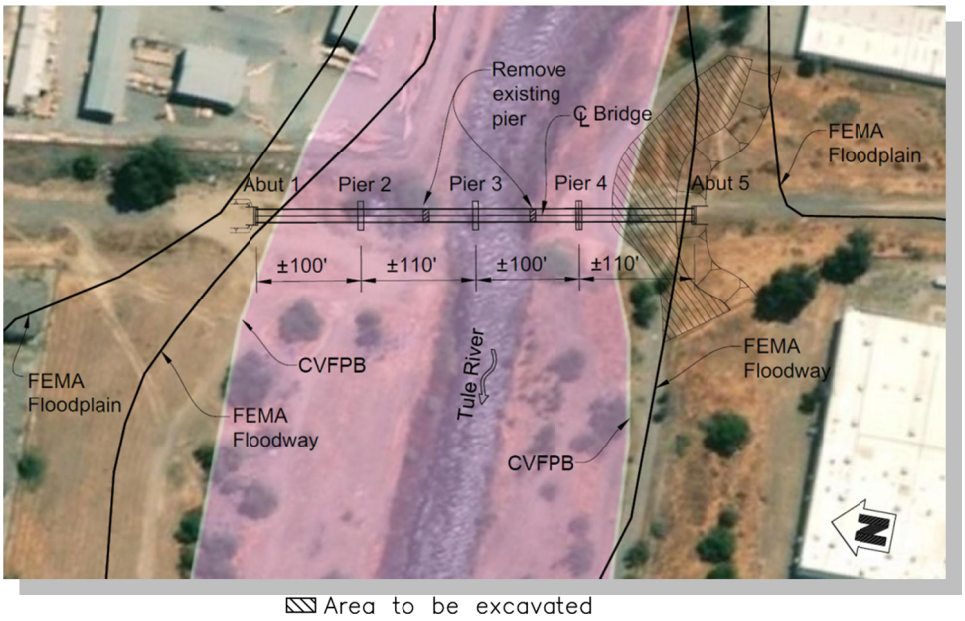

Figure 8 – Alternative 1 Foundation Plan

Field measurements showed that the existing pier width is approximately 11'-6". The typical pedestrian path would be 12' wide, requiring that the existing piers either be widened, or that the path be constrained to 10' wide at the bridge to allow the truss to be supported on the existing piers. Because no information was available from the City on the existing foundations, this alternative assumes an upper bound cost foundation rehabilitation that would include construction of an outrigger bent to extend around each of the existing piers to be incorporated into the project. The CIDH piles and encasing walls will be designed to support the existing pier in addition the truss atop the pier during seismic and scour events. This would both provide an adequate width for a 12' wide pedestrian path as well as potential mitigation for the foundations being found to be inadequate for current design codes. The abutments would consist of a seat abutment supported on small diameter CIDH piles. Two existing piers are not planned to be incorporated into this alternative and

would be demolished. The removal of the piers would likely be viewed positively by both the CVFPB and FEMA as their removal will lessen the hydraulic obstructions within the channel. Removal of the piers would also potentially reduce the required mitigations for the Regional Water Quality Control Board and the Army Corps of Engineers for reduction in State Waters and Waters of the United States resulting from this project. All components of the bridge for this alternative will be designed to the AASHTO Guide Specifications for the Design of Pedestrian Bridges and the AASHTO LRFD Bridge Design Specifications.

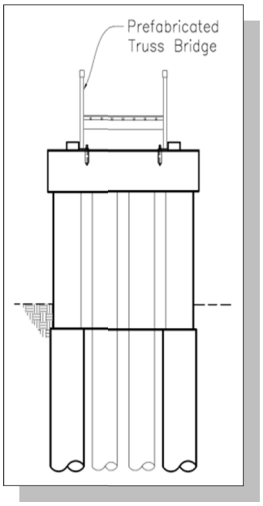

Figure 9 – Alternative 1 Pier Configuration

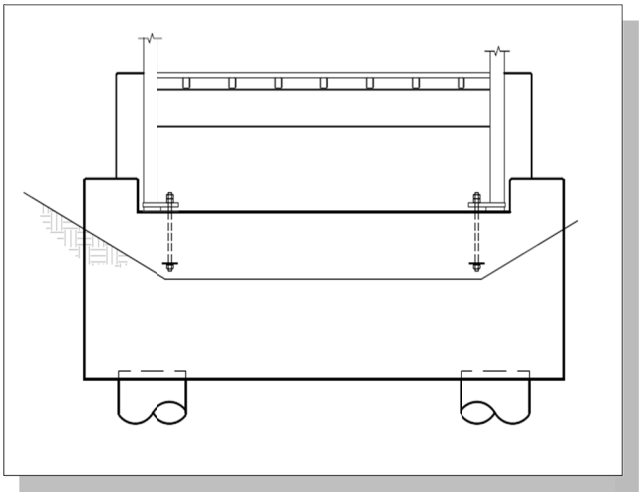

Figure 10 – Alternative 1 Abutment Configuration

Although the outrigger bent would provide the necessary width for the pedestrian path, it would also contribute significantly to the seismic demands of the superstructure by increasing the weight of the foundations. This alternative would also require the excavation of the existing foundations to confirm the depth and presence of pile supports. Even if this excavation is performed, it will be costly and provides no guarantee the foundations will be adequate for current scour and seismic design criteria and is therefore inadvisable.

Our opinion of probable construction cost for this alternative is $4.0 million.

<u>Alternative 2 – New Bridge Foundations</u>

This alternative will construct new bridge foundations to support the superstructure instead of using the existing bridge foundations. The primary benefit of this approach is that it allows for removal of the existing piers which are within both the CVFPB and FEMA the floodways, and placing the new foundations outside of the main channel. To provide the required floodway width for Central Valley and FEMA, this alternative will consist of a three span prefabricated steel truss with span lengths of 140'. This span configuration minimizes the number of piers within the floodways and

Figure 11 – Reference Project

potentially mitigates permitting issues as discussed for Alternative 1.

The superstructure for this alternative will be supported by single column concrete piers on large diameter CIDH piles as well as concrete seat abutments on small diameter CIDH piles. All components of the bridge for this alternative will be designed to the AASHTO Guide Specifications for the Design of Pedestrian Bridges and the AASHTO LRFD Bridge Design Specifications. This alternative is based off of a similar design which Cornerstone completed and has been successfully constructed recently. The use of the single column pier keeps the substructure elements (foundations, column and cap beam supporting the truss) minimal resulting in reduced construction time, less material usage and a lighter structure that does not impart significant seismic demands into the prefabricated truss elements.

Our opinion of probable construction cost for this alternative is $3.1 million.

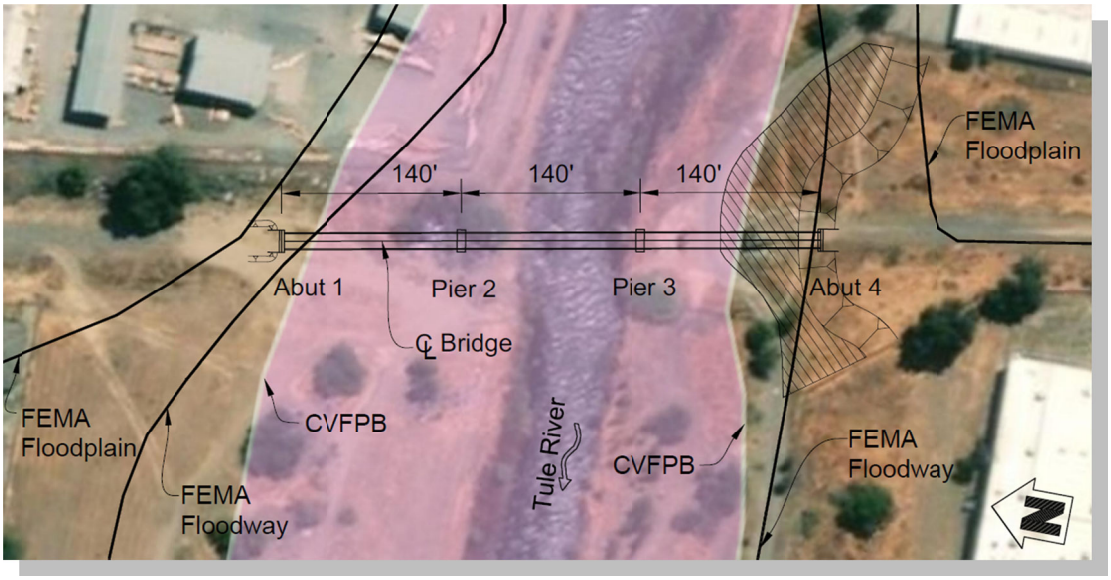

Figure 12 – Alternative 2 Foundation Plan

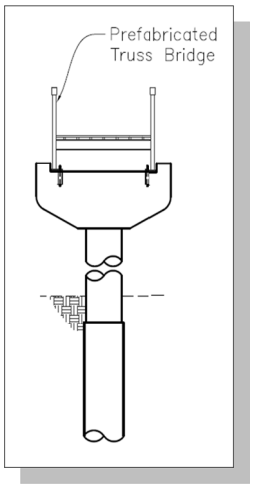

Figure 13 – Alternative 2 Pier Configuration

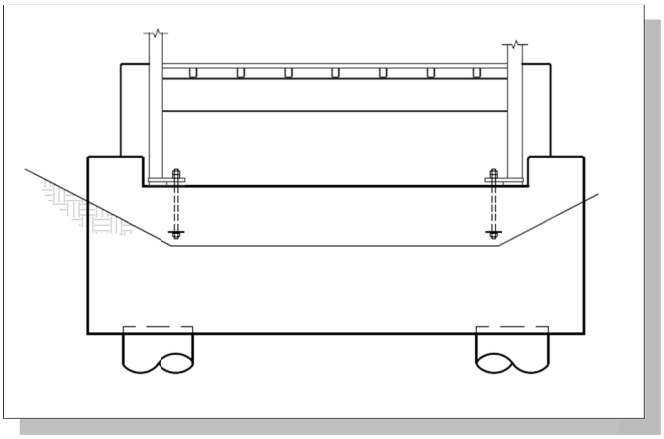

Figure 14 – Alternative 2 Abutment Configuration

RECOMMENDED ALTERNATIVE

Based on the site conditions, the recommended bridge alternative for the Tule River Bridge at Butterfield Stage Corridor consists of a three span prefabricated steel truss bridge using new bridge foundations. The new bridge foundations would consist of concrete single column piers supported on large diameter CIDH piles with concrete seat abutments on small diameter CIDH piles. The existing bridge foundations will be removed. Removing the existing foundations that are directly in the FEMA and CVFPB floodways would potentially mitigate permitting issues. This alternative also would not require the excavation of the existing foundations to determine the depth of the foundations and presence of piles. The equally spaced foundations would provide an aesthetic span configuration to help uphold the historical significance the UPRR bridge brought to the Porterville community.

Our opinion of probable construction cost for the recommended bridge alternative is **$3,100,000**. This does not include preliminary engineering, right of way, or construction engineering costs which are estimated separately in the attachments to this memorandum.

AREA OF POTENTIAL EFFECTS

An area of potential effects (APE) for construction is shown in the attachment 1The distance to the west of the existing foundations would provide adequate space for a span of the truss to be placed prior to installation. The additional distance on either side provides room for construction equipment. The APE extends to the north and south of the existing foundations along the former tracks to allow construction access to the project site. We understand that the City of Porterville owns the right of way at the bridge site, however a temporary easement may be required at the south end of the APE to allow heavy equipment to access the APE without traversing over the existing railroad structure in that location which may be unsuitable for heavy equipment access. This area of potential effects is provided for CEQA and NEPA documentation as applicable.

RESOLUTION NO. ____-2021

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORTERVILLE CONTAINING FINDINGS IN SUPPORT OF APPROVAL OF A MITIGATED NEGATIVE DECLARATION OF ENVIRONMENTAL IMPACT FOR THE PROPOSED BUTTERFIELD STAGE CORRIDOR PROJECT

WHEREAS: The City Council of the City of Porterville at its regularly scheduled meeting of August 17, 2021, conducted a public meeting to consider approval of a Mitigated Negative Declaration, which evaluates the environmental impacts of the development of the Butterfield Stage Corridor that will utilize approximately nine (9) miles of city owned former Union Pacific Railroad right of way between Tea Pot Dome Avenue to the south and Avenue 196 in Strathmore to the north. The project will consist of a Class 1, twelve (12) foot paved, non-motorized multi-use path that, within city limits, will include amenities such as solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. Portions of the path that are outside of city limits, would still include the following amenities: solar lighting, drought tolerant landscaping and trash receptacles. The Mitigated Negative Declaration evaluated the physical elements of the improvements associated the development of the Butterfield Stage Corridor (hereinafter "the project"); and

WHEREAS: At the conclusion of the public hearing, the City Council moved to continue the item to the meeting of October 5, 2021, to allow for additional time to evaluate and respond to comments received by the San Joaquin Valley Air Pollution Control District; and

WHEREAS: On July 15, 2021, the Environmental Coordinator made a preliminary determination that a Mitigated Negative Declaration would be appropriate for the proposed project; and

WHEREAS: The proposed Project is consistent with the goal, policies and land use designation of the Porterville 2030 General Plan. The project will facilitate the achievement of General Plan Implementation Policy PSCF-I-14, to develop a safe and efficient trail network throughout the City that links parks and other key City destinations; and

WHEREAS: The City Council considered the following findings in its review of the environmental circumstances for this project:

1. That a Mitigated Negative Declaration was prepared in accordance with the California Environmental Quality Act (CEQA).

2. The project will not create adverse environmental impacts on biological resources, cultural resources, hazards and hazardous materials or tribal cultural resources when mitigation measures are implemented and standards of the Development Ordinance and General Plan are maintained.

3. As the Lead Agency pursuant to CEQA, the City Council is the decision making body for the consolidation project.

4. On July 15, 2021, the Environmental Coordinator made a preliminary determination that a Mitigated Negative Declaration would be appropriate for the proposed project in light of the studies prepared and with implementation of defined mitigation measures related to Biological Resources, Cultural Resources, Hazards and Hazardous Materials and Tribal Cultural Resources. The Initial Study and proposed Mitigation Measures have been transmitted to interested agencies, groups, and individuals for a 30 day review period from July 16, 2021, through August 16, 2021. One comment was received by San Joaquin Valley Air Pollution Control District, which did not identify new unavoidable significant affects, nor did the comments result in a finding that the proposed mitigation measures in the IS/MND will not reduce potential affect to less than significant.

5. That review of the environmental circumstances regarding this project indicates that no adverse impacts would occur to biological resources, cultural resources, hazards and hazardous materials and tribal cultural resources when the mitigation measures are implemented and standards of the Development Ordinance and General Plan are applied. Mitigation measures to reduce impacts to less than significant were defined and have been incorporated in the Mitigation Monitoring Program which is attached as an exhibit to this resolution (Exhibit A).

6. That the environmental assessment and analysis prepared for this project supporting the Mitigation Negative Declaration reflects the independent judgement of the City of Porterville.

7. The development shall comply with all mitigation measures adopted as a component of the approval of the Mitigated Negative Declaration for this project.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Porterville does hereby approve the Mitigated Negative Declaration prepared for the Butterfield Stage Corridor project, and that the mitigation measures defined in Exhibit A shall be implemented with project execution.

PASSED, APPROVED AND ADOPTED this 5th day of October, 2021.

Chapter 4 Mitigation Monitoring and Reporting Program

This Mitigation Monitoring and Reporting Program (MMRP) has been formulated based upon the findings of the Initial Study/Mitigated Negative Declaration (IS/MND) for the Butterfield Stage Corridor Project in the City of Porterville. The MMRP lists mitigation measures recommended in the IS/MND for the Project and identifies monitoring and reporting requirements.

Table 4-1 presents the mitigation measures identified for the proposed Project. Each mitigation measure is numbered with a symbol indicating the topical section to which it pertains, a hyphen, and the impact number. For example, AIR-2 would be the second mitigation measure identified in the Air Quality analysis of the IS/MND.

The first column of **Table 4-1** identifies the mitigation measure. The second column, entitled "When Monitoring is to Occur," identifies the time the mitigation measure should be initiated. The third column, "Frequency of Monitoring," identifies the frequency of the monitoring of the mitigation measure. The fourth column, "Agency Responsible for Monitoring," names the party ultimately responsible for ensuring that the mitigation measure is implemented. The last columns will be used by the City to ensure that individual mitigation measures have been complied with and monitored.

EXHIBIT A

This page left intentionally blank.

Biological Resources				
BIO-1: WEAP Training				
Prior to initiating construction activities (including staging and mobilization), all personnel associated with Project construction shall attend mandatory Worker Environmental Awareness Program (WEAP) training, conducted by a qualified biologist, to aid workers in identifying special status species that may occur in the Project area. The specifics of this program shall include identification of the sensitive species and suitable habitats, a description of the regulatory status and general ecological characteristics of these species, and review of the mitigation measures required to reduce impacts to biological resources within the work area. A fact sheet conveying this information, along with photographs or illustrations of sensitive species with potential to occur onsite, shall also be prepared for distribution to all contractors, their employees, and all other personnel involved with construction of the Project. All employees shall sign a form documenting that they have attended WEAP training and understand the information presented to them.	Prior to Construction	City of Porterville	City of Porterville	
BIO-2: Operational Hours				
Prior to initiating construction activities (including staging and mobilization), all personnel associated with Project construction shall attend mandatory Worker Environmental Awareness Program (WEAP) training, conducted by a qualified biologist, to aid workers in identifying special status species that may occur in the Project area. The specifics of this program shall include identification of the sensitive species and suitable habitats, a description of the regulatory status and general ecological characteristics of these species, and review of the mitigation measures required to reduce impacts to biological resources within the work area. A fact sheet conveying this information, along with photographs or illustrations of sensitive species with potential to occur onsite, shall also be prepared for distribution to all contractors, their employees, and all other personnel involved with construction of the Project. documenting that they have attended WEAP training and understand the information presented to them.				
BIO-3: Avoidance				
The Project's construction activities shall occur, if feasible, between September 16 and January 31 (outside of nesting bird season) in an effort to avoid impacts to nesting birds.	September 16 and January 31	City of Porterville	City of Porterville	
BIO-4: Nesting Bird Pre-Construction Survey				
If activities must occur within nesting bird season (February 1 to September 15), a qualified biologist shall conduct pre-construction surveys for active nests within 30 days prior to the start of construction. The survey shall include the proposed work area and surrounding lands within 500 feet. If no active nests are observed, no further mitigation is required. Raptor nests are considered "active" upon the nest-building stage.	February 1 to September 15	City of Porterville	City of Porterville	
BIO-5: Pre-Construction Surveys				
A qualified biologist will perform a pre-construction survey of the Project area for roosting bats, American badger, San Joaquin kit fox (200 feet of proposed work) and the western pond turtle within 30 days prior to the start of construction. The biologist shall determine the appropriate construction setback distances or provide instructions to ensure compliance with State and federal laws protecting the species.	30 days prior to the start of construction	City of Porterville	City of Porterville	
Cultural Resources				
CULT-1: Archaeological Remains				
Should archaeological remains or artifacts be unearthed during any stage of Project activities, work in the area of discovery shall cease until the area is evaluated by a qualified archaeologist. If mitigation is warranted, the Project proponent shall abide by recommendations of the archaeologist.	During Construction	City of Porterville	City of Porterville	
CULT-2: Human Remains				
In the event that any human remains are discovered on the Project site, the Tulare County Coroner must be notified of the discovery (California Health and Safety Code, Section 7050.5) and all activities in the immediate area of the find or in any nearby area reasonably suspected to overlie adjacent human remains must cease until appropriate and lawful measures have been implemented. If the	During Construction	City of Porterville	City of Porterville

Mitigation Measure/Condition of Approval	**When Monitoring is to Occur**	**Agency Responsible for Implementing Migigation**	**Agency Responsible for Monitoring**	**Verification of Compliance (name/date)**
Coroner determines that the remains are not recent, but rather of Native American origin, the Coroner shall notify the Native American Heritage Commission (NAHC) in Sacramento within 24 hours to permit the NAHC to determine the Most Likely Descendent of the deceased Native American.				
Hazards and Hazardous Materials				
HAZ-1: Transportation of Hazardous Materials				
Prior to the issuance of a grading permit or the planting of any trees, the City shall ensure that a Phase II ESA shall be conducted to determine the presence or absence of a significant impact to the subject site from hazardous materials. The Phase II ESA may include but may not be limited to the following: (1) Collection and laboratory analysis of soils and/or groundwater samples to ascertain the presence or absence of significant concentrations of constituents of concern; (2) Collection and laboratory analysis of soil vapors and/or indoor air to ascertain the presence or absence of significant concentrations of volatile constituents of concern; and/or (3) Geophysical surveys to ascertain the presence or absence of subsurface features of concern such as USTs, drywells, drains, plumbing, and septic systems. The findings and conclusions of the Phase II ESA shall become the basis for potential recommendations for follow-up investigation, site characterization, and/or remedial activities, if found to be warranted.	Phase II ESA	City of Porterville	City of Porterville	
HAZ-2: Presence of Hazardous Materials				
In the event the findings and conclusions of the Phase II ESA reveal the presence of significant concentrations of hazardous materials warranting further investigation, the City shall ensure that site characterization shall be conducted in the form of additional Phase II ESAs in order to characterize the source and maximum extent of impacts from constituents of concern. The findings and conclusions of the site characterization shall become the basis for formation of a remedial action plan and/or risk assessment.	Phase II ESA	City of Porterville	City of Porterville	
HAZ-3: Presence of Hazardous Materials - Assessment				
If the findings and conclusions of the Phase II ESAs, site characterization and/or risk assessment demonstrate the presence of concentrations of hazardous materials exceeding regulatory threshold	Phase II ESA	City of Porterville	City of Porterville	

Mitigation Monitoring and Reporting Program				
Mitigation Measure/Condition of Approval	**When Monitoring is to Occur**	**Agency Responsible for Implementing Migigation**	**Agency Responsible for Monitoring**	**Verification of Compliance (name/date)**
levels, prior to the issuance of a grading permit, the City shall complete site remediation and potential risk assessment with oversight from the applicable regulatory agency including, but not limited to, the Cal-EPA Department of Toxic Substances Control (DTSC) or Regional Water Quality Control Board (RWQCB), and Tulare County Department of Environmental Health Services. Potential remediation could include the removal or treatment of water and/or soil. If removal occurs, hazardous materials shall be transported and disposed at a hazardous materials permitted facility.				
Tribal Cultural Resources

Visalia, CA 93291

Project: Initial Study and Mitigated Negative Declaration for Butterfield Stage Corridor Project

District CEQA Reference No: 20210751

Dear Ms. Marple:

The San Joaquin Valley Unified Air Pollution Control District (District) has reviewed the Initial Study/Mitigated Negative Declaration (IS/MND) for the project referenced above from the City of Fresno (City). The project consist of the construction of a nine mile long non-motorized use path (Project). The Project is located along the City of Porterville, east of State Route 65, south of Ave 128 and north of Avenue 196.

Project Scope

The Project consists of the development of a transportation facility for non-motorized users to provide safe access to education, retail, job centers, housing, and the city's transit center. The pathway is also expected to include amenities such as solar lighting, drought tolerant landscaping, drinking stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings.

The District offers the following comments:

1) Project Related Criteria Pollutant Emissions

1a) Construction Emissions:

At the federal level under the National Ambient Air Quality Standards (NAAQS), the District is designated as extreme nonattainment for the 8-hour ozone standards and serious nonattainment for the particulate matter less than 2.5

Printed on recycled paper.

microns in size (PM2.5) standards. At the state level under California Ambient Air Quality Standards (CAAQS), the District is designated as nonattainment for the 8-hour ozone, PM10, PM2.5 standards.

Although Project construction air emissions are short-term emissions generated from construction activities such as mobile heavy-duty diesel off-road equipment and are determined to result in a less than significant impact on air quality, the District recommends the below measure be considered for the Project.

Recommended Measure: To reduce impacts from construction-related diesel exhaust emissions, the project should utilize the cleanest available off-road construction fleets, as set forth in §2423 of Title 13 of the California Code of Regulations, and Part 89 of Title 40 Code of Federal Regulations.

2) Health Risk Assessment

The IS/MND states that, "the Project would have a less than significant impact related to exposure of sensitive receptors to substantial pollutant concentrations" (page 15) based on the Project's related construction and operational emissions having a less than significant impact. The District would like to clarify that although the Project's criteria pollutant emissions from construction and operation will not exceed the District's significance thresholds for, the Project may have the potential to result in health impacts to nearby sensitive receptors (for example, residences, businesses, hospitals, day-care facilities, health care facilities, etc.). An assessment on potential health risk impact is based on a Prioritization and/or a health risk assessment (HRA) and not on whether or not the Project's emissions would exceed the significance thresholds for criterial pollutants. To determine potential health impacts on surrounding receptors, a Prioritization and/or a HRA should be performed for the Project.

The health risk determinations should quantify and characterize potential Toxic Air Contaminant (TAC) air pollutants identified by the Office of Environmental Health Hazard Assessment/California Air Resources Board (OEHHA/CARB) that pose a present or potential hazard to human health.

Health risk analyses should include all potential air emissions from the project, which include emissions from construction of the facility, including multi-year construction, as well as ongoing operational activities of the facility. Note, two common sources of TACs can be attributed to diesel exhaust emitted from heavy-duty off-road earth moving equipment during construction, and from ongoing operation of heavy-duty on-road trucks. A list of TACs identified by OEHHA/CARB can be found at: https://ww2.arb.ca.gov/resources/documents/carb-identified-toxic-air-contaminants

Prioritization (Screening Health Risk Assessment):
A "Prioritization" is the recommended method for a conservative screening-level health risk assessment. The Prioritization should be performed using the California

Air Pollution Control Officers Association's (CAPCOA) methodology. The District recommends that a more refined analysis, in the form of an HRA, be performed for any project resulting in a Prioritization score of 10 or greater. This is because the prioritization results are a conservative health risk representation, while the detailed HRA provides a more accurate health risk evaluation.

To assist land use agencies and project proponents with Prioritization analyses, the District has created a prioritization calculator based on the aforementioned CAPCOA guidelines, which can be found here: http:www.valleyair.org/busind/pto/emission_factors/Criteria/Toxics/Utilities/PRIORITIZATION%20RMR%202016.XLS

Health Risk Assessment:
Prior to performing an HRA, it is strongly recommended that land use agencies/development project proponents contact the District to review the proposed health risk modeling protocol. A development project would be considered to have a potentially significant health risk if the HRA demonstrates that the project-related health impacts would exceed the Districts significance threshold of 20 in a million for carcinogenic risk, or 1.0 for either the Acute or Chronic Hazard Indices. A project with a significant health risk would trigger all feasible mitigation measures. The District strongly recommends that development projects that result in a significant health risk not be approved by the land use agency.

The District is available to review HRA protocols and analyses. For HRA submittals please provide the following information electronically to the District for review:

- HRA AERMOD model files
- HARP2 files
- Summary of emissions source locations, emissions rates, and emission factor calculations and methodology.

For assistance, please contact the District's Technical Services Department by:

- E-Mailing inquiries to: hramodeler@valleyair.org
- Calling (559) 230-5900
- Visiting the Districts modeling guidance website at: http://www.valleyair.org/busind/pto/Tox_Resources/AirQualityMonitoring.htm.

Recommended Measure: Development projects resulting in toxic air contaminant emissions should be located an adequate distance from residential areas and other sensitive receptors in accordance to CARB's Air Quality and Land Use Handbook: A Community Health Perspective.

Recommended Measure: A health risk screening and/or assessment should be performed to assess potential risks to sensitive receptors for all of the following projects:

- Projects whose proposed locations are within the established buffer distances identified in CARB's handbook located at https://ww3.arb.ca.gov/ch/handbook.pdf

- Projects whose land uses are not specifically identified in ARB's handbook (such as shopping centers), but there is sufficient information to reasonably conclude that sensitive receptors would be exposed to significant sources of toxic air contaminants; and

Projects that would otherwise appear to be exempt from CEQA requirements, but there is sufficient information to reasonably conclude that sensitive receptors would be exposed to significant sources of toxic air contaminants, such as industrial use projects allowed by right.

3) Vegetative Barriers and Urban Greening

The Project is located along the city of Porterville and is surrounded by mix land use development. There are residential units, churches and schools located adjacent from the Project along N Main Street. The District suggests the County consider the feasibility of incorporating vegetative barriers and urban greening as a measure to further reduce air pollution exposure on sensitive receptors (i.e. residential, units, churches, and schools).

While various emission control techniques and programs exist to reduce air quality emissions from mobile and stationary sources, vegetative barriers have been shown to be an additional measure to potentially reduce a population's exposure to air pollution through the interception of airborne particles and the uptake of gaseous pollutants. Examples of vegetative barriers include, but not limited to the following: trees, bushes, shrubs, or a mix of these. Generally, a higher and thicker vegetative barrier with full coverage will result in greater reductions in downwind pollutant concentrations. In the same manner, urban greening is also a way to help improve air quality and public health in addition to enhancing the overall beautification of a community with drought resistant low maintenance greenery.

4) Solar Deployment in the Community

It is the policy of the State of California that renewable energy resources and zero-carbon resources supply 100% of retail sales of electricity to California end-use customers by December 31, 2045. While various emission control techniques and programs exist to reduce air quality emissions from mobile and stationary sources, the production of solar energy is contributing to improving air quality and public health. The District suggests that the Project proponent consider the feasibility of incorporating solar power systems, as an emission reduction strategy for this Project.

5) District Rules and Regulation

The District issues permits for many types of air pollution sources and regulates some activities not requiring permits. A project subject to District rules and regulation would reduce its impacts on air quality through compliance with regulatory requirements. In general, a regulation is a collection of rules, each of which deals with a specific topic. Here are a couple of example, Regulation II (Permits) deals with permitting emission sources and includes rules such as District permit requirements (Rule 2010), New and Modified Stationary Source Review (Rule 2201), and implementation of Emission Reduction Credit Banking (Rule 2301).

The list of rules below is neither exhaustive nor exclusive. Current District rules can be found online at: www.valleyair.org/rules/1ruleslist.htm. To identify other District rules or regulations that apply to this Project or to obtain information about District permit requirements, the applicant is strongly encouraged to contact the District's Small Business Assistance (SBA) Office at (661) 392-5665.

5a) District Rules 2010 and 2201 - Air Quality Permitting for Stationary Sources

Stationary Source emissions include any building, structure, facility, or installation which emits or may emit any affected pollutant directly or as a fugitive emission. District Rule 2010 requires operators of emission sources to obtain an Authority to Construct (ATC) and Permit to Operate (PTO) from the District. District Rule 2201 requires that new and modified stationary sources of emissions mitigate their emissions using best available control technology (BACT).

This Project may be subject to District Rule 2010 (Permits Required) and Rule 2201 (New and Modified Stationary Source Review) and may require District permits.

Prior to commencing construction on any permit-required equipment or process, a finalized Authority to Construct (ATC) must be issued to the Project proponent by the District. For further information or assistance, the project proponent may contact the District's Small Business Assistance (SBA) Office at (661) 392-5665.

5b) District Rule 9510 (Indirect Source Review)

The purpose of District Rule 9510 (Indirect Source Review) is to reduce the growth in both NOx and PM10 emissions associated with development and transportation projects from mobile and area sources associated with construction and operation of development projects. The rule encourages clean air design elements to be incorporated into the development project. In case the proposed project clean air design elements are insufficient to meet the targeted emission reductions, the rule requires developers to pay a fee used to fund projects to achieve off-site emissions reductions.

The District has reviewed the information provided and determined that there is no construction of a new building, facility, or structure, or reconstruction of a building, facility, or structure for the purpose of increasing capacity or activity. Therefore, the project does not meet the definition of a "Development Project", as defined in District Rule 9510 section 3.13, and District Rule 9510 requirements and related fees do not apply to the Project.

5c) District Regulation VIII (Fugitive PM10 Prohibitions)

The project proponent may be required to submit a Construction Notification Form or submit and receive approval of a Dust Control Plan prior to commencing any earthmoving activities as described in Regulation VIII, specifically Rule 8021 – *Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities.*

The application for both the Construction Notification and Dust Control Plan can be found online at:
https://www.valleyair.org/busind/comply/PM10/forms/DCP-Form.docx

Information about District Regulation VIII can be found online at:
http://www.valleyair.org/busind/comply/pm10/compliance_pm10.htm

5d) Other District Rules and Regulations

The Project may also be subject to the following District rules: Rule 4102 (Nuisance), Rule 4601 (Architectural Coatings), and Rule 4641 (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations). In the event an existing building will be renovated, partially demolished or removed, the project may be subject to District Rule 4002 (National Emission Standards for Hazardous Air Pollutants).

6) District Comment Letter

The District recommends that a copy of the District's comments be provided to the Project proponent.

If you have any questions or require further information, please contact Diana Walker by e-mail at Diana.Walker@valleyair.org or by phone at (559) 230-5820.

Sincerely,

Brian Clements

Project: Draft Initial Study and Mitigated Negative Declaration for the Butterfield Stage Corridor Project - City of Porterville

District CEQA Reference No: 20210751

Dear Ms. Marple:

The San Joaquin Valley Unified Air Pollution Control District (District) has reviewed the Draft Initial Study/Mitigated Negative Declaration (Draft IS/MND) for the project referenced above from the City of Porterville (City). This comment letter supersedes and replaces the initial comment letter that was sent on August 11, 2021. The District recognizes this project as one that will result in air quality benefits to the Valley related to increased walkability in the area. The project consists of replacing an existing railroad line with a 12-foot wide, approximately nine mile long path for non-motorized users that will improve walkability by providing safe, improved access to education, retail opportunities, job centers, housing, and the City's transit center. In addition, the project will include amenities such as solar lighting, drought tolerant landscaping, drinking stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. The proposed project site runs generally north and south across the entire City of Porterville, east of State Route (SR) 65, from Tea Pot Dome Avenue/Avenue 128 to the south and Avenue 196 in Strathmore (unincorporated community within the County of Tulare) at the northerly extent.

The District offers the following comments:

1) <u>Project Related Criteria Pollutant Emissions</u>

Based on information provided to the District, project-specific annual emissions from construction and operation emissions of criteria pollutants will not exceed any of the following District significance thresholds: 100 tons per year of carbon monoxide (CO), 10 tons per year of oxides of nitrogen (NOx), 10 tons per year of reactive organic gases (ROG), 27 tons per year of oxides of sulfur (SOx), 15 tons per year of

Printed on recycled paper.

particulate matter of 10 microns or less in size (PM10), or 15 tons per year of particulate matter of 2.5 microns or less in size (PM2.5).

Although project construction air emissions are short-term emissions generated from construction activities such as mobile heavy-duty diesel off-road equipment and are determined to result in a less than significant impact on air quality, the District recommends the below measure for the project.

Recommended Measure: To reduce impacts from construction-related diesel exhaust emissions, the project should utilize clean off-road construction equipment, including the latest tier equipment as feasible.

2) District Rule 9510 and District Regulation VIII

The District concurs with the City's Draft IS/MND that the project is subject to District Rule 9510 (Indirect Source Review) and Regulation VIII (Fugitive PM10) requirements.

In accordance with Rule 9510, an Air Impact Assessment (AIA) application should be submitted to the District when seeking to gain project-level approval from a public agency. In this case, if not already done, please submit an AIA application to the District to comply with District Rule 9510. The District recommends that demonstration of compliance with District Rule 9510 be made a condition of project approval.

Information about how to comply with District Rule 9510 can be found online at: http://www.valleyair.org/ISR/ISRHome.htm.

The AIA application form can be found online at: http://www.valleyair.org/ISR/ISRFormsAndApplications.htm

When subject to Regulation VIII requirements, the project proponent should consult with the District in order to Determine specific requirements, such as the potential requirement to submit and receive approval of a Dust Control Plan prior to commencing any earthmoving activities as described in Regulation VIII, specifically Rule 8021 - *Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities.*

The applications for Dust Control Plans can be found online at: https://www.valleyair.org/busind/comply/PM10/forms/DCP-Form.docx

Information about District Regulation VIII can be found online at: http://www.valleyair.org/busind/comply/pm10/compliance_pm10.htm

3) Other District Rules and Regulations

The project may also be subject to the following District rules: Rule 4102 (Nuisance), Rule 4601 (Architectural Coatings), and Rule 4641 (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations). In the event an existing building will be renovated, partially demolished or removed, the project may be subject to District Rule 4002 (National Emission Standards for Hazardous Air Pollutants).

If you have any questions or require further information, please contact Diana Walker by e-mail at Diana.Walker@valleyair.org or by phone at (559) 230-5820.

Response A/4 6
Comment A/5 6
Response A/5 6

The following are the City of Porterville's responses to comments received during the public review period for the Initial Study/Mitigated Negative Declaration (IS/MND), dated July 2021, prepared for the Butterfield Stage Corridor Project. The Notice of Intent to adopt an IS/MND was circulated for public review from July 16, 2021 through August 16, 2021. One (1) comment letter was received from the San Joaquin Valley Air Pollution Control District (SJVAPCD).

These comments did not result in significant changes to the IS/MND. No comments received identified a new unavoidable significant effect, nor did they result in a finding that the proposed mitigation measures in the IS/MND will not reduce potential effects to less than significant. Accordingly, pursuant to CEQA Guidelines § 15073.5, recirculation of the IS/MND is not required.

LETTER A
San Joaquin Valley Air Pollution Control District (SJVAPCD)
(August 23, 2021)

SJVAPCD

Comment A/1

Dear Ms. Marple:

The San Joaquin Valley Unified Air Pollution Control District (District) has reviewed the Draft Initial Study/Mitigated Negative Declaration (Draft IS/MND) for the project referenced above from the City of Porterville (City). This comment letter supersedes and replaces the initial comment letter that was sent on August 11, 2021. The District recognizes this project as one that will result in air quality benefits to the Valley related to increased walkability in the area. The project consists of replacing an existing railroad line with a 12-foot wide, approximately nine mile long path for non-motorized users that will improve walkability by providing safe, improved access to education, retail opportunities, job centers, housing, and the City's transit center. In addition, the project will include amenities such as solar lighting, drought tolerant landscaping, drinking stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. The proposed project site runs generally north and south across the entire City of Porterville, east of State Route (SR) 65, from Tea Pot Dome Avenue/Avenue 128 to the south and Avenue 196 in Strathmore (unincorporated community within the County of Tulare) at the northerly extent.

The District offers the following comments:

Response A/1

This comment provides an introduction to the comment letter and does not address the adequacy or completeness of the Draft MND; does not raise environmental issues; and does not request the incorporation of additional information relevant to environmental issues. Such comments do not require a response, pursuant to Section 15088(a) of the State CEQA Guidelines. No further response is necessary.

Comment A/2

1) Project Related Criteria Pollutant Emissions

Based on information provided to the District, project-specific annual emissions from construction and operation emissions of criteria pollutants will not exceed any of the following District significance thresholds: 100 tons per year of carbon monoxide (CO), 10 tons per year of oxides of nitrogen (NOx), 10 tons per year of reactive organic gases (ROG), 27 tons per year of oxides of sulfur (SOx), 15 tons per year of particulate matter of 10 microns or less in size (PM10), or 15 tons per year of particulate matter of 2.5 microns or less in size (PM2.5).

Although project construction air emissions are short-term emissions generated from construction activities such as mobile heavy-duty diesel off-road equipment and are determined to result in a less than significant impact on air quality, the District recommends the below measure for the project.

Recommended Measure: To reduce impacts from construction-related diesel exhaust emissions, the project should utilize clean off-road construction equipment, including the latest tier equipment as feasible.

Response A/2

This comment acknowledges the Project's less than significant construction emissions impact, and makes a recommendation that the Project use the cleanest construction fleet available to further reduce construction-related air quality impacts. This comment does not address the adequacy or completeness of the Draft MND. No further response is necessary.

Comment A/3

2) District Rule 9510 and District Regulation VIII

The District concurs with the City's Draft IS/MND that the project is subject to District Rule 9510 (Indirect Source Review) and Regulation VIII (Fugitive PM10) requirements.

In accordance with Rule 9510, an Air Impact Assessment (AIA) application should be submitted to the District when seeking to gain project-level approval from a public agency. In this case, if not already done, please submit an AIA application to the District to comply with District Rule 9510. The District recommends that demonstration of compliance with District Rule 9510 be made a condition of project approval.

Information about how to comply with District Rule 9510 can be found online at: http://www.valleyair.org/ISR/ISRHome.htm.

The AIA application form can be found online at: http://www.valleyair.org/ISR/ISRFormsAndApplications.htm

When subject to Regulation VIII requirements, the project proponent should consult with the District in order to Determine specific requirements, such as the potential requirement to submit and receive approval of a Dust Control Plan prior to commencing any earthmoving activities as described in Regulation VIII, specifically Rule 8021 - Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities.

The applications for Dust Control Plans can be found online at: https://www.valleyair.org/busind/comply/PM10/forms/DCP-Form.docx

Information about District Regulation VIII can be found online at: http://www.valleyair.org/busind/comply/pm10/compliance_pm10.htm

Response A/3

This comment summarizes applicable rules including: Rule 9510 (Indirect Source Review) and Regulation VIII, (Fugitive PM10 Prohibitions). As the project goes through the development process, the City will be required to comply with them.

Comment A/4

3) Other District Rules and Regulations

The Project may also be subject to the following District rules: Rule 4102 (Nuisance), Rule 4601 (Architectural Coatings), and Rule 4641 (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations). In the event an existing building will be renovated, partially demolished or removed, the project may be subject to District Rule 4002 (National Emission Standards for Hazardous Air Pollutants).

Response A/4

This comment summarizes other potentially applicable rules including: Regulation VIII, (Fugitive PM10 Prohibitions), Rule 4102 (Nuisance), Rule 4601 (Architectural Coatings), Rule 4641 (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations), and Rule 4002 (National Emission Standards for Hazardous Air Pollutants). As the project goes through the development process, the applicability of each SJVAPCD Rule will need to be determined and if they are applicable, the City will be required to comply with them.

Comment A/5

If you have any questions or require further information, please contact Diana Walker by e-mail at Diana.Walker@valleyair.org or by phone at (559) 230-5820.

Sincerely,

Brian Clements
Director of Permit Services

Response A/5

This comment provides a closing to the comment letter and does not question the adequacy of the analysis included in the Draft MND. No further response is required.

Project: Draft Initial Study and Mitigated Negative Declaration for the Butterfield Stage Corridor Project - City of Porterville

District CEQA Reference No: 20210751

Dear Ms. Marple:

The San Joaquin Valley Unified Air Pollution Control District (District) has reviewed the Draft Initial Study/Mitigated Negative Declaration (Draft IS/MND) for the project referenced above from the City of Porterville (City). This comment letter supersedes and replaces the initial comment letter that was sent on August 11, 2021. The District recognizes this project as one that will result in air quality benefits to the Valley related to increased walkability in the area. The project consists of replacing an existing railroad line with a 12-foot wide, approximately nine mile long path for non-motorized users that will improve walkability by providing safe, improved access to education, retail opportunities, job centers, housing, and the City's transit center. In addition, the project will include amenities such as solar lighting, drought tolerant landscaping, drinking stations, refuse receptacles, benches, wayfinding, and controlled lighted crossings. The proposed project site runs generally north and south across the entire City of Porterville, east of State Route (SR) 65, from Tea Pot Dome Avenue/Avenue 128 to the south and Avenue 196 in Strathmore (unincorporated community within the County of Tulare) at the northerly extent.

The District offers the following comments:

1) <u>Project Related Criteria Pollutant Emissions</u>

Based on information provided to the District, project-specific annual emissions from construction and operation emissions of criteria pollutants will not exceed any of the following District significance thresholds: 100 tons per year of carbon monoxide (CO), 10 tons per year of oxides of nitrogen (NOx), 10 tons per year of reactive organic gases (ROG), 27 tons per year of oxides of sulfur (SOx), 15 tons per year of

particulate matter of 10 microns or less in size (PM10), or 15 tons per year of particulate matter of 2.5 microns or less in size (PM2.5).

Although project construction air emissions are short-term emissions generated from construction activities such as mobile heavy-duty diesel off-road equipment and are determined to result in a less than significant impact on air quality, the District recommends the below measure for the project.

Recommended Measure: To reduce impacts from construction-related diesel exhaust emissions, the project should utilize clean off-road construction equipment, including the latest tier equipment as feasible.

2) District Rule 9510 and District Regulation VIII

The District concurs with the City's Draft IS/MND that the project is subject to District Rule 9510 (Indirect Source Review) and Regulation VIII (Fugitive PM10) requirements.

In accordance with Rule 9510, an Air Impact Assessment (AIA) application should be submitted to the District when seeking to gain project-level approval from a public agency. In this case, if not already done, please submit an AIA application to the District to comply with District Rule 9510. The District recommends that demonstration of compliance with District Rule 9510 be made a condition of project approval.

Information about how to comply with District Rule 9510 can be found online at: http://www.valleyair.org/ISR/ISRHome.htm.

The AIA application form can be found online at: http://www.valleyair.org/ISR/ISRFormsAndApplications.htm

When subject to Regulation VIII requirements, the project proponent should consult with the District in order to Determine specific requirements, such as the potential requirement to submit and receive approval of a Dust Control Plan prior to commencing any earthmoving activities as described in Regulation VIII, specifically Rule 8021 - *Construction, Demolition, Excavation, Extraction, and Other Earthmoving Activities.*

The applications for Dust Control Plans can be found online at: https://www.valleyair.org/busind/comply/PM10/forms/DCP-Form.docx

Information about District Regulation VIII can be found online at: http://www.valleyair.org/busind/comply/pm10/compliance_pm10.htm

3) Other District Rules and Regulations

The project may also be subject to the following District rules: Rule 4102 (Nuisance), Rule 4601 (Architectural Coatings), and Rule 4641 (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations). In the event an existing building will be renovated, partially demolished or removed, the project may be subject to District Rule 4002 (National Emission Standards for Hazardous Air Pollutants).

If you have any questions or require further information, please contact Diana Walker by e-mail at Diana.Walker@valleyair.org or by phone at (559) 230-5820.

Sincerely,

Brian Clements

CITY COUNCIL AGENDA – AUGUST 17, 2021

SUBJECT: Consideration of the Butterfield Stage Corridor Mitigated Negative Declaration

SOURCE: Community Development

COMMENT: The City of Porterville is proposing to develop a non-motorized transportation facility known as the Butterfield Stage Corridor to provide safe, improved access to education, retail opportunities, job centers, housing, and the transit center. The Butterfield Stage Corridor will utilize approximately nine miles of City-owned former Union Pacific Railroad right of way between Tea Pot Dome Avenue to the south and Avenue 196 in Strathmore to the north. The project will consist of a Class 1, twelve (12) foot paved, non-motorized multi-use path that, within city limit, will include amenities such as solar lighting, drought tolerant landscaping, drinking water stations, refuse receptacles, benches, wayfinding, and controlled-lighted crossings. Portions of the path that are outside of city limits, would still include the following amenities: solar lighting, drought tolerant landscaping and trash receptacles. The path will meander through the width of the right of way in a manner best suited to avoid irregularities of grade and to provide space for the amenities. The project will facilitate the achievement of General Plan Implementation Policy PSCF-I-14, to "develop a safe and efficient trail network throughout the City that links parks and other key City destinations."

On March 24, 2021, the California Transportation Commission adopted the 2021 Active Transportation Program (ATP) for Statewide and Small Urban and Rural Components (Resolution G-21-30), which included $7.1 million for the development of the first phase of the Butterfield Stage Corridor that encompasses the Class 1 non-motorized multi-use path with amenities between College Avenue to the south and West North Grand Avenue to the north. City staff have been working with Tulare County Association of Governments (TCAG) staff on funding options to develop the segment of the path between West North Grand Avenue and Avenue 196.

On July 15, 2021, the Environmental Coordinator made a preliminary determination that a Mitigated Negative Declaration would be appropriate for the Project. Mitigation measures were identified for Biological Resources, Cultural Resources, Hazards and Hazardous Materials, and Tribal Cultural Resources. The Initial Study has been transmitted to the State Clearinghouse (SCH #2021070300), as well as to interested agencies, groups, and individuals for review and comment. The review period ran for thirty (30) days from July 16, 2021, through August 16, 2021. At the time of writing the staff report, one comment letter has been received from the San Joaquin Valley Air Pollution Control District, which is attached.

RECOMMENDATION: That the City Council:
1. Open the Public Hearing to receive comments regarding the project;
2. Adopt the draft Resolution approving a Mitigated Negative Declaration of environmental impact; and
3. Direct staff to carryout the development of the Butterfield Stage Corridor Project

ATTACHMENTS:
1. Project Locator Map
2. Draft Initial Study Mitigated Negative Declaration
3. Draft Resolution
4. San Joaquin Valley Air Pollution Control District Letter - August 11, 2021

Appropriated/Funded:

Review By:

Department Director:

Jason Ridenour, Interim Community Development Director

Final Approver: John Lollis, City Manager

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Approval for Community Civic Event - Veterans Homecoming Committee - Veterans Day Parade - November 11, 2021

SOURCE: Finance

COMMENT:

The Veterans Homecoming Committee is requesting approval to hold its annual Veterans Day Parade on November 11, 2021. Like most community events, the Veterans Day Parade was cancelled last year due to the COVID-19 pandemic. The Porterville Veterans Day Parade is the longest running in the country and this year, the Veterans Homecoming Committee is requesting to continue this patriotic tradition in honoring veterans and showing gratitude for their service.

The request is to hold the Veterans Day Parade on Thursday, November 11, 2021 from 10:00 a.m. to 12:00 p.m., including the closure of Main Street from Doris Avenue to Orange Avenue and also the side streets indicated on the attached map from 5:00 a.m. to 12:00 p.m.

This request is made under the Community Civic Events Ordinance No. 1326, as amended. The application has been routed according to the Ordinance regulations and reviewed by all City Departments involved. The requirements are listed on the attached copy of the application, agreement, Exhibit A and Exhibit B. A map showing the requested street closures is included. Event organizers are required to adhere to all State and local guidelines and limitations pertaining to COVID-19.

The City Council's COVID-19 Ad Hoc Committee reviewed the application and recommended additional safety measures including: extending the parade route to Orange Avenue to allow better social distancing among parade observers; multiple announcing areas along the parade route; providing a live-streaming option to allow for individuals to view the parade virtually instead of in-person; signage to encourage parade observers to maintain social distance; and scheduling a vaccination incentive clinic in coordination with the event.

RECOMMENDATION: That the City Council consider the Veterans Homecoming Committee's application to hold the Veterans Day Parade on November 11, 2021.

CITY OF PORTERVILLE

APPLICATION AND AGREEMENT FOR A PERMIT TO HOLD A COMMUNITY CIVIC EVENT OR OTHER ACTIVITY TO BE HELD ON PUBLIC PROPERTY

What constitutes a Community Civic Event?

A non-profit organization wishes to sponsor an event that is open to the community at large and will utilize public property. Most of the time, Community Civic Events require street or sidewalk closures. This application must be submitted NO LESS THAN 30 DAYS PRIOR to the date of the event in order to obtain City Council approval.

All City Code requirements are described in ordinance 15-20 (e) 1-23 and as amended in ordinance 1613. For a full description please visit our City of Porterville website at www.ci.porterville.ca.us/govt/CityClerk/, Porterville Municipal Codes. For questions or concerns please call 559-782-7451 or 559-782-7457. Any person who violates the provisions in this code, shall be deemed guilty of either a misdemeanor or an infraction, with penalties of one hundred ($100) for the first violation.

Liability insurance: The sponsoring organization/applicant agrees to provide and keep in force during the term of this permit a policy of liability and property damage insurance against liability for personal injury, including accidental death, as well as liability for property damage which may arise in any way during the term of this permit. **The City of Porterville and Successor Agency to the Porterville Redevelopment Agency shall be named as additional insured.** A Certificate of Liability Insurance and Additional Insured Endorsement sample forms are enclosed for your convenience. **This original certificate and endorsement shall be submitted to the Finance Department prior to the City of Porterville Council's approval.** *The council shall condition the granting of a CCE permit upon the sponsoring entity's filing with the council a policy of public liability insurance in which the city has been named as insured or coinsured with the permittee. The policy of insurance shall insure the city, its officers, and its employees against all claims arising out of, or in connection with, the issuance of the CCE permit or the operation of the permittee or its agents or representatives, pursuant to the permit. The policy of insurance shall provide coverage of no less than one million dollars ($1,000,000.00) per occurrence of bodily injury and property damage, combined single limit. (Ordinance 15-20(e) 18)*

BA **Authorized Representative Initial**

Alcohol liability insurance: Organization/Applicant will obtain an alcohol permit if any alcoholic beverages are to be served. The insurance policy shall be endorsed to include **full liquor liability** in an amount not less than one million dollars ($1,000,000) per occurrence. The City of Porterville shall be named as additional insured against all claims arising out of or in connection with the issuance of this permit or the operation of the permitted, his/her agents or representatives pursuant the permit. **Claims-made policies are not acceptable.**

BA **Authorized Representative Initials**

Health permit: Organization/Applicant **will obtain or ensure** that all participants obtain a 'Temporary Food Facilities' permit(s) from the Tulare County Public Health Department, if any food is to be served in connection with this Community Civic Event. To contact the Tulare County Environmental Health Department located at 5957 S. Mooney Blvd., Visalia, CA, 93277, call 559-733-6441, or fax information to 559-733-6932; or visit their website: www.tularehhsa.org.

BA **Authorized Representative Initials**

First aid station: Organization/Applicant will establish a first aid station, with clearly posted signs, to provide basic emergency care, such as ice/hot packs, bandages, and compresses.

BA **Authorized Representative Initials**

Toilet rental service: Applicant shall have care, custody and control of the equipment and shall bear responsibility and liability for all loss and damage to the equipment and for its contents while at the City's location. Applicant shall not overload, move or alter the equipment and shall use the equipment for its intended purpose. Applicant shall be responsible for any damages to City's property resulting from company's provision of services hereunder. Applicant shall confirm with the service company the number of portable toilets, standard and handicap, and wash sinks needed for the number of expected attendees.

BA **Authorized Representative Initials**

Agreement: The sponsoring organization/applicant agrees to comply with all provisions of the Community Civic Event Ordinance 15-20(e), as amended, and the terms and conditions set forth by City Council and stated in Exhibit 'A.' The sponsoring organization/applicant agrees, during the term of this permit, to secure and hold the City free and harmless from all loss, liability, and claims for damages, costs and charges of any kind or character arising out of, relating to, or in any way connected with his/her performance of this permit. Said agreement to hold harmless shall include and extend to any injury to any person or persons, or property of any kind whatsoever and to whomever belonging, including, but not limited to, said organization/applicant, and shall not be liable to the City for any injury to persons or property which may result solely or primarily from the action or non-action of the City or its directors, officers, or employees. Approval of the Community Civic Events Permit by the Porterville City Council pertains only to authorized activities conducted at designated locations within the incorporated area of the City of Porterville, and such approval shall not be construed or interpreted to authorize sponsor utilization of public right-of-ways outside of the jurisdiction of the City of Porterville.

VENDOR/PARTICIPANT LIST IN CONNECTION WITH THE APPLICATION AND AGREEMENT FOR A PERMIT TO HOLD A COMMUNITY CIVIC EVENT OR OTHER ACTIVITY TO BE HELD ON PUBLIC PROPERTY

Name of event: Veterans Day Parade

Sponsoring organization: Veterans Homecoming Committee

Location: Main St., Porterville, CA. Event date: 11-11-2021 Event time: 1000 - 1200

All vendors are required to complete the business license permit form. List all firms, individuals, organizations, etc., that will engage in selling at or participate in the above-named event. **NO PERMIT WILL BE ISSUED WITHOUT THIS INFORMATION.** Vendors with no valid City of Porterville business license are required to pay $1 per day to the City, with the exceptions of non-profit organizations per *City of Porterville Municipal Code 15-20(E) Community Civic Events (16). This form should be completed at the time of application, but must be submitted **NO LESS THAN ONE WEEK PRIOR TO THE EVENT.**

Vendor name	Address/Telephone	Business License required?	Type of Activity
– TBD –			

*Municipal Code 15-20(E) Community Civic Events (16): *Business License Fees: Any individual, company, firm, concessionaire, fair operator, carnival operator, etc., who engages in, conducts, organizes, or promotes business for profit shall pay a business license fee of one dollar ($1.00) per day per amusement, entertainment, exhibit, ride or per booth, space, stall, stand or other unenclosed location used for the purpose of advertising, promoting, or sale of, or taking orders for, goods or services; except that no individual, company, firm concessionaire, fair operator, carnival operator, etc., who possesses a valid city business license shall be subject to separate licensing pursuant to this subsection E16.*

The nonprofit sponsor shall collect said fee and remit the fee to the city within five (5) working days following the CCE. Said remittance shall be accompanied by a complete list of participants and consecutively numbered receipts written in triplicate, containing the name, address and telephone number of the licensee, and the licensee's California seller's permit number. Said receipts shall be furnished by the city. One copy of the receipt shall be furnished to the licensee, one copy filed with the finance department of the city, and one copy retained by the CCE sponsor for a period of three (3) years for audit purposes.

Requirements for Community Civic Event

"Veterans Day Parade"

November 11, 2021
10:00 am-12:00 pm

Location: Main St,
Porterville CA 93257

Finance Director: *M. Bemis*	
City Engineer: *D. Cervantez*	
Community Development Manager: *J. Ridenour*	Questioned if this had been presented to the Ad Hoc Committee.
Public Works Director: *M. Knight*	
Fire Marshall: C. Dignam	W. Cleveland Ave shall not be closed from Division St. to D St. to allow emergency response from Fire Station 71.
Parks and Leisure Services Director: *D. Moore*	Coordinate with Parks and Leisure on public address system. Main St outlet needs to be expressed week prior to event. Public to remain out of Main St. planters.
Police Lieutenant: *R. Carrillo*	Please see Recommendations/ Requirements in Exhibit B.

Administrative Services Director: *P. Hildreth*	Risk Management will require a Certificate of Insurance with evidence of $2,000,000 in liability coverage, naming the City of Porterville as an additional insured. Also event organizer required to comply with all state mandates concerning COVID-19.

CITY OF PORTERVILLE/POLICE DEPARTMENT
Community Civic Event Application

Veterans Day Parade
November 11th – 10:00AM to 12:00PM

Porterville Police Department Proposed Conditions/Requirements:

- City Council approval is required for all street closures.
- On all streets approved for closure, ensure adequate barricades/barriers are used to warn motorists of non-access and prevent vehicle access to those designated areas.
- Veteran's Homecoming Committee should meet with street vendors to coordinate rules regarding their activities, such as:
  - Staying off the parade route and crossing in front of floats or groups
  - Shall not sell silly string, snap caps or party poppers
  - Ensure each vendor has properly obtained a City business license
- An Outside Amplifier Permit has been requested and granted. However, event organizers shall not allow music or other amplifications to be played so loud as to unreasonably disturb the peace and good order of the business establishments or neighborhoods in the area.
- At conclusion of event, event organizers shall ensure streets are promptly cleared of any vehicles, equipment, booths or anything that could present a hazard to pedestrians or vehicles traveling through this area.
- Food vendors should be situated where they minimally block the sidewalk.
- Food vendors should provide inspection certificates from the Tulare County Health Department to members of the Veteran's Homecoming Committee, to ensure safe food products.
- Throwing candy from vehicles, floats, or any parade entry is prohibited. This results in children scampering to catch or find candy in a crowded environment, and causes others to run out into the street. This practice creates significant and unnecessary risk for parade goers. All registered parade entrants should be informed of this prohibition and efforts taken to cease this practice.
- The Porterville Police Department would like to remind everyone that the City of Porterville Municipal Code now requires that face coverings be worn in accordance of the California Department of Health's Guidance for the use of Face Coverings. For further information refer to the Guidance for the Use of Face Coverings located at:

  https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Guidance.aspx.

- Event organizers shall coordinate all policing/traffic/parking concerns with Lt. Ron Moore, Lt. Bruce Sokoloff or Lt. Rose Gurule well in advance of the event. They can be contacted at 559-782-7410/559-782-7400.

Rick Carrillo, Lieutenant
Police Department

CITY OF PORTERVILLE

OUTSIDE AMPLIFIER PERMIT

(City Ordinances #18-9 & 18-14)

This application must be submitted ten *(10)* days prior to the date of the event. A copy of this permit must be at the operating premises of the amplifying equipment for which this registration is issued.

1 Name and home address of the applicant: Bob Atchley

P.O. Box 1473, Porterville, Ca. 93258

2 Address where amplification equipment is to be used: Main St.

3 Names and addresses of all persons who will use or operate the amplification equipment: Parade

4 Type of event for which amplification equipment will be used: Parade - Brent Gill

Volunteers

5 Dates and hours of operation of amplification equipment: Nov 11, 2021 0900 - 1200

6 A general description of the sound amplifying equipment to be used: Public Address Systems

Section 18-9 It shall be unlawful for any person within the city to use or operate or cause to be operated or to play any radio, phonograph, jukebox, record player, loudspeaker, musical instrument, mechanical device, machine, apparatus, or instrument for intensification or amplification of the human voice or any sound or noise in a manner so loud as to be calculated to disturb the peace and good order of the neighborhood or sleep of ordinary persons in nearby residences or so loud as to unreasonably disturb and interfere with the peace and comfort of the occupants of nearby residences.

The operation of any such instrument, phonograph, jukebox, machine or device in such manner as to be plainly audible at a distance of one hundred feet (100') from the building, structure, vehicle, or place in which, or on which it is situated or located shall be prima facie evidence of a violation of this section. (Ord Code § 6311)

Section 18-14 It shall be unlawful for any person to maintain, operate, connect, or suffer or permit to be maintained, operated, or operated, or connected any or sound amplifier in such a manner as to cause any sound to be projected outside of any building or out of doors in any part of the city, except as may be necessary to amplify sound for the proper presentation of moving picture shows, or exhibiting for the convenient hearing of patrons within the building or enclosure in which the show or or exhibition is given, without having first procured a permit from the chief of police, which permit shall be granted at the will of the chief of police upon application in writing therefore, but which permit, when granted, shall be revocable by the city council whenever any such loudspeaker or sound amplifier shall by the council be deemed objectionable, and any such permit may be so revoked with or without notice, or with or without a formal hearing, at the option of the council, and in the event of the revocation of any such permit, the same shall not be renewed, except upon application as the first instance. (Ord. Code § 6312)

Penal Code Section 415 (2) Any of the following persons shall be punished by imprisonment in the county jail for a period of not more than 90 days, a fine of not more than four hundred dollars ($400), or both such imprisonment and fine: (2) Any person who maliciously and willfully disturbs another person by loud and unreasonable noise.

I hereby certify that I have read and answered all statements on this registration form and that they are true and correct.

Bob Atchley — *Signature of Applicant*

Sept 7 2021 — *Date*

THIS OUTSIDE AMPLIFIER PERMIT HAS BEEN APPROVED. HOWEVER, WE URGE YOU TO REMAIN CONSIDERATE OF THE GENERAL PEACE AND ORDER OF THE NEIGHBORS IN THE AREA. FAILURE TO ABIDE BY THESE REGULATIONS CAN RESULT IN REVOCATION OF THE PERMIT.

9-20-21 — *Date*

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: City of Porterville Veterans Day Run & Walk

SOURCE: Parks and Leisure Services

COMMENT: A long-standing tradition of the City's Parks and Leisure Services Department has been to host the annual Veterans Day Run & Walk prior to the annual Veterans Day Parade. The event is open to all ages and ability levels with participants typically ranging in age from babies in strollers to 90 years old or greater. Medals are awarded to the top three finishers in each age division of the 5K Run, 5K Walk and 10K Run. An honorary Veteran will shoot the starter's gun to signify the start of the race which starts at 7:30 A.M. The location of the start/finish line is on Main Street in front of City Hall. The 5K route takes the participants north on Main Street to Henderson Avenue, east on Henderson Avenue to Plano Street, south on Plano Street to Olive Avenue, west on Olive Avenue to Main Street, and north on Main Street to City Hall. The 10K route takes the runners north on Main Street to Reid Avenue, east on Reid Avenue to Plano Street, south on Plano Street to Oak Avenue, west on Oak Avenue to Main Street, and north on Main Street to City Hall.

Due to the COVID-19 pandemic, the 2020 Veterans Day Run & Walk transitioned to a virtual format. Participants were given a one week window to complete their race which was tracked on an app. City staff believes that given the outdoor nature of the event, combined with how the participants distance themselves from each other during the course of the race, that a safe event can be administered. Staff is planning on offering a virtual option once again this year for those wishing to participate from out of town, or those local participants that would prefer the virtual alternative. The event will be subject to change to an all virtual format if determined necessary to do so. The Veterans Day Run & Walk would adhere to all current COVID-19 safety guidelines. The Internal Community Civic Event form has been routed to City staff.

RECOMMENDATION: That the City Council provide direction on the scheduling of the City of Porterville Veterans Day Run & Walk.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Consideration of Amendment To Sphere of Influence Request

SOURCE: Community Development

COMMENT: At its meeting on October 20, 2020, the City Council adopted the following three Resolutions: Resolution 86-2020 approving a Mitigated Negative Declaration for the Citrus Blossom subdivision project, Resolution 87-2020 requesting that the Local Agency Formation Commission of Tulare County (LAFCO) approve an annexation and modify the Porterville Sphere of Influence (SOI), and Resolution 88-2020 approving the Citrus Blossom Tentative Subdivision map. Furthermore, Ordinance 1877, a rezone of APN 243-130-042 from RS-1 (Very Low Density Residential) to RS-2 (Low Density Residential), was approved on November 3, 2020, with the first reading taking place at the regularly scheduled Council Meeting on October 20, 2020, and second reading on November 3, 2020.

The request for annexation and amendment to the Porterville SOI was considered by LAFCO at its meeting on July 7, 2021. The LAFCO Commission denied the request for annexation (LAFCO Case No. 1560-P-323) and continued the request for the amendment to the Porterville SOI (LAFCo Case 1560-P-323A), referring the item back to LAFCO staff and the City of Porterville for further study and consideration of including four additional parcels to the west of the requested amendment to the Porterville SOI. Four additional parcels is an approximate 7.6-acre increase to the requested amendment which include APN's 243-130-038, 243-130-039, 243-130-040, and 243-130-041. The applicant subsequently submitted a request for reconsideration, which went before LAFCO at its meeting on September 1, 2021, which was also denied.

The Mitigated Negative Declaration adopted by Resolution 87-2020, did not evaluate the addition of the four additional parcels to the Porterville SOI, as had been requested by LAFCO at its meeting on July 7, 2021. Staff requested that Crawford and Bowen Planning, Inc., the environmental consulting firm that wrote the original environmental document, provide an estimated cost and schedule for the appropriate mechanism to include the additional parcels that LAFCO requested be included in the request for amendment to the Porterville SOI. Crawford and Bowen Planning, Inc. recommended that the most appropriate method to address the increase in parcels to the Porterville SOI amendment would be through preparing an Addendum to evaluate the project based on the current environmental and regulatory setting. The Addendum would supplement the existing Mitigated Negative Declaration and evaluate the

environmental impacts associated with including four additional parcels into the Porterville SOI pursuant to CEQA Sections 15162 and 15164. The fee for the Addendum would be $2,500 and would be available for City staff review three weeks after authorization is given to the consultant to start the additional review. The Mitigated Negative Declaration that was adopted with Resolution 86-2020, was funded by the Citrus Blossom project applicant. The contract for the Addendum would need to be funded by the City of Porterville, as it is outside the Mitigated Negative Declaration that was adopted by Resolution 86-2020.

The City is not required to pursue the requested modification to the Porterville SOI. The Porterville SOI amendment request, as adopted in Resolution 87-2020, also included a request for annexation to allow for the Citrus Blossom project to move forward to develop housing within the standards of the City of Porterville Development Ordinance, including the utilization of City of Porterville utilities. The annexation was denied by LAFCO on July 7, 2021, therefore, if the project is to move forward, it would move forward in the County of Tulare.

RECOMMENDATION: That the City Council provide direction on whether to engage Crawford and Bowen Planning, Inc. to prepare an addendum to evaluate the environmental impacts associated with including four additional parcels into the Porterville SOI pursuant to CEQA Sections 15162 and 15164 and bring back a future Agenda item to consider an addendum to the Mitigated Negative Declaration and Resolution requesting the additional parcels be included in the Porterville Sphere of Influence Amendment.

CITY OF PORTERVILLE CALIFORNIA

Date Printed: 9/29/2021 by the Community Development Department

RESOLUTION NO. 86 -2020

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORTERVILLE CONTAINING FINDINGS IN SUPPORT OF APPROVAL OF A MITIGATED NEGATIVE DECLARATION OF ENVIRONMENTAL IMPACT FOR THE PROPOSED CITRUS BLOSSOM SUBDIVISION PROJECT (PRC 2019-020)

WHEREAS: The City Council of the City of Porterville at its regularly scheduled meeting of October 6, 2020, conducted a public hearing to consider the approval of the Mitigated Negative Declaration which evaluates the environmental impacts of a Tentative Subdivision Map and related entitlements to accommodate the division of ±11.5 acres into 50 lots located at the southeast corner of Newcomb St. and Linda Vista Ave, hereby referred to as the "Citrus Blossom Subdivision," (APN 243-130-042); and

WHEREAS: At the conclusion of the public hearing, the City Council moved to continue the item to the meeting of October 20, 2020 to allow for additional deliberation; and

WHEREAS: On September 2, 2020, the Environmental Coordinator made a preliminary determination that a Mitigated Negative Declaration would be appropriate for the Tentative Subdivision Map and subsequent development of the Citrus Blossom Tentative Subdivision Map in a manner consistent with City codes and plans; and

WHEREAS: The proposed Project is consistent with the goal, policies, and land use designation of the Porterville 2030 General Plan. The General Plan designates the site as Low Density Residential; however, the site requires a zone change from RS-1 (Very Low Density Residential) to RS-2 (Low Density Residential), as supported in Resolution 88 -2020; and

WHEREAS: The City Council made the following findings:

1. That the proposed project is consistent with the goal, policies, and land use designation of the Porterville 2030 General Plan. The General Plan designates the site as Low Density Residential. The proposed subdivision will be developed within the density allowed by the General Plan.

2. The Initial Study prepared for this project is in compliance with the California Environmental Quality Act, and indicates that all potential impacts will be mitigated to less than significant levels. Through the implementation of the mitigation measures contained in the Mitigation Monitoring Program, the result of the impacts addressed will be less than significant.

3. On September 2, 2020 the Environmental Coordinator made a preliminary determination that a Mitigated Negative Declaration would be appropriate for the proposed project in light of the studies prepared and with implementation of defined mitigation measures related to Biological Resources, Cultural Resources, Noise, Greenhouse Gas Emissions, and Mandatory Findings of Significance. The Initial Study and proposed Mitigated Negative Declaration have been transmitted to interested agencies, groups, and individuals for a 30 day review period from

September 5, 2020 to October 5, 2020. At the time of writing of the staff report, no comments were received. That review of the environmental circumstances regarding this project indicates that no adverse impacts would occur to biological resources, cultural resources, greenhouse gas and noise when the mitigation measures are implemented and standards of the Development Ordinance and General Plan are applied. Mitigation measures to reduce impacts to less than significant were defined and have been incorporated in the Mitigation Monitoring Program which is attached as an exhibit to the Mitigated Negative Declaration (Exhibit A). In addition to these mitigation measures, any further mitigation measures recommended by a responsible or trustee agency shall be upheld at the expense of the applicant with the oversight of the City and said responsible or trustee agency.

4. That the proposed location the project and the conditions under which it would be operated or maintained will not be detrimental to the public health, safety or welfare, or materially injurious to properties or improvements in the area. The General Plan designates the site for Low Density Residential development. Conditions of approval are included to ensure adequate development standards are met.

5. That the environmental assessment and analysis prepared for this project supporting the Mitigated Negative Declaration reflects the independent judgment of the City of Porterville.

6. The developer/applicant shall comply with all mitigation measures adopted as a component of the approval of the Mitigated Negative Declaration for this project. The developer/applicant will be required to sign a document committing to comply with the adopted mitigation measures prior to any construction on the site.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Porterville does hereby approve the Mitigated Negative Declaration prepared for the Tentative Subdivision Project, and the subsequent development of the Citrus Blossom Subdivision in a manner consistent with City codes and plans, and that the mitigation measures defined in Exhibit A shall be implemented by the developer/applicant or their partners and successors with project implementation.

PASSED, APPROVED AND ADOPTED this 20th of October, 2020.

Martha A. Flores, Mayor

MITIGATION MONITORING AND REPORTING PROGRAM

This Mitigation Monitoring and Reporting Program (MMRP) has been formulated based upon the findings of the Initial Study/Mitigated Negative Declaration (IS/MND) for the City of Porterville's Citrus Blossom Tentative Subdivision Map Project (proposed Project). The MMRP lists mitigation measures recommended in the IS/MND for the proposed Project and identifies monitoring and reporting requirements as well as conditions recommended by responsible agencies who commented on the project.

The first column of the Table identifies the mitigation measure. The second column, entitled "Party Responsible for Implementing Mitigation," names the party responsible for carrying out the required action. The third column, "Implementation Timing," identifies the time the mitigation measure should be initiated. The fourth column, "Party Responsible for Monitoring," names the party ultimately responsible for ensuring that the mitigation measure is implemented. The last column will be used by the City to ensure that individual mitigation measures have been monitored.

Mitigation Measure	Party responsible for Implementing Mitigation	Implementation Timing	Party responsible for Monitoring	Verification (name/date)
Swainson's hawk Protection Measures **BIO-1:** To the extent practicable, construction shall be scheduled to avoid the Swainson's hawk nesting season, which extends from March through August **BIO-2:** If it is not possible to schedule work between September and February, a qualified biologist shall conduct a survey for active Swainson's hawk nests within 0.50 miles of the Project site no more than 14 days prior to the start of construction. If an active nest is found within 0.50 miles, and the qualified biologist determines that Project activities would disrupt nesting, a construction-free buffer or limited operating period shall be implemented in consultation with the CDFW. Migratory Bird Protection Measures **BIO-3:** To the extent practicable, construction shall be scheduled to avoid the nesting season, which extends from February through August. If it is not possible to schedule construction between September and January, a pre-construction clearance survey for nesting birds shall be conducted by a qualified biologist to ensure that no active nests will be disturbed during the implementation of the Project. A pre-construction clearance survey shall be conducted no more than 14 days prior to the start of construction activities. During this survey, the qualified biologist shall inspect all potential nest substrates in and immediately adjacent to the impact areas, including within 250 feet in the case of raptor nests. If an active nest is found close enough to the construction area to be disturbed by	Project Applicant	Prior to and during construction	Project Applicant / City of Porterville	

Mitigation Measure	Party responsible for Implementing Mitigation	Implementation Timing	Party responsible for Monitoring	Verification (name/date)
these activities, the qualified biologist shall determine the extent of a construction-free buffer to be established around the nest. If work cannot proceed without disturbing the nesting birds, work may need to be halted or redirected to other areas until nesting and fledging are completed or the nest has failed for non-construction related reasons.				
<u>Cultural Resources Protection Measures</u> **CUL-1:** • Before initiation of construction or ground-disturbing activities associated with the Project, the Project proponent for all Project phases shall require all construction personnel to be alerted to the possibility of buried cultural resources, including historic, archeological and paleontological resources; • The general contractor and its supervisory staff shall be responsible for monitoring the construction Project for disturbance of cultural resources; and • If a potentially significant historical, archaeological, or paleontological resource, such as structural features, unusual amounts of bone or shell, artifacts, human remains, or architectural remains or trash deposits are encountered during subsurface construction activities (i.e., trenching, grading), all construction activities within a 100-foot radius of the identified potential resource shall cease until a qualified archaeologist evaluates the item for its significance and records the item on the	Project Applicant	Prior to and during construction	Project Applicant	

Mitigation Measure	Party responsible for Implementing Mitigation	Implementation Timing	Party responsible for Monitoring	Verification (name/date)
appropriate State Department of Parks and Recreation (DPR) forms. The archaeologist shall determine whether the item requires further study. If, after the qualified archaeologist conducts appropriate technical analyses, the item is determined to be significant under California Environmental Quality Act, the archaeologist shall recommend feasible mitigation measures, which may include avoidance, preservation in place or other appropriate measure, as outlined in Public Resources Code section 21083.2. The City of Porterville shall implement said measures. **CUL-2:** The Project applicant will incorporate into the construction contract(s) a provision that in the event a fossil or fossil formations are discovered during any subsurface construction activities for the proposed Project (i.e., trenching, grading), all excavations within 100 feet of the find shall be temporarily halted until the find is examined by a qualified paleontologist, in accordance with Society of Vertebrate Paleontology standards. The paleontologist shall notify the appropriate representative at the City of Porterville, who shall coordinate with the paleontologist as to any necessary investigation of the find. If the find is determined to be significant under CEQA, the City shall implement those measures, which may include avoidance, preservation in place, or other appropriate measures, as outlined in Public Resources Code section 21083.2.				

Mitigation Measure	Party responsible for Implementing Mitigation	Implementation Timing	Party responsible for Monitoring	Verification (name/date)
<u>Greenhouse Gas Emissions Reduction Measures</u> **GHG-1:** The project applicant shall demonstrate compliance with the applicable BPS strategies to the Planning Division prior to the issuance of a building permit. The following PBS strategies are considered to be applicable, feasible, and effective in reducing greenhouse gas emissions generated by the project: • The project applicant shall provide a pedestrian access network that internally links all residential units and connects to the existing surrounding external streets and pedestrian facilities. • The project applicant shall ensure site design and building placement minimize barriers to pedestrian access and interconnectivity. Physical barriers such as wells, berms, landscaping, and slopes between residential uses that impede bicycle or pedestrian circulation shall be eliminated. In addition, barriers to pedestrian access of neighboring facilities and sites shall be minimized. • Any transit stops associated with the project shall be provided with safe and convenient bicycle/pedestrian access and provide essential transit stop improvements (i.e., shelters, route information, benches, and lighting). • The project applicant shall install energy efficient roofing materials. • The project applicant shall incorporate bike lanes and routes into the street system. • The project applicant shall plant trees to provide shade. • The project applicant shall install only natural gas or electric stoves in residences. The project applicant shall install energy efficient heating and cooling systems, appliances and equipment, and control systems.	Project Applicant	During project design and construction	Project Applicant	

Mitigation Measure	Party responsible for Implementing Mitigation	Implementation Timing	Party responsible for Monitoring	Verification (name/date)
Noise Reduction Measures **NOI-1:** During construction activities, delivery trucks serving the Project shall be limited to between 6:00 A.M. and 9:00 P.M. Monday through Friday and between 7:00 A.M. and 5:00 PM on Saturday or Sunday to avoid noise-sensitive hours of the day. **NOI- 2:** Construction activities shall be limited to between 6:00 A.M. and 9:00 P.M. Monday through Friday and between 7:00 A.M. and 5:00 PM on Saturday or Sunday to avoid noise-sensitive hours of the day. Construction activities shall be prohibited on holidays (President's Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving, Day after Thanksgiving, Christmas Day, and New Year's Day). **NOI-3:** The Project Applicant shall require the construction contractor to ensure that construction equipment noise is minimized by muffling and shielding intakes and exhaust on construction equipment (in accordance with the manufacturer's specifications) and by shrouding or shielding impact tools.	Project Applicant	During construction and operation	Project Applicant

By: Fernando Gabriel-Moraga, Deputy City Clerk

Resolution No. 87-2020

A RESOLUTION OF APPLICATION BY THE CITY OF PORTERVILLE REQUESTING THAT THE LOCAL AGENCY FORMATION COMMISSION TAKE PROCEEDINGS FOR ANNEXATION 485

WHEREAS: The City Council of the City of Porterville at its regularly scheduled meeting of October 6, 2020, conducted a public meeting to consider the approval of the Citrus Blossom Tentative Subdivision Map, a proposed subdivision of 50 single family homes with an ±0.43 acre pocket park on ±11.5 acres. This annexation would consequently require an amendment to the Urban Development Boundary and the Sphere of Influence, and due to the current configuration of those boundaries, the request that LAFCo would include three additional parcels, not a part of the annexation, into the Urban Development Boundary and Sphere of Influence. A Mitigated Negative Declaration was prepared that evaluated all components of the proposed project; and

WHEREAS: At the conclusion of the public hearing, the City Council moved to continue the item to the meeting of October 20, 2020 to allow for additional deliberation; and

WHEREAS, the City of Porterville desires to initiate proceedings pursuant to the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, Division 3, commencing with Section 56000 of the California Government Code, for Annexation 485; and

WHEREAS, the territory proposed to be annexed to the city totals approximately 11.5± acres, and is substantially underdeveloped with one single family residence and citrus groves; and

WHEREAS, this proposal is beyond the Sphere of Influence for the affected city. An amendment to the Sphere of Influence and the Porterville Urban Development Boundary would be required to accommodate the project. This amendment would include three underdeveloped parcels to the south of the area to be annexed, to ensure the future development occur in an orderly manner; and

WHEREAS, Notice of a Public Hearing was published in a newspaper of general circulation, *The Porterville Recorder*, and individually mailed to all property owners within the subject area and within a 300-foot radius surrounding the subject area on September 4, 2020; and

WHEREAS, this proposal is made pursuant to Sections 56654 and 56428 of the California Government Code; and

WHEREAS, the reasons for this proposal are as follows:

1. To ensure compatible land use planning practices are implemented and to steer sustainable future development in a growing area near the current City limits.
2. To add much needed developable land to the City to aide in meeting fifth cycle Regional Housing Needs Allocation quotas.
3. To maintain a definitive and organized city boundary and ensure efficient provision of services and facilities needed for high quality of life in the project area.

WHEREAS, the proposed annexation area and proposed development thereof would be subject to compliance with the Porterville Municipal Code and Porterville General Plan.

NOW, THEREFORE, BE IT RESOLVED, this Resolution of Application is hereby adopted and approved by the City Council of the City of Porterville. The Local Agency Formation Commission of Tulare County is hereby requested to take proceedings for the annexation and modification of the Porterville Sphere of Influence for the territory as described in Exhibit A, according to the terms and conditions stated above, and in the manner provided for by the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, and the detachment of the same area from County Services Area #1.

PASSED, APPROVED AND ADOPTED this 20th of October, 2020.

Martha A. Flores, Mayor

RESOLUTION NO. 88-2020

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORTERVILLE CONTAINING FINDINGS IN SUPPORT OF APPROVAL FOR THE CITRUS BLOSSOM TENTATIVE SUBDIVSION MAP FOR THAT ±11.5 ACRE UNDERDEVELOPED SITE GENERALLY LOCATED ON THE SOUTHWEST CORNER OF NEWCOMB STREET AND LINDA VISTA AVENUE

WHEREAS: The City Council of the City of Porterville at its regularly scheduled meeting of October 6, 2020, conducted a public meeting to consider approval of the Citrus Blossom Tentative Subdivision Map (Exhibit A). The proposed tentative subdivision map would divide the ±11.5 acres identified as Tulare County APN 243-130-042 into 50 parcels for development of as many detached single-family residences with an ±0.43 acre pocket park. The project as proposed meets the requirements of the Development Code and General Plan, except where otherwise conditioned, and includes such features as sidewalks with parkway strips, street trees, streetlights, a dedicated park space, and circular access within the subdivision, which would take access onto the City's circulation network from Newcomb Street and Linda Vista Avenue. The project would also include improvements to both Newcomb Street and Linda Vista Avenue along the frontages of the subject site and a road stub to the south for future connectivity to the underdeveloped area to the south of the site; and

WHEREAS: The City Council received testimony from all interested parties relative to the proposed Project; and

WHEREAS: At the conclusion of the public hearing, the City Council moved to continue the item to the meeting of October 20, 2020 to allow for additional deliberation; and

WHEREAS: At the conclusion of the deliberation, the City Council adopted a resolution approving a Mitigated Negative Declaration for the proposed project; and

WHEREAS: The City Council adopted an ordinance approving change in zone from RS-1 (Very Low Density Residential) to RS-2 (Low Density Residential); and

WHEREAS: The City Council made the following findings:

1. That the proposed Project is consistent with the goal, policies and land use designation of the Porterville 2030 General Plan. The General Plan designates the site as Low Density Residential, and is supported by as supported by the proposed RS-2 (Low Density Residential) zoning. The proposed subdivision will be developed within the density allowed by the General Plan.

2. The Initial Study prepared for this project is in compliance with the California Environmental Quality Act, and indicates that all potential impacts will be mitigated to less than significant levels. Through the implementation of the mitigation measures contained in the Mitigation Monitoring Program, the result of impacts addressed will be less than significant.

3. That the proposed location of the project and the conditions under which it would be operated or maintained will not be detrimental to the public health, safety or welfare, or materially injurious to properties or improvements in the area. The General Plan designates the site for Low Density Residential development. Conditions of approval are included to ensure adequate development standards are met.

4. That the standards of population density, site area dimensions, site coverage, yard spaces, heights of structures, distance between structures, off-street parking facilities and landscaped areas will produce an environment of stable and desirable character consistent with the objectives of the Development Ordinance. The proposed project complies with all of the requirements of Series 400 Land Divisions, of the Porterville Development Ordinance.

NOW, THEREFORE, BE IT RESOLVED: That the City Council of the City of Porterville does hereby approve the Citrus Blossom Tentative Subdivision Map (PRC 2019-020) subject to the following conditions:

1. Approval of the tentative subdivision map is contingent upon a successful application to the Tulare County LAFCo for annexation and amendment of the Sphere of Influence and Urban Development Boundary.

2. The developer/applicant shall comply with all mitigation measures adopted as a component of the approval of the Mitigated Negative Declaration for this project. Prior to recording the final map, the developer/applicant shall submit a signed document committing to comply with the adopted mitigation measures.

3. The developer/applicant shall install a block wall on the westerly property line to separate the proposed subdivision from existing land uses on the parcels to the west. The wall shall be constructed at such time as public improvements are installed.

4. Due to the size of the project and the proximity of the project to a community park, a pocket park is proposed as a part of the map. The developer/applicant has shown a ±18,548 sf pocket park, Lot A, to be located on N. Birch Street. The park shall be improved to City Standards.

5. The developer/applicant shall develop a road stub in the southerly portion of the development, as shown in the tentative map, between Lots 40 and 41. This is to ensure connectivity with Rose Street to the southwest at such time the properties to the south are developed at a higher density or subdivided. This stub is to be fully improved consistent with all other streets within the subdivision.

6. Prior to approval of the improvement plans, the developer/ applicant shall have completed and approved, landscaping and/or lighting improvement plans. The developer/applicant shall petition, on a form provided by the City, to have said

subdivision placed in a Lighting and Landscape Maintenance District, Benefit Assessment District or similar district to include: (1) Lighting; (2) Recreational Open Space; (3) Common Public Landscaping along Newcomb and Linda Vista Streets; (4) Public walls/fences, if any; (5) Drainage reservoir, if any; and (6) any other public improvement complying with Series 400, Section 407.03
(i) of the Development Ordinance. The developer/applicant shall submit a processing fee of $375 with the executed petition form.

7. Exclusive of assessments for a Lighting and Landscape Maintenance District, the developer/applicant shall pay all service fees and maintain all new lighting and landscape improvements in a safe and healthy manner for the greater of a minimum ninety-day plant establishment period following acceptance of the subdivision improvements, or until assessment begins for the Lighting and Landscape Maintenance District.

8. In accordance with Series 400, Section 407.02 (g) or (h) of the Development Ordinance, the developer/applicant shall enter into an agreement that provides for completion of improvements within twelve (12) months of the Final Map acceptance.

9. Prior to recording the final subdivision map, the developer/applicant shall provide surety for off-site improvements and provide easements, permits, calculations, etc. if, in the opinion of the City Engineer, they are needed for the proper functioning or phasing of the subdivision (e.g. water, sewer, drainage, etc.).

10. Building permits shall not proceed further than the installation of the foundation until all of the following items are accepted as complete:
    a. The storm drain system is functional so that it will accept water from fire hydrant and/or water main flushing;
    b. The water system, is functional from the source of water past the lots on which permits are being requested (i.e. all services and the sampling station, if required, are installed, valves are functional and accessible, bacteria testing is completed, etc.);
    c. Street base rock for accessibility by public safety officials and buildinginspectors;
    d. Lots are graded in accordance with the approved grading plan. Prior to receipt of the Final Grading, Drainage and Soils Report a letter from the "Supervising Civil Engineer" is required validating that the grading has been done in accordance with the approved grading plan and in accordance with the recommends contained in the Preliminary Soils Report;
    e. The sewer system is completed, tested, and accepted by the City prior to residential occupancy of any house in the subdivision;
    f. Lot corners are marked;
    g. Fire hydrants are accepted by the Fire Department and the Engineering Division.

11. The developer/applicant shall coordinate with the U.S. Postal Service regarding the kind of mail facilities that will be utilized. If neighborhood box units (NBUs) are to be used, construct sidewalks in a timely manner to facilitate NBU installation.

12. The developer/applicant shall cause all regulatory and street name signs to be installed

prior to occupancy of any house located where its occupants will utilize a street that does not have them.

13. The developer/applicant shall dedicate and improve, to City standards, temporary turn-arounds at the ends of dead-end streets to accommodate refuse vehicles and street sweepers.

14. The developer/applicant shall have a Civil Engineer design a water system that will provide a fire flow at each fire hydrant of 1,000 g.p.m. with 20 p.s.i. residual pressure for a dwelling less than 3,600 square feet and 1,500 g.p.m. with 20 p.s.i. residual pressure for a dwelling unit greater than 3,600 square feet.

15. The developer/applicant shall construct or provide surety for construction of curb, gutter, sidewalk, water, sewer, street paving to the center of the street (if necessary), etc. along the full frontage of all proposed subdivision lots except where they exist to City standards and are in good condition in the opinion of the City Engineer. The developer/applicant shall stub improvements to the property line if, in the opinion of the City Engineer, they will be needed for connection to development on the adjacent property.

16. The developer/applicant shall provide street striping and flexible delineators as necessary to provide safe vehicular movements, where directed by the City Engineer.

17. The developer/applicant shall construct street improvements that comply with the intention of the adopted Development Ordinance and per the attached details. The right of way width for interior streets shall be 56 feet wide with a parkway between the back of curb and sidewalk. The ultimate right of way width on Newcomb Street shall be 68 feet wide (34' width from centerline to property line) with a parkway between the back of curb and sidewalk, followed by a 10' wide landscape easement. The ultimate right of way width on Linda Vista Ave shall be 68 feet wide (34' width from centerline to property line). An additional 9' right of way dedication will be required along Linda Vista followed by an additional 10' wide landscape easement. Dry public utilities shall be located within an easement outside of the public right of way.

18. Prior to recording the final subdivision map, the developer/applicant shall provide improvements by the method indicated below:
    a. Pursuant to Section 66411.1(b) of the Government Code, the developer applicant shall construct curbs, gutters, sidewalks, curb returns per City Standards, sewer laterals, water services, fire hydrant relocation, street lights, connecting pavement along the full frontage of the proposed land division parcels.
    b. Additional improvements include a functional drainage system, connection of existing house to City's sewer system, abandonment of existing septic system(s), well abandonment (if any and not incompliance with the City's Backflow Ordinance), curing of leaks in irrigation lines (if any), and other improvements necessary for public health and safety, except where they exist to Federal, State and City standards and are in good condition in the opinion of the City Engineer.
19. Prior to approval of the final map, the developer/applicant shall provide public

improvement plans prepared by a Civil Engineer that include specific on-site grading details and specifications for City approval.

20. The developer/applicant shall comply with Appendix J, "Grading" of the current California Building Code, including provision of a grading and drainage plan signed by a licensed civil engineer or architect. The developer/applicant shall comply with City Retaining Wall Standards (adopted by City Council January 3, 1989) at lot lines where such standards are applicable.

21. The developer/applicant shall provide a Soils Report in conformance with Chapter 18 of the current California Building Code. The Soils Report shall include R-Value testing, expansion indexes, etc. where required for the construction of public improvements. The developer/applicant is advised that this area has previously been identified as an area of high soil expansion potential.

22. The developer/applicant shall construct and/or repair street, curb, gutter, sidewalk, etc. along the full parcel frontage, except where they exist and are determined to be in good condition and in compliance with current accessibility standards in the opinion of the City Engineer (Ord. No. 1306).

23. The developer/applicant shall comply with driveway vehicular sight distance requirements per Section 300.16 of the Development Ordinance and driveway separation from property line per City standards.

24. The developer applicant is hereby notified that the extension of a water line and sewer line in Linda Vista Avenue is required from the intersection of Newcomb Street to the westerly property line. Fire flow requirements will require the extension of a separate waterline in order to create a looped water system. The City will provide additional information if lines are determined to be a part of master plan facilities and will be subject to reimbursement.

25. The developer/applicant shall comply with City Standard for "backflow" prevention pursuant to Resolution No. 9615 (1981). A double backflow preventer is required off the water main and is to be located in an above ground enclosure.

26. The developer/applicant shall design on-site water systems meeting the requirements of the current California Plumbing and Fire Codes. It shall be noted that the City water system complies with Title 22 of the California Administrative Code and any assurance to effectively provide water pressure for multi-story buildings is the sole responsibility of the owner/builder.

27. The developer/applicant shall submit design master plans consisting of combined grading & drainage and sewer & water utilities to ensure the proper functioning and/or phasing of the development. The developer/applicant shall construct drainage facilities as required to serve the property (Ord. No. 1306). Dedicate a drainage easement across each lot requiring an easement, unless all lots are graded to drain to the street. The

developer/applicant shall construct concrete drainage swales, approved by the City Engineer, if necessary, to transport storm water across adjacent subdivision lots to reach a City drainage system. A minimum amount of runoff must be contained onsite per the State's MS4 requirements.

28. Drainage calculations must be submitted to verify that onsite drainage area/s will capture necessary runoff. The site shall be designed to convey water to the City drainage system without crossing driveways. The developer/applicant is required to install a sidewalk channel drain at the low side of the driveway, where applicable.

29. The developer/applicant is hereby notified that reimbursement for Master Plan facilities is made when funds are available and is contingent upon the work being done by the approved low bidder of at least two bona fide bidders. The bids must be approved by the City prior to construction. The City will provide additional information if lines are determined to be a part of master plan facilities and will be subject to reimbursement.

30. The developer/applicant shall move existing utility structures (i.e., poles, splice boxes, vaults, etc.) to a position that provides a minimum of four feet (4') of clear space in the sidewalk area and a minimum of two feet (2') of clear space from the curb face to the structure, unless the utility structures are below grade (Title 24 DSA).

31. The developer/applicant shall provide 3000K LED streetlights on Marbelite poles (spaced at staggered 320' intervals) following Southern California Edison Company specifications, as approved by the City Engineer. Wood poles are expressly prohibited without prior written approval of the City Engineer.

32. The developer/applicant shall comply with the City Retaining Wall Standards (adopted by City Council January 3, 1989) at lot lines where such standards are applicable.

33. For residential development, the developer/applicant is hereby notified that the installation of an additional water meter, servicing the irrigation system, is required for monitoring actual water usage if the landscape area is 5,000 square feet or more. The City will require payment of impact fees based on estimated usage and will monitor actual water usage for one year.

34. The developer/applicant shall, under City inspection, remove all existing abandoned and unnecessary items, to the satisfaction of the City Engineer, before the issuance of a certificate of occupancy (for example, foundations, septic tanks, irrigation pipes, etc.).

35. The developer/applicant shall abandon existing wells, if any, after first getting an abandonment permit from the Tulare County Environmental Health Services Division. The developer/applicant is required to provide the City Engineer with proof of compliance with County regulations before performing any grading or issuance of the building permit, whichever comes first.

36. The developer/applicant shall assure compliance with Section 7-8, Work Site Maintenance of the Standard Specifications. Applicable requirements from both San Joaquin Valley Air Pollution Control District Regulation VIII, Fugitive PM10 Prohibitions and the California Green Code Standards must also be met. During grading operations the "Supervising Civil Engineer" shall be responsible for enforcing the dust control provisions of Section 7-8 or the developer/applicant shall pay inspection fees on the grading cost to compensate the City for dust control inspection.

37. The developer/applicant shall not allow onsite runoff or debris outside of the limits of the property during construction. Applicable best management practices (BMPs) shall be implemented to protect the City's drainage system and inhibit vehicle track-out onto City streets. The improvement plans shall show the location of BMPs and areas designated for erosion and waste control. The developer/applicant shall remove and properly dispose of waste and spills deposited in the project area.

38. The developer/applicant is advised that they are obligated to comply with the National Pollutant Discharge Elimination System (NPDES) General Permit No. CAS000002 for discharge of Storm Water Associated with construction activity (except operations that result in disturbance of less than one acre of total land area and which are not a part of a larger common plan of development or sale). Before construction begins the proponent must:

    a. Submit a Notice of Intent (NOI) to comply with the permit, a site map, and appropriate fee to the State Water Resources Control Board (SWRCB).

    b. Prepare a Storm Water Pollution Prevention Plan (SWPPP) for the entire project before construction begins. The SWPPP must contain, at a minimum:

        1. All items listed in Section A of the permit.
           Descriptions of measures to be taken to prevent or eliminate unauthorized non-storm water discharges and all temporary (e.g., fiber rolls, silt fences, etc.) and permanent (e.g., vegetated swales, detention basins, etc.) best management practices that will be implemented to prevent pollutants from discharging with storm water into water of the United States.

    c. If portions of the project area are to be sold off before the entire project is completed, the proponent must:

        1. Submit to the California Regional Water Quality Control Board a change of information form identifying the new owners along with a revised site map clearly depicting those portions that were sold and those that are remaining.
        2. Informing each new owner of their responsibility to submit their own NOI, site map, and appropriate fee to the SWRCB and prepare their own SWPPP.

PASSED, APPROVED AND ADOPTED this 20th day of October, 2020.

Martha A. Flores, Mayor

By: Fernando Gabriel-Moraga, Deputy City Clerk

BEFORE THE LOCAL AGENCY FORMATION COMMISSION

OF THE

COUNTY OF TULARE, STATE OF CALIFORNIA

In the Matter of the Proposed Annexation	)	
To the City of Porterville and Detachment	)	
from CSA #1. LAFCO Case 1560-P-323,	)	RESOLUTION NO. **21-015**
City of Porterville Annexation 485 (Citrus	)	
Blossom Subdivision)	)	

WHEREAS, application has been made to this Commission pursuant to the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 (Government Code Sections 56000 et seq.) for approval of a proposal to annex certain territories described in attached Exhibit “A” made a part hereof; and

WHEREAS, this Commission has read and considered the Resolution of Application and application materials, the report of the County Assessor and the Executive Officers report and recommendations of the Executive Officer, all of which documents and materials are incorporated by reference herein; and

WHEREAS, on July 7, 2021 this Commission heard, received, and considered testimony, comments, recommendations and reports from all persons present and desiring to be heard concerning this matter.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED AND ORDERED as follows:

1. The information, material and facts set forth in the application, the report of the County Assessor, and the report and recommendations of the Executive Officer

(including any corrections), have been received and considered in accordance with Government Code Section 56668. All of said information, materials, facts, reports and other evidence are incorporated by reference herein.

2. The City of Porterville, as Lead Agency, filed a Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program in compliance with the California Environmental Quality Act (CEQA). And finds that the Commission has reviewed and considered the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program prepared by the City of Porterville for this project and find although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent.

3. The Commission has reviewed and considered, in accordance with Government Code Section 56668, the information, material and facts presented by the following persons who appeared at the meeting and commented on the proposal:

> Kelley Ivancovich, Jenny Cox, David Cox, Cresencio Mena, Juan Martinez, Camila Garcia, Michelle Pacheco, Bill Landis, Joyce Brown, all local residents that spoke against the proposed project.
> John Lollis, City Manager for the City of Porterville; and Jason Ridenour, City of Porterville spoke in support of the proposed annexation.

4. All notices required by law have been given and all proceedings heretofore and now taken in this matter have been and now are in all respects as required by law.

5. Based upon the evidence and information on the record before it, the Commission makes the following findings of fact:

a. Fewer than 12 registered voters reside in the affected territory, which is considered uninhabited.

b. The proposed reorganization does not contain any Williamson Act contract land.

6. Based upon the evidence and information on the record before it and the findings of fact made above, the Commission did not make the following determinations:

a. The boundaries of the proposed reorganization are definite and certain and conform to lines of assessment.

b. The proposed annexation is compatible with the city's General Plan.

c. There is a demonstrated need for municipal services and controls and that the city has the capability of meeting this need.

d. There is a mutual social and economic interest between the residents of the city and the proposed annexation territory.

e. The proposed annexation represents a logical and reasonable expansion of the annexing municipality.

f. All urban services and infrastructure can be provided for by the city.

8. The Commission hereby disapproves the proposed reorganization of the territory described in Exhibit "A," attached hereto.

9. The following short form designation shall be used throughout these proceedings:

LAFCO Case No. 1560-P-323, City of Porterville Annexation 485 (Citrus Blossom Subdivision)

The foregoing resolution was adopted upon motion of Commissioner Townsend, seconded by Commissioner Harrell, at a regular meeting held on this 7th day of July, 2021, by the following vote:

AYES:	Allen, Valero (A), Harrell (A), Townsend

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Consideration of Measure R Citizens' Oversight Committee Representative

SOURCE: City Manager's Office

COMMENT: In 2006, the voters of Tulare County approved Measure R, a 1/2-cent sales tax for transportation within the incorporated and unincorporated areas of Tulare County. As a part of the passage of Measure R, a Citizens' Oversight Committee was established and charged with the responsibility of monitoring the expenditure of revenues derived from the Measure. The City of Porterville's current representative to the Committee through June 2021 was Ms. Cathy Capone, who has served in this capacity for the City since November 2018. Ms. Capone has indicated her willingness to continue to serve as the City's representative on this Committee, which would be a 2-year term to expire June 30, 2023.

RECOMMENDATION: That the City Council consider the reappointment of Ms. Cathy Capone to the Measure R Oversight Committee to a 2-year term to expire on June 30, 2023.

ATTACHMENTS: 1. Measure R Appendix C - Citizens Oversight Committee

Appropriated/Funded:

Review By:

Department Director:

Final Approver: John Lollis, City Manager

Appendix C – Citizens' Oversight Committee

Committee Purpose

To provide input on implementation of the plan, and to advise the TCAG Board if and when the plan needs to be augmented and to ensure that the funds are being spent in accordance with the plan.

To inform the public and to ensure that the Transportation Measure (Measure) funding program revenues and expenditures are spent as promised to the public.

Administrative Issues

Committee Formation

- The Committee will be formed within six (6) months upon approval of the Measure by the voters of Tulare County in November 2006
- The Citizens' Oversight Committee (Committee) shall not be amended out of the Expenditure Plan
- Meetings will commence when Measure revenues are recommended for expenditure; including Strategic/Work Plan updates

Selection and Duties of Committee Chair and Vice Chair

- The Committee shall select a Chair and Vice Chair from the members, each of whom shall serve a one (1) year term
- The duties of the Chair will be to call meetings, set agendas, and preside over meetings
- The duties of the Vice Chair will be to perform the same duties described above in the absence of the Chair

Committee Meetings

- The Committee will hold one formal meeting annually, with additional meetings scheduled as needed by the Committee.
- All Committee meetings must be held in compliance with the Brown Act
- All meetings will be conducted per "Robert's Rules of Order"

Subcommittee Requirements

- Subcommittees: the Committee may elect to form subcommittees to perform specific parts of its purpose.
- All subcommittees shall have an odd number of members

Committee Membership, Selection, and Quorum

Membership & Selection

The Committee will be designed to reflect the diversity of the County. The Committee will consist of 16 members. Each organization represented on the Citizens' Oversight Committee will nominate its representative; with final appointments approved by the governing board of the TCAG. The membership shall be as follows:

*One member will be appointed by each City and the County. (Total of 9)

*One representative from a major private sector Tulare County employer, nominated by the Tulare County Economic Development Corporation

*One representative from the building industry, nominated by the Tulare County Building Industry Association.

*One representative from the agriculture industry, nominated by the Tulare County Farm Bureau

*One representative from the Hispanic community, nominated by the Tulare Kings Hispanic Chamber of Commerce

*One representative from an advocacy group representing bicyclists and pedestrians, and/or transit.

*One member who is a professional in the field of audit, finance and/or budgeting with a minimum of five years in a relevant and senior decision-making position in the public or private sector.

*One representative from an environmental advocacy group

- In the case of the final three representatives, applications from citizens from Tulare County who are over the age of 18 will be solicited and accepted and the representatives will be selected by the other 13 seated Board members, subject to final approval by TCAG.

Quorum

- A Quorum will be no less than nine (9) members of the Committee
- An action item of the Committee may be approved by a simple majority of those present, as long as the quorum requirement is met.

Term of Membership

- Terms of membership will be for two (2) years. No member may serve more than 8 years
- Members may be reimbursed for authorized expenses, but not be compensated for their service on the Committee
- In an effort to maintain Committee member consistency, during the first two (2) years of the Committee, terms will be staggered with 8 of the members to serve a one-year term, 8 of the members to serve a two-year term. The length of the first terms will be determined via random selection.
- Proxy voting will not be permitted

Eligibility

- U.S. citizen 18 years of age or older who resides in Tulare County
- Not an elected official at any level of government
- Not a public employee at any State, County or local city agencies
- Must submit an annual statement of financial disclosure consistent with Fair Political Practices Commission (FPPC) rules and regulations and filed with the Authority

Staffing

- TCAG will staff the Committee and provide technical and administrative assistance to support and publicize the Committee's activities.
- TCAG services and any necessary outside services will be paid using the TCAG's Measure Administration Program revenues
- Expert staff will be requested to provide information and make presentations to the Committee, as needed

Responsibilities

The Committee may receive, review and recommend any action or revision to plans, programs, audits or projects that is within the scope of its purpose stated above. Specific responsibilities include:

- Receive, review, inspect, and recommend action on independent financial and performance audits related to the Measure

- Receive, review, and recommend action on other periodic reports, studies and plans from responsible agencies. Such reports, studies and plans must be directly related to Measure programs, revenues, or expenditures
- Review and comment upon Measure expenditures to ensure that they are consistent with the Expenditure Plan
- Annually review how sales tax receipts are being spent and publicize the results
- Present Committee recommendations, findings, and requests to the public and TCAG in a formal annual report to inform Tulare County residents how funds are being spent.
- The Committee will have full access to the TCAG independent auditor and will have the authority to request and review specific information, with the understanding that the Committee will rely upon data, processes and studies available from TCAG, and other relevant data generated by reputable sources. It is understood; that TCAG will be continuously striving to improve the reliability of data and to update analytical and modeling processes and that the Committee will be kept abreast of any such efforts, and is invited to participate in development of such updates in a review capacity.

The Committee will assist TCAG in taking advantage of changing situations with technical and transportation developments in the future. Therefore, the provisions regarding the Committee make up, processes and protocols are viewed through 2037 based upon a 2007 perspective, and are not meant to be unduly restrictive on the TCAG and the Committee's roles and responsibilities.

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Consideration of Support for a Letter in Support for the Completion of State Route 99 in the San Joaquin Valley

SOURCE: City Manager's Office

COMMENT: The Tulare County Association of Governments (TCAG), in conjunction with the Madera and Merced regional transportation agencies, are seeking support from local and regional governments, businesses, and other organizations in the respective San Joaquin Valley counties in an effort to secure a commitment from the State of California to take action to complete State Route 99 and finish the project begun in 1969.

State Route 99 serves as a critical north-south corridor for goods movement throughout California and supports the largest agricultural region in the United States. Despite recent significant investments in the corridor, State Route 99 remains unfinished resulting in congestion that hampers economic activity, negatively impacting air quality. The incomplete State Route 99 also presents dangerous conditions to the traveling public, oscillating between four and six lanes. Finishing State Route 99 would reduce congestion, increase economic activity, solve safety issues, as well as improve and meet State air quality and climate change goals.

TCAG has provided a draft Letter of Support for the City Council's consideration, which the Council may act to support.

RECOMMENDATION: That the City Council consider its support for the draft Letter of Support for completing the widening of State Route 99 in the San Joaquin Valley.

ATTACHMENTS: 1. Draft Complete State Route 99 Support Letter

Appropriated/Funded:

Review By:

Department Director:

Final Approver: John Lollis, City Manager

October xx, 2021

The Honorable Gavin Newsom
Governor, State of California
State Capitol
Sacramento, CA 95814

Re: Finish What We Started – A Call to Action to Complete State Route 99, Improve Public Safety, Invest in our Economy, and Enhance Overall Quality of Life in California

Dear Governor Newsom:

The undersigned organizations, businesses, and associations write to urge you and your Administration to fully commit to funding and building a completed State Route (SR) 99, which serves as a critical north-south corridor that:

- Supports the movement of freight throughout California with 1.3 million daily truck trips. Ninety percent of freight through the San Joaquin Valley moves by truck, primarily on SR 99.

- Supports jobs and economic activity with approximately 44 percent of all employment in the San Joaquin Valley associated with goods movement-dependent industries – more than goods movement related employment in all other regions of California.

- Supports the largest agricultural region in the United States. The San Joaquin Valley generates more than $45 billion in ag products annually – and provides 25 percent of the nation's food supply.

- Represents a vital travel corridor for the 4.4 million residents of the San Joaquin Valley.

Despite recent investments into the corridor, SR 99 remains unfinished resulting in needless congestion, hampering economic activity, negatively impacting quality of life, and deleteriously impacting air quality and climate change. The currently incomplete SR 99 also poses a serious danger to the traveling public – going from six-lanes to four-lanes and back again numerous times.

Making good on the promise of SR 99 will have many and varied positive outcomes for the *entire* State of California – decreasing congestion, alleviating safety issues and associated fatalities and serious injuries, increasing our economic competitiveness and vitality, and the creating living-wage jobs. These benefits can be realized while also achieving the state's air quality and climate change goals.

Recent investments into the SR 99 corridor, including significant local funding from countywide sales-tax measures and Proposition 1B (the 2006 $19.9 billion transportation infrastructure bond), have helped close the gap, but those efforts will be for not if we do not finish the job. Eight segments totaling 35 miles out of the 274-mile SR 99 corridor through Merced, Madera, and Tulare counties remain unfunded. These unfinished segments include approximately 12 dangerous bottlenecks along this vital corridor.

During your tenure as Governor, you have made climate change a central pillar of your Administration and we applaud you for your efforts to address the defining crisis of our time. From implementing aggressive policies to move the state further away from dependence on fossil fuels by reducing vehicle miles traveled on our roads, encouraging the transition to electric vehicle use and other alternative fuels to setting strong conservation goals to effectively protect the state's land and coastal water, California continues to lead the way in the fight against global warming.

At the same time, we must also be cautious with respect to how our climate policies impact our economy and the safety of our state's residents. The state's multimodal transportation system, including its highways, streets, and roads are the backbone of our robust economy, and policies that undermine our infrastructure will have serious consequences.

We must find a way to fight climate change, while also continuing to invest in a surface transportation network that moves goods, services, and people efficiently and safely. The choke points and safety issues created as heavy-duty trucks and passenger vehicles move from six to four lanes through SR 99 corridor can only be fully eliminated by completing the corridor.

Critics are opposed to building more highway lanes and expanding road lanes in general. Respectfully, this view is short-sighted when discussing the busiest state highway in the nation, for many reasons:

- Completing the widening of SR 99 will decrease air pollution by unclogging the often-stagnant flow of truck freight by speeding truck traffic through congested areas.

- Improving the flow of truck traffic will increase overall motorist safety, reducing accidents as people try to maneuver around trucks.

In closing, we recognize the multiple challenges facing the state, including our ambitious climate goals, and are confident a completed six-lane SR 99 corridor can and should play an important role in California's future. In fact, the San Joaquin Valley has demonstrated it can meet the state's aggressive GHG emissions reduction goals while finishing SR 99 through the development, adoption, and state approval of its SB 375 mandated Sustainable Communities Strategy.

We respectfully request that the California State Transportation Agency and the California Department of Transportation work with the San Joaquin Valley to develop and implement a 15-year plan to complete SR 99 – to finish what we started. We stand ready to work with you and your Administration towards this virtuous end.

Sincerely,

cc: The Honorable Lena Gonzalez, Chair, Senate Transportation Committee
The Honorable Laura Friedman, Chair, Assembly Transportation Committee
The Honorable David Kim, Secretary, California State Transportation Agency
The Honorable Toks Omishakin, Director, California State Department of Transportation
The Honorable Hilary Norton, Chair, California Transportation Commission
Mitch Weiss, Executive Director, California Transportation Commission

CITY COUNCIL AGENDA – OCTOBER 5, 2021

SUBJECT: Status and Review of Proclamation of Local Emergency: COVID-19

SOURCE: City Manager's Office

COMMENT: At its meeting of March 17, 2020, the City Council took action to approve a Resolution of Proclamation of Existence of a Local Emergency for the novel coronavirus (COVID-19), which staff also initiated a soft-opening of its Emergency Operations Center (EOC) on Friday, March 20, 2020. At its meeting on September 21, 2021, the Council reviewed the status of existence of local emergency, and acted to continue its Resolution of Proclamation.

On March 4, 2020, Governor Newsom issued a Proclamation of a State of Emergency, President Trump issued a Proclamation on Declaring a National Emergency on March 13, 2020, and the Tulare County Board of Supervisors adopted a Resolution of Proclamations of Local Emergencies on March 17, 2020. The Tule River Tribal Council also adopted a Resolution of Declaration of State of Emergency on March 13, 2020. Subsequent to his Proclamation at the time of this report, Governor Newsom has issued sixty-two (62) Executive Orders in support of the State addressing and mitigating COVID-19 impacts, several of which are pertinent to the City. On June 11, 2021, Governor Newsom issued two Executive Orders to terminate the Stay-at-Home Order (Executive Order N-07-21), as well as to begin the wind down of other previous Executive Orders related to the pandemic (Executive Order N-08-21).

Governor Newsom's Executive Order N-25-20, issued on March 12, 2020, provided restrictions on mass gatherings of no more than 250, as well as provided accommodations to the Brown Act to encourage remote participation and social distancing. At its meeting of March 17, 2020, the Council gave direction of local gatherings not to exceed twenty-five (25), which staff responded to complaints and incidents accordingly. Both President Trump and the Centers for Disease Control (CDC) had recommended mass gatherings not exceed ten (10), which with Easter approaching on Sunday, April 12, 2020, the Council acted at its meeting on April 7, 2020, to limit local gatherings to no more than ten (10) individuals, allowing also for 6' social distancing. On October 9, 2020, apparently in consideration of the approaching holidays (e.g. Halloween, Thanksgiving, Christmas, etc.), the State issued guidance to allow up to three households to gather outdoors, including in a public park or outdoor space, allowing for social distancing, hand hygiene and wearing of face coverings unless eating or drinking, and not to exceed two hours in duration. On December 3, 2020, in response to rapidly increasing positive cases and hospitalizations (especially requiring ICU care), the State issued new stay home

Orders that prohibited all gatherings with members of other households. On January 25, 2021, the State ended its stay home Orders, removing the prohibited gathering restriction. On April 12, 2021, the State issued new guidance for activities and business tiers consistent with the Blueprint for a Safer Economy, which continued to strongly discourage indoor gatherings, but did allow for outdoor social gatherings not to exceed fifty (50) individuals in the Orange (Moderate) Tier - Tulare County's tier status at that time. On May 21, 2021, the State issued new guidance for activities and business referred to as "Beyond the Blueprint" that became effective June 15, 2021, eliminating limitations on capacity and allowing large gatherings both outdoors (recommended vaccine verification or negative testing) and indoors (required vaccine verification or negative testing). The "Beyond the Blueprint" requirements and regulations were effective through October 1, 2021, which the State assessed conditions by September 1, 2021 and determined an update was necessary. On August 18, 2021, the State issued updated guidance to the "Beyond the Blueprint" in regard to indoor "Mega Events," requiring vaccine verification or negative testing requirements for events involving 1,000 or more participants, removing self-attestation as a mode of verification after September 20, 2021, and extending requirements and regulations until November 1, 2021.

During the past eighteen (18) months, the Council and its legislative bodies have conducted teleconferencing meetings as allowed pursuant to a series of Executive Orders, the most recent which expired on September 30, 2021 (Executive Order N-08-021, issued June 11, 2021), which waived all physical presence requirements under the Brown Act as a means of limiting the spread of COVID-19. Recently adopted State law, Assembly Bill 361 (AB 361), extends the authority of public agencies to conduct meetings by teleconference, including video conference, without compliance with all of the Brown Act's limitations on such meetings, which the status of emergency resulting from the COVID-19 pandemic and accompanying recommendations for social distancing remain in place. Consistent with AB 361, the Council must adopt a Resolution consistent with its proclamation of local emergency, and must review and renew such Resolution every thirty (30) days thereafter. AB 361 will sunset on January 1, 2024.

The County and most cities across the county initially either closed or instituted soft-closings of its parks, including the closing of arbors, playgrounds and restrooms. At its meeting of April 7, 2020, the Council acted to soft-close City parks, including arbors, playgrounds, skatepark and sports courts (keeping restrooms open for hygiene purposes) and that gatherings of any size not occur. Consistent with the State and County's modified Orders regarding outdoor recreation and operating restrictions, at its meeting of May 5, 2020, the Council acted to reopen the City's golf course (including requiring participants to wear face coverings), OHV Park and tennis courts. On June 5, 2020, the State announced guidelines for the opening of outdoor recreation, including public swimming pools and aquatic venues, beginning June 12, 2020. At its meeting on June 16, 2020, the Council provided approval for the opening of the Murry Park swimming pool and Fallen Heroes Park splash pad consistent with the State's guidelines and necessary precautions and preparations. With continued

limitations on team-oriented recreation activities, staff prepared new individual outdoor recreation opportunities for the community, such as cross-country running. On June 5, 2020, the State also provided guidance on the opening of day camps beginning June 12, 2020, which staff also prepared for opening consistent with the State's guidelines and necessary precautions and preparations, and subsequently was completed on July 31, 2020. On September 28, 2020, the State allowed public playgrounds to reopen with guidance and restrictions, which at its meeting on October 6, 2020, the Council acted to keep playgrounds closed until further action. In its regional stay at home order issued on December 3, 2020, the State ordered the closing of all indoor and outdoor playgrounds, but did encourage residents to experience outdoor recreation without gathering with anyone outside their immediate household. On December 9, 2020, the State changed its guidance on outdoor playgrounds, allowing to remain open to facilitate physically distanced personal health and wellness through outdoor exercise. At its meeting on February 2, 2021, the Council acted to reopen the City's public playgrounds and skatepark in accordance with State guidance and restrictions. On February 19, 2021, the State released new guidance for both indoor and outdoor youth and recreational adult sports, effective February 26, 2021. Adhering and consistent with State guidance, the City began offering the reservation of park arbors and pavilions on March 27, 2021, and reopened the Zalud House Museum on March 25, 2021.

Due to the pandemic and to avoid mass gatherings, the community has suffered from the cancellation in the prior calendar year of the Iris Festival, Cinco de Mayo Parade, Porterville Fair, Military Banner Ceremony, KJUG Summer Concert Series, Freedom Fest, Pioneer Days, Veterans Day Parade, Christmas Tree-Lighting Ceremony and the Children's Christmas Parade (December), which further cancellations in the current calendar year potentially to occur.

Governor Newsom's Executive Order N-28-20, issued on March 16, 2020, strongly advised that both private and public utilities not shutoff utilities or charge late fees for lack of payment until May 31, 2020, and directed the California Public Utilities Commission to review both private and public utilities for conformance. At its meeting on March 17, 2020, the Council acted to suspend the shutoff of utilities and the charging of late fees for lack of payment until at least its meeting of April 21, 2020 for review. Governor Newsom issued Executive Order N-42-20 on April 2, 2020, which mandated that private and public water utilities not shutoff service due to non-payment, retroactive to March 4, 2020 - the Order did not reference the charging of late fees. Given the suspension of shutoff and charging of late fees, the City initially experienced a dramatic increase in accounts not making payment since the Council's action, which staff reinforced the message to customers that regular payments must still be made and has led to now generally usual payment, although has begun to accumulate. Since the Council's action on March 17, 2020 and as of August 31, 2021, there was $1,111,582 in unpaid City utility accounts (water: $543,626; sewer: $300,470; and refuse: $267,485), with the corresponding total loss in late fees of $297,561 - more than double the City's experience prior to the Governor's Executive Order. At its meeting on April 21, 2020, the Council acted to continue the moratorium of utility turnoff for non-

payment consistent with the Executive Order, and to continue to not charge late fees until further action by the Council. State Senate Bill 155 was chaptered on September 24, 2021, which extends the prohibition of shutoff of utilities until December 31, 2021.

Governor Newsom's Executive Order N-32-20, issued on March 18, 2020, appropriated $150 million in emergency homeless funding, of which $284,403 was allocated to Tulare County between $147,734 to the Continuum of Care (CoC) and $136,669 to the County. The CoC initially indicated its appropriation to the City of approximately $40,000 based upon recent homeless population counts, which City staff recommended be the funding source for the daily homeless lunch program the City initiated on March 27, 2020, with the closure of the local non-profit (Helping Hands of Porterville Inc.) due to pandemic concerns earlier that same week. Staff estimated that the $40,000 would allow the daily lunch program to continue through the month of April 2020. Subquently, the CoC indicated it was attempting to match its funding allocation with the County's as the required 25% match to larger federal FEMA funding of approximately $1.2 million. The County has indicated its allocation will be utilized in assisting with providing shelter for homeless individuals that are identified high-risk or in need of quarantine due to COVID-19 (Project Roomkey), which the County was working with two local hotels in the leasing of approximately thirty (30) rooms. At the time of this report, the County is no longer reporting the number of hotel rooms available to homeless individuals participating in the Project Roomkey program across the county, nor the number of rooms occupied. The County also reports that a Street Medicine event occurred in Porterville on June 29, 2020, during which twelve (12) individuals were tested for COVID-19 and all were negative, as well as another Street Medicine event that occurred in the Porterville area on May 7, 2021. On July 1, 2020, Helping Hands of Porterville resumed its daily homeless lunch program, thus relieving the City and its staff of the deliver of this program. However, Helping Hands decided to close its program in October 2020 due to limited donations and participation.

The City's contract operator of the planned navigation center, Turning Point of Central California, had been issued building permits and was making necessary improvements for anticipated opening in the month of July, with the installation of the fire monitoring and suppression system the final improvement needed to be completed. Turning Point had previously indicated that due to the current pandemic, occupancy of the navigation center when opened would be at half-capacity to allow adequate physical distancing given group housing, but now believes the center can open with two-thirds capacity and meet State guidelines for healthy and safe operations. Given the delay in the installation of the fire monitoring and suppression system, at its meeting on August 4, 2020, the Council gave staff direction to consider opening the navigation center restricted to providing services without housing, which Turning Point opened and began offering daily services only on August 18, 2020. With the final completion of the requisite fire suppression and monitoring system, Turning Point began offering emergency shelter and transitional housing on November 15, 2020. For those served by the navigation center, a vaccine event occurred on May 7, 2021.

Governor Newsom's Executive Order N-33-20, issued on March 19, 2020, ordered that state residents shelter-at-home, and that only identified essential businesses remain open and associated workforce. Much confusion reverberated throughout the state in clarifying essential businesses, which staff both responded to complaints and acted proactively in following the State's guidelines of essential businesses (attached). To assist in this ever-changing subject, at its meeting on April 21, 2020, the Council acted to appoint Vice Mayor Reyes and Council Member Gurrola to form an Ad Hoc Committee to coordinate with the City Attorney and City Manager in the application of the State and County guidelines in regard to essential and non-essential businesses. The Committee has met intermittently in review of local complaints and compliance with modified State and County Orders. At its meeting on December 15, 2020, the Council acted to appoint Council Member Carrillo to replace former Council Member Gurrola on the Committee.

On Tuesday, April 28, 2020, Governor Newsom announced his 4 Stage plan for reopening the California economy and gradual modification of his stay-at-home Order, which his presentation is enclosed. The Governor indicated that moving from current Stage 1 to State 2 would likely occur in several weeks and allow non-essential "low-risk" retail to reopen with requisite 6' social distancing. The Governor indicated "high-risk" personal services would likely be allowed later during the Summer. On May 4, 2020, Governor Newsom issued Executive Order N-60-20, allowing the reopening of lower-risk businesses and spaces in Stage 2 beginning May 8, 2020, including manufacturing, retailers (pick-up and delivery) and warehouses. The Order also allowed Counties to proceed more quickly through Stage 2 (Variation Attestation) given certain State-determined public health metrics were met, including: 1) sustained reduction or stability in new cases for fourteen (14) days; 2) adequate diagnostic testing capacity and test results, including the ability to test all individuals with COVID-19 symptoms, same-day testing widely available for hospitalized patients, healthcare workers and workers in essential roles, close contacts for confirmed cases, and outpatients with symptoms; 3) public health department's capacity to rapidly interview new cases, identify close contacts, and ensure isolation and quarantine are effective; and 4) health care system capacity to respond to potential surges.

At its meeting on May 12, 2020, the Tulare County Board of Supervisors considered its draft plan for compliance with the Executive Order (attached). Of note, the Tulare County Public Health Officer issued a health advisory on May 7, 2020, that county residents should wear face coverings when in public (attached). At its meeting on May 19, 2020, the Board of Supervisors acted to modify its draft plan for reopening, including advancing immediately through the State's Stage 3, rescinding the County's Public Health Officer's Order, halting all local civil enforcement of stay-at-home Orders, directing County guidance for Stage 3 businesses, and direct County efforts from meeting State metrics to supporting problem areas and populations including the elderly and health compromised individuals, skilled nursing facilities, hospitals, and businesses or agencies with reported outbreaks. On May 26, 2020, the County

submitted its Variance Attestation to the State, which was approved and posted by the State on May 27, 2020, allowing the county to proceed through the State's Stage 2.

On May 25, 2020, the State announced that places of worship (25% capacity) and in-store retail were allowed to proceed immediately statewide, and on May 26, 2020, the Governor announced that barber and hair salons could reopen immediately in counties with approved Variance Attestations, which as previously stated Tulare County's was approved by the State on May 27th. On June 5, 2020, the State announced that additional previous Stage 3 activities would be allowed to reopen with provided guidance effective June 12, 2020, including bars and wineries, campgrounds and RV parks, family entertainment centers (i.e. bowling alleys and movie theaters), fitness facilities, and museums/galleries/zoos/aquariums.

Due to increasing positive cases across the state, on June 18, 2020, the State issued guidance that all individuals wear face coverings when in public. At its meeting on July 7, 2020, the Council acted to approve and Order under its Proclamation of Local Emergency authorizing the City to enforce the State's mandatory face covering requirements through the City's administrative citation regulations and aggressive education efforts, and directed City staff to prepare an emergency Ordinance requiring face coverings consistent with the State requirements, which was scheduled for Public Hearing and was approved by the Council at its meeting of July 21, 2020. In enforcement of the emergency Ordinance since adoption by Council, the Fire Department's Code Enforcement Division has eleven (11) documented business-oriented incidents, and the Police Department has 132 documented individual or group incidents. On June 9, 2021, the State released new face coverings guidance to take effect June 15, 2021, providing that face coverings are not required for fully vaccinated individuals except for: 1) on public transit; 2) indoors in K-12 education, childcare and youth settings; 3) healthcare settings; 4) state and local correctional and detention facilities; and 5) homeless, emergency and cooling centers. Unvaccinated individuals continue to be required to wear face coverings when indoors in public settings and businesses. On July 27, 2021, the CDC issued guidance that recommended vaccinated individuals wear face coverings while indoors in areas considered to be experiencing increased spread ("substantial" or "high" risk) of the delta variant coronavirus, which Tulare County at the time of this report is considered "high" risk for spread.

Due to increasing positive cases, testing positivity and COVID-19 hospitalizations, the State placed Tulare County on its monitoring list program for targeted engagement and potentially reinstituting community measures, which on June 28, 2020, the State directed all bars in Tulare County be closed again immediately by local health officer order. On July 1, 2020, the State further directed the closing of indoor activities for at least the succeeding three weeks, including restaurants, bowling alleys, movie theaters, card rooms, museums, wineries and zoos. On Monday, July 14, 2020, the State directed the immediate closure of all bars in California and cease in-restaurant dining, as well as the immediate closure of indoor activities or industries including

barbershops, fitness centers, hair salons, malls, offices for non-essential sectors, personal care services (e.g. esthetic salons, nails salons, tattoo parlors), protests and places of worship for counties on the State's monitoring list (including Tulare County), unless the activity or industry can be modified to operate indoors or by pick-up. The State Board of Barbering and Cosmetology initially declared that barbershops and esthetic, hair and nails salons are required to operate indoors and may not operate outdoors and therefore must be closed, however, the State Board subsequently determined to allow these businesses to be open with modifications to operate outdoors.

On August 28, 2020, Governor Newsom announced that the State was implementing a new County Monitoring List system known as the Blueprint for a Safer Economy, incorporating standardized four tiers dependent upon a county's daily new cases per 100,000 population and testing positivity rates and the corresponding effect on economic sectors guidelines for operation. When the Blueprint for a Safer Economy was retired on June 15, 2021, Tulare County was in the Orange (Moderate) tier given its daily positive case rate per 100,000 population exceeded two (1.5 at the time of the report), however, the positivity rate met the Yellow (Minimal) tier requirement of less than two percent (1.5% at the time of the report). As of June 15, 2021, there were three counties in the Red (Substantial) tier, thirty-one (31) counties in the Orange (Moderate) tier and twenty-four (24) counties in the Yellow (Minimal) tier. Under the new system, the State allowed barber and hair salons to reopen indoor operations on August 31, 2020, and allowed nail salons to reopen indoor operations on September 22, 2020, if permitted by local county public health officials. The State further allowed expanded personal care services to reopen indoor operations on October 20, 2020, including esthetic, skin care, electrology, body art professionals, tattoo parlors, piercing shops and massage therapy (in non-healthcare settings).

On September 30, 2020, the State announced a new health equity metric to be included in the Blueprint for a Safer Economy, requiring that test positivity rates in disadvantaged communities that comprise the lowest quartile of a county's Healthy Places Index census tracts do not significantly lag behind overall county test positivity rates. In order to advance to the next less restrictive tier (e.g. Purple-widespread to Red-substantial), a county will need to meet an equity metric and/or demonstrate targeted investments to eliminate disparities in levels of transmission. According to Tulare County's report as of October 13, 2020, the lowest quartile does not include Porterville areas exceeding 8% positivity, with the census tracts of Cutler/Yettum (24.4%), Pixley/Teviston (18.9%), Earlimart (15.6%), Alpaugh/Allensworth/Richgrove (15.4%), South-Central Tulare (13.3%), Tipton/Woodville (12.5%), West-Central Tulare (11.8%) and Orosi (8.9%) being of greatest concern. As referenced by a Member of Council, at its meeting on October 6, 2020, the Tulare County Board of Supervisors adopted a Resolution, demanding clarity, consistency, and continuity from Governor Newsom regarding COVID-19 directives to counties.

On November 19, 2020, due to the observed significant rise in positive cases, the State announced a "Limited Stay At Home Order" that in all counties in the Purple (Widespread) tier under the State's Blueprint for a Safer Economy,

requiring that all non-essential business and public activities cease to occur between 10:00 PM and 5:00 AM, effective November 21, 2020 through December 21, 2020 or as may be extended. On January 25, 2021, the State removed this Order effective immediately.

On December 3, 2020, due to the continued significant rise in positive cases and hospitalizations (especially ICU care), the State issued a "Regional Stay At Home Order" with the state separated into five regions by county and centered around maintaining a minimum of fifteen percent (15%) regional hospital ICU capacity, with Tulare County joining eleven (11) other counties in the "San Joaquin Valley" region. The San Joaquin Valley region experienced 14.1% ICU capacity on December 5th and 6.6% capacity on December 6th, causing the new regional order to go into effect in the San Joaquin Valley region at 11:59 P.M. on December 6th. As of June 15, 2021, the San Joaquin Valley region had 27.4% ICU capacity. The regional order modified business operations, including: 1) limit indoor retail to no more than twenty percent (20%) capacity; 2) limit restaurants to delivery/pick-up/take-out only; 3) limit worship and political expression to outdoor only; 4) limit outdoor recreation to no drink or food sales; 5) limit essential office work only when remote work is not possible; and 6) limit hotels and lodging to only supporting critical infrastructure. The regional order closes business operations, including: 1) barber and hair salons; 2) personal care services (esthetician, massage, nail and tattoo); and 3) museums. On January 25, 2021, the State removed this Order, returning to the State's Blueprint for a Safer Economy and the county tiers system.

The new State Blueprint also provided a waiver process to allow TK-6th Grade students to receive in-person instruction with prior County and State approval, which locally St. Anne's School received such approval and began instruction on September 14, 2020. Also locally, Hope Elementary School received waiver approval and began in-person instruction on September 28, 2020, and Porterville Unified School District received waiver approval and began in-person instruction on December 1, 2020. Burton, Pleasant View Elementary and Rockford Elementary have each also received both County and State waiver approval and have begun in-person instruction. The State issued guidance on August 2, 2021, that all adults and students must wear face coverings when indoors, and on August 11, 2021, announced guidance that all education employees be vaccinated or be tested at least once weekly.

At its meeting on August 4, 2020, the Council considered and gave direction to staff evaluate opportunities for local restaurants to operate outdoors in the City's public right-of-way. At its meeting on August 18, 2020, given City liability considerations, the Council gave direction to work with local restaurants individually through an application and guidelines developed in coordination with the Council's Ad Hoc Committee. On August 24, 2020, the Council Ad Hoc Committee met with staff to review draft guidelines for the opening of outdoor dining by restaurants in public right-of-way, which the final guidelines are provided as an attachment. Consistent with the guidelines and the proposed City's support for protecting restaurant patrons dining in the public right-of-way, at its meeting on September 1, 2020, the Council authorized an appropriation of

$100,000 from the City's Emergency/Catastrophic Reserve Fund for the purchase of necessary traffic and sidewalk barriers and other complimentary amenities, with any expenditure of funds to be documented for potential reimbursement should future federal and/or state funding be made available to mitigate COVID-19 activities. Nine entities had been approved to provide outdoor dining, including the Elks Lodge #1342, New China Restaurant, El Jacalito Taqueria, Pho Sho Fusion House, Pizza Factory, El Maguey Mexican Restaurant, Mariscos El-30, RJ's Cafe & Bakery, El Nuevo Mexicali II, Habi Sushi, Black Bear Diner and Birria Y Pollos El Guero, and several more were in the application process prior to outdoor dining being prohibited by the State's regional stay at home orders on December 3, 2020. On January 25, 2021, the State removed the regional stay at home Order, again allowing outdoor dining and the consideration of the outdoor dining permits that were in process. The Council's initial approval of the outdoor dining permit process was effective through January 31, 2021, which at its meeting on February 2, 2021, the Council acted to extend its outdoor dining permit process until June 30, 2021. Subsequently, an additional seven entities have been approved to provide outdoor dining, including Birria y Pupusas Las Favoritas, Denny's, El Nuevo Mexicali, El Tapatio, Landing 13, Taco Truck Cantina and The Mud House.

On June 3, 2021, Governor Newsom released a letter announcing the Eighth Notice of Regulatory Relief that allows restaurants and bars to maintain their expanded outdoor operations by providing regulatory relief through the end of 2021. The regulatory relief includes; on-sale retailers exercising off-sale privileges, sales of alcoholic beverages to-go, deliveries to consumers, free delivery, expansion of licensed footprint, on-sale licenses without kitchen facilities, virtual meet the winemaker or brewer dinners, renewal of relief for charitable promotions and sales, and relief from type-75 requirement to produce 100 barrels of beer annually. The letter also encourages local jurisdictions to continue to allow expanded outdoor dining opportunities. At the time of this report nineteen (19) entities have been approved to provide outdoor dining. One restaurant requested that their permit closed and several other restaurants are no longer utilizing the temporary outdoor dining areas approved under the program. The Council's initial approval of the outdoor dining permit process through January 31, 2021, was extended on February 2, 2021 to June 30, 2021. At its meeting on June 15, 2021, the Council extended the outdoor dining permit through January 2, 2022.

Due to increasing virus spread in the Central Valley resulting in increased cases and hospitalizations, on July 27, 2020, the Governor announced the appropriation of $52 million in support of the counties of Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus and Tulare in the implementation of three Unified Support Teams to provide hands-on technical assistance in support of testing, contact tracing, isolation and quarantine efforts. On August 12 and 13, 2020, the State's Unified Support Team met with local representatives in developing strategies reducing community spread in Tulare County.

Most of the City's workforce has been deemed essential under the State's guidelines, which the City has directed its limited non-essential workers to

remain at home and available for assignment if necessary, and has implemented a rotation of its essential workforce as much as possible to reduce employees public exposure. Employees required to be at work during the shelter-at-home Order are accrued special leave for later utilization and/or payment, as well as employees that are working from home. Given the State's reopening guidelines, all City employees returned to work effective June 1, 2020, and the special leave program was discontinued effective May 31, 2020. Compounding the challenge for the City's workforce was the temporary closure of local non-profit contractor Promoting Self Worth (PSW) due to its workforce being considered highly vulnerable to COVID-19, thus necessitating City staff to address the contracted essential services of graffiti removal and the care for a significant number of Landscape and Lighting Maintenance Districts (LMD). PSW returned to performing its contracted services with the City beginning the week of May 11, 2020.

Governor Newsom's Executive Order N-37-20, issued on March 27, 2020, established a moratorium on eviction of tenants in good standing as of the date of the Order through May 31, 2020, which had been an issue of discussion by the Council at its meeting on March 17, 2020. On May 29, 2020, Governor Newsom issued Executive Order N-66-20, extending the eviction moratorium through July 28, 2020. On June 30, 2020, the Governor issued Executive Order N-71-20, extending the eviction moratorium through September 30, 2020. On August 31, 2020, Governor Newsom signed legislation to extend protections for tenants from eviction from COVID-19-related back rent through February 1, 2021, as well as extended anti-foreclosure protections in the Homeowner Bill of Rights to small landlords, and on January 20, 2021, Governor Newsom signed legislation to extend the protections through June 30, 2021. On June 28, 2021, Governor Newsom signed legislation to extend the protections through September 30, 2021. With the conclusion of the eviction moratorium, $850 million in State emergency rental assistance continues to be available to eligible low income tenants through the California COVID-19 Rent Relief Program.

Governor Newsom's Executive Order N-39-20, issued on March 30, 2020, provided broad waivers of certifications and licensing for healthcare providers and locations to expand the provision of medical care in meeting an expected patient surge. During his press conference announcing the Order, Governor Newsom mentioned that Porterville would play a role in meeting the expected patient surge, which staff has learned will involve the reactivation of a portion of the General Treatment Area of the Porterville Developmental Center (PDC), including caring for up to potentially 350 COVID-19 patients in four (4) categories: 1) patients too sick to recover at home, but do not need hospitalization; 2) patients who have been hospitalized and who are recovering and require less care; 3) skilled nursing facility patients who don't require acute care; and 4) developmentally-disabled group home patients. Preliminary construction improvements have been completed to prepare the facility's infrastructure, with no timeline yet provided for necessary medical improvements expected to begin. The City has repeatedly asked the State to keep it involved in its planning efforts, including any actions by Council that would be supportive of its operation. On May 8, 2020, the City received notice

from the County that the State intended to immediately relocate approximately forty (40) foster youth from across the state with COVID-19 to PDC, however, on May 9, 2020, the County notified the City that the State had changed its plans and would not be relocating the youth to PDC, likely to ensure regional patient surge capacity. On July 2, 2020, the City received notification from the County that the State would activate PDC as a regional alternate site on Friday, July 3, 2020, treating low-acute COVID-19 patients transferred from impacted hospitals from across the Central Valley. On August 19, 2020, the State notified the County that State personnel were being assigned to support the large fires in northern California and now across the state, and that PDC would not be accepting any new patients until further notice. As of September 12, 2020, there were no patients being treated at PDC, with the State designating the "warm closure" of the facility that can be reactivated within seventy-two (72) hours if necessary. The State has indicated that due to rising hospitalizations, it anticipated that PDC would be reopened as a regional alternate site, which was activated on December 15, 2020, and at the time of this report is currently not treating any patients and has been returned to "warm closure" status.

As part of the Governor's commitment to broader testing in rural and under-served areas of the state, the State established a contracted large-scale testing facility at the Veterans Memorial Building, beginning operations on Tuesday, May 5, 2020. Up to 130 tests are expected to be performed each day (Monday - Friday) for the next several months, which testing will be available to everyone by appointment. Given initial low utilization, City staff initiated a local messaging campaign for local residents to be tested, which precipitated improved community response beyond minimum State testing thresholds. City staff had been notified by County staff that the Veterans Memorial administration has given notice to the State to terminate the testing at its facility effective July 31, 2020, so that it may again use the facility for other purposes, however, the State and the Veterans Memorial administration have agreed to continue testing, with the testing site being terminated effective July 31, 2021. In addition, the City has partnered with the County in providing free community walkup testing, occurring weekly on Tuesdays in the public parking lot south of the Centennial Plaza building, which the County made the determination to discontinue the testing site effective May 18, 2021.

The United States Food and Drug Administration (FDA) provided emergency use authorization for the Pfizer-BioNTech COVID-19 vaccine on December 11, 2020, the Moderna vaccine on December 18, 2020 and the Johnson & Johnson vaccine on February 27, 2021, which the State provided guidelines for the distribution of vaccines in three phases. Consistent with the State's identified Phase 1A/Tier 1 priority, Tulare County began vaccinations the week of December 14, 2020, with approximately 3,000 vaccines administered. At the time of this report, the County has received 331,725 vaccines and administered 229,990 vaccines to residents, and is available to all individuals age 12 or older. The County had identified large-scale community vaccination sites, with locations in Porterville (Porterville College), Tulare (Ag Center) and Visalia (College of the Sequoias), though the County transitioned the Porterville vaccination site to the Porterville Fairgrounds in May 2021 due to a parking lot

project at Porterville College. At its Special Meeting on April 13, 2021, the City Council approved a mass vaccination and resource fair event sponsored by the County at the Porterville Fairgrounds on Sunday, April 18th through Tuesday, April 20th, 2021, which a successor vaccination event at the Fairgrounds for Sunday, May 10th through Tuesday, May 12th, 2021. Effective July 31, 2021, the local community vaccine clinic operated by Sierra View Medical Center and Imperial Ambulance at the Veterans Memorial Building transitioned to Sierra View's facility on the southwest corner of Morton Avenue/Pearson Drive.

On March 27, 2020, President Trump signed the Coronavirus Aid, Relief, and Economic Security (CARES) Act, a $2 trillion economic recovery stimulus package. The financial recovery package includes: 1) $604 billion for individuals/families, including $300 billion in cash payments, $260 billion in unemployment payments and $44 billion in student loan assistance; 2) $500 billion for large corporations; 3) $377 billion for small business; 4) $340 billion for state and local governments; 5) and $180 billion for public services, including $100 billion for hospitals. Within the state and local government provisions, a local government's (county or city) population must exceed 500,000 to receive direct federal recovery, which local governments with population less than 500,000 would only receive federal recovery through a state if the state was agreeable to local government distributions. On April 24, 2020, President Trump signed the Paycheck Protection Program and Healthcare Enhancement Act (H.R. 266), which provided approximately $400 billion in additional business assistance ($321 billion) and medical support and testing ($75 billion). Staff is focusing its efforts now in engaging with local businesses and financial institutions to ensure the emergency resources are made available to promote local economic stability upon the completion of the current state of emergency.

On December 27, 2020, President Trump signed a $900 billion COVID-19 relief bill into law, which included enhanced unemployment benefits, direct cash payments, small business assistance, childcare and education funding, rental assistance, vaccine and hospital funding, and payroll tax repayment, but did not include local government funding. Tulare County has reported that it would be receiving $13 million in direct funding for rental and utility assistance, which it opted to dedicate to the State under SB 91 legislation for matching funds of $14 million, with the total estimated $27 million to be administered by the Local Initiatives Support Corporation (LISC) through local non-profit organizations beginning by March 15, 2021.

On July 14, 2021, Governor Newsom announced the State's new $100 billion California Comeback Plan, which includes $5.2 billion allocated for both back-rent and prospective rent for eligible low income residents(California COVID-19 Rent Relief Program), as well as $2 billion to pay back unpaid water and utility bills.

On March 11, 2021, President Biden signed the $1.9 trillion American Rescue Plan Act (ARPA), which includes $65 billion in local government funding

assistance, with recent estimates by adopted population formulas would provide $19,984,717 in direct federal financial assistance to the City. Guidelines for the eligible use of funds are currently being drafted by the U.S. Department of the Treasury, which will administer the funds, who released the Interim Final Rule on May 10, 2021. The City's first allocation of $9,992,358 was received on May 20, 2021, which the second allocation would be received twelve (12) months later in May 2022, with all funds required to be obligated by December 31, 2024, and expended by December 31, 2026. Pursuant to the Interim Final Rule, the funds may be used for: 1) support public health expenditures in response and mitigation of COVID-19, including public safety personnel; 2) address negative economic impacts caused by the public health emergency, including assistance to individuals, households, businesses and impacted industries (tourism, travel and hospitality); 3) replace lost public sector revenue; 4) provide premium pay for essential workers in critical infrastructure sectors; and 5) invest in water, sewer and broadband infrastructure. At its meeting on May 18, 2021, the Council provided direction that the priorities for funding be water infrastructure, homeless services, broadband and technology infrastructure, business assistance (restaurants in particular) and vaccine support.

Consistent with federal guidelines in the use of ARPA funds and the Council's priorities for the use of funds, at its meeting on August 17, 2021, the Council acted to support a vaccine incentive program in collaboration with Sierra View Medical Center, offering $100 gift cards/certificates from local businesses (with particular focus on restaurants and personal services) to individuals being vaccinated in special publicized events. The City and Sierra View partnered in a vaccine event at the KJUG Free Summer Concert at Centennial Park on August 19, 20201, which seventy-four (74) individuals were vaccinated, and a Community Roundup Event on August 27, 2021 at Sierra View's vaccine clinic, which had 366 individuals vaccinated, for a total of 440 local gift cards to be purchased and $44,000 in City's ARPA funds expended. A second Community Roundup Event was held on September 16-18, 2021, with 795 individuals vaccinated. A total of 1,880 local gift cards/certificates have been purchased, of which 1,235 have been distributed, and $188,000 in City ARPA funds expended. Sierra View has expressed its interest in continuing to partner with the City in future vaccine incentive events, which the Council at its meeting on September 21, 2021, authorized continued Community Roundup Events for October 7-9 and October 28-30, 2021, as well as Music on Main events on October 15, 2021, and October 29, 2021. Unfortunately, the vaccine event planned in conjunction with the Family Literacy Day on September 25, 2021, was canceled due to unhealthy air quality from the local Windy Fire. Family Healthcare Network has also expressed an interest to partner with the City on vaccine incentive events through its Downtown clinic.

At its meeting on May 5, 2020, the Council acted to amend its federal Community Development Block Grant (CDBG) 5-Year Action Plan and program the $490,000 CDBG-CV business assistance funds received, and took additional action at its meeting on June 2, 2020, which staff received final approval from the Housing and Urban Development (HUD) Department on July

21, 2020, and begin providing local small business assistance. Although the City received approval of its CDBG-CV plan and program by HUD, on August 10, 2020, HUD released its final set of program rules, which staff had to review for consistency. On September 17, 2020, the City received notification from HUD of an additional $393,000 in additional CDBG-CV funds, which City staff is still awaiting final approval from HUD on the use of funds. At its meeting of June 16, 2020, the Council took action to defer the collection of the biannual $25 business license from July 2020 to January 2021 for local small businesses, which due to the State's current regional stay at home order, at its meeting on December 15, 2020, the Council acted to defer the biannual collection again until July 2021. At its meeting on August 3, 2021, the Council acted to continue to defer the biannual collection until January 2022.

On December 3, 2020, given the new Regional Stay-at-Home Orders, the State announced that a new $500 million in grants would be made available to assist small businesses impacted by the Orders, which the application period for the first round of funding opened on December 30, 2020, and closed on January 13, 2021. A second round of funding was committed to by the State, with the application period having opened on February 2 and closed on February 8, 2021. Four additional rounds of funding were announced by the State on March 3, 2021, with the third round (waitlisted applicants from the first and seconds rounds only) having opened on March 5 and closed March 11, 2021, the fourth round (nonprofit cultural institutions only) opened on March 16 and closed on March 23, 2021, the fifth round (open to all eligible applicants) opened on March 25 and closed on March 31, 2021, and the sixth round (open to all eligible applicants) opened on April 28, 2021 and closed on May 4, 2021. An eighth round for nonprofit cultural institutions only opened on August 27, 2021 and closed on September 8, 2021. A ninth round for new and waitlisted applicants opened on September 9, 2021 and closed on September 30, 2021. Additional rounds of funding are expected to announced, as the State has recognized an estimated $75 billion budget surplus.

Given challenges of access and gaps in available small business assistance, some cities have developed self-funded small business assistance programs. As an example, the City of Whittier recently developed a $500,000 small business assistance grant program, with eligible businesses required to have a valid business license, be independently owned and operated, and have a physical commercial location (home based businesses are not eligible). The program provides $500 to personal care services providers (i.e. hair, massage, nail, skincare, tattoo), $2,000 to businesses that generate less than $250,000 in gross taxable sales, and $2,500 to businesses that generate more than $250,000 in gross taxable sales. Small businesses are defined generating less than $1.25 million in gross taxable sales.

From a City financial perspective, there is uncertainty as to how the pandemic would affect local sales tax and transient occupancy tax, which could be further compounded by a potential reassessment of property tax values. Fortunately, the conservative stewardship of the City has allowed it to have General Fund reserves for Catastrophic Emergencies ($2.8 million) and Budget Stabilization

($4.3 million), which in addition to the recent passage of Measure I, allows the City to purposefully address the current crisis and plan for budgetary accommodations that the City's essential services to the community can continue without current modification. The League of California Cities has estimated cities in California will collectively lose $7 billion in revenue through the 2020-2021 fiscal year.

As a component of its 2020-2021 budget adoption, the State appropriated $500 million of CARES Act funding to cities that were not allocated CARES Act funding directly by the federal government, including $275 million to cities with a population of less than 300,000, which the City received approximately $740,000.

On Friday, January 8, 2021, Governor Newsom announced the State's proposed $227 billion budget for the 2021-2022 fiscal year, allocating $15 billion for COVID-19 recovery and support, focused on vaccinations, safe reopening of schools, support for small businesses, and funding for California residents, but did not include financial support for cities.

On Tuesday, February 23, 2021, Governor Newsom signed the Golden State Stimulus legislation, that provides $9.6 billion in financial assistance to eligible individuals and families, and economic aid to qualifying small businesses and non-profits.

RECOMMENDATION: That the City Council:
1. Receive the report of status and review of the Proclamation of Local Emergency;
2. Determine the need exists to continue said Declaration;
3. Approve the Draft Resolution authorizing local emergency virtual meetings; and
4. Take action and/or provide direction as deemed necessary.

RESOLUTION NO. 22-2020

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORTERVILLE TO PROCLAIM THE EXISTENCE OF A LOCAL EMERGENCY

RESOLVED, by the City Council (the "Council") of the City of Porterville (the "City"), as follows:

WHEREAS, the novel coronavirus (COVID-19) is a respiratory disease which the Centers for Disease Control and Prevention (CDC) considers to be a very serious public health threat with outcomes ranging from mild to severe sickness and death; and

WHEREAS, COVID-19 is easily transmissible from person to person and has spread globally to over 118 countries, infected more than 125,000, and killed more than 4,000 as of March 11, 2020 per the World Health Organization (WHO); and

WHEREAS, on January 31, 2020, the United States Department of Public Health and Human Services declared a public emergency for COVID-19 beginning on January 27, 2020; and

WHEREAS, on March 4, 2020, Governor Gavin Newsom declared a state of emergency in the State of California due to the number of confirmed cases of COVID-19 in the State; and

WHEREAS, on March 11, 2020, WHO made the assessment that COVID-19 can be characterized as a pandemic; and

WHEREAS, on March 12, 2020, Tulare County declared an emergency due to the confirmed case of COVID-19 at Sierra View Medical Center in the city of Porterville, thus enabling Tulare County to take extraordinary measures; and

WHEREAS, on March 13, 2020, Governor Newsom announced that California public health officials have determined that gatherings of more than 250 people should be postponed or canceled across the State at least until the end of March; and

WHEREAS, COVID-19 therefore and will continue to cause conditions of peril to the health, safety, and welfare of persons and property in the City of Porterville; and

WHEREAS, preparing for, responding to, mitigating, and recovering from the spread of COVID-19 requires the City to divert resources from normal day-to-day operations, and has and will continue to impose extraordinary requirements on and expenses to the City; and

WHEREAS, the City Council hereby finds that the above described conditions related to the COVID-19 outbreak does warrant and necessitate the proclamation of the existence of a local emergency in the city of Porterville.

NOW, THEREFORE, it is hereby **DECLARED** and **ORDERED**, as follows:

1. The proclamation of existence of a local emergency exists throughout the City of Porterville.

2. The local emergency shall be deemed to continue to exist until its termination is proclaimed by the City Council of the City of Porterville.

3. As required by law, the City Council shall review the need to continue the state of emergency every thirty (30) days until this Resolution is terminated.

PASSED, APPROVED, AND ADOPTED this 17th day of March, 2020.

EXECUTIVE DEPARTMENT
STATE OF CALIFORNIA

PROCLAMATION OF A STATE OF EMERGENCY

WHEREAS in December 2019, an outbreak of respiratory illness due to a novel coronavirus (a disease now known as COVID-19), was first identified in Wuhan City, Hubei Province, China, and has spread outside of China, impacting more than 75 countries, including the United States; and

WHEREAS the State of California has been working in close collaboration with the national Centers for Disease Control and Prevention (CDC), with the United States Health and Human Services Agency, and with local health departments since December 2019 to monitor and plan for the potential spread of COVID-19 to the United States; and

WHEREAS on January 23, 2020, the CDC activated its Emergency Response System to provide ongoing support for the response to COVID-19 across the country; and

WHEREAS on January 24, 2020, the California Department of Public Health activated its Medical and Health Coordination Center and on March 2, 2020, the Office of Emergency Services activated the State Operations Center to support and guide state and local actions to preserve public health; and

WHEREAS the California Department of Public Health has been in regular communication with hospitals, clinics and other health providers and has provided guidance to health facilities and providers regarding COVID-19; and

WHEREAS as of March 4, 2020, across the globe, there are more than 94,000 confirmed cases of COVID-19, tragically resulting in more than 3,000 deaths worldwide; and

WHEREAS as of March 4, 2020, there are 129 confirmed cases of COVID-19 in the United States, including 53 in California, and more than 9,400 Californians across 49 counties are in home monitoring based on possible travel-based exposure to the virus, and officials expect the number of cases in California, the United States, and worldwide to increase; and

WHEREAS for more than a decade California has had a robust pandemic influenza plan, supported local governments in the development of local plans, and required that state and local plans be regularly updated and exercised; and

WHEREAS California has a strong federal, state and local public health and health care delivery system that has effectively responded to prior events including the H1N1 influenza virus in 2009, and most recently Ebola; and

WHEREAS experts anticipate that while a high percentage of individuals affected by COVID-19 will experience mild flu-like symptoms, some will have more serious symptoms and require hospitalization, particularly individuals who are elderly or already have underlying chronic health conditions; and

WHEREAS it is imperative to prepare for and respond to suspected or confirmed COVID-19 cases in California, to implement measures to mitigate the spread of COVID-19, and to prepare to respond to an increasing number of individuals requiring medical care and hospitalization; and

WHEREAS if COVID-19 spreads in California at a rate comparable to the rate of spread in other countries, the number of persons requiring medical care may exceed locally available resources, and controlling outbreaks minimizes the risk to the public, maintains the health and safety of the people of California, and limits the spread of infection in our communities and within the healthcare delivery system; and

WHEREAS personal protective equipment (PPE) is not necessary for use by the general population but appropriate PPE is one of the most effective ways to preserve and protect California's healthcare workforce at this critical time and to prevent the spread of COVID-19 broadly; and

WHEREAS state and local health departments must use all available preventative measures to combat the spread of COVID-19, which will require access to services, personnel, equipment, facilities, and other resources, potentially including resources beyond those currently available, to prepare for and respond to any potential cases and the spread of the virus; and

WHEREAS I find that conditions of Government Code section 8558(b), relating to the declaration of a State of Emergency, have been met; and

WHEREAS I find that the conditions caused by COVID-19 are likely to require the combined forces of a mutual aid region or regions to appropriately respond; and

WHEREAS under the provisions of Government Code section 8625(c), I find that local authority is inadequate to cope with the threat posed by COVID-19; and

WHEREAS under the provisions of Government Code section 8571, I find that strict compliance with various statutes and regulations specified in this order would prevent, hinder, or delay appropriate actions to prevent and mitigate the effects of the COVID-19.

NOW, THEREFORE, I, GAVIN NEWSOM, Governor of the State of California, in accordance with the authority vested in me by the State Constitution and statutes, including the California Emergency Services Act, and in particular, Government Code section 8625, **HEREBY PROCLAIM A STATE OF EMERGENCY** to exist in California.

IT IS HEREBY ORDERED THAT:

1. In preparing for and responding to COVID-19, all agencies of the state government use and employ state personnel, equipment, and facilities or perform any and all activities consistent with the direction of the Office of Emergency Services and the State Emergency Plan, as well as the California Department of Public Health and the Emergency Medical Services Authority. Also, all residents are to heed the advice of emergency officials with regard to this emergency in order to protect their safety.

2. As necessary to assist local governments and for the protection of public health, state agencies shall enter into contracts to arrange for the procurement of materials, goods, and services needed to assist in preparing for, containing, responding to, mitigating the effects of, and recovering from the spread of COVID-19. Applicable provisions of the Government Code and the Public Contract Code, including but not limited to travel, advertising, and competitive bidding requirements, are suspended to the extent necessary to address the effects of COVID-19.

3. Any out-of-state personnel, including, but not limited to, medical personnel, entering California to assist in preparing for, responding to, mitigating the effects of, and recovering from COVID-19 shall be permitted to provide services in the same manner as prescribed in Government Code section 179.5, with respect to licensing and certification. Permission for any such individual rendering service is subject to the approval of the Director of the Emergency Medical Services Authority for medical personnel and the Director of the Office of Emergency Services for non-medical personnel and shall be in effect for a period of time not to exceed the duration of this emergency.

4. The time limitation set forth in Penal Code section 396, subdivision (b), prohibiting price gouging in time of emergency is hereby waived as it relates to emergency supplies and medical supplies. These price gouging protections shall be in effect through September 4, 2020.

5. Any state-owned properties that the Office of Emergency Services determines are suitable for use to assist in preparing for, responding to, mitigating the effects of, or recovering from COVID-19 shall be made available to the Office of Emergency Services for this purpose, notwithstanding any state or local law that would restrict, delay, or otherwise inhibit such use.

6. Any fairgrounds that the Office of Emergency Services determines are suitable to assist in preparing for, responding to, mitigating the effects of, or recovering from COVID-19 shall be made available to the Office of Emergency Services pursuant to the Emergency Services Act, Government Code section 8589. The Office of Emergency Services shall notify the fairgrounds of the intended use and can immediately use the fairgrounds without the fairground board of directors' approval, and

notwithstanding any state or local law that would restrict, delay, or otherwise inhibit such use.

7. The 30-day time period in Health and Safety Code section 101080, within which a local governing authority must renew a local health emergency, is hereby waived for the duration of this statewide emergency. Any such local health emergency will remain in effect until each local governing authority terminates its respective local health emergency.

8. The 60-day time period in Government Code section 8630, within which local government authorities must renew a local emergency, is hereby waived for the duration of this statewide emergency. Any local emergency proclaimed will remain in effect until each local governing authority terminates its respective local emergency.

9. The Office of Emergency Services shall provide assistance to local governments that have demonstrated extraordinary or disproportionate impacts from COVID-19, if appropriate and necessary, under the authority of the California Disaster Assistance Act, Government Code section 8680 et seq., and California Code of Regulations, Title 19, section 2900 et seq.

10. To ensure hospitals and other health facilities are able to adequately treat patients legally isolated as a result of COVID-19, the Director of the California Department of Public Health may waive any of the licensing requirements of Chapter 2 of Division 2 of the Health and Safety Code and accompanying regulations with respect to any hospital or health facility identified in Health and Safety Code section 1250. Any waiver shall include alternative measures that, under the circumstances, will allow the facilities to treat legally isolated patients while protecting public health and safety. Any facilities being granted a waiver shall be established and operated in accordance with the facility's required disaster and mass casualty plan. Any waivers granted pursuant to this paragraph shall be posted on the Department's website.

11. To support consistent practices across California, state departments, in coordination with the Office of Emergency Services, shall provide updated and specific guidance relating to preventing and mitigating COVID-19 to schools, employers, employees, first responders and community care facilities by no later than March 10, 2020.

12. To promptly respond for the protection of public health, state entities are, notwithstanding any other state or local law, authorized to share relevant medical information, limited to the patient's underlying health conditions, age, current condition, date of exposure, and possible contact tracing, as necessary to address the effect of the COVID-19 outbreak with state, local, federal, and nongovernmental partners, with such information to be used for the limited purposes of monitoring, investigation and control, and treatment and coordination of care. The

notification requirement of Civil Code section 1798.24, subdivision (i), is suspended.

13. Notwithstanding Health and Safety Code sections 1797.52 and 1797.218, during the course of this emergency, any EMT-P licensees shall have the authority to transport patients to medical facilities other than acute care hospitals when approved by the California EMS Authority. In order to carry out this order, to the extent that the provisions of Health and Safety Code sections 1797.52 and 1797.218 may prohibit EMT-P licensees from transporting patients to facilities other than acute care hospitals, those statutes are hereby suspended until the termination of this State of Emergency.

14. The Department of Social Services may, to the extent the Department deems necessary to respond to the threat of COVID-19, waive any provisions of the Health and Safety Code or Welfare and Institutions Code, and accompanying regulations, interim licensing standards, or other written policies or procedures with respect to the use, licensing, or approval of facilities or homes within the Department's jurisdiction set forth in the California Community Care Facilities Act (Health and Safety Code section 1500 et seq.), the California Child Day Care Facilities Act (Health and Safety Code section 1596.70 et seq.), and the California Residential Care Facilities for the Elderly Act (Health and Safety Code section 1569 et seq.). Any waivers granted pursuant to this paragraph shall be posted on the Department's website.

I FURTHER DIRECT that as soon as hereafter possible, this proclamation be filed in the Office of the Secretary of State and that widespread publicity and notice be given of this proclamation.

IN WITNESS WHEREOF I have hereunto set my hand and caused the Great Seal of the State of California to be affixed this 4th day of March 2020.

GAVIN NEWSOM
Governor of California

ATTEST:

ALEX PADILLA
Secretary of State

PROCLAMATIONS

Proclamation on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak

Issued on: **March 13, 2020**

★ ★ ★

In December 2019, a novel (new) coronavirus known as SARS-CoV-2 ("the virus") was first detected in Wuhan, Hubei Province, People's Republic of China, causing outbreaks of the coronavirus disease COVID-19 that has now spread globally. The Secretary of Health and Human Services (HHS) declared a public health emergency on January 31, 2020, under section 319 of the Public Health Service Act (42 U.S.C. 247d), in response to COVID-19. I have taken sweeping action to control the spread of the virus in the United States, including by suspending entry of foreign nationals seeking entry who had been physically present within the prior 14 days in certain jurisdictions where COVID-19 outbreaks have occurred, including the People's Republic of China, the Islamic Republic of Iran, and the Schengen Area of Europe. The Federal Government, along with State and local governments, has taken preventive and proactive measures to slow the spread of the virus and treat those affected, including by instituting Federal quarantines for individuals evacuated from foreign nations, issuing a declaration pursuant to section 319F-3 of the Public Health Service Act (42 U.S.C. 247d-6d), and releasing policies to accelerate the acquisition of personal protective equipment and streamline bringing new diagnostic capabilities to laboratories. On March 11, 2020, the World Health Organization announced that the COVID-19 outbreak can be characterized as a pandemic, as the rates of infection continue to rise in many locations around the world and across the United States.

The spread of COVID-19 within our Nation's communities threatens to strain our Nation's healthcare systems. As of March 12, 2020, 1,645 people from 47 States have been infected with the virus that

causes COVID-19. It is incumbent on hospitals and medical facilities throughout the country to assess their preparedness posture and be prepared to surge capacity and capability. Additional measures, however, are needed to successfully contain and combat the virus in the United States.

NOW, THEREFORE, I, DONALD J. TRUMP, President of the United States, by the authority vested in me by the Constitution and the laws of the United States of America, including sections 201 and 301 of the National Emergencies Act (50 U.S.C. 1601 *et seq*.) and consistent with section 1135 of the Social Security Act (SSA), as amended (42 U.S.C. 1320b-5), do hereby find and proclaim that the COVID-19 outbreak in the United States constitutes a national emergency, beginning March 1, 2020. Pursuant to this declaration, I direct as follows:

Section 1. Emergency Authority. The Secretary of HHS may exercise the authority under section 1135 of the SSA to temporarily waive or modify certain requirements of the Medicare, Medicaid, and State Children's Health Insurance programs and of the Health Insurance Portability and Accountability Act Privacy Rule throughout the duration of the public health emergency declared in response to the COVID-19 outbreak.

Sec. 2. Certification and Notice. In exercising this authority, the Secretary of HHS shall provide certification and advance written notice to the Congress as required by section 1135(d) of the SSA (42 U.S.C. 1320b-5(d)).

Sec. 3. General Provisions. (a) Nothing in this proclamation shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This proclamation shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This proclamation is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

IN WITNESS WHEREOF, I have hereunto set my hand this thirteenth day of March, in the year of our Lord two thousand twenty, and of the Independence of the United States of America the two hundred and forty-fourth.

SUBJECT: Ratify Proclamations of Emergency for COVID-19

REQUEST(S):

That the Board of Supervisors:

1. Ratify a Proclamation of Local Emergency issued by the County Coordinator of Emergency Services on March 11, 2020 due to COVID-19; and

2. Ratify a Proclamation of Local Health Emergency issued by the County Health Officer on March 11, 2020 due to COVID-19.

SUMMARY:

As has been widely covered in the media, the COVID-19 outbreak originated in China beginning in December 2019. The Tulare County Department of Public Health, in cooperation with all Tulare County departments and numerous healthcare and community partners, has been actively monitoring and proactively preparing for COVID-19 since early January 2020.

Since that time, cases have been reported worldwide along with numerous deaths resulting from the disease. California has had numerous cases resulting from travel, person-to-person contact, and community spread. On March 4, 2020, Governor Newsom proclaimed a State of Emergency for COVID-19 after the first COVID-19 related death in California. Since that date, confirmed cases have also occurred in neighboring Fresno and Madera Counties.

On March 11, 2020, Tulare County had its first confirmed positive COVID-19 case. As a result, the County implemented a contingency plan under which the County's Coordinator of Emergency Services proclaimed a Local Emergency, and the County

Health Officer proclaimed a Local Health Emergency, to enable the County to take all necessary response actions to combat the effects of the disease. Pursuant to California Government Code section 8630(b), these proclamations must be ratified within seven (7) days by the Board of Supervisors in order to remain in effect.

The Governor's State of Emergency dated March 4, 2020, waives statutory requirements to renew emergency proclamations for COVID-19, so these local proclamations will remain in effect until terminated by the Tulare County Board of Supervisors.

As a matter of information, local public health emergencies due to the threat posed by COVID-19 also have been declared by the Counties of Santa Clara, San Diego, San Francisco, Orange, Solano, Alameda, Sonoma, Marin, Placer, Los Angeles, Mendocino, Butte, San Bernardino, San Benito, Yolo, Monterey, San Mateo, Yuba, Sutter, Contra Costa, Humboldt, Lake, and Sacramento, and by numerous California cities and Indian Tribes.

FISCAL IMPACT/FINANCING:

There is no cost associated with proclaiming or terminating a local emergency or local health emergency. The proclamation of local emergency contains a request for California Disaster Assistance Act funding, which may result in cost recovery of extraordinary response costs associated with this incident.

LINKAGE TO THE COUNTY OF TULARE STRATEGIC BUSINESS PLAN:

The County's five-year strategic plan includes the Safety and Security initiative, with a directive to plan and provide coordinated emergency preparedness, response, recovery and mitigation capabilities for both natural and man-made disasters. These proclamations support the County's emergency response and coordination efforts by ensuring all necessary actions can be taken to mitigate the spread of disease.

* * * * * * * * * * * * * * * * * * *

1. Ratified a Proclamation of Local Emergency issued by the County Coordinator of Emergency Services on March 11, 2020 due to COVID-19; and

2. Ratified a Proclamation of Local Health Emergency issued by the County Health Officer on March 11, 2020 due to COVID-19.

PROCLAMATION OF A LOCAL EMERGENCY
BY THE DIRECTOR OF EMERGENCY SERVICES

WHEREAS, Government Code section 8630 and Tulare County Ordinance Code section 1-15-1030 authorize the Director of Emergency Services to proclaim a local emergency when the County of Tulare ("County") is threatened by conditions of disaster or extreme peril to the safety of persons and property within the County that are or are likely to be beyond the control of the services, personnel, equipment, and facilities of the County, and the Board of Supervisors is not in session; and

WHEREAS, the Director of Emergency Services hereby finds:

Conditions of extreme peril to the safety of persons and property have arisen within the County due to the following:

A novel coronavirus (named "COVID-19") was first detected in Wuhan City, Hubei Province, China, in December 2019. The U.S. Centers for Disease Control and Prevention ("CDC") considers the virus to be a very serious public health threat, based on current information. In part, the virus is considered a serious public health threat because much is unknown. The exact modes of transmission, the factors facilitating human-to-human transmission, the extent of asymptomatic viral shedding, the groups most at risk of serious illness, the attack rate, and the case fatality rate all remain active areas of investigation. The CDC believes at this time that symptoms appear two to fourteen days after exposure. Currently, there is no vaccine or specific antiviral treatment for COVID-19.

The number of reported cases of COVID-19 has escalated dramatically over a short period of time. To date, worldwide there are over 125,000 confirmed cases of COVID-19 and over 4,600 deaths from COVID-19. Cases of COVID-19, though concentrated in China, have been reported in one hundred twenty-two countries, including the United States, and include individuals who never visited China. Transmission from an asymptomatic individual has been documented. In the U.S., there have been 939 total cases of COVID-19 confirmed to date in 41 different states, and at least 29 deaths reported.

The World Health Organization has declared the outbreak to be a global health emergency. Actions are being taken to protect public health and limit the spread of COVID-19 in the United States.

On March 4, 2020, Governor Newsom proclaimed a state of emergency to exist in California. There are now almost 200 confirmed cases in California spanning some 24 counties and at least four deaths have been reported in California due to COVID-19.

Local public health emergencies due to the threat posed by COVID-19 have been declared by the Counties of Santa Clara, San Diego, San Francisco, Orange, Solano, Alameda, Sonoma, Marin, Placer, Los Angeles, Mendocino, Butte, San Bernardino, San Benito, Yolo, Monterey, San Mateo, Yuba, Sutter, Contra Costa, Humboldt, Lake, and Sacramento, and by numerous California cities and Indian Tribes; and

Tulare County has a population of over 450,000 residents, many of whom travel frequently for business or personal reasons. The Health Officer of the County of Tulare has determined that there is an imminent and proximate threat to public health from the introduction of COVID-19 in Tulare County, and has declared a Local Health Emergency as a result.

These conditions are beyond the control of the services, personnel, equipment, and facilities of the County and require the combined forces of other political subdivisions to combat.

WHEREAS, on March 11, 2020, a Tulare County resident tested positive for COVID-19; and

WHEREAS, based on the experience of other California communities, it can reasonably be expected that other positive tests will soon follow; and

WHEREAS, the Board of Supervisors is not in session, and cannot immediately be called into session; and

WHEREAS, during a local emergency, the Director of Emergency Services or other individual authorized to serve in that capacity under Tulare County Ordinance Code sections 1-15-1031 and 1-15-1032 is empowered by Tulare County Ordinance Code section 1-15-1025 to issue rules and regulations on matters reasonably related to the protection of life and property as affected by such emergency; provided, however, that such rules and regulations must be confirmed at the earliest possible time by the Board of Supervisors; and

WHEREAS, the Director of Emergency Services is unavailable to issue a proclamation as he is currently outside of Tulare County and has authorized his successor, the County's Coordinator of Emergency Services (Assistant County Administrative Officer), as designated in Tulare County Ordinance Code sections 1-15-1010 (c) and 1-15-1030 (g) to exercise the powers of Director of Emergency Services as provided for in Tulare County Ordinance Code section 1-15-1030 (h) and thereby to issue this proclamation of local emergency; and

WHEREAS, the Tulare County Health Department must use all preventive measures, which will require access to available services, personnel, equipment, and facilities, to respond to COVID-19; and

NOW THEREFORE, the Tulare County Coordinator of Emergency Services hereby:

1. Proclaims that a local emergency, as defined in Government Code Section 8558 and Tulare County Ordinance Code Section 1-15-1005, now exists within the County due to the presence of COVID-19; and

2. Requests that the Governor of the State of California request a federal declaration to provide assistance, including, but not limited to, California Disaster Assistance Act ("CDAA"); and

3. Orders that the Tulare County Health Department must use all preventive measures, which will require access to available services, personnel, equipment, and facilities, to respond to COVID-19.

The local emergency shall not remain in effect for a period in excess of seven days unless it has been ratified by the Board of Supervisors.

PROCLAMATION OF LOCAL HEALTH EMERGENCY
REGARDING NOVEL CORONAVIRUS (COVID-19)

WHEREAS, California Health and Safety Code section 101080 and Tulare County Ordinance Code section 1-15-1033 authorize the local health officer to declare a local health emergency in the health officer's jurisdiction, or any part thereof, whenever the health officer reasonably determines that there is an imminent and proximate threat of the introduction of any contagious, infectious, or communicable disease, chemical agent, noncommunicable biologic agent, toxin, or radioactive agent; and

WHEREAS, the local health emergency shall not remain in effect after 7 days from the date of this declaration unless it has been ratified by the County of Tulare's Board of Supervisors; and

WHEREAS, the Health Officer of the County of Tulare makes the following findings:

A novel coronavirus (named "COVID-19") was first detected in Wuhan City, Hubei Province, China, in December 2019. The U.S. Centers for Disease Control and Prevention ("CDC") considers the virus to be a very serious public health threat, based on current information. In part, the virus is considered a serious public health threat because much is unknown. The exact modes of transmission, the factors facilitating human-to-human transmission, the extent of asymptomatic viral shedding, the groups most at risk of serious illness, the attack rate, and the case fatality rate all remain active areas of investigation, but are poorly characterized at this time. The best information to date suggests that the virus is spread between people primarily via respiratory droplets produced when an infected person coughs or sneezes. Symptoms of the virus include fever, cough, and shortness of breath, and infected individuals have experienced a range of outcomes, from mild sickness to severe illness and death. The CDC believes at this time that symptoms appear two to fourteen days after exposure. Currently, there is no vaccine or specific antiviral treatment for COVID-19.

The number of reported cases of COVID-19 has escalated dramatically over a short period of time. To date, worldwide there are over 125,000 confirmed cases of COVID-19 and over 4,600 deaths from COVID-19. Cases of COVID-19, though concentrated in China, have been reported in 122 counties, including the United States. Confirmed cases of COVID-19 include individuals who never visited China. Transmission from an asymptomatic individual has been documented. The World Health Organization has declared the outbreak to be a global health emergency.

On March 4, 2020, Governor Newsom proclaimed a state of emergency to exist in California.

DECLARATION OF LOCAL HEALTH EMERGENCY
REGARDING NOVEL CORONAVIRUS (COVID-19)

There are now almost 200 confirmed cases in California spanning 24 counties, and 4 deaths have been reported in California due to COVID-19.

Local public health emergencies due to the threat posed by COVID-19 have been declared by the Counties of Santa Clara, San Diego, San Francisco, Orange, Solano, Alameda, Sonoma, Marin, Placer, Los Angeles, Mendocino, Butte, San Bernardino, San Benito, Yolo, Monterey, San Mateo, Yuba, Sutter, Contra Costa, Humboldt, Lake, and Sacramento, and by numerous California cities and Indian Tribes.

Tulare County has a population of over 450,000 residents, many of whom travel frequently for business or personal reasons. As of March 11, 2020 there are 939 total cases of COVID-19 in the United States and 29 deaths. 41 states have reported cases.

WHEREAS, on March 11, 2020, a Tulare County resident tested positive for COVID-19; and

WHEREAS, based on the experience of other California communities, it can reasonably be expected that other positive tests will soon follow; and

WHEREAS, the Health Officer of the County of Tulare does hereby find that there is an imminent and proximate threat to public health from the introduction of COVID-19 in Tulare County; and

WHEREAS, the Board of Supervisors is not in session, and cannot immediately be called into session; and

NOW, THEREFORE, the Health Officer of the County of Tulare hereby proclaims and declares that a local health emergency now exists in the County of Tulare due to the presence of and threat posed by COVID-19.

TULE RIVER INDIAN TRIBE OF CALIFORNIA

IN THE MATTER OF:

Resolution to Formally Declare a State of) Emergency for the Tule River Tribe of The) Tule River Reservation of California)

RESOLUTION NO. FY2020-100

BE IT RESOLVED BY THE COUNCIL OF THE TULE RIVER INDIAN TRIBE:

WHEREAS, the Tule River Indian Tribe (the "Tribe") is a federally recognized Indian tribe organized pursuant to the Constitution and Bylaws of the Tule River Indian Tribe approved January 15, 1936 ("Constitution"); and

WHEREAS, pursuant to Article III, Section 1 of the Constitution the governing body of the Tribe is the Tribal Council and pursuant to Article VI, Section 1 of its Constitution it has the power to promulgate ordinance for the purpose of safeguarding the peace and safety of residents of the reservation and to adopt resolutions regulating the procedure of tribal agencies of the reservation; and

WHEREAS, On March 4th 2020, a proclaimed State of Emergency exits in the State of California, as result of the threat of COVID-19; and

WHEREAS, despite sustained efforts, the virus remains a threat, and further efforts to control the spread of the virus to reduce and minimize the risk of infection are needed; and

WHEREAS, for the safety and protection of the public health within the jurisdiction of the Tribe for the Tribe and/or its governmental agencies to obtain emergency support and funding from Federal, state and local agencies; and

WHEREAS, the Tule River Tribal Council desires to consider state and local recommendation deemed necessary in the interests of the public health, issue guidance limiting or recommend limitations upon attendance at public assemblies, conferences, or other mass events, which could cause the cancellation of such gatherings through no fault or responsibility of the parties involved thereby constituting a force majeure; and

WHEREAS, in the interest of public health and safety, it is necessary to exercise my authority under Constitution of the governing body of the Tribe to ensure adequate response and address potential issues related to the threat of COVID-19; and

NOW THEREFORE BE IT RESOLVED, the Tribal Council hereby declares a State of Emergency for the safety and protection of the public health within the jurisdiction of the Tribe for the Tribe and/or its governmental agencies to obtain emergency support and funding from Federal, state and local agencies

EXECUTIVE DEPARTMENT
STATE OF CALIFORNIA

EXECUTIVE ORDER N-42-20

WHEREAS on March 4, 2020, I proclaimed a state of emergency to exist in California as a result of the threat of COVID-19; and

WHEREAS it is the established policy of the State under Water Code section 106.3 that every human being has the right to safe, clean, affordable, and accessible water adequate for human consumption, cooking, and sanitary purposes; and

WHEREAS to limit the spread of COVID-19 it is crucial that Californians wash their hands regularly and thoroughly; and

WHEREAS many Californians are experiencing or will experience substantial losses of income as a result of business closures, the loss of work hours or wages, or layoffs related to COVID-19, which may hinder their ability to make payments for water service and subject them to water shutoffs due to non-payment; and

WHEREAS many small businesses that provide services essential to the health and well-being of Californians have experienced substantial reductions in income, which may hinder their ability to make payments for water service and subject them to water shutoffs due to non-payment; and

WHEREAS the California Public Utilities Commission has directed private water utilities under its jurisdiction to implement customer service protections, including a moratorium on service disconnections, during the COVID-19 emergency; and

WHEREAS more than 100 public and private water systems have voluntarily agreed to halt disconnections as well; and

WHEREAS under the provisions of Government Code section 8571, I find that strict compliance with the various statutes and regulations concerning water shutoffs specified in this order would prevent, hinder, or delay appropriate actions to prevent and mitigate the effects of the COVID-19 pandemic.

NOW, THEREFORE, I, GAVIN NEWSOM, Governor of the State of California, in accordance with the authority vested in me by the State Constitution and the statutes of the State of California, and in particular, Government Code sections 8567, 8570, 8571, and 8627, do hereby issue the following order to become effective immediately:

IT IS HEREBY ORDERED THAT:

1) The authority of urban and community water systems, as defined in Health and Safety Code section 116902, subdivision (d), to discontinue residential service, as defined in Health and Safety Code section 116902, subdivision (c), for non-payment under Health and Safety Code sections 116908 and 116910, is suspended.

2) Water systems not subject to the requirements of Health and Safety Code sections 116908 and 116910 shall not discontinue residential

service, as defined in Health and Safety Code section 116902, subdivision (c), for non-payment.

3) Water systems shall restore any residential service to occupied residences that has been discontinued for nonpayment since March 4, 2020.

4) Water systems shall not discontinue service to any business in the critical infrastructure sectors designated by the State Public Health Officer as critical to protect the health and well-being of all Californians that qualifies as a small business under 13 C.F.R. § 121.201 of the Small Business Administration's regulations.

5) The State Water Resources Control Board shall identify best practices, guidelines, or both to be implemented during the COVID-19 emergency (i) to address non-payment or reduced payments, (ii) to promote and to ensure continuity of service by water systems and wastewater systems, and (iii) to provide measures such as the sharing of supplies, equipment and staffing to relieve water systems under financial distress.

Nothing in this Order eliminates the obligation of water customers to pay for water service, prevents a water system from charging a customer for such service, or reduces the amount a customer already may owe to a water system.

Nothing in this Order modifies the obligations of urban and community waters systems to comply with provisions of the Water Shutoff Protection Act not specifically addressed by this Order or other applicable laws, regulations, and guidelines.

IT IS FURTHER ORDERED that as soon as hereafter possible, this Order be filed in the Office of the Secretary of State and that widespread publicity and notice be given of this Order.

This Order is not intended to, and does not, create any rights or benefits, substantive or procedural, enforceable at law or in equity, against the State of California, its agencies, departments, entities, officers, employees, or any other person.

IN WITNESS WHEREOF I have hereunto set my hand and caused the Great Seal of the State of California to be affixed this 2nd day of April 2020.

GAVIN NEWSOM
Governor of California

ORDINANCE NO. 1874

AN URGENCY ORDINANCE OF THE CITY COUNCIL OF THE CITY OF PORTERVILLE REQUIRING THE USE OF FACE COVERINGS IN CONFORMITY WITH THE REQUIREMENTS SET BY THE CALIFORNIA DEPARTMENT OF PUBLIC HEALTH

WHEREAS, the novel coronavirus (COVID-19) is a respiratory disease which the Centers for Disease Control and Prevention (CDC) considers to be a very serious public health threat with outcomes ranging from mild to severe sickness and death;

WHEREAS, COVID-19 has been found to be easily transmissible from person to person;

WHEREAS, on January 31, 2020, the United States Department of Public Health and Human Services declared a public emergency for COVID-19 beginning on January 27, 2020;

WHEREAS, on March 4, 2020, Governor Gavin Newsom declared a state of emergency in the State of California due to the number of confirmed cases of COVID-19 in the State;

WHEREAS, on March 21, 2020, Tulare County declared an emergency, thus enabling the County to take extraordinary measures;

WHEREAS, on March 17, 2020, due the actions of the Federal and State Governments, and due to the presence of confirmed cases in Tulare County and the Porterville area, the Porterville City Council adopted Resolution No. 22-2020, a Resolution of the City Council of the City of Porterville to Proclaim the Existence of a Local Emergency;

WHEREAS, on June 18, 2020, the California Department of Public Health issued Guidance for the Use of Face Coverings, which mandates that face coverings be worn state-wide in certain settings and circumstances;

WHEREAS, as of July 7, 2020, Tulare County remains on the State of California Covid-19 "watch list," due to continuing spread of the disease in the County, including in the Porterville area;

WHEREAS, on July 7, 2020, the Porterville City Council ordered that the face covering requirements of the State be enforced within the City via the City's administrative citation regulations and through aggressive education efforts, and directed that an urgency ordinance be prepared consistent with the order;

WHEREAS, the City of Porterville is authorized to enforce the state-wide order concerning Face Coverings pursuant to the California Constitution, Porterville City Charter Section 4, and applicable State laws and City regulations; and

WHEREAS, substantial scientific evidence shows that when combined with physical distancing and other health and safety practices such as hand washing and the regular disinfection of surfaces, wearing Face Coverings will assist in allowing additional business and other activities

to be resumed in the safest way possible, and will help protect Porterville's community members and in particular those that are most vulnerable due to age or health conditions;

THE CITY COUNCIL OF THE CITY OF PORTERVILLE does ordain as follows:

Section 1. The provisions of this urgency ordinance are necessary for the immediate preservation of the health and safety of the public; will help protect all community members who live, work and are present in the City of Porterville; and will assist in state-wide efforts to mitigate the spread of Covid-19.

Section 2. Individuals, while in the City of Porterville, are required to comply with all guidance within the California Department of Public Health's "Guidance for the Use of Face Coverings," (hereinafter "Face Covering Requirements") as currently set forth and as may be further revised by the State of California. A copy of the Face Covering Requirements, released June 18, 2020, and revised on June 29, 2020, is attached hereto as Exhibit "A."

Section 3. Businesses operating in the City of Porterville are required to comply with all applicable Industry Guidance issued by the California Department of Public Health, which incorporate the Face Covering Requirements.

Section 4. The City is authorized to utilize education efforts in any effort to gain cooperation and compliance with the Face Covering Requirements;

Section 5. City staff is further authorized to engage in code enforcement efforts to remedy violations of the Face Covering Requirements. Violations of these requirements are punishable as permitted by State law. Furthermore, the City is hereby authorized to enforce violations of the requirements pursuant to its Administrative Citation regulations set forth in Chapter 2, Article 14, Sections 2-141 through 2-155 of the Porterville Municipal Code.

Section 6. This Ordinance is exempt from the requirements of CEQA pursuant to California Public Resources Code Section 21080(b) (4).

Section 7. This Ordinance shall take effect immediately upon adoption by at least a 4/5 vote of the all members of the Porterville City Council, pursuant to Section 13 of the Porterville City Charter.

THE FOREGOING ORDINANCE was approved by the City Council of the City of Porterville, State of California, on July 21, 2020 at a regular meeting of said Council duly and regularly convened.

GAVIN NEWSOM
Governor

Released June 18, 2020

- Revised on June 29, 2020 to clarify that children under two years old are exempt from wearing face coverings due to risk of suffocation

GUIDANCE FOR THE USE OF FACE COVERINGS

Because of our collective actions, California has limited the spread of COVID-19 and associated hospitalizations and deaths in our state. Still, the risk for COVID-19 remains and the increasing number of Californians who are leaving their homes for work and other needs, increases the risk for COVID-19 exposure and infection.

Over the last four months, we have learned a lot about COVID-19 transmission, most notably that people who are infected but are asymptomatic or pre-symptomatic play an important part in community spread. The use of face coverings by everyone can limit the release of infected droplets when talking, coughing, and/or sneezing, as well as reinforce physical distancing.

This document updates existing CDPH guidance for the use of cloth face coverings by the general public when outside the home. It mandates that face coverings be worn state-wide in the circumstances and with the exceptions outlined below. It does not substitute for existing guidance about social distancing and handwashing.

Guidance

People in California must wear face coverings when they are in the high-risk situations listed below:

- Inside of, or in line to enter, any indoor public space;[1]
- Obtaining services from the healthcare sector in settings including, but not limited to, a hospital, pharmacy, medical clinic, laboratory, physician or dental office, veterinary clinic, or blood bank;[2]
- Waiting for or riding on public transportation or paratransit or while in a taxi, private car service, or ride-sharing vehicle;
- Engaged in work, whether at the workplace or performing work off-site, when:
  - Interacting in-person with any member of the public;
  - Working in any space visited by members of the public, regardless of whether anyone from the public is present at the time;

[1] Unless exempted by state guidelines for specific public settings
[2] Unless directed otherwise by an employee or healthcare provider

    - Working in any space where food is prepared or packaged for sale or distribution to others;
    - Working in or walking through common areas, such as hallways, stairways, elevators, and parking facilities;
    - In any room or enclosed area where other people (except for members of the person's own household or residence) are present when unable to physically distance.
- Driving or operating any public transportation or paratransit vehicle, taxi, or private car service or ride-sharing vehicle when passengers are present. When no passengers are present, face coverings are strongly recommended.
- While outdoors in public spaces when maintaining a physical distance of 6 feet from persons who are not members of the same household or residence is not feasible.

The following individuals are exempt from wearing a face covering:

- Persons younger than two years old. These very young children must not wear a face covering because of the risk of suffocation.
- Persons with a medical condition, mental health condition, or disability that prevents wearing a face covering. This includes persons with a medical condition for whom wearing a face covering could obstruct breathing or who are unconscious, incapacitated, or otherwise unable to remove a face covering without assistance.
- Persons who are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication.
- Persons for whom wearing a face covering would create a risk to the person related to their work, as determined by local, state, or federal regulators or workplace safety guidelines.
- Persons who are obtaining a service involving the nose or face for which temporary removal of the face covering is necessary to perform the service.
- Persons who are seated at a restaurant or other establishment that offers food or beverage service, while they are eating or drinking, provided that they are able to maintain a distance of at least six feet away from persons who are not members of the same household or residence.
- Persons who are engaged in outdoor work or recreation such as swimming, walking, hiking, bicycling, or running, when alone or with household members, and when they are able to maintain a distance of at least six feet from others.

- Persons who are incarcerated. Prisons and jails, as part of their mitigation plans, will have specific guidance on the wearing of face coverings or masks for both inmates and staff.

Note: Persons exempted from wearing a face covering due to a medical condition who are employed in a job involving regular contact with others should wear a non-restrictive alternative, such as a face shield with a drape on the bottom edge, as long as their condition permits it.

Background

What is a cloth face covering?

A cloth face covering is a material that covers the nose and mouth. It can be secured to the head with ties or straps or simply wrapped around the lower face. It can be made of a variety of materials, such as cotton, silk, or linen. A cloth face covering may be factory-made or sewn by hand or can be improvised from household items such as scarfs, T-shirts, sweatshirts, or towels.

How well do cloth face coverings work to prevent spread of COVID-19?

There is scientific evidence to suggest that use of cloth face coverings by the public during a pandemic could help reduce disease transmission. Their primary role is to reduce the release of infectious particles into the air when someone speaks, coughs, or sneezes, including someone who has COVID-19 but feels well. Cloth face coverings are not a substitute for physical distancing, washing hands, and staying home when ill, but they may be helpful when combined with these primary interventions.

When should I wear a cloth face covering?

You should wear face coverings when in public places, particularly when those locations are indoors or in other areas where physical distancing is not possible

How should I care for a cloth face covering?

It's a good idea to wash your cloth face covering frequently, ideally after each use, or at least daily. Have a bag or bin to keep cloth face coverings in until they can be laundered with detergent and hot water and dried on a hot cycle. If you must re-wear your cloth face covering before washing, wash your hands immediately after putting it back on and avoid touching your face. Discard cloth face coverings that:

- No longer cover the nose and mouth
- Have stretched out or damaged ties or straps
- Cannot stay on the face
- Have holes or tears in the fabric

###

Overview of the Emergency Rental Assistance Program

Background

On December 27, 2020 the federal Consolidated Appropriations Act 2021 was signed into law and $25 billion was allocated to the United States Treasury (UST) for the Emergency Rental Assistance Program (ERAP) to assist households that are unable to pay rent or utilities due to the COVID-10 pandemic. California received $2.6 of the federal ERAP funds. To implement these rental assistance resources, the state of CA worked with state legislation to develop a programmatic framework to ease administration burden and deploy these resources to those most in need.

On January 28th, the Legislature approved SB 91. This bill extended the eviction protections and created a mechanism to deploy the $2.6 billion in ERAP resources to assist struggling tenants and landlords impacted by COVID-19. The bill allocated $1.5 billion to the state and $1.1 billion directly to local governments with populations with more than 200,000. The bill establishes the criteria and prioritization for use of the state-administered rental assistance funding from the federal bill.

Local governments with populations of 200,000 and greater that received a direct allocation of funding for rental assistance from the federal government could also qualify for block grant funding from the state's $1.5 billion share. Counties were given the option to take the funds and administer their own program or to participate in the state-administered program. Tulare County has opted to participate in the state administered program. The state administered program will be managed centrally by the Local Initiatives Support Corporation (LISC).

Under state statute the rental assistance program is to be implemented by March 15, 2021. Ninety percent of the funding is to be directed towards financial assistance and ten percent for administration of the program.

Program Requirements

While not a full comprehensive list, the key program requirements include the following:

- For those landlords who agree to participate, funding will be available to pay up to 80 percent of an eligible household's unpaid rent accumulated from April 2020 through March 2021, provided that the landlord agrees to forgive the remaining 20 percent.

- In cases where the landlord chooses not to participate, tenants can apply for assistance for rental arrears, but are be limited to compensation of 25% of the eligible household's unpaid rent accumulated from April 2020 through March 2021 which will be paid to the landlord. The program also allows for prospective payments of 25% of the monthly rent for the months of April, May, and June 2021.

- Funds are to be administered in a least three rounds to eligible households. Prioritizing: (1) those households under 50% of the area median income (AMI) or unemployed for 90 days; (2) Below 80% AMI and in communities disproportionately affected by COVID-19 (as determined by the Department of Housing and Community Development); (3) Below 80% AMI not included in round 1 and 2.

- The top priority for the use of assistance funding would be rental arrears; followed by prospective rent payments, utility payments (both arrears and prospective payments)

LISC and Local Partnership

Given the rapid implementation timeframes, the one-time nature of these funds, among other considerations, the State believed that a central administrative structure would be most effective in deploying these resources in an effective and compliant manner. They contracted with LISC to administering the Emergency Rental Assistance Program (ERAP). LISC will be responsible in providing the following support and oversight:

- State outreach and education campaign with adaptability for local messaging.
- Standardized, federally consistent application and eligibility criteria, accessible to both landlords and tenants.
- Contracted solution with a state-wide network, including rural areas.
- Robust, multi-lingual client support and technical assistance.
- Processing of Applications (input, review, verification, fraud control, notifications to tenant and landlord, verification of accounts, disbursement of payment, reporting per state and federal government requirements, downstream audit management).
- Central privacy protections and fraud control.
- Management of duplication of benefits in accordance with the Consolidated Appropriations Act, 2021.
- Application portal to begin receiving applications from landlords and tenants.

LISC is seeking nonprofit and community-based organizations with capacity to provide local on-the-ground support to residents to help them access rental assistance. LISC will work with local partners and organizations within Tulare County to ensure all potential applicants know about the ERAP and receive the needed program assistance.

There are three tiers of partnership: Tier 1-Promotion, Tier 2-Outreach, and Tier 3-Technical Assistance. Local partners who want to partner with LISC will need to submit an application. Partner requirements include:

- Registered non-profits and quasi-government entities providing services to residents in communities served by this program
- Must have an EIN
- Must have a DUNS number
- Must be active on the CA Secretary of State website
- Must be registered on SAM website
- If applicable, non-profits must have actively filed 990 Forms

Organizations that do not have the above information are not eligible for Tier 2 and Tier 3 partnership but may still apply under the Tier 1 program. All applicants will be considered based on capacity to successfully reach their proposed community. Tier 2 and 3 will also be evaluated based on ability to successfully administer federal funds. First round of applications were due Monday, February 22. However, ongoing applications can still be submitted after the 22nd and will be reviewed on an ongoing basis throughout the program. To apply go to https://lisc.tfaforms.net/308

Eviction Protections

- SB 91 extends the states current eviction moratorium for tenants unable to pay rent due to COVID related financial hardships, as established under AB 3088, by five months, from January 31, 2021 through June 30, 2021.
- Tenants must continue to pay 25% of their rental obligations, as required under AB 3088, through June 30, 2021. During this time as tenants continue to pay at least 25% of their rent, then they are protected from eviction for any unpaid rent that has accumulated through June 30 and it can never be used as the basis for eviction. The 25% may be paid monthly or as a lump sum by June 30, 2021.

FACT SHEET: The Coronavirus State and Local Fiscal Recovery Funds Will Deliver $350 Billion for State, Local, Territorial, and Tribal Governments to Respond to the COVID-19 Emergency and Bring Back Jobs

May 10, 2021

Aid to state, local, territorial, and Tribal governments will help turn the tide on the pandemic, address its economic fallout, and lay the foundation for a strong and equitable recovery

Today, the U.S. Department of the Treasury announced the launch of the Coronavirus State and Local Fiscal Recovery Funds, established by the American Rescue Plan Act of 2021, to provide $350 billion in emergency funding for eligible state, local, territorial, and Tribal governments. Treasury also released details on how these funds can be used to respond to acute pandemic response needs, fill revenue shortfalls among these governments, and support the communities and populations hardest-hit by the COVID-19 crisis. With the launch of the Coronavirus State and Local Fiscal Recovery Funds, eligible jurisdictions will be able to access this funding in the coming days to address these needs.

State, local, territorial, and Tribal governments have been on the frontlines of responding to the immense public health and economic needs created by this crisis – from standing up vaccination sites to supporting small businesses – even as these governments confronted revenue shortfalls during the downturn. As a result, these governments have endured unprecedented strains, forcing many to make untenable choices between laying off educators, firefighters, and other frontline workers or failing to provide other services that communities rely on. Faced with these challenges, state and local governments have cut over 1 million jobs since the beginning of the crisis. The experience of prior economic downturns has shown that budget pressures like these often result in prolonged fiscal austerity that can slow an economic recovery.

To support the immediate pandemic response, bring back jobs, and lay the groundwork for a strong and equitable recovery, the American Rescue Plan Act of 2021 established the Coronavirus State and Local Fiscal Recovery Funds, designed to deliver $350 billion to state, local, territorial, and Tribal governments to bolster their response to the COVID-19 emergency and its economic impacts. Today, Treasury is launching this much-needed relief to:

- Support urgent COVID-19 response efforts to continue to decrease spread of the virus and bring the pandemic under control;
- Replace lost public sector revenue to strengthen support for vital public services and help retain jobs;
- Support immediate economic stabilization for households and businesses; and,
- Address systemic public health and economic challenges that have contributed to the inequal impact of the pandemic on certain populations.

The Coronavirus State and Local Fiscal Recovery Funds provide substantial flexibility for each jurisdiction to meet local needs—including support for households, small businesses, impacted industries, essential workers, and the communities hardest-hit by the crisis. These funds also deliver resources that recipients can invest in building, maintaining, or upgrading their water, sewer, and broadband infrastructure.

Starting today, eligible state, territorial, metropolitan city, county, and Tribal governments may request Coronavirus State and Local Fiscal Recovery Funds through the Treasury Submission Portal. Concurrent with this program launch, Treasury has published an Interim Final Rule that implements the provisions of this program.

FUNDING AMOUNTS

The American Rescue Plan provides a total of $350 billion in Coronavirus State and Local Fiscal Recovery Funds to help eligible state, local, territorial, and Tribal governments meet their present needs and build the foundation for a strong recovery. Congress has allocated this funding to tens of thousands of jurisdictions. These allocations include:

Type	Amount ($ billions)
States & District of Columbia	$195.3
Counties	$65.1
Metropolitan Cites	$45.6
Tribal Governments	$20.0
Territories	$4.5
Non-Entitlement Units of Local Government	$19.5

Treasury expects to distribute these funds directly to each state, territorial, metropolitan city, county, and Tribal government. Local governments that are classified as non-entitlement units will receive this funding through their applicable state government. Treasury expects to provide further guidance on distributions to non-entitlement units next week.

Local governments should expect to receive funds in two tranches, with 50% provided beginning in May 2021 and the balance delivered 12 months later. States that have experienced a net increase in the unemployment rate of more than 2 percentage points from February 2020 to the latest available data as of the date of certification will receive their full allocation of funds in a single payment; other states will receive funds in two equal tranches. Governments of U.S. territories will receive a single payment. Tribal governments will receive two payments, with the first payment available in May and the second payment, based on employment data, to be delivered in June 2021.

USES OF FUNDING

Coronavirus State and Local Fiscal Recovery Funds provide eligible state, local, territorial, and Tribal governments with a substantial infusion of resources to meet pandemic response needs and rebuild a stronger, more equitable economy as the country recovers. Within the categories of eligible uses, recipients have broad flexibility to decide how best to use this funding to meet the needs of their communities. Recipients may use Coronavirus State and Local Fiscal Recovery Funds to:

- **Support public health expenditures,** by funding COVID-19 mitigation efforts, medical expenses, behavioral healthcare, and certain public health and safety staff;

- **Address negative economic impacts caused by the public health emergency,** including economic harms to workers, households, small businesses, impacted industries, and the public sector;

- **Replace lost public sector revenue**, using this funding to provide government services to the extent of the reduction in revenue experienced due to the pandemic;

- **Provide premium pay for essential workers**, offering additional support to those who have borne and will bear the greatest health risks because of their service in critical infrastructure sectors; and,

- **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, support vital wastewater and stormwater infrastructure, and to expand access to broadband internet.

Within these overall categories, Treasury's Interim Final Rule provides guidelines and principles for determining the types of programs and services that this funding can support, together with examples of allowable uses that recipients may consider. As described below, Treasury has also designed these provisions to take into consideration the disproportionate impacts of the COVID-19 public health emergency on those hardest-hit by the pandemic.

1. **Supporting the public health response**

Mitigating the impact of COVID-19 continues to require an unprecedented public health response from state, local, territorial, and Tribal governments. Coronavirus State and Local Fiscal Recovery Funds provide resources to meet these needs through the provision of care for those impacted by the virus and through services that address disparities in public health that have been exacerbated by the pandemic. Recipients may use this funding to address a broad range of public health needs across COVID-19 mitigation, medical expenses, behavioral healthcare, and public health resources. Among other services, these funds can help support:

- **Services and programs to contain and mitigate the spread of COVID-19, including:**

  - ✓ Vaccination programs
  - ✓ Medical expenses
  - ✓ Testing
  - ✓ Contact tracing
  - ✓ Isolation or quarantine
  - ✓ PPE purchases
  - ✓ Support for vulnerable populations to access medical or public health services
  - ✓ Public health surveillance (e.g., monitoring for variants)
  - ✓ Enforcement of public health orders
  - ✓ Public communication efforts
  - ✓ Enhancement of healthcare capacity, including alternative care facilities
  - ✓ Support for prevention, mitigation, or other services in congregate living facilities and schools
  - ✓ Enhancement of public health data systems
  - ✓ Capital investments in public facilities to meet pandemic operational needs
  - ✓ Ventilation improvements in key settings like healthcare facilities

- **Services to address behavioral healthcare needs exacerbated by the pandemic, including:**

  - ✓ Mental health treatment
  - ✓ Substance misuse treatment
  - ✓ Other behavioral health services
  - ✓ Hotlines or warmlines
  - ✓ Crisis intervention
  - ✓ Services or outreach to promote access to health and social services

- **Payroll and covered benefits expenses** for public health, healthcare, human services, public safety and similar employees, to the extent that they work on the COVID-19 response. For public health and safety workers, recipients can use these funds to cover the full payroll and covered benefits costs for employees or operating units or divisions primarily dedicated to the COVID-19 response.

2. **Addressing the negative economic impacts caused by the public health emergency**

The COVID-19 public health emergency resulted in significant economic hardship for many Americans. As businesses closed, consumers stayed home, schools shifted to remote education, and travel declined precipitously, over 20 million jobs were lost between February and April 2020. Although many have since returned to work, as of April 2021, the economy remains more than 8 million jobs below its pre-pandemic peak, and more than 3 million workers have dropped out of the labor market altogether since February 2020.

To help alleviate the economic hardships caused by the pandemic, Coronavirus State and Local Fiscal Recovery Funds enable eligible state, local, territorial, and Tribal governments to provide a wide range of assistance to individuals and households, small businesses, and impacted industries, in addition to enabling governments to rehire public sector staff and rebuild capacity. Among these uses include:

- **Delivering assistance to workers and families**, including aid to unemployed workers and job training, as well as aid to households facing food, housing, or other financial insecurity. In addition, these funds can support survivor's benefits for family members of COVID-19 victims.

- **Supporting small businesses,** helping them to address financial challenges caused by the pandemic and to make investments in COVID-19 prevention and mitigation tactics, as well as to provide technical assistance. To achieve these goals, recipients may employ this funding to execute a broad array of loan, grant, in-kind assistance, and counseling programs to enable small businesses to rebound from the downturn.

- **Speeding the recovery of the tourism, travel, and hospitality sectors**, supporting industries that were particularly hard-hit by the COVID-19 emergency and are just now beginning to mend. Similarly impacted sectors within a local area are also eligible for support.

- **Rebuilding public sector capacity,** by rehiring public sector staff and replenishing unemployment insurance (UI) trust funds, in each case up to pre-pandemic levels. Recipients may also use this funding to build their internal capacity to successfully implement economic relief programs, with investments in data analysis, targeted outreach, technology infrastructure, and impact evaluations.

3. **Serving the hardest-hit communities and families**

While the pandemic has affected communities across the country, it has disproportionately impacted low-income families and communities of color and has exacerbated systemic health and economic inequities. Low-income and socially vulnerable communities have experienced the most severe health impacts. For example, counties with high poverty rates also have the highest rates of infections and deaths, with 223 deaths per 100,000 compared to the U.S. average of 175 deaths per 100,000.

Coronavirus State and Local Fiscal Recovery Funds allow for a broad range of uses to address the disproportionate public health and economic impacts of the crisis on the hardest-hit communities, populations, and households. Eligible services include:

- **Addressing health disparities and the social determinants of health,** through funding for community health workers, public benefits navigators, remediation of lead hazards, and community violence intervention programs;
- **Investments in housing and neighborhoods**, such as services to address individuals experiencing homelessness, affordable housing development, housing vouchers, and residential counseling and housing navigation assistance to facilitate moves to neighborhoods with high economic opportunity;
- **Addressing educational disparities** through new or expanded early learning services, providing additional resources to high-poverty school districts, and offering educational services like tutoring or afterschool programs as well as services to address social, emotional, and mental health needs; and,
- **Promoting healthy childhood environments,** including new or expanded high quality childcare, home visiting programs for families with young children, and enhanced services for child welfare-involved families and foster youth.

Governments may use Coronavirus State and Local Fiscal Recovery Funds to support these additional services if they are provided:

- within a Qualified Census Tract (a low-income area as designated by the Department of Housing and Urban Development);
- to families living in Qualified Census Tracts;
- by a Tribal government; or,
- to other populations, households, or geographic areas disproportionately impacted by the pandemic.

4. **Replacing lost public sector revenue**

State, local, territorial, and Tribal governments that are facing budget shortfalls may use Coronavirus State and Local Fiscal Recovery Funds to avoid cuts to government services. With these additional resources, recipients can continue to provide valuable public services and ensure that fiscal austerity measures do not hamper the broader economic recovery.

Many state, local, territorial, and Tribal governments have experienced significant budget shortfalls, which can yield a devastating impact on their respective communities. Faced with budget shortfalls and pandemic-related uncertainty, state and local governments cut staff in all 50 states. These budget shortfalls and staff cuts are particularly problematic at present, as these entities are on the front lines of battling the COVID-19 pandemic and helping citizens weather the economic downturn.

Recipients may use these funds to replace lost revenue. Treasury's Interim Final Rule establishes a methodology that each recipient can use to calculate its reduction in revenue. Specifically, recipients will compute the extent of their reduction in revenue by comparing their actual revenue to an alternative representing what could have been expected to occur in the absence of the pandemic. Analysis of this expected trend begins with the last full fiscal year prior to the public health emergency and projects forward at either (a) the recipient's average annual revenue growth over the three full fiscal years prior to the public health emergency or (b) 4.1%, the national average state and local revenue growth rate from 2015-18 (the latest available data).

For administrative convenience, Treasury's Interim Final Rule allows recipients to presume that any diminution in actual revenue relative to the expected trend is due to the COVID-19 public health emergency. Upon receiving Coronavirus State and Local Fiscal Recovery Funds, recipients may immediately calculate the reduction in revenue that occurred in 2020 and deploy funds to address any shortfall. Recipients will have the opportunity to re-calculate revenue loss at several points through the program, supporting those entities that experience a lagged impact of the crisis on revenues.

Importantly, once a shortfall in revenue is identified, recipients will have broad latitude to use this funding to support government services, up to this amount of lost revenue.

5. **Providing premium pay for essential workers**

Coronavirus State and Local Fiscal Recovery Funds provide resources for eligible state, local, territorial, and Tribal governments to recognize the heroic contributions of essential workers. Since the start of the public health emergency, essential workers have put their physical well-being at risk to meet the daily needs of their communities and to provide care for others.

Many of these essential workers have not received compensation for the heightened risks they have faced and continue to face. Recipients may use this funding to provide premium pay directly, or through grants to private employers, to a broad range of essential workers who must be physically present at their jobs including, among others:

- ✓ Staff at nursing homes, hospitals, and home-care settings
- ✓ Workers at farms, food production facilities, grocery stores, and restaurants
- ✓ Janitors and sanitation workers
- ✓ Public health and safety staff
- ✓ Truck drivers, transit staff, and warehouse workers
- ✓ Childcare workers, educators, and school staff
- ✓ Social service and human services staff

Treasury's Interim Final Rule emphasizes the need for recipients to prioritize premium pay for lower income workers. Premium pay that would increase a worker's total pay above 150% of the greater of the state or county average annual wage requires specific justification for how it responds to the needs of these workers.

In addition, employers are both permitted and encouraged to use Coronavirus State and Local Fiscal Recovery Funds to offer retrospective premium pay, recognizing that many essential workers have not yet received additional compensation for work performed. Staff working for third-party contractors in eligible sectors are also eligible for premium pay.

6. **Investing in water and sewer infrastructure**

Recipients may use Coronavirus State and Local Fiscal Recovery Funds to invest in necessary improvements to their water and sewer infrastructures, including projects that address the impacts of climate change.

Recipients may use this funding to invest in an array of drinking water infrastructure projects, such as building or upgrading facilities and transmission, distribution, and storage systems, including the replacement of lead service lines.

Recipients may also use this funding to invest in wastewater infrastructure projects, including constructing publicly-owned treatment infrastructure, managing and treating stormwater or subsurface drainage water, facilitating water reuse, and securing publicly-owned treatment works.

To help jurisdictions expedite their execution of these essential investments, Treasury's Interim Final Rule aligns types of eligible projects with the wide range of projects that can be supported by the Environmental Protection Agency's Clean Water State Revolving Fund and Drinking Water State Revolving Fund. Recipients retain substantial flexibility to identify those water and sewer infrastructure investments that are of the highest priority for their own communities.

Treasury's Interim Final Rule also encourages recipients to ensure that water, sewer, and broadband projects use strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions.

7. **Investing in broadband infrastructure**

The pandemic has underscored the importance of access to universal, high-speed, reliable, and affordable broadband coverage. Over the past year, millions of Americans relied on the internet to participate in remote school, healthcare, and work.

Yet, by at least one measure, 30 million Americans live in areas where there is no broadband service or where existing services do not deliver minimally acceptable speeds. For millions of other Americans, the high cost of broadband access may place it out of reach. The American Rescue Plan aims to help remedy these shortfalls, providing recipients with flexibility to use Coronavirus State and Local Fiscal Recovery Funds to invest in broadband infrastructure.

Recognizing the acute need in certain communities, Treasury's Interim Final Rule provides that investments in broadband be made in areas that are currently unserved or underserved—in other words, lacking a wireline connection that reliably delivers minimum speeds of 25 Mbps download and 3 Mbps upload. Recipients are also encouraged to prioritize projects that achieve last-mile connections to households and businesses.

Using these funds, recipients generally should build broadband infrastructure with modern technologies in mind, specifically those projects that deliver services offering reliable 100 Mbps download and 100

Mbps upload speeds, unless impracticable due to topography, geography, or financial cost. In addition, recipients are encouraged to pursue fiber optic investments.

In view of the wide disparities in broadband access, assistance to households to support internet access or digital literacy is an eligible use to respond to the public health and negative economic impacts of the pandemic, as detailed above.

8. **Ineligible Uses**

Coronavirus State and Local Fiscal Recovery Funds provide substantial resources to help eligible state, local, territorial, and Tribal governments manage the public health and economic consequences of COVID-19. Recipients have considerable flexibility to use these funds to address the diverse needs of their communities.

To ensure that these funds are used for their intended purposes, the American Rescue Plan Act also specifies two ineligible uses of funds:

- **States and territories may not use this funding to directly or indirectly offset a reduction in net tax revenue due to a change in law from March 3, 2021 through the last day of the fiscal year in which the funds provided have been spent.** The American Rescue Plan ensures that funds needed to provide vital services and support public employees, small businesses, and families struggling to make it through the pandemic are not used to fund reductions in net tax revenue. Treasury's Interim Final Rule implements this requirement. If a state or territory cuts taxes, they must demonstrate how they paid for the tax cuts from sources other than Coronavirus State Fiscal Recovery Funds—by enacting policies to raise other sources of revenue, by cutting spending, or through higher revenue due to economic growth. If the funds provided have been used to offset tax cuts, the amount used for this purpose must be paid back to the Treasury.
- **No recipient may use this funding to make a deposit to a pension fund.** Treasury's Interim Final Rule defines a "deposit" as an extraordinary contribution to a pension fund for the purpose of reducing an accrued, unfunded liability. While pension deposits are prohibited, recipients may use funds for routine payroll contributions for employees whose wages and salaries are an eligible use of funds.

Treasury's Interim Final Rule identifies several other ineligible uses, including funding debt service, legal settlements or judgments, and deposits to rainy day funds or financial reserves. Further, general infrastructure spending is not covered as an eligible use outside of water, sewer, and broadband investments or above the amount allocated under the revenue loss provision. While the program offers broad flexibility to recipients to address local conditions, these restrictions will help ensure that funds are used to augment existing activities and address pressing needs.

June 9, 2021

Note: This guidance is effective June 15, 2021and supersedes all prior face coverings guidance.

GUIDANCE FOR THE USE OF MASKS

Background

The COVID-19 vaccines are effective in preventing infection, disease, and spread. Unvaccinated persons are more likely to get infected and spread the virus which is transmitted through the air and concentrates indoors. About 15% of our population remains without the option for vaccination (children under 12 years old are not yet eligible) and risk for COVID-19 exposure and infection will remain until we reach full community immunity.

The purpose of this guidance is to align with CDC recommendations and provide information about higher risk settings where masks are required or recommended to prevent transmission to persons with higher risk of infection (e.g., unvaccinated or immunocompromised persons), to persons with prolonged, cumulative exposures (e.g., workers), or to persons whose vaccination status is unknown. When people who are not fully vaccinated wear a mask correctly, they protect others as well as themselves. Consistent and correct mask use by people who are not fully vaccinated is especially important indoors.

In workplaces, employers are subject to the Cal/OSHA COVID-19 Emergency Temporary Standards (ETS) or in some workplaces the CalOSHA Aerosol Transmissible Diseases Standard, and should consult those regulations for additional applicable requirements.

Guidance for Individuals

Masks are **not required for fully vaccinated individuals, except** in the following settings where masks are required for everyone, regardless of vaccination status:

- On public transit[1] (examples: airplanes, ships, ferries, trains, subways, buses, taxis, and ride-shares) and in transportation hubs (examples: airport, bus terminal, marina, train station, seaport or other port, subway station, or any other area that provides transportation)
- **Indoors** in K-12 schools[2], childcare[3] and other youth settings.
    - Note: This may change as updated K-12 schools guidance is forthcoming, pending updates for K-12 operational guidance from the CDC.

[1] CDC Requirement for Face Masks on Public Transportation Conveyances and at Transportation Hubs
[2] CDC Operational Strategy for K-12 Schools through Phased Prevention
[3] CDC Guidance for Operating Child Care Programs during COVID-19

- Healthcare settings[4] (including long term care facilities[5])
- State and local correctional facilities and detention centers[6]
- Homeless shelters[7], emergency shelters[8] and cooling centers[9]

Additionally, masks are **required* for unvaccinated individuals** in indoor public settings and businesses (examples: retail, restaurants, theaters, family entertainment centers, meetings, state and local government offices serving the public)

For additional information, individuals should refer to CDC Recommendations for Safer Activities (see CDPH Masking Guidance Frequently Asked Questions for more information).

*Guidance for Businesses, Venue Operators or Hosts

In settings where masks are required only for unvaccinated individuals, businesses, venue operators or hosts may choose to:

- Provide information to all patrons, guests and attendees regarding vaccination requirements and allow vaccinated individuals to self-attest that they are in compliance prior to entry.
- Implement vaccine verification to determine whether individuals are required to wear a mask.
- Require all patrons to wear masks.

No person can be prevented from wearing a mask as a condition of participation in an activity or entry into a business.

Exemptions to masks requirements

The following **individuals** are exempt from wearing masks at all times:

- Persons younger than two years old. Very young children must not wear a mask because of the risk of suffocation.
- Persons with a medical condition, mental health condition, or disability that prevents wearing a mask. This includes persons with a medical condition for whom wearing a mask could obstruct breathing or who are unconscious, incapacitated, or otherwise unable to remove a mask without assistance.
- Persons who are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication.
- Persons for whom wearing a mask would create a risk to the person related to their work, as determined by local, state, or federal regulators or workplace safety guidelines.

August 18, 2021

TO: All Californians

SUBJECT: Beyond the Blueprint for Industry and Business Sectors

Related Materials: Beyond the Blueprint Q&A

Updates as of August 18, 2021:

- Applied vaccine verification or negative testing requirement to Indoor Mega Events involving 1,000 or more participants.
- Removed self-attestation as a mode for both vaccine verification and for verification of negative COVID-19 test for indoor events scheduled after September 20, 2021.
- Extended date for requirements and recommendations to remain in place to November 1, 2021.

Background:

On June 15, California fully reopened the economy and moved beyond the Blueprint for a Safer Economy. All sectors listed in the Blueprint Activities and Business Tiers Chart returned to usual operations (with the limited exceptions noted below for Mega Events).

California has made great strides in vaccinating its residents, with more than 75 percent of those eligible at least partially vaccinated. Although vaccinations provide a powerful protection against COVID-19 hospitalization and death, the Delta variant, which is currently the most common strain of COVID-19 in California, is highly transmissible and may cause more severe illness.[1] In fact, recent data suggests that viral load is roughly 1,000 times higher in people infected with the Delta variant than those infected with the original coronavirus strain. California is currently experiencing the fastest increase in COVID-19 cases during the entire pandemic with 25.7 new cases per 100,000 people per day, with case rates increasing eleven-fold within two months. Given the rapid spread of the highly transmissible Delta variant, additional precautionary measures must be taken in large, indoor events, which have the potential to cause large, substantial, and severe outbreaks.

Large events involve several factors that increase the risk of transmission including (a) persons attending often travel from outside the immediate area, from areas with higher levels of transmission, and some types of travel may increase the risk of exposure; (b) events have prolonged duration; (c) crowding is common in large events; (d) even in counties or venues with universal masking requirements, masks are removed for eating and drinking; and

(e) the larger the number of people gathered in crowded settings, the greater the likelihood that contagious persons are present and the more individuals who are exposed with the potential of becoming infected and spreading infections within their families, communities, schools, and workplaces.

Indoor settings are especially high risk for transmission. While universal masking reduces the spread of infectious droplets and aerosols, masks are often removed for eating and drinking. Activities like singing, yelling, or cheering increase transmission risk, even when masks are being worn.

The immediate and primary call to action continues to be for eligible Californians to get vaccinated. A secondary call to action is for all unvaccinated Californians to comply with indoor masking requirements and for all Californians to consider their personal choices around harm reduction and risk tolerance in the face of the Delta variant and the likelihood of additional variants emerging in the future.

Additionally, a key method to reduce transmission in large gatherings is to expand the number of events that require attendees to be verified fully-vaccinated against COVID-19 or verified tested negative, both indoors and outdoors.

CDPH is therefore updating the general public health requirements and recommendations as follows, effective September 20, 2021. These updated measures will remain in place until **November 1, 2021:**

	Restrictions Applying to Indoor & Outdoor Settings
UPDATE: **Definitions of Mega Events**	Crowds greater than 1,000 (indoors) attendees Crowds greater than 10,000 (outdoors) attendees
UPDATE: **Vaccine Verification / Negative Testing**	Required for **Indoor** Mega Events Recommended for **Outdoor** Mega Events Self-attestation may not be used to verify status as fully vaccinated or as proof of negative test result for indoor settings. For outdoor settings, it is recommended not to use self-attestation to verify status as fully vaccinated or as proof of negative test result.
Capacity Limitations	No restrictions
Physical Distancing	No restrictions for attendees, customers, and guests
Masking	Follow current CDPH Guidance for Face Coverings
Travelers	Recommend following CDC recommendations.

In workplaces, employers are subject to the Cal/OSHA COVID-19 Emergency Temporary Standards (ETS) or in some workplaces the CalOSHA Aerosol Transmissible Diseases Standard, and should consult those regulations for additional applicable requirements.

Limited Requirements for Mega Events:

Mega Events are characterized by large crowds greater than 1,000 indoor OR 10,000 outdoor attendees. Mega Events may have either assigned or unassigned seating, and may be either general admission or gated, ticketed, and permitted events. Mega Events do not include venues such as shopping malls or museums that are open to

public circulation as part of their regular operations, except to the extent that such venues host qualifying events.

Mega Events are considered higher risk for COVID transmission because:

- Participants and attendees are spending extensive periods of time physically close to large numbers of people they don't usually interact with.
- The frequency and total duration of close contact between attendees is increased, thereby increasing the risk that respiratory particles will be transmitted between attendees and participants.
- They draw from beyond the nearby community and will often draw attendees and participants from other states and countries who may be infected with more infectious COVID variants.
- Effective contact tracing may be difficult given the number of potential uncontrolled mixing between groups and attendees among individuals who are unlikely to be together again and the nature of the events.

For Indoor Mega Events (example: conventions/conferences/expos/sporting events and concerts[2]):

In addition to the general public health recommendations:

- Verification of fully vaccinated status* or pre-entry negative test** result is required of all attendees.
    - Indoor venue and event operators may not use self-attestation as a mode of verification.
- Information will be prominently placed on all communications, including the reservation and ticketing systems, to ensure guests are aware of testing and vaccination requirements (including acceptable modes of verification).
- Attendees must follow CDPH Guidance for Face Coverings.
- Venues should make masks available to attendees upon request.

For Outdoor Mega Events (example: music or food festivals/car shows/large endurance events and marathons/parades/sporting events and concerts):

In addition to the general public health recommendations:

- Verification of fully vaccinated status or pre-entry negative test result is strongly recommended for all attendees.
    - If implemented, venue and event operators are recommended to not use self-attestation as a mode of verification but rather use verification options for providing proof of vaccination in the CDPH Vaccine Record Guidelines & Standards.
- Attendees must follow CDPH Guidance for Face Coverings.
- Information will be prominently placed on all communications, including the reservation and ticketing systems, to ensure guests are aware that the State strongly recommends that they be fully vaccinated or obtain a negative COVID-19 test prior to attending the event.
- Venues should make masks available to attendees upon request.

Additional recommendations for sponsors of Mega Events:

- Encourage everyone to get vaccinated when eligible.

- Facilitate increased ventilation of indoor spaces (i.e., open all windows and doors to increase natural air flow), following current CDPH and CalOSHA guidance.
- Encourage everyone to sign up for CA Notify as an added layer of protection for themselves and the community to receive alerts when they have been in close contact with someone who tests positive for COVID-19.
- Convey the risk of attending large, crowded events where the vaccine status of others in attendance may be unknown to the individuals.
- Convey the risk of attending large, crowded events for populations that may not currently be eligible for vaccination or may be immunocompromised and whose vaccine protection may be incomplete.
- Encourage all venues along any parade or event route to provide outdoor spaces for eating/drinking/congregating to reduce the risk of transmission in indoor settings.

The requirements and recommendations for negative testing / vaccine verification will be in place effective September 20, 2021 through November 1, 2021. The state will assess conditions by October 15, 2021, to determine whether updated requirements or recommendations are needed beyond November 1, 2021.

[1] CDC - Delta Variant: What We Know About the Science

[2] These requirements continue to be recommended but not mandatory for places of worship meeting the definition of a mega event.

* Fully vaccinated

1. Definition: See current CDPH Guidance for Fully Vaccinated Persons for definitions, acceptable vaccines, and updates on additional vaccines as they are approved.
2. Verification: See current Options for Providing Proof of Vaccination in the CDPH Vaccine Record Guidelines & Standards for acceptable methods of vaccine verification.

** Pre-entry negative testing

1. Definition: Testing must be conducted within 72 hours before event start time (both PCR and antigen are acceptable). Results of the test must be available prior to entry into the event or venue.
2. Verification: See current CDPH Updated Testing Guidance for acceptable methods of proof of negative COVID-19 test result.

RESOLUTION 2021-_____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORTERVILLE AFFIRMING ITS PROCLAMATION OF A LOCAL EMERGENCY, RATIFYING THE PROCLAMATION OF A STATE OF EMERGENCY BY ASSEMBLY BILL 361 ISSUED ON SEPTEMBER 16, 2021, AND AUTHORIZING REMOTE TELECONFERENCE MEETINGS OF ALL LEGISLATIVE BODIES OF THE CITY OF PORTERVILLE FOR THE PERIOD OF THIRTY (30) DAYS PURSUANT TO BROWN ACT PROVISIONS

WHEREAS, the City Council is committed to preserving and nurturing public access and participation in meetings of all City of Porterville legislative bodies; and,

WHEREAS, all meetings of the City's legislative bodies are open and public, as required by the Ralph M. Brown Act (Cal. Gov. Code 54950-54963), so that any member of the public may attend, participate, and watch the City's legislative bodies conduct their business; and,

WHEREAS, the Brown Act, Government Code section 54953(e), makes provisions for remote teleconferencing participation in meetings by members of a legislative body, without compliance with the requirements of Government Code section 54953(b)(s), subject to the existence of certain conditions; and,

WHEREAS, a required condition is that a state of emergency is declared by the Governor pursuant to Government Code section 8625, proclaiming the existence of conditions of disaster or of extreme peril to the safety of persons and property within the state caused by conditions as described in Government Code section 8558; and,

WHEREAS, a proclamation is made when there is an actual incident, threat of disaster, or extreme period to the safety of persons and property within the jurisdictions that are within the City's boundaries, caused by natural, technological, or human-caused disasters; and,

WHEREAS, it is further required that State or local officials have imposed or recommended measures to promote social distancing, or, the legislative body meeting solely in person would present imminent risks to the health and safety of attendees; and,

WHEREAS, such conditions now exist in the City, specifically, a State of Emergency has been proclaimed by the Governor of the State of California; and,

WHEREAS, State and local officials continue to promote social distancing measures and City's conference chambers limited capacity would present imminent risk to health and safety of attendees; and,

WHEREAS, the City does hereby reaffirm its proclamation of a local emergency due to the novel coronavirus (COVID-19) that has caused, and will continue to cause, conditions of peril to the safety of persons within the City that are likely to be beyond the control of services, personnel, equipment, and facilities of the City, and desires to reaffirm its local emergency and ratify the proclamation of emergency by the Governor of the State of California; and,

WHEREAS, as a consequence of the local and state emergency, the City does hereby find that the legislative bodies of the City shall conduct their meetings without compliance with paragraph three (3) of subdivision (b) of Government Code section 54953, as authorized by subdivision (e) of section 54953, and that such legislative bodies shall comply with the requirements to provide the public with access to the meetings as prescribed in paragraph two (2) of subdivision (c) of section 54953; and,

WHEREAS, the City will give notice of the meeting and post agendas, as described, to allow members of the public to access the meeting and address the legislative body, to give notice of the means by which members of the public may access the meeting and offer public comment, including an opportunity for all persons to attend via a call-in option or an internet-based service option, and to conduct the meeting in a manner that protects the statutory and constitutional rights of the parties and the public appearing before the legislative body; and,

WHEREAS, the legislative body will not take any further action on agenda items when there is a disruption which prevents the public agency from broadcasting the meeting, or in the event of a disruption within the local agency's control which prevents members of the public from offering public comments, until public access is restored; and,

WHEREAS, the legislative body will not require public comments to be submitted in advance of the meeting and specifies that the legislative body must provide an opportunity for the public to address the legislative body and offer comment in real time; and,

WHEREAS, the legislative body will not close the public comment until the public comment period has elapsed or until a reasonable amount of time has elapsed as specified.

NOW, THEREFORE BE IT RESOLVED by the City Council of the City of Porterville as follows:

SECTION 1. Recitals. The Recitals set forth above are true and correct and are incorporated into this Resolution by this reference; and,

SECTION 2. Reaffirmation of Local Emergency. The City hereby reaffirms that a local emergency now exists through the City, and that State and local officials

continue to promote social distancing measures and City's conference chambers limited capacity would present imminent risk to health and safety of attendees; and,

SECTION 3. Ratification of Governor's Proclamation of a State of Emergency. The City hereby ratifies the Governor of the State of California's Proclamation of March 2, 2020; and,

SECTION 4. Remote Teleconference Meetings. The City Manager and legislative bodies of City of Porterville are hereby authorized and directed to take all actions necessary to carry out the intent and purpose of this Resolution including, conducting open and public meetings in accordance with Government Code section 54953(e) and other applicable provisions of the Brown Act; and,

SECTION 5. Effective Date of Resolutions. This Resolution shall take effect immediately upon its adoption and shall be effective until the earlier of November 4, 2021, or such time the Council adopts a subsequent Resolution in accordance with Government Code section 54953 (e)(3) to extend the time during which the legislative bodies of City of Porterville may continue to teleconference without compliance with paragraph (3) of subdivision (b) of section 54953.

PASSED, APPROVED, AND ADOPTED this 5th day of October, 2021.
